# THE EUROPA YEAR BOOK 1977

# A WORLD SURVEY

Volume II: Africa, the Americas, Asia and Australasia

EUROPA PUBLICATIONS

The Europa Year Book is widely accepted as one of the major sources of reference material on today's world. Each new edition of this two-volume work of reference is the result of a year's research and revision by a team of editors.

Volume I deals with International Organizations throughout the world and with the countries of Europe (including the U.S.S.R. and Turkey). Volume II covers Africa, the Americas, Asia and Australasia. This book provides a wealth of information about every country in the world—including recent history, economic and statistical surveys, details of the constitution, government, diplomatic representation, political parties, legal system, religions, social welfare, education and defence. For each country there is also a directory section containing the names, addresses and other useful facts about newspapers and periodicals, publishers, radio and television, banks, insurance, chambers of commerce, trade associations and trade unions, airlines, railway and shipping organizations, and universities.

The first part of Volume I is devoted to international organizations: extensive information is included on the United Nations and all its activities. The European Communities and more than 1,500 other international organizations and associations are listed and their functions described.

# Foreword

THE second volume of THE EUROPA YEAR BOOK: A WORLD SURVEY covers the countries of Asia, Australasia, Africa and the Americas. With its companion volume, which deals with international organizations and European countries, it provides detailed information on political, economic and commercial activity throughout the world.

Readers are referred to our regional reference books THE MIDDLE EAST AND NORTH AFRICA, AFRICA SOUTH OF THE SAHARA and THE FAR EAST AND AUSTRALASIA for additional information on the geography, history and economics of these areas as well as a Who's Who of influential personalities.

The editor thanks the many individuals and organizations throughout the world who have co-operated in providing up-to-date information for this edition and gratefully acknowledges the use of material from the following publications: the United Nations' *Demographic Yearbook, Statistical Yearbook* and *Yearbook of Industrial Statistics*, the Food and Agricultural Organization's *Production Yearbook* and the International Institute for Strategic Studies' *Military Balance*.

March 1977.

## CONGO PEOPLE'S REPUBLIC

President Marien Ngouabi was killed on March 18th, 1977, in an abortive attempt to overthrow the regime. A military committee of eleven officers, appointed by the central committee of the ruling Parti Congolais du Travail, immediately closed the borders and imposed a curfew. The following day, former President Alphonse Massemba-Debat and several acquaintances were charged with complicity in the murder, although the assassins themselves still remained at large. Massemba-Debat later admitted responsibility for his part in the plot and was executed in late March. On March 23rd, Cardinal Biayenda, Archbishop of Brazzaville, was murdered and three members of the late President's family were charged with the crime. A subsequent official communiqué asserted that there was no connection between the two murders. It was speculated that the Cardinal was killed not as an act of revenge by the President's relatives, but to prevent him from revealing the identities of others involved in the plot.

## INDIA

President Fakhruddin Ali Ahmed died on February 11th, 1977. The Vice-President, Basappa Danappa Jatti, was sworn in as acting President. Under the Constitution a new President must be elected within six months.

In elections in March the opposition alliance of four parties, the Janata Party, won 271 seats in the new 542-seat Lok Sabha. The ruling Indian National Congress Party won 153 seats. Congress for Democracy, the party formed immediately before the elections by Jagjivan Ram, who had resigned as Minister of Agriculture in February 1977 and left the Indian National Congress Party, won 28 seats. With the support of Congress for Democracy, of the Marxist Communist Party, which won 22 seats, and of the Akhil Bharat Hindu Mahasabha Party, the Janata Party was able to form a new government. The leader of the Janata Party, Morarji Desai, was sworn in as Prime Minister on March 24, 1977. The state of emergency was revoked. The Prime Minister, Indira Gandhi, lost her seat in Parliament and resigned as leader of the Congress Party. Yeshwantrao Balwantrao Chavan, the former Minister of External Affairs, was chosen as the new parliamentary leader of the Indian National Congress Party.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Afghanistan lies in the heart of Asia. Its neighbours are to the north the Soviet Union, to the west Iran, to the east China and to the east and south Pakistan. The climate varies sharply between the highlands and lowlands; the temperature in the south-west in summer reaches 48.8°c (120°F) and in the winter in the Hindu Kush mountains of the north-east falls far below zero. Of the many languages spoken in Afghanistan the two main ones are Pashtu and Dari. The vast majority of Afghans are Muslims of the Sunni sect; there are also minority groups of Hindus, Sikhs and Jews. The national flag (proportions 3 by 2) has three horizontal stripes of black (a quarter of the depth), red (a quarter) and green (half the depth). In the upper left is the circular state emblem in yellow. The capital is Kabul.

### Recent History

The last King of Afghanistan, Zahir Shah, reigned from 1933 to 1973. His country was neutral during both World Wars and remains a staunch advocate of non-alignment. In 1953 the King's cousin, Mohammad Daoud, became Prime Minister and, securing aid from the U.S.S.R., initiated a series of economic plans for the modernization of the country. Daoud resigned in 1963 and Dr. Mohammad Yusuf became the first Prime Minister not of royal birth. He introduced a new democratic constitution which combined western ideas with Islamic religious and political beliefs, but the King never allowed political parties to operate. Afghanistan made little progress under the succeeding Prime Ministers.

In July 1973, while King Zahir was in Italy, the monarchy was overthrown by a coup, in which the main figure was the former Premier, Mohammad Daoud. The 1964 constitution was abolished and Afghanistan declared a republic. Daoud took office as Head of State, Prime Minister, Foreign Minister and Minister of Defence.

Because Afghanistan maintains that an autonomous area, to be known as Pashtunistan, should be created for the Pashtun and Baluch tribes in north-west Pakistan, relations with Pakistan have been strained. Trade and diplomatic relations between Afghanistan and Pakistan were suspended between 1961 and 1963, during the premiership of Mohammad Daoud, a particularly strong supporter of Pashtunistan. When Daoud became President relations between the two countries worsened again. During 1975 there was hostile press and radio propaganda in each country against the other. In April 1976, however, Pakistan offered aid to flood and earthquake victims in Afghanistan, and later in the year there were friendly exchanges between President Daoud and Premier Bhutto of Pakistan.

### Government

The Government consists of a Central Committee of the Republic, presided over by the Head of State, and an appointed Cabinet.

### Defence

Every able-bodied Afghan has to serve two years in the army, which numbers 80,000 men. Its equipment and training are very largely provided by the Soviet Union. The Afghan air force, which numbers 8,000, is equipped with supersonic jet aircraft. Police security forces come under the Ministry of the Interior. Para-military forces number 25,000 men.

### Economic Affairs

Agriculture, which provides employment for about 80 per cent of the labour force, is the mainstay of the economy. In 1976 it accounted for over half the G.N.P. and for 85 per cent of export earnings. Principal agricultural exports include livestock, wool and cotton, fresh and dried fruits, processed hides and skins and medicinal herbs. In years of normal production Afghanistan has not achieved self-sufficiency in food-grains. However, in 1976, because of better weather and increased use of new fertilizers and seeds, wheat and cotton production rose greatly. The Agricultural Development Bank of Afghanistan disburses important loans for agricultural development.

The country is well-endowed with minerals: natural gas (with estimated reserves of over 100,000 million cubic metres), coal, salt, lapis-lazuli, barite and talc are extracted. Other mineral deposits, such as petroleum, iron ore and copper, are to be exploited, according to a seven-year plan launched in 1976. Petroleum products have been imported at special low prices from Iran and the U.S.S.R. but it is planned to increase internal sources of energy by setting up hydro- and thermal electric power stations.

Industry still contributes less to G.N.P. than handicrafts such as carpet-making. The major industries include cotton textiles, chemical fertilizers, leather and plastic goods. An industrial bank was set up in 1972 and the seven-year plan (1976–83) provides for new industries in both public and private sectors.

As well as carpets and rugs, Afghanistan exports fruit and vegetables to Pakistan and India, natural gas to the U.S.S.R. (its main trading partner) and karakul to the European fur markets.

Afghanistan has received foreign aid chiefly from the U.S.S.R. and the U.S.A., but substantial help has also come from the People's Republic of China, the EEC, Saudi Arabia and Iran. By mid-1975 Afghanistan had built up reserves of nearly U.S. $120 million, but drew on these to meet its trade deficit of about U.S. $10 million in 1976.

### Transport and Communications

Afghanistan is a land-locked country and the most convenient access to the sea lies through Pakistan. A network of asphalted highways, connecting the main towns, has been built with Soviet and U.S. help. All-weather highways link Kabul with Qandahar and Herat in the south and west, Jelalabad in the east and Mazar-i-Sharif and the Oxus, on which there is water traffic, in the north. There are two international and 29 local airports. A feasibility study for the country's first railway, linking Kabul to Iran, was completed in 1976.

### Social Welfare

Government officials in the main towns enjoy national health insurance and all officials are entitled to an old age pension. Most private companies have their own doctor and hospitals. There are over 60 public hospitals with some 3,200 beds. Disabled people are looked after in social welfare centres in the provincial capitals. China is to build a 250-bed hospital free.

### Education

Free compulsory primary education for 8 years was introduced in 1975. By 1975/76 there were 3,429 primary and village schools with 691,000 pupils. Another 125,000 attended 512 middle schools, and 62,600 pupils were taught at 197 lycées. There are two universities and a polytechnic. Government policy in 1976 was to increase the number and variety of vocational schools.

### Tourism

These are Afghanistan's principal attractions: Bamian with its high statue of Buddha and thousands of painted caves; Bandi Amir with its suspended lakes; the Blue Mosque of Mazar; the walls of Kabul; Herat with its Grand Mosque and minarets; the towns of Qandahar and Girishk; Balkh (ancient Bactria), "Mother of Cities", in the north; Bagram, Hadda and Surkh Kotal (of interest to archaeologists); and the high mountains of the Hindu Kush.

*Visas* are required to enter Afghanistan for nationals of all countries.

### Sport

The traditional sports are wrestling and buzkashi, a game played by teams of hundreds of horsemen. Athletics and ball games are sponsored by the Ministry of Education.

### Public Holidays

**1977:** May 27th (Roze-Isteqlal, Independence Day), July 17th–19th (Jashyn-i-Jamhoriat, Republic Celebrations), August 18th (first day of Ramadan), August 31st (Pashtunistan Day), September 9th (Parliament Day), September 16th–18th (Id ul Fitr, end of Ramadan), October 15th (Roze Nejat, Day of Deliverance), October 24th (United Nations Day), November 23rd–26th (Id ul Adha, Celebration of the Sacrifice), December 22nd (Ashura, Martyrdom of Imam Husayn).

**1978:** February 21st (Roze-Maulud, Birth and death of Prophet Mohamed), March 21st (Nau-roz, New Year's Day).

### Weights and Measures

The metric system has been officially adopted but traditional weights are still used. One "seer" equals 16 pounds.

### Currency and Exchange Rates

100 puls = 2 krans = 1 afghani.

Exchange rates (October 1976):

£1 sterling = 80.1 afghanis;
U.S. $1 = 50.5 afghanis.

## FINANCE

100 puls (puli) = 2 krans = 1 afghani.

Coins: 25 and 50 puls; 1, 2 and 5 afghanis.

Notes: 10, 20, 50, 100, 500 and 1,000 afghanis.

Exchange rates (October 1976): £1 sterling = 71.4 afghanis (official rate) or 80.1 afghanis (free rate):

U.S. $1 = 45.0 afghanis (official rate) or 50.5 afghanis (free rate).

1,000 afghanis = £12.49 = $19.80 (free rates).

*Note:* Multiple exchange rates were in operation before March 1963. Between 1956 and 1963 the official base rate was U.S. $1 = 20.00 afghanis. Since March 1963 there has been a single official rate of $1 = 45.00 afghanis. In terms of sterling, the official exchange rate was £1 = 108.00 afghanis from November 1967 to August 1971; and £1 = 117.26 afghanis from December 1971 to June 1972. Some trade takes place at the official rate; some at rates determined by discounts or premiums; and some at free market rates, which fluctuate widely.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Democratic and Popular Republic of Algeria borders on the Mediterranean to the north, Mali and Niger to the south, Tunisia and Libya to the east, and Morocco and Mauritania to the west. The climate on the coast is temperate, becoming more extreme in the Atlas mountains immediately to the south. The Sahara, further south, is hot and arid. Arabic is the official language but French is still widely used. There is a considerable Berber-speaking minority. Islam is the state religion. The national flag (proportions 3 by 2) has equal vertical stripes of green and white, with a red crescent moon and five-pointed red star superimposed in the centre. The capital is Algiers.

### Recent History

Until 1962 Algeria was part of the French Republic. Economic and political power was in the hands of a large white-settler population. In 1954, having failed to gain equal status by constitutional means, the native Muslim majority began a war for national independence, led by the *Front de Libération Nationale* (FLN). Despite resistance from the Europeans in Algeria, France ceded independence by the Agreement of Evian in 1962. Over a million Muslims died in the war. Most of the white population left for France when independence was declared.

Under President Mohammed Ben Bella economic reconstruction was begun and the foundation was laid for a single-party socialist state. However, the failure of the FLN to function as an active political force left real power with the bureaucracy and the army. In 1965 the army leader, Col. Houari Boumedienne, deposed Ben Bella in a bloodless *coup* and took control of the state as President of a Revolutionary Council.

Boumedienne faced considerable opposition from the Left. In 1967 Col. Tahar Zbiri led an unsuccessful armed rising with the support of several leading politicians. By 1971, however, the government felt strong enough to adopt a more active social policy. French oil interests were nationalized and an agrarian reform programme was initiated. The renewed emphasis on socialism met with some resistance from conservative elements and in May 1975 there were clashes between traditionalists and radicals at Algiers University. Boumedienne's personal authority was enhanced by the death of Ahmed Medeghri, the Minister of the Interior, in December 1974 and the dismissal of Cherif Belkacem as Minister of State in July 1975, leaving only Abdelaziz Bouteflika, Minister of Foreign Affairs since 1963, as a figure of comparable stature in the Government.

In June 1975, Boumedienne announced a series of projected measures to consolidate the regime, including the drawing up of a National Charter and the holding of elections for a President and National Assembly. In March 1976 an opposition group issued a manifesto in Algiers denouncing Boumedienne's "totalitarianism and personality cult". However, after the publication of the National Charter in April, the administration encouraged free public discussion and responded to criticisms by amending the Charter before its adoption by referendum in June. A new Constitution, embodying the principles of the Charter, was approved by another referendum in November, and on December 10th Boumedienne was elected President unopposed with over 99 per cent of votes cast. Elections for a National Assembly were to be held in February 1977.

Since independence Algeria has been one of the most prominent non-aligned states. It has supported national liberation movements, among them that of Palestine. It has close economic ties with France but its desire to assert independence from the ex-colonial power has often led to strained relations.

The annexation of the former Spanish Sahara by Morocco and Mauritania (*see* chapter on Morocco) embittered relations between the two countries and Algeria, which advocated independence for the territory. In January and February 1976 Algerian and Moroccan troops clashed in the Sahara, and in March Algeria recognized the Saharan Arab Democratic Republic proclaimed by Polisario, the Saharan liberation movement. Morocco and Mauritania broke off diplomatic relations with Algeria but there were no further clashes. Algeria contented itself with providing support and refuge for Polisario guerrillas.

### Government

Under the 1976 Constitution Algeria is a socialist single-party state. The Head of State is a President elected for a six-year term by universal adult suffrage. The President presides over a Council of Ministers, appointed by himself, and a High Security Council. The President may appoint a Vice-President and a Prime Minister but executive power is essentially concentrated in his own hands. The President shares legislative power with a unicameral National Popular Assembly elected by universal adult suffrage for a five-year term. The President may dissolve the Assembly at any time and is empowered to legislate by decree when it is not in session. The country is divided into 31 wilayas, subdivided into 691 communes. Each wilaya and commune has an elected assembly. All candidates for election, whether to local or national assemblies or to the Presidency of the Republic, are nominated by the FLN but the electorate may be offered a choice of candidates.

### Defence

The National Popular Army, formerly FLN's military wing, is now Algeria's official army. The estimated strength of the armed forces in 1976 was 69,300, comprising an army of 61,000, navy 3,800 and air force 4,500. The 1976 defence budget was 1,288 million dinars. Both France and the Soviet Union provide military equipment and training. Military service is compulsory for six months, and there is a gendarmerie of 10,000.

### Economic Affairs

About half the working population are employed in agriculture, but it accounts for only 8 per cent of GNP. The main products are wine, wheat, olives and citrus fruit. The government has sought to encourage cereal production and dairy farming to replace the traditional dependence on wine exports. An agrarian reform programme has been under way since 1971. Land is being distributed among the rural population organized into co-operatives. Efforts to increase production have so far failed, and Algeria is forced to import considerable quantities of foodstuffs.

Algeria is rich in minerals, notably iron ore, phosphates, petroleum and natural gas. The Government is committed to rapid industrialization based on these resources. The major industrial products are iron and steel, petrochemicals and fertilizers. Almost all mining and industrial activity is state controlled. Attempts have been made to introduce *autogestion*, a system of workers' control, but this has met with difficulties and, for the present, most industry is run on the lines of orthodox state capitalism.

During the period of the 1970–73 Four-Year Plan, GDP rose by about 10 per cent annually. After the large oil-price rise in 1973–74 the Government decided on a more intense investment programme which would use the increased revenue to push growth still faster. In 1974 Algeria for the first time achieved a large export surplus, but petroleum production fell in volume and natural gas production was slower to expand than had been expected. The following year there was a massive trade deficit. Continuing efforts to finance the ambitious development programme led to an alarming growth in public indebtedness.

Algeria's development has so far been concentrated in capital-intensive production for export. Backward agricultural areas have been little affected by economic change, despite government projects to reduce regional inequalities. Too few jobs have been created to cope with a population increase of 3.2 per cent a year. Nearly a million Algerians work abroad and about another million are unemployed or under-employed at home.

### Transport and Communications

There are about 4,000 km. of railway, excellent coastal roads and good major roads over the mountains and into the Sahara. Algiers is one of the principal ports on the Mediterranean. There are internal and international air services.

### Social Welfare

Since January 1st, 1974, all Algerian citizens have the right to free medical attention. There is a great shortage of doctors and hospitals, but the public health budget rose in 1975 to 726 million dinars.

### Education

Over 20 per cent of the state's annual current budget is devoted to education. About 80 per cent of Algerian children receive primary education. In 1974 there were almost 2.5 million pupils in primary schools. Opportunities for secondary and higher education are still very restricted. There were fewer than half a million pupils in all secondary and higher education in 1974. The education system still broadly follows the French model, but all French teachers have now been replaced by Algerians or other Arabs and the use of Arabic is replacing French in primary schools. In 1976 all private education in Algeria was abolished.

### Tourism

The chief attractions for tourists are the Mediterranean coast, the Atlas mountains and the desert, and the climate. There were nearly 200,000 tourist visits in 1972.

*Visas* are not required to visit Algeria by nationals of the following countries: Andorra, Bahrain, Denmark, Egypt, Finland, France and the French overseas territories, Guinea, Guyana, Iraq, Italy, Jordan, Kuwait, Lebanon, Liechtenstein, Mauritius, Norway, Oman, San Marino, Spain, Sweden, Switzerland, Syria, Tunisia, the Yemen Arab Republic and Yugoslavia.

### Sport

Football is the most popular sport. Algeria also takes part in many athletic events, and sports of all kinds are being encouraged.

### Public Holidays

**1977:** May 1st (Labour Day), June 19th (Ben Bella's Overthrow), July 5th (Independence), September 15th (Id ul Fitr), November 1st (Anniversary of the Revolution), November 22nd (Id ul Adha), December 12th (Muslim New Year), December 21st (Ashoura).

**1978:** January 1st (New Year), February 20th (Mouloud, birth of the Prophet).

*Note:* The European community observes the usual Christian holidays.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes = 1 Algerian dinar.

Exchange rates (October 1976):

£1 sterling = 6.63 dinars;

U.S. $1 = 4.18 dinars.

## FINANCE

100 centimes = 1 Algerian dinar.
Coins: 1, 2, 5, 10, 20 and 50 centimes; 1 and 5 dinars.
Notes: 5, 10, 50, 100 and 500 dinars.

Exchange rates (October 1976): £1 sterling = 6.63 dinars; U.S. $1 = 4.18 dinars.
100 Algerian dinars = £15.07 = $23.91.

*Note:* The Algerian dinar was introduced in April 1964, replacing (at par) the new Algerian franc. From January 1960 the Algerian franc (equal to the French franc) was valued at 180 milligrammes of gold. Until August 1971 the dinar was thus valued at 20.255 U.S. cents (U.S. $1 = 4.937 dinars). Between December 1971 and February 1973 the dinar's value was 21.991 U.S. cents ($1 = 4.537 dinars); from February 1973 to January 1974 it was 24.435 U.S. cents ($1 = 4.093 dinars). Since January 1974 the Algerian authorities have allowed the dinar to "float" on foreign exchange markets. The average exchange rate (dinars per U.S. dollar) was: 3.959 in 1973; 4.181 in 1974; 3.949 in 1975. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 11.849 dinars.

# THE CONSTITUTION

(*Approved by popular referendum, November* 1976).

The preamble recalls that Algeria owes its independence to a war of liberation which will go down in history as one of the epic struggles in the resurrection of the peoples of the Third World. It emphasizes that the institutions established since June 1965 are intended to transform the progressive ideas of the revolution into real achievements, affecting daily life, and to develop the content of the revolution by thought and action towards a definitive commitment to socialism.

### FUNDAMENTAL PRINCIPLES OF THE ORGANIZATION OF ALGERIAN SOCIETY

*The Republic:* The State is socialist. Islam is the state religion and Arabic is the official national language. National sovereignty resides in the people. The National Charter is the fundamental source of national policy and law. It is to be referred to on ideological questions and for the interpretation of the Constitution. The popular assemblies are the basic institution of the state.

*Socialism:* The irreversible option of socialism is the only path to complete national independence. The individual ownership of property for personal or family use is guaranteed. Non-exploitative private property is an integral part of the new social system. The cultural, agrarian and industrial revolutions and socialist management of enterprises are the bases for the building of socialism.

*The State:* The State is exclusively at the service of the people. Those holding positions of responsibility must live solely on their salaries and may not, directly or by the agency of others, engage in any remunerative activity.

*Fundamental Freedoms and the Rights of Man and the Citizen:* Fundamental rights and freedoms are guaranteed. All discrimination on grounds of sex, race or occupation is forbidden. Law cannot operate retrospectively and a person is presumed innocent until proved guilty. Victims of judicial error shall receive compensation from the State.

The State guarantees the inviolability of the home, of private life and of the person. The State also guarantees the secrecy of correspondence, the freedom of conscience and opinion, freedom of intellectual, artistic and scientific creation, and freedom of expression and assembly.

The State guarantees the right to join a trade union, the right to work, to protection, to security, to health, to leisure, to education, etc. It also guarantees the right to leave the national territory, within the limits set by law. The law lays down the conditions under which the fundamental rights and freedoms may be withdrawn from anyone who uses them to attack the Constitution, the essential interests of the nation, the unity of the people and of the national territory, the internal and external security of the State, and the socialist revolution.

*Duties of citizens* Every citizen must protect public property and safeguard national independence. The law sanctions the duty of parents to educate and protect their children, as well as the duty of children to help and support their parents. Women must participate fully in the building of socialism and national development.

*The National Popular Army* The Army safeguards national independence and sovereignty. It participates in the development of the country and the building of socialism.

*Principles of foreign policy* Algeria subscribes to the objectives of the United Nations, the Organization of African Unity and the Arab League. It support Arab, Maghreb and African unity, on a basis of popular liberation. It is non-aligned and advocates peace and non-interference in the internal affairs of state. It fights against colonialism, imperialism and racial discrimination and supports the peoples of Africa, Asia and Latin America in their liberation struggles.

### POWER AND ITS ORGANIZATION

*Political power* The Algerian institutional system rests on the principle of the single-party state. The FLN is a vanguard force, guiding and organizing the people for the building of socialism. Party and state organs work in different frameworks and with different means to attain the same objectives. The decisive posts in the state organization are held by members of the party leadership.

*The Executive* The President of the Republic is Head of State, Head of the Armed Forces and responsible for national defence. He must be of Algerian origin, a Muslim and more than 40 years old. He is elected by universal, secret, direct suffrage. His mandate is for six years, and is indefinitely renewable. The President embodies the unity of the political leadership of the party and the state. The presidential candidate is nominated by the party congress. The President presides over joint meetings of the party and the executive. Ministers are appointed by the President. The President presides over meetings of the Council of Ministers. He may appoint a Vice-President and a Prime Minister, to whom he may delegate some of his powers. Should the Presidency fall vacant, the President of the National Popular Assembly temporarily assumes the office and organizes presidential elections within 45 days. He may not himself be a candidate in the election The President presides over a High Security Council which advises on all matters affecting national security.

*The Legislature.* The National Popular Assembly prepares and votes the law. Its members are nominated by the party leadership and elected by universal, direct, secret suffrage for a five-year term. The deputies enjoy parliamentary immunity. The Assembly sits for two ordinary sessions per year, each of not more than three months' duration. The commissions of the Assembly are in permanent session. Both the President and the Assembly may initiate legislation. The Assembly may legislate in all areas except national defence. In the periods between sessions of the Assembly the President may legislate by decree, but all such legislation must be submitted to the Assembly in the following session.

The Head of State is empowered to dissolve the Assembly or call premature elections, having consulted a joint meeting of the party leadership and the Government.

*The Judiciary.* Judges obey only the law. They defend the socialist revolution. The right of the accused to a defence is guaranteed. The Supreme Court regulates the activities of courts and tribunals. The Higher Court of the Magistrature is presided over by the President of the Republic; the Minister of Justice is Vice-President of the Court. All magistrates are answerable to the Higher Court for the manner in which they fulfill their functions.

*Surveillance of the State.* Surveillance is intended to ensure the efficient functioning of state organs and their respect for the National Charter, the Constitution and the law. Popular surveillance is exercised by the elected assemblies. An Audit Office is established to examine all expenditure by state and party bodies.

*Constitutional revision:* The Constitution can be revised on the initiative of the President of the Republic by a two-thirds majority of the National Assembly. The basic principles of the Constitution may not be revised.

## ASSEMBLIES

The Algerian political system provides for elected assemblies at three levels, communal, provincial and national. The communal assemblies (*assemblées populaires communales*) were created in 1967. They are headed by an elected president and are renewed by democratic vote every four years. The provincial assemblies (*assemblées populaires de wilayas*) were created in 1969 and are renewed every five years. The chief of the executive, the wali, is a government appointee. The national assembly (*assemblée nationale populaire*) was first elected in 1964 and has not met since 1966. Elections for a new national assembly were to be held in February 1977. Elections for all assemblies are made from a single-party list presented by the FLN, but a choice of candidates is offered within the list.

## POLITICAL PARTY

Government is based on a one-party system.

**Front de Libération Nationale (FLN):** place Emir Abdelkader, Algiers; f. 1954; socialist in outlook, the party is divided into a Secretariat, a Central Committee, Federations, Dairas and Kasmas; under the 1976 constitution, the party congress nominates the candidate for the Presidency of the Republic; Head MOHAMED CHERIF MESSADIA.

Under the aegis of the FLN there exists a number of mass political organizations, including *Jeunesse du Front de Libération Nationale* (JFLN) and the *Union Nationale des Femmes Algériennes* (UNFA).

There are several small opposition groups; all are proscribed and in exile in France or in other Arab countries.

## JUDICIAL SYSTEM

The highest court of justice is the Supreme Court in Algiers. Justice is exercised through 132 courts grouped on a regional basis. Three special Criminal Courts have been set up in Oran, Constantine and Algiers to deal with economic crimes against the state. From these there is no appeal. In April 1975 the Government decided to establish a *Cour de sûreté de l'état*, composed of magistrates and high-ranking army officers, to try all cases involving state security.

Saddek Benmehdjouba.

### ROADS

There are about 82,000 km. of roads and tracks, of which 18,500 km. are main roads and 19,000 km. are secondary roads. The total is made up of 55,000 km. in the north, including 24,000 km. of good roads, and 27,000 km. in the south, including 3,200 km. with asphalt surface. The French administration built a good road system, partly for military purposes, which since independence has been allowed to deteriorate in parts, and only a small percentage of roads are surfaced. New roads have been built linking the Sahara oil fields with the coast, and the trans-Saharan highway is a major project. Algeria is a member of the Trans-Sahara Road Committee, organizing the building of this road, now renamed the "Road of African Unity". The first 360-km. stretch, from Hassi Marroket to In Salah, was opened in April 1973, and work has begun on the next section, which will include 420 km. inside Algeria and run into Niger.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Angola lies on the west coast of Africa. The Cabinda district is separated from the rest of the country by the estuary of the River Congo and Zairian territory. Angola is bordered by Zaire to the north, Zambia to the east and Namibia to the south. The climate is tropical, locally tempered by altitude. Tribal dialects and Portuguese are spoken. Most of the population follow traditional beliefs although there is a large minority of Roman Catholics and other Christian faiths. The flag (proportions 3 by 2) has two equal horizontal bands of red and black. Superimposed in gold are a five-pointed star, half a cogwheel and a machete. The capital is Luanda.

### Recent History

Formerly a Portuguese colony, Angola became an overseas province in 1951. Small nationalist groups began to form in the 1950s. There was an unsuccessful nationalist rebellion in 1961. Severe repression followed and there was a lull in nationalist activity until 1966. After a new wave of fighting, nationalist guerrilla groups were able to establish military and political control in large parts of eastern Angola and to press westward. Three major nationalist organizations were formed: the *Movimento Popular de Libertação de Angola* (MPLA), the *Frente Nacional de Libertação de Angola* (FNLA) and the *União Nacional para a Independência Total de Angola* (UNITA).

Following the April 1974 *coup d'état* in Portugal, Angola's right to independence was recognized but negotiations were slow to take place because of a lack of nationalist unity and the violence caused by a minority of white settlers who still wanted white minority rule. Negotiations between the Portuguese government and the nationalist groups began in September and, following the formation of a common front by these groups, it was agreed in January 1975 that Angola would become independent in November 1975.

A transitional government of representatives of the MPLA, FNLA, UNITA and Portuguese government was set up. However, violent clashes between the MPLA and the FNLA occurred in March as a result of the groups' ideological and tribal differences. Ceasefire agreements were signed in March, May and June but they had little effect on the violent fighting which continued throughout the country.

In the second half of 1975 the MPLA, supported by the U.S.S.R. and Cuba, controlled Luanda, parts of the coast and the districts east of the capital; the FNLA, aided by the U.S.A. and some West European countries, held northern Angola; and UNITA held the central regions of Huambo and Bié and most of southern Angola. The FNLA and UNITA formed a united front to fight the Communist-backed MPLA.

Cabinda, the oil-rich enclave separated from Angola by Zaire, was taken over from the FNLA by the MPLA at the end of 1975. There is an active secessionist movement comprising two competing factions of the *Frente de Libertação do Enclave de Cabinda* (FLEC) based in the Congo and Zaire. The leader of FLEC declared Cabinda independent in November 1975 but no country has recognized the government-in-exile in Zaire.

The Portuguese government proclaimed Angola independent from November 11th, 1975, and transferred sovereignty to "the Angolan people" and not to any of the liberation movements. The MPLA proclaimed the People's Republic of Angola and the establishment of a government, with its seat in Luanda, under the presidency of Dr. Agostinho Neto. The FNLA and UNITA proclaimed the People's Democratic Republic of Angola and a coalition government, based in Nova Lisboa (renamed Huambo), under Dr. Jonas Savimbi, leader of UNITA. The involvement of South African troops in the south, ostensibly to safeguard the Cunene hydro-electricity scheme, and of an estimated 15,000 Cuban troops, caused an international furore.

Fierce fighting continued and by the end of February 1976 the MPLA, aided by Cuban technical and military expertise, had effectively gained control of the whole country. Diplomatic recognition from the Organization of African Unity (OAU) and most West European countries followed, the Soviet Union and the Eastern bloc having already recognized the MPLA as the legitimate government. South African troops were withdrawn from Angola in March but Cuban troops remained in Cabinda and the south. A measure of internal opposition to the MPLA remained. In August, fighting between MPLA and UNITA forces was reported but by October the last pockets of UNITA resistance had been eliminated. In the summer there was a resurgence of FNLA activity in the north and it was also reported that the MPLA was being faced with increased resistance in Cabinda from FLEC.

During 1976 the Government concentrated on the task of national reconstruction and was totally committed to socialism. Its tasks were to activate and plan the paralyzed sectors of the economy, extend and consolidate the state sector, subject the private sector to state control, give priority to solving the problems of food, health and the education of the masses, solve the housing problem, restructure the state apparatus and combat illiteracy. Many people's power organizations and workers' committees were set up throughout the country. The Government signed many friendship agreements with other countries including a 20-year co-operation agreement with the Soviet Union.

### Government

According to the 1975 constitution, the MPLA is responsible for the country's political, economic and social leadership. The MPLA's supreme organ is the Congress, which normally meets every four years. The Congress elects the MPLA's President and Central Committee (41 full members and 10 alternates) to supervise the movement's work. Amendments to the constitution may be made only by the MPLA Central Committee. The Committee elects a Political Bureau (10 members, including the President) to be its executive organ.

The supreme organ of state is to be the elected People's Assembly but, until the Assembly is established, legislative power is held by the Council of the Revolution, comprising members of the MPLA Political Bureau, the General Staff of the armed forces, government members appointed by the MPLA, Provincial Commissioners and the Chiefs of Staff and Political Commissars of the Military Fronts. The Head of State is the President of the Republic, who is also President of the MPLA, Commander-in-Chief of the armed forces and Chairman of the Council of the Revolution. The Council appoints the Government, led by a Prime Minister, to exercise executive authority. An important local administration system has been established.

### Defence

In 1976 the Angolan army was being restructured with Cuban aid. There is compulsory conscription for both sexes between the ages of 18 and 35.

### Economic Affairs

The principal crops are coffee (the second largest export commodity), sugar cane, maize and wheat. Livestock is of little significance. Forestry is important in the Cabinda and Moxico districts.

Angola is very rich in minerals, especially diamonds, petroleum and iron ore, and there are also deposits of copper, manganese, phosphates and salt. In 1975 deposits of uranium were discovered on the border with Namibia.

Between 1966 and 1974 Angola's annual economic growth rate averaged 6 per cent but the two-year civil war severely disrupted the economy. Agricultural production fell dramatically in 1975 and 1976. Production of the principal cash crop, coffee, plummeted from 3.2 million bags in 1973/74 to an estimated one million bags in 1975/76 because of the neglect of the coffee plantations in the north. Plans were announced in May 1976 to mobilize 150,000 people to harvest the coffee but it was estimated that it would take at least two years for the plantations to achieve maximum yield. However, the quadrupling of world market prices between June 1975 and December 1976 will help to offset the fall in export volume. Other agricultural exports include sisal, cotton, maize, tobacco, bananas and palm oil. The Government intends to reorganize agriculture on a co-operative and state-run plantation basis.

Crude petroleum is the major earner of foreign exchange, accounting for nearly 50 per cent of export earnings in 1974. Normally around 85 per cent of production comes from offshore fields in Cabinda which produced an average of 140,000 barrels per day before the civil war temporarily halted operations in December 1975. Following the release in April 1976 of $120 million in royalties and tax payments to the Government, which had been withheld since December, production was resumed and in September 1976 was reported to have reached 123,000 barrels per day. Production in mainland Angola, suspended in January 1976, resumed in May and onshore production is reported to have reached 30,000 barrels per day compared with the average of 25,000 in 1975. Proven reserves in Angola are estimated at 1,300 million barrels. In May a national oil company, Sonangol, was set up to supervise production and distribution. There are two refineries, one at Luanda handling 21,700 barrels per day and one in Cabinda handling 2,800.

Diamonds are the country's second most valuable mineral. Normally Diamang, which holds the nation's diamond concessions, produces around 8 per cent of the world's diamonds but only 1.96 million carats were mined in 1974, the lowest output since 1968. It is reported that production fell by a further 60 per cent in 1975 and by 85 per cent in the first half of 1976, because of the intensification of the civil war and increased smuggling. In mid-1976 Diamang began negotiations with the Angolan Government with a view to handing over its concession rights.

The other main mineral is iron ore, the production of which reached 5.6 million metric tons in 1974. However, production halted in August 1975 when the Cia. Mineira de Lobito went bankrupt. It is hoped to resume production at the Cassinga mines in early 1977. Angola also has great hydro-electricity potential and when the Cunene scheme in the south is completed it will supply Angola and Namibia with hydro-electricity and vast supplies of water for irrigation projects in the area.

The economy has been severely affected by the exodus of over 300,000 Portuguese, creating a severe shortage of skilled workers, although the Cuban Government is to send technicians in order to alleviate the situation. The Government plans to increase its control over national resources by nationalizing with indemnity any industry essential to the economy. Also, any company which has been abandoned by its owners or which was owned by supporters of the FNLA or UNITA may be confiscated without compensation. In 1976 some 50 companies were nationalized in the agricultural, fishing, cement, textile and steel sectors. The economy is to be divided into three sectors, the state, co-operative and private.

Another obstacle to economic recovery is the shortage of imported raw materials but the many economic agreements signed with other countries should improve this situation. Distribution is another problem, and emphasis is being laid on the repair and improvement of the transport system. In 1976 widespread labour unrest and a rash of strikes and wage demands in the face of falling productivity generated immense inflationary pressures and led to the Government's suspension of all wage negotiations and the introduction of prison sentences for acts of economic sabotage.

A three-year development plan is to be drawn up for 1977–80 and the country's first five-year plan will come into operation in 1980. Industrial and agricultural diversification is high on the list of priorities. A large trade surplus, 15,160 million escudos in 1974, is likely to continue due to higher petroleum and coffee earnings resulting from the quadrupling of world prices. Foreign exchange earnings will be used to continue imports of capital goods. The Government is also seeking economic assistance from capitalist and non-capitalist countries.

### Transport and Communications

The Portuguese developed an extensive transport and communications network but much of this was destroyed during the civil war. The Benguela railway, of particular importance for Zambian trade, has been closed to international traffic since August 1975, although domestic services from Benguela to Luso have been operating. Internal air transport is well developed. Angola's airline TAAG and

Mozambique's airline DETA have pooled resources and are using TAP Boeing 707s for international flights. The main harbours are Lobito, Luanda and Moçâmedes.

### Education

There is a shortage of teachers and equipment but Cuban aid should help to alleviate this problem. Primary education is compulsory. There is a university at Luanda.

The Government is pledged to extend education to all and plans to reduce drastically the 80 per cent illiteracy rate.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centavos = 1 Angolan escudo.

Exchange rates (December 1976):

£1 sterling = 52.45 escudos;
U.S. $1 = 31.535 escudos.

100 centavos = 1 Angolan escudo; 1,000 escudos are known as a *conto*.

Coins: 10, 20 and 50 centavos; 1, 2½, 5, 10 and 20 escudos.

Notes: 20, 50, 100, 500 and 1,000 escudos.

Exchange rates (December 1976): £1 sterling = 52.45 escudos; U.S. $1 = 31.535 escudos.

1,000 Angolan escudos = £19.07 = $31.71.

*Note:* The Angolan escudo is at par with the Portuguese escudo. Between September 1949 and August 1971 the official exchange rate (par value) was U.S. $1 = 28.75 escudos (1 escudo = 3.478 U.S. cents). From December 1971 to February 1973 the central rate was $1 = 27.25 escudos. In terms of sterling, the exchange rate was £1 = 69.00 escudos from November 1967 to August 1971; and £1 = 71.006 escudos from December 1971 to June 1972. # THE CONSTITUTION

(The Constitution was promulgated in November 1975.)

## BASIC PRINCIPLES

The People's Republic of Angola shall be a sovereign, independent and democratic state. All sovereignty shall be vested in the Angolan people. The *Movimento Popular de Libertação de Angola* (*MPLA*), their legitimate representative, shall be responsible for the political, economic and social leadership of the nation. The people shall be guaranteed broad effective participation in the exercise of political power through the development of people's power organizations.

The People's Republic of Angola shall be a unitary and indivisible State. Economic, social and cultural solidarity shall be promoted between all the Republic's regions for the common development of the entire nation and the elimination of regionalism and tribalism.

### Defence

Under the leadership of the MPLA and with its President as Commander-in-Chief, the People's Armed Forces for the Liberation of Angola (FAPLA) shall be institutionalized as the national army of the Republic. It shall be the responsibility of FAPLA to defend the country and to participate alongside the people in production and hence in national reconstruction. The Commander-in-Chief of FAPLA shall appoint and dismiss high-ranking officers.

### Religion

The Republic shall be a secular state and there shall be complete separation of the State and religious institutions. All religions shall be respected.

### The Economy

Agriculture shall be regarded as the base and industry as the decisive factor in the Republic's development. The Republic shall promote the establishment of just social relations in all sectors of production, furthering and developing the public sector and fostering co-operatives. It shall recognize, protect and guarantee private activities and property, including that of foreigners, provided that they are useful to the country's economy and in the interests of the Angolan people. The fiscal system shall be guided by the principle of graduated direct taxation.

### Education

The Republic shall vigorously combat illiteracy and obscurantism and shall promote the development of education and of a true national culture.

## FUNDAMENTAL RIGHTS AND DUTIES

The State shall respect and protect the human person and human dignity. The life, liberty, personal integrity, good name and repute of every citizen shall be protected by law. All citizens shall be equal before the law and enjoy the same rights. They shall be subject to the same duties, without any distinction based on colour, race, ethnic group, sex, place of birth, religion, level of education, or economic or social status.

It shall be the right and duty of every citizen to participate in the defence of the country and to defend and extend the revolution. All citizens over the age of 18 shall have the right and duty to take an active part in public life, to vote and be elected or appointed to any State organ. It shall be the duty of every elected citizen to account for the discharge of his mandate to the electors who have chosen him, who shall at any time have the right to revoke his mandate.

There shall be freedom of expression, assembly and association provided that the basic objectives of the Republic are adhered to. Every citizen has the right to a defence. Individual freedoms, namely the inviolability of the home and the privacy of correspondence, are guaranteed. Freedom of conscience and belief shall be inviolable. Work shall be the right and duty of all citizens. The State guarantees medical and health care and the right to assistance in childhood, motherhood, disability, old age, etc. It also guarantees access to education and culture.

## STATE ORGANS

### President of the Republic

The President of the Republic shall be the President of the MPLA. As Head of State he shall represent the Angolan nation. He shall have the following specific functions:

to preside over the Council of the Revolution and direct its proceedings;
to swear in the Government appointed by the Council of the Revolution;
to declare war and make peace, as authorized by the Council of the Revolution;
to swear in the Provincial Commissioners appointed by the Council of the Revolution on the recommendation of the MPLA;
to sign, promulgate and publish the laws of the Council of the Revolution, Government decrees and statutory Ministerial decrees;
to direct national defence;
to pardon and commute sentences;
to indicate who shall replace him in his absence or when temporarily prevented from exercising his functions;
to discharge all the other functions conferred on him by the Council of the Revolution.

In the case of the death, resignation or permanent incapacity of the President, the Council of the Revolution shall appoint from among its members a temporary replacement.

### People's Assembly

The People's Assembly shall be the supreme State body. A special law shall establish its composition and its system of election and also its jurisdiction and manner of functioning.

### Council of the Revolution

Pending the institution of the People's Assembly, the Council of the Revolution shall be the supreme organ of the State.

The Council of the Revolution shall comprise the members of the MPLA Political Bureau, the members of the FAPLA General Staff, Government members appointed by the MPLA, Provincial Commissioners and the Chiefs of Staff and Political Commissars of the Military Fronts. Its chairman shall be the President of the Republic.

The Council shall exercise the following duties:

to discharge legislative functions which it may delegate to the Government;
to define and conduct the country's domestic and foreign policy;
to approve the General State Budget and the Economic Plan drawn up by the Government;
to appoint and dismiss the Prime Minister and other members of the Government on the recommendation of the MPLA;
to appoint and dismiss Provincial Commissioners on the recommendation of the MPLA;
to authorize the President to declare war and make peace;
to decree a state of siege or emergency;
to decree amnesties.

### Government

The Government shall comprise the Prime Minister, the Ministers and the Secretaries of State. It shall be presided over by the Prime Minister. It shall be the duty of the Government, as the executive organ, to conduct the State's domestic and foreign policy under the leadership of the Council of the Revolution and the President, and to supervise public administration.

The Government shall have the following functions:

to guarantee the safety of persons and property;
to draw up the General State Budget and Economic Plan and to implement them once they are approved by the Council of the Revolution.

The Government may exercise by decree the legislative functions delegated to it by the Council of the Revolution.

### Judiciary

The organization, composition and competence of the Courts shall be established by law. Judges shall be independent in the discharge of their functions.

### Local Administration

The People's Republic of Angola shall be administratively divided into *Províncias* (Provinces), *Concelhos* (Councils), *Comunas* (Communes), *Círculos* (Circles), *Bairros* (Neighbourhoods) and *Povoações* (Villages).

Local administration shall be guided by the combined principles of unity, decentralization and local initiative.

Each province shall have a Provincial Commission which shall be presided over by the Provincial Commissioner and shall exercise legislative functions in matters of exclusive concern to the Province.

The administrative bodies of the Council, Commune, Neighbourhood and Village shall be, respectively, the Town Hall, the Commune Commission and the People's Neighbourhood or Village Commission.

The local authorities shall have legal personality and shall enjoy administrative and financial autonomy. The structure and jurisdiction of the administrative bodies and other organs of local administration shall be established by law.

### FINAL AND TRANSITORY PROVISIONS

Pending the establishment of the Assembly with constitutional powers, an amendment to the Constitution may be made only by the MPLA Central Committee. Laws and regulations may be repealed or amended if they conflict with the spirit of the present law or the Angolan revolutionary process. All treaties, agreements and alliances to which Portugal has committed Angola which are contrary to the interests of the Angolan people shall be reviewed.

# THE ANTARCTIC TREATY

The Treaty was signed in Washington in December 1959 by the twelve nations co-operating in the Antarctic during the International Geophysical Year. The Treaty entered into force on June 23rd, 1961.

## SIGNATORIES

Argentina
Australia
Belgium
Chile
France
Japan
New Zealand
Norway
South Africa
U.S.S.R.
United Kingdom
U.S.A.

## ACCEDING STATES

Brazil, Czechoslovakia, Denmark, the German Democratic Republic, the Netherlands, Poland, Romania.

## ANTARCTIC TREATY CONSULTATIVE MEETINGS

Meetings of delegations from all the signatory nations of the Antarctic Treaty are held from time to time to discuss scientific and political matters. The representatives elect a Chairman and Secretary. Committees and Working Groups may be established as required.

## SUMMARY OF TREATY

*Article* 1. Antarctica shall be used for peaceful purposes only.

*Article* 2. Freedom of scientific investigation and co-operation.

*Article* 3. Exchange of information and personnel.

*Article* 4. 1. Nothing contained in the present Treaty shall be interpreted as:

(a) a renunciation by any Contracting Party of previously asserted rights of or claims to territorial sovereignty in Antarctica;

(b) a renunciation or diminution by any Contracting Party of any basis of claim to territorial sovereignty in Antarctica which it may have whether as a result of its activities or those of its nationals in Antarctica, or otherwise;

(c) prejudicing the position of any Contracting Party as regards its recognition or non-recognition of any other State's right of or claim or basis of claim to territorial sovereignty in Antarctica.

2. No acts or activities taking place while the present Treaty is in force shall constitute a basis for asserting, supporting or denying a claim to territorial sovereignty in Antarctica or create any rights of sovereignty in Antarctica. No new claim, or enlargement of an existing claim, to territorial sovereignty in Antarctica shall be asserted while the present Treaty is in force.

*Article* 5. Any nuclear explosions in Antarctica and the disposal there of radioactive waste material shall be prohibited.

*Article* 6. Geographical limits and rights on high seas.

*Article* 7. Designation of observers and notification of stations and expeditions.

*Article* 8. Jurisdiction over observers and scientists.

*Article* 9. Consultative meetings.

*Articles* 10–14. Upholding, interpreting, amending, notifying and depositing the Treaty.

# ARGENTINA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Argentine Republic occupies almost the whole of South America south of the Tropic of Capricorn and east of the Andes. It has a long Atlantic coastline stretching from Uruguay and the River Plate to Tierra del Fuego. To the west lie Chile and the Andes mountains, to the north are Bolivia, Paraguay and Brazil. Argentina also claims the Falkland Islands, the Falkland Islands Dependencies and part of Antarctica. The climate varies from sub-tropical in the north to sub-arctic in Patagonia, generally with moderate summer rainfall. The language is Spanish. Nearly 90 per cent of the population are Roman Catholic and about 2 per cent Protestant. The national flag (proportions 2 by 1) has three horizontal stripes of light blue, white and light blue. The state flag (proportions 3 by 2) has the same design with, in addition, a gold "Sun of May" on the white stripe. The capital is Buenos Aires.

### Recent History

In June 1966 a military *coup* overthrew Argentina's civilian administration and began nearly seven years of government by the armed forces. In 1972 the President, Lt.-Gen. Alejandro Lanusse, announced that the military regime intended to restore civilian rule.

In the elections of March 1973 the Frente Justicialista de Liberación obtained a large majority in Congress, and the Justicialist candidate, Dr. Héctor Cámpora, became President. Military rule ended in May 1973. Cámpora resigned in July to make way for the election of Lt.-Gen. Juan Perón Sosa, President from 1946 to 1955 and a considerable influence on subsequent Argentine politics.

General Perón returned to Argentina, after 18 years' exile in Spain, in June 1973. In elections held in September Gen. Perón obtained 62 per cent of the votes, and he and his wife Mariá Estela Martínez de Perón were sworn in as President and Vice-President respectively in October. A promise of stricter legislation on subversive activity and a purge of the left-wing elements of the Peronist movement were among the first acts of the new administration.

General Perón died in July 1974 and was succeeded as President by his wife, who was unable to control the upsurge in violence between left- and right-wing groups. The Government moved further to the right and Señora Perón's right-hand man, José López Rega, became increasingly influential. He was strongly criticized, particularly by the left who accused him of setting up the *Triple A*, an extreme right-wing terrorist group, and of misappropriating public funds.

Assassinations and kidnappings increased until in November 1974 a state of siege was declared. Celestino Rodrigo's programme of economic austerity in mid-1975 and the soaring inflation rate caused widespread strikes and dissension among industrial workers, and when President Perón refused to honour negotiated wage rises of over 100 per cent, offering only 50 per cent, twelve days of crippling strikes ensued and the cabinet resigned.

The left-wing *Montoneros* were officially outlawed in September 1975 but violence continued unabated. Over 700 people were killed by terrorists in 1975. Owing to ill health, President Perón temporarily vacated her post and returned after a month to a climate of hostility and violence and accusations of alleged misuse of public funds. The continued violence and deteriorating economic situation resulted in demands for the resignation of President Perón, all of which culminated in an unsuccessful coup by a section of the air force.

In early 1976 several liberal ministers left the cabinet and in February President Perón forced a recess of Congress until May, thus postponing a possible investigation of her affairs. On March 24th the military, led by Lt.-Gen. Jorge Rafael Videla, Commander of the army, overthrew the President and installed a three-man junta. Five days later Gen. Videla was sworn in as President. The junta dissolved Congress, suspended all political and trade union activity and removed most government officials from their posts. Several hundred people were arrested.

Although the new government sought to reduce political violence, over 100 murders occurred in the month following the military takeover. Government forces launched an anti-guerrilla offensive and eliminated various groups, but this, combined with the continued feud between left and right, led to more than 1,000 killings in 1976. The second half of the year was also marked by widespread labour unrest over the Government's economic policies.

### Government

Argentina is a Republic composed of a Federal District, twenty-two Provinces and the National Territory of Tierra del Fuego, Antarctica and the South Atlantic Islands (Argentine jurisdiction over the Falkland Islands and part of Antarctica is disputed by the United Kingdom).

After the military takeover in 1976 Congress was dissolved and the supreme national organ became the *Junta Militar*, with the President holding executive powers. A commission was established to advise the junta on legislative matters. Each Province is administered by an appointed Governor.

### Defence

A period of national service is compulsory between the ages of 20 and 45, either one year being spent in the army or air force or fourteen months in the navy. The total strength of the regular armed forces in 1976 was 132,800, of which the army had 83,500 with a further 250,000 trained reservists, the navy had 32,300 and the air force 17,000 men. Defence expenditure for 1975 amounted to 10,309 million pesos.

### Economic Affairs

Argentina is primarily an agricultural country and its prosperity depends largely on foreign trade in meat, wool and cereals. However, the meat industry has suffered as domestic prices have been held to an unprofitable minimum by the Government. Also, the EEC, which had been taking about 70 per cent of Argentine beef, banned imports in early 1974 as part of a general attempt to maintain domestic prices. Cereals are the principal export, with maize accounting for about half. Argentina is one of the world's largest exporters of wine.

Industry is concerned mainly with meat-processing, meat-packing and other animal by-products. There has been rapid growth in the plastics, textile, steel, engineering and chemical industries.

Argentina has sufficient oil reserves to satisfy the bulk of domestic requirements but the 1974–75 Energy Plan gave priority to reducing the volume of petroleum used in the generation of electricity in favour of hydro-electricity and nuclear sources. It is hoped that by 1985 hydro-electricity will contribute 48 per cent of total electricity requirements.

In 1975 the economy was adversely affected by decisions taken in 1973 to stimulate consumption and promote income redistribution. The G.D.P. fell by 1.4 per cent, compared with an increase of 6.6 per cent in 1974, industrial production fell by 3.6 per cent and that of agriculture by 1.2 per cent, investment fell by 6.9 per cent, the treasury deficit rose to 139,300 million pesos, and inflation reached 334.8 per cent compared with 40.1 per cent in 1974. The 1975 trade deficit reached nearly U.S. $1,000 million, due to a fall in agricultural exports, resulting from decreased production by farmers as a protest against low domestic prices, and an increase in the cost of oil imports. In an attempt to establish the peso's true value it was devalued 13 times between March and December 1975.

The situation continued to deteriorate between January and March 1976 with the inflation rate increasing to 566.3 per cent in the year ending March 1976. However, in April the new military Government introduced a recovery programme, including a reduction in the fiscal deficit by sacking over 300,000 public employees and returning many state enterprises to private capital and administration; tax reforms; gradual liberalization of the exchange market; promotion of exports; a new foreign investment law; large-scale investment in the agricultural sector; better prices and lower duties for grain and meat exporters; expansion of the energy and mining sectors and a price policy ruled by market forces rather than government controls.

These measures had some success. The monthly inflation rate fell from 34.9 per cent in April 1976 to 4.3 per cent in July, mainly due to more stable prices and a wage freeze. However, the austerity measures had an adverse effect on some productive sectors. An overall 2.6 per cent fall in industrial production was forecast for 1976. The external position improved, due to a good grain harvest, higher meat exports and substantially reduced imports. A trade surplus was forecast for 1976. In late 1976 the Government was seeking extensive loans from the IMF and international banks to help meet foreign debt obligations. A three-year economic plan was being drafted.

Argentina is a member of the Latin American Free Trade Association, the Inter-American Development Bank and the Latin American Economic System (SELA).

### Transport and Communications

Argentina's transport network is concentrated in the east central provinces. Main railways connect with Chile, Bolivia, Brazil and Paraguay and run parallel with branches of the Pan American Highway. At the end of 1975 Argentina had 311,893 km. of roads. In 1976 the first road link between Argentina and Uruguay, the Paysandú-Colón bridge, was opened. River steamers operate on the Plate, Paraguay, Paraná and Uruguay rivers. Internal air services are well developed and Aerolíneas Argentinas, as well as many foreign airlines, operate international schedules.

### Social Welfare

Social welfare benefits are provided to wage-earners through trade unions and employers' associations. In 1967 all welfare services were co-ordinated under the National Council of Social Welfare, and a new Pensions Law was introduced. Pensions, retirement grants, family allowances and the minimum wage were increased several times in 1975 to keep pace with inflation.

### Education

The adult literacy rate of about 90 per cent is regarded as the highest in Latin America. Education is free from pre-school to university level, and compulsory for all children at primary and intermediate levels, from the ages of six to fourteen. Secondary education covers a five-year period, and university courses range from one to six years. There are 13 national universities, two provincial universities and 23 private universities.

### Tourism

Argentina has yet to exploit fully her superb tourist attractions. The principal ones are the Andes mountains, the lake district of Bariloche, where there is a National Park, the Atlantic beaches, the Iguazú falls, the Pampas and the city of Buenos Aires.

*Visas* are not required to visit Argentina by nationals of the following countries: Austria, Belgium, Denmark, France, Federal Republic of Germany, Luxembourg, Netherlands, Norway, Sweden, Switzerland, United Kingdom, and all American countries except Cuba.

### Sport

The most popular sport is football, followed by horse racing, polo, rugby, motor racing and basket-ball.

### Public Holidays

**1977:** May 1st (Labour Day), May 25th (Anniversary of the 1810 Revolution), June 20th (Flag Day), July 9th (Independence Day), August 17th (Death of Gen. José de San Martín), December 8th (Immaculate Conception), December 25th (Christmas).

**1978:** January 1st (New Year's Day), March 23rd (Maundy Thursday), March 24th (Good Friday).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centavos = 1 Argentine peso.

Exchange rates (December 1976):

£1 sterling = 433.3 new pesos;
U.S. $1 = 261.5 new pesos.

## FINANCE

100 centavos=1 Argentine peso.

Coins: 1, 5, 10, 20 and 50 centavos; 1, 5 and 10 pesos.

Notes: 1, 5, 10, 50, 100, 500, 1,000 and 10,000 pesos.

Exchange rates (December 1976): £1 sterling=433.3 new pesos; U.S. $1=261.5 new pesos.

1,000 Argentine pesos=£2.31=$3.82.

*Note:* The new peso was introduced in January 1970, replacing the old peso (official exchange rate: U.S. $1=350 old pesos since March 1967) at the rate of 1 new peso=100 old pesos. From January to June 1970 the exchange rate remained at U.S. $1=3.50 new pesos. Between June 1970 and April 1971 the rate was $1=4.00 new pesos. After six more devaluations the official rate was fixed at $1=5.00 new pesos in August 1971. The next month a two-tier system was indroduced, with a commercial rate (remaining at $1=5.00 pesos until March 1975) and a financial rate, beginning at $1=6.70 pesos (selling rate). The financial rate was revised several times and stood at $1=9.98 pesos from August 1972 to March 1975, when the commercial rate was fixed at $1=10.00 new pesos, with financial rates of $1=15.05 pesos (buying) or 15.10 pesos (selling). The peso has since been devalued on several occasions. In August 1975 a special financial rate was introduced and in November the commercial rate was discontinued, leaving the two financial rates in operation. In January 1976 a free rate (beginning at $1=150.0 pesos) was added. In March a new official rate of $1=140 pesos was established, the financial rates were discontinued but the free rate (then $1=258.0 pesos) remained. In November 1976 the official rate was abolished, leaving all transactions to be settled on the free market. For calculating the value of foreign trade transactions, the average market rate (pesos per U.S. dollar) was: 3.78 in 1970; 4.62 in 1971; 8.17 in 1972; 9.35 in 1973; 8.87 in 1974; 27.39 in 1975. In terms of sterling the official exchange rate was £1=8.40 new pesos from November 1967 to June 1970; £1=9.60 new pesos from June 1970 to April 1971; and £1=13.03 new pesos (commercial rate) from December 1971 to June 1972.

# THE CONSTITUTION

Since the military took over on March 24th, 1976, the 1853 constitution, with amendments, remains partially in force. All major changes to the constitution are incorporated in the *Acta para el Proceso de Reorganización Nacional, Propósitos y Objetivos Básicos del Proceso de Reorganización Nacional* and the *Estatuto para el Proceso de Reorganización Nacional*, all promulgated on March 24th, 1976. These new laws substantially alter the legislative and executive system. The summary below is an amalgamation of the constitution and new laws.

### Declarations, rights and guarantees

Each province has the right to exercise its own administration of justice, municipal system and primary education. The Roman Catholic religion, being the faith of the majority of the nation, shall enjoy State protection; freedom of religious belief is guaranteed to all other denominations. All the inhabitants of the country have the right to work and exercise any legal trade; to petition the authorities; to leave or enter the Argentine territory, to use or dispose of their properties, to associate for a peaceable or useful purpose; to teach and acquire education, and to express freely their opinion in the press without censorship. The State does not admit any prerogative of blood, birth, privilege or titles of nobility. Equality is the basis of all duties and public offices. No citizens may be detained, except for reasons and in the manner prescribed by the law; or sentenced other than by virtue of a law existing prior to the offence and by decision of the competent tribunal after the hearing and defence of the person concerned. Private residence, property and correspondence are inviolable. No one may enter the home of a citizen or carry out any search in it without his consent, unless by a warrant from the competent authority; no one may suffer expropriation, except in case of public necessity and provided that the appropriate compensation has been paid in accordance with the provisions of the laws. In no case may the penalty of confiscation of property be imposed.

The *Acta* states that the Chiefs of Staff of the army, navy and air force establish a *Junta Militar* which assumes all political power. The following officials are removed from their posts: the President; governors and vice-governors; federal interventors; members of Congress, provincial legislatures, municipal councils, the Supreme Court and provincial courts; and the Attorney-General. All political and trade union activity is suspended.

The basic objectives and aims for national reorganization are to restore essential values, eliminate subversion, promote economic development, strengthen political sovereignty, uphold Christian moral values and tradition, enforce national security, promote general welfare and set up an education system in accordance with the needs of the country. The Junta has stated that it intends to restore a democratic representative and republican government when the *Proceso de Reorganización Nacional* has been completed.

### Junta Militar

The Junta Militar comprises the Chiefs of Staff of the army, navy and air force. It shall be the supreme organ of State and its members shall remain in office for a maximum of three years. The Junta holds a mixture of legislative and executive powers and is responsible for the general running of the country. It may meet when one of its members requests it to do so but to meet in full session all members must be present. Decisions shall be made by simple majority.

The Junta has the following powers: to appoint and dismiss the President and to appoint his successor by a means not yet established. It may also appoint and dismiss members of the Supreme Court, the Attorney-General and the Public Prosecutor. It is the Commander-in-Chief of all the armed forces, may declare war or a state of siege, authorize the executive to declare war or make peace, authorize the formation of provincial militias, allow foreign troops on to Argentine soil and give instructions to the executive regarding the functioning of provincial governments.

### President of the Republic

The President must have been born on Argentine soil or be the son of an Argentine national, belong to the Catholic faith, be over 30 years of age and be a high-ranking military officer. He is appointed and dismissed by the Junta Militar. In the case of death, temporary absence or illness, executive power shall be assumed by the Minister of Planning.

The President shall have the following powers: to issue instructions and regulations necessary for the implementation of laws; to approve and promulgate laws; to grant pardons and commute sentences; to appoint and dismiss Ministers; to negotiate treaties; to appoint high-ranking officers of the armed forces on the proposal of the Chiefs of Staff; to supervise the collection of taxes; to regulate foreign trade; to fix import and export duties; to levy taxes for a specified time whenever the defence, common safety or general welfare of the State so require; to contract loans on the nation's credit; to regulate the internal and external debt and the currency system of the country; to fix the budget and provide for whatever is conducive to the prosperity and well-being of the nation; to fix territorial limits; to establish national security; to negotiate, sign and ratify treaties and concordats; to ratify appointments made by the Junta Militar to the posts of judge of Supreme Court, Attorney-General and Public Prosecutor; to appoint members of the lower courts and to issue instructions to the provincial governments and to appoint governors.

### Comisión de Asesoramiento Legislativo

The CAL is a deliberative body and acts as an adviser to the Junta Militar and President on legislative matters. It comprises nine officers of the three branches of the armed forces. Its president is elected from among its members in yearly rotation in the manner established by the Junta. Its secretary shall come from the same branch of the armed forces as the current president. It shall have eight working committees responsible for defence and foreign affairs; the interior and justice; social welfare and labour; education; the budget, finance, industry and natural resources; agriculture and livestock; public works and transport; energy, fuel and communications. Decisions shall be made by absolute majority.

Bills must be approved by the relevant working committee and a plenary session of the CAL before they can be approved and promulgated by the executive. A bill must first be considered to be of fundamental importance by the working committee and the CAL before it can be dealt with. If the executive does not agree with the CAL on any issue, the bill is passed to the Junta for final decision.

The preparation of bills is the responsibility of the Government, the President and the Chiefs of Staff. They are then passed to the CAL via the President or the Junta, which can also prepare laws.

### Judiciary

Judicial power is exercised by the Supreme Court and all other competent tribunals. The members of the Supreme Court are appointed and dismissed by the Junta Militar. Judges of the lower courts are appointed by the President.

The executive is to pass a law by which a special court shall be established to institute legal proceedings against high officials who have committed any crimes whilst in office. This was previously the responsibility of the legislature.

In the provinces, the provincial governors shall appoint the members of the provincial courts who shall enjoy those guarantees established in the provincial constitutions.

### Provincial Government

The twenty-two provinces retain all the power not delegated to the Federal Government. They are governed by their own constitutions and must adapt their action to comply with the Junta's basic objectives and aims and the *Estatuto para el Proceso de Reorganización Nacional*. The President appoints the provincial governors.

There are 12 symphony orchestras in Argentina, 5 of them in Buenos Aires.

## ATOMIC ENERGY

**Comisión Nacional de Energía Atómica:** Avda. Libertador 8250, Buenos Aires; f. 1950; Departments of Raw Materials, Fuel Elements, Nuclear Reactors, Heavy Water, Radioisotopes and Radiation, Research, Radiological Protection, Development and Services and Economics.

Pres. Capt. Carlos Castro Madero.

Argentina's first nuclear reactor, with a capacity of 320 MW, at Atucha on the River Paraná de las Palmas was opened in March 1974. There are four others in various stages of construction. It is also planned to construct a heavy water plant on the River Limay in Patagonia. By 1990 Argentina intends to cover 30 per cent of its energy needs from nuclear reactors based on its own uranium resources.

Research reactors: The following research reactors are in operation:

RA-1 Centro Atómico Constituyentes: maximum capacity 150 kW.

RA-2 Centro Atómico Constituyentes: maximum capacity 30W.

RA-3 Centro Atómico Ezeiza: maximum capacity 8 MW.

RA-4 Universidad Nacional de Rosario: maximum capacity 0.1 W.

**Universidad Nacional de Cuyo:** San Luis; nuclear physics.

**Universidad de Buenos Aires:** Viamonte 444, Buenos Aires; the application and study of radio-isotopes and nuclear physics are carried out in the faculties of Agronomy, National Science, Medicine and Engineering.

**Universidad Nacional de La Plata:** La Plata; Nuclear Chemistry and Spectroscopy; Beta spectroscope, 100-channel analyser.

**Universidad Nacional de Litoral:** Santa Fe; Nuclear Electronics, Metallurgy, Radio-Chemistry and Mineral-Processing.

# AUSTRALIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of Australia occupies the whole of the island continent of Australia in the South Pacific and the offshore island of Tasmania to the south-east. Australia's nearest neighbour is Indonesia, covering the long archipelago to the north and north-west. The Australian climate is hot and dry with average temperatures of about 80°F (26.8°C) rising to over 120°F (49°C) in the interior. Over half the country is desert or semi-desert with little rainfall. More than 98 per cent of the population are of European origin. English is the official language. Over 88 per cent of the population were Christian in 1966. The national flag (proportions 2 by 1) is blue with a Union Jack in the upper hoist, a large seven-pointed white star in the lower hoist and five smaller white stars in the form of the Southern Cross in the fly. The capital, Canberra, lies in one of two enclaves of Federal Territory known as the Australian Capital Territory.

### Recent History

Since the Second World War Australia has taken an important place in Pacific and Asian affairs and has strengthened its political and economic ties with India, South-East Asia and Japan. The country co-operates more closely than formerly with the U.S.A., and contributed troops to the war in Viet-Nam until 1970. As a founder-member of the Colombo Plan it has given much aid in money, materials and training to Asian countries. In June 1976 Australia signed a Basic Treaty of Friendship and Co-operation with Japan.

In 1966 Sir Robert Menzies resigned after sixteen years as Prime Minister, and was succeeded by Harold Holt, who died the next year. His successor, Senator John Gorton, resigned after a vote of no confidence and William McMahon was Prime Minister from March 1971 until December 1972, when, after 23 years in office, the Liberal-Country Party Coalition was defeated by the Labor Party, led by Gough Whitlam.

Papua New Guinea, Australia's largest overseas territory, attained self-government in 1973 and full independence in September 1975 (*see* Papua New Guinea).

In May 1974 elections were held for both Houses after a crisis concerning supply funds split the Parliament and led to the dissolution of both Houses. Labor was returned but lost its majority in the Senate and had its majority in the House of Representatives reduced. In June the Liberal and National (formerly Country) Parties formed a joint Opposition.

In mid-1975 the Whitlam government narrowly survived accusations of unorthodox international loan-raising activities. Opposition to the Government's monetary policy became more strenuous in October when the Senate exercised a constitutional right in blocking Budget Bills concerning money supply. An impasse developed in which the Opposition was in theory prepared to delay supply indefinitely and the Government was not willing to consent to a general election over the issue. The Senate received further support for its policy of deferment and proposed a general election to be held before mid-1976, which Mr. Whitlam rejected. On November 11th the Governor-General, Sir John Kerr, intervened and took the unprecedented step of dismissing the Government and installing a caretaker ministry, under Malcolm Fraser, the Liberal leader, to govern until elections. Despite widespread strikes and demonstrations in favour of Mr. Whitlam, the elections in December produced a large Liberal majority and Mr. Fraser formed a coalition government with the Country Party. His subsequent policies encountered strong opposition from trade unions, particularly over the proposed restructuring of the Medibank national health service founded by the Whitlam Government.

### Government

Australia comprises six states and two federally-administered territories. Executive power is vested in the Queen and exercised by her appointed representative, the Governor-General. He normally acts on the advice of the Federal Executive Council, led by the Prime Minister. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers.

Legislative power is vested in the Federal Parliament. This consists of the Queen, represented by the Governor-General, and two chambers elected by universal adult suffrage (voting is compulsory). The Senate has 64 members (10 from each State and two from each of the federal territories) elected by proportional representation for six years, with half the Senators retiring every three years. The House of Representatives has 127 members elected for three years (subject to dissolution) from single-member constituencies. The Federal Executive Council is responsible to Parliament.

Each State has a Governor, representing the Queen, and its own legislative, executive and judicial system. The State Governments are autonomous except for certain powers placed under the jurisdiction of the Federal Government. All except Queensland have an Upper House, the Legislative Council, and a Lower House, the Legislative Assembly or House of Assembly. The chief ministers of the States are known as Premiers, as distinct from the Federal Prime Minister.

### Defence

Australia's defence policy is based on collective security and it is a member of the British Commonwealth Strategic Reserve and ANZUS, with New Zealand and U.S.A. Australia's armed forces numbered 69,350 at June 1976 (army 31,600, navy 16,200, air force 21,550). The estimated expenditure on defence for 1976/77 is $A2,200 million. Service in the armed forces is voluntary.

### Economic Affairs

Australia's traditional reliance on the agricultural sector has been eroded by the phenomenal oil and mineral discoveries of recent years. Some 70 per cent of Australia's oil requirements are now met by domestic sources. In 1972/73 agriculture contributed around 8 per cent of Gross Domestic Product (G.D.P.) and the share of agricultural products in total export trade declined to about 50 per cent in the mid-1970s, with wool, wheat, meat, sugar and dairy products remaining major export items. Gold, silver, lead, zinc and copper have long been exploited, but recent discoveries of vast deposits of oil, natural gas, coal, nickel, iron ore and bauxite have transformed the economy. In 1975/76 minerals accounted for 28 per cent of export revenue. Many of these minerals are being exploited as raw materials for Japan's industries. The pattern of Australia's dependence on foreign trade has thus undergone a change, with Japan overtaking Western countries as the major market, currently providing one-fifth of imports and taking one-third of Australian exports. Australia has also increased its trade with China and South-East Asian countries, and has trade agreements with the U.S.S.R. and other East European countries.

Manufacturing industries contributed 25 per cent of G.D.P. in 1974/75 but employment in this area declined to under 1.3 million, mainly in iron and steel and engineering. Other important industries are food processing, machinery, motor vehicles, chemicals, electrical and electronic equipment. Domestic sources of energy are coal, gas, thermal and hydro-electricity. Oil and natural gas production totalled 23 million and 4.3 million cubic metres respectively during 1974/75.

Revaluations in 1972 and 1973 preceded a 12 per cent devaluation of the Australian dollar against U.S. currency in 1974. Inflation nearly doubled between the end of 1972 and the end of 1974, and was around 16 per cent for most of 1975. The Fraser Government, in both the 1975/76 and 1976/77 budgets, imposed policies of wage restraint and cuts in public sector spending. Nevertheless, inflation at the end of 1976 remained at around 13 per cent and unemployment has risen to 4.7 per cent. In November 1976 the Government was forced to devalue the dollar by 17.5 per cent, although this decision was partially reversed in December.

The trade surplus, aided by a sustained growth in exports, recovered from its decline in 1973/74; the surplus for 1975/76 was A$1,300 million. Trade agreements with Middle East and Communist countries, as part of a plan to diversify economic dependence, promise continued improvement for the future.

In June 1971, Australia became a member of OECD. The United Kingdom-Australia Trade Agreement was terminated in February 1973, following the entry into the EEC of the U.K., but new trade terms are to be established.

### Transport and Communications

For its population, Australia has a well developed transport system with 40,000 km. of railway, 864,000 km. of roads and over 138,000 km. of scheduled air routes. In the thinly populated areas of Central and Western Australia air transport is extremely important and Australia has pioneered services such as the Flying Doctor Service to overcome the problems of distance. Australia is well served by international shipping and air lines. Its civil aviation industry is expanding rapidly and in 1974/75 Australia's domestic airlines carried over nine million passengers.

### Social Welfare

Australia provides old age pensions, invalid, maternity, sickness and unemployment benefits and children's allowances. In July 1975 a new government health insurance scheme was introduced. Reciprocal welfare agreements operate between Australia and New Zealand and the United Kingdom. About 25 per cent of Federal budget expenditure is allocated to welfare.

### Education

Education is the responsibility of each of the six States and the Federal Government. It is free and compulsory from the ages of 6 to 15. In 1975 there were 2,297,979 children enrolled in government primary and secondary schools, and some 621,000 attending private schools. Special services have been developed to meet the needs of children living in the outback, notably Schools of the Air, using two-way receiver sets. A system of one-teacher schools also helps meet these needs. Australia has 18 universities with (in 1976) nearly 154,000 students.

### Tourism

Australian tourism is developing with quicker and cheaper air transport. The main attractions are swimming and surfing on the Pacific beaches, sailing from Sydney and other harbours, skin-diving along the Great Barrier Reef, and winter and summer sports in the Blue Mountains. Over half a million tourists visited Australia in 1976.

*Visas* are not required by citizens of New Zealand.

### Sport

Australians excel at sport, especially tennis and cricket. They play a number of codes of football and are enthusiastic followers of horse-racing. They also pursue water sports.

### Public Holidays

**1977:** June 13th* (Queen's Official Birthday), December 25th (Christmas Day), December 27th (Boxing Day†).

**1978:** January 1st (New Year's Day), January 26th (Australia Day), March 24th–27th (Easter), April 25th (Anzac Day).

* October 10th in Western Australia.

† Boxing Day is not a public holiday in South Australia. There are also numerous State holidays.

### Weights and Measures

The imperial system of weights and measures is gradually being replaced by the metric system.

### Currency and Exchange Rates

100 cents = 1 Australian dollar.

Exchange rates (December 1976):
£1 sterling = $A1.593;
U.S. $1 = 95.0 Australian cents.

## FINANCE

100 cents = 1 Australian dollar ($A).

Coins: 1, 2, 5, 10, 20 and 50 cents.

Notes: 1, 2, 5, 10, 20 and 50 dollars.

Exchange rates (December 1976): £1 sterling = $A1.593; U.S. $1 = 95.0 Australian cents.

$A100 = £62.76 = U.S. $105.21.

*Note:* The Australian dollar was introduced in February 1966, replacing the Australian pound (exchange rate: £A1 = U.S. $2.24 from September 1949) at the rate of $A2 = £A1. From February 1966 to August 1971 the exchange rate remained at $A1 = U.S. $1.12 (U.S. $1 = 89.29 Australian cents). Between December 1971 and December 1972 the par value of the Australian dollar was U.S. $1.216 (U.S. $1 = 82.24 Australian cents), though the effective mid-point exchange rate was $A1 = U.S. $1.191. Revaluations were made in December 1972 ($A1 = U.S. $1.275), in Februarv 1973 ($A1 = U.S. $1.4167) and in September 1973 ($A1 = U.S. $1.4875). This last valuation remained in effect until September 1974, when the direct relationship with the U.S. dollar was ended and the Australian dollar was linked to a weighted "basket" of the currencies of Australia's main trading partners. The Australian dollar's value immediately fell to U.S. $1.31, representing an effective devaluation by 11.9 per cent. The currency maintained its weighted value until November 1976, when it was devalued by 17.5 per cent. In December 1976 it was revalued marginally twice. The average value of the Australian dollar was: U.S. $1.134 in 1971; U.S. $1.192 in 1972; U.S. $1.423 in 1973; U.S. $1.441 in 1974; U.S. $1.310 in 1975. In terms of sterling the exchange rate was £1 = $A2.143 ($A1 = 9s. 4d. or 46.67p) from November 1967 to December 1971; and £1 = $2.188 from December 1971 to June 1972.

# THE CONSTITUTION

## PARLIAMENT

The legislative power of the Commonwealth is vested in a Federal Parliament, consisting of the Queen, represented by the Governor-General, a Senate, and a House of Representatives. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives. This power is limited by strict, although unwritten, constitutional understanding, and it is rare for such decisions to be made at the sole discretion of the Governor-General. After any general election Parliament must be summoned to meet not later than thirty days after the day appointed for the return of the writs.

## THE SENATE

The Senate is composed of ten Senators from each State, two Senators representing the Northern Territory and two representing the Australian Capital Territory. The Senators are directly chosen for a period of six years by the people of the state, voting as one electorate, and are elected by proportional representation. They retire by rotation, half from each State on June 30th of each third year. The Senate may proceed to the dispatch of business notwithstanding the failure of any State to provide for its representation in the Senate.

If a Senator vacates his seat before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, in joint session, choose a person to hold the place until the expiration of the term or until the election of a successor. If the State Parliament is not in session, the Governor of the State, acting on the advice of the Executive Council, may appoint a Senator to hold office until Parliament reassembles, or until a new Senator is elected.

## THE HOUSE OF REPRESENTATIVES

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. The number in each State is in proportion to population, but under the Constitution must be at least five. The House of Representatives is composed of 127 members, which includes two members for the Australian Capital Territory and one member for the Northern Territory.

Members are elected by universal adult suffrage and voting is compulsory. Qualifications for Commonwealth franchise are possessed by any British subject, not under 18 years of age, subject to certain disqualifications (e.g. if of unsound mind), who has lived in Australia for six months continuously.

Members are chosen by the electors of their respective electorates by the preferential voting system.

The duration of the Parliament is limited to three years.

Qualification for membership of the House of Representatives is possessed by any British subject 18 years of age or over who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth.

## THE EXECUTIVE GOVERNMENT

The executive power of the Federal Government is vested in the Queen, and is exercised by the Governor-General, assisted by an Executive Council of Ministers of State, known as the Federal Executive Council. These Ministers are, or must become within three months, members of the Australian Parliament.

## THE JUDICIAL POWER

The judicial power of the Commonwealth is vested in the High Court of Australia, in such other Federal Courts as the Australian Parliament creates, and in such other courts as it invests with Federal jurisdiction.

The High Court consists of a Chief Justice and not fewer than two other Justices, appointed by the Governor-General in Council. It has both an original and an appellate jurisdiction.

The High Court's original jurisdiction extends to all matters arising under any treaty, affecting representatives of other countries, in which the Commonwealth of Australia or its representative is a party, between States or between residents of different States or between a State and a resident of another State, and in which a writ of *mandamus*, or prohibition, or an injunction is sought against an officer of the Commonwealth of Australia. It also extends to matters arising under the Constitution or involving its interpretation, and to any other matters empowered by the Australian Parliament.

The appellate jurisdiction extends to appeals from all judgments, decrees, orders and sentences of its own Justices exercising original jurisdiction, of any other Federal Court or court exercising Federal jurisdiction and of the Supreme Court of any State or any other State court from which an appeal lies to the Queen in Council.

The Australian Industrial Court is composed of a Chief Judge and eleven other Judges. The Australian Conciliation and Arbitration Commission comprises a President, Deputy Presidents, Commissioners, and a number of Conciliators. Jurisdiction in bankruptcy and insolvency is administered by the Federal Court of Bankruptcy or State Courts of Insolvency, or State Courts exercising Federal jurisdiction. There is a Supreme Court in the Australian Capital Territory and in the Northern Territory. State courts, including courts of summary jurisdiction, are invested with Federal judicial power, principally to deal with offences created by Federal statutes.

## THE STATES

The Commonwealth Constitution safeguards the Constitution of each State by providing that it shall continue as at the establishment of the Commonwealth, except as altered in accordance with its own provisions. When a State law is inconsistent with a law of the Commonwealth, the latter prevails, and the former is invalid to the extent of the inconsistency. However, the legislation of the Australian Parliament is limited in the main to those matters which are listed in section 51 of the Constitution, while the States possess, as well as concurrent powers in those matters, residual legislative powers enabling them to legislate in any way for "the peace, order and good Government" of their respective territories.

The States may not, without the consent of the Commonwealth, raise or maintain naval or military forces, or impose taxes on any property belonging to the Commonwealth, nor may the Commonwealth tax State property. The States may not coin money.

The Commonwealth may not enact any law for establishing any religion or for prohibiting the exercise of any religion, and no religious test may be imposed as a qualification for any office under the Commonwealth.

The Commonwealth is charged with protecting every State against invasion, and, on the application of a State Executive Government, against domestic violence.

Provision is made under the Constitution for the admission of new States and for the establishment of new States within the Commonwealth.

### ALTERATION OF THE CONSTITUTION

Proposed laws for the amendment of the Constitution must be passed by an absolute majority in both Houses of Parliament, and not less than two or more than six months after its passage through both Houses the proposed law must be submitted in each State to the qualified electors.

In the event of one House twice refusing to pass a proposed amendment which has already received an absolute majority in the other House, the Governor-General may, notwithstanding such refusal, submit the proposed amendment to the electors. If, in a majority of the States a majority of the electors voting approve the proposed law and if a majority of all the electors voting also approve, it shall be presented to the Governor-General for Royal Assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing or altering the limits of the State, or in any way affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

### NEW SOUTH WALES

The executive power is vested in the Governor, appointed by the Crown, who is assisted by a Cabinet.

The legislative power is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The former consists of sixty members, elected at a joint sitting of both Houses of Parliament, for a term of twelve years, fifteen members retiring every three years. The Legislative Assembly consists of ninety-nine members, and sits for three years.

### VICTORIA

The legislative authority is vested in a bicameral Parliament: the Upper House, or Legislative Council, of thirty-six members, elected for six years, and the Lower House, or Legislative Assembly, of seventy-three members, elected for three years. One-half of the members of the Council retire every three years.

In the exercise of the executive the Governor is assisted by a Cabinet of responsible Ministers. Not more than five members of the Council and not more than thirteen members of the Assembly may occupy salaried office at any one time.

Provision has been made for the imminent re-division of the State into eighty-one electoral districts, each returning one Member, and into twenty-two electoral provinces, each returning two Members.

### QUEENSLAND

Legislative power rests with a unicameral Parliament composed of eighty-two members elected from eighty-two districts for a term of three years.

### SOUTH AUSTRALIA

The Constitution vests the legislative power in a Parliament elected by the people and consisting of a Legislative Council and a House of Assembly. The Council is composed of twenty-two members, half of whom retire every three years. Their places are filled by new members elected under a system of proportional representation, with the whole State as a single electorate. The executive has no authority to dissolve this body.

The forty-seven members of the House of Assembly are elected for three years from forty-seven electoral districts.

The executive power is vested in a Governor, appointed by the Crown, and an Executive Council consisting of twelve responsible Ministers.

### WESTERN AUSTRALIA

The administration is vested in the Governor, a Legislative Council and a Legislative Assembly.

According to the present Constitution, the Legislative Council consists of thirty members, each of the fifteen provinces returning two members. Election is for a term of six years, and one-half of the members retire every three years.

The Legislative Assembly consists of fifty-one members, elected for three years, each representing one electorate. Proposals to enlarge both the Legislative Assembly and the Legislative Council are to be considered in 1976.

The entire management and control of the unalienated lands of the Crown in Western Australia is vested in the State Legislature.

### TASMANIA

The executive authority is vested in a Governor, appointed by the Crown and acting upon the advice of a Legislative Council and House of Assembly. The Council consists of nineteen members who sit for six years, retiring in rotation. There is no power to dissolve the Council. The House of Assembly has 35 members elected for four years.

### NORTHERN TERRITORY

The Northern Territory is administered on behalf of the Commonwealth Government by the Administrator and the Department of Northern Australia in Darwin. In addition, the Legislative Assembly of 19 elected members is given the power to make Ordinances for the peace, order and good government of the Northern Territory.

### AUSTRALIAN CAPITAL TERRITORY

The Australian Capital Territory, within which the Seat of Government is situated, is administered by the Federal Government. Under legislation passed by the Parliament the Governor-General is given power to make Ordinances for the peace, order and good government of the Territory. There is established in the Territory an elected Legislative Assembly, consisting of 18 elected members, which may advise the Government on matters affecting the Territory.

# JUDICIAL SYSTEM

The judicial power of the Commonwealth is vested in a Federal Supreme Court, the High Court of Australia, consisting of a Chief Justice and six Justices and such other courts as the Commonwealth Parliament may create. Parliament can also vest certain Federal jurisdiction in State courts. The High Court has original jurisdiction in all matters arising under treaties or affecting representatives of other countries, and in certain matters in which the Commonwealth or the States are concerned. It also hears and determines appeals from judgments of its own Justices exercising original jurisdiction, and from judgments of any other Federal Court or of the Supreme Court of any State. Australian States may appeal to the Judicial Committee of the Privy Council in the United Kingdom in non-Federal matters. Each State has a Supreme Court as well as a combination of lesser courts.

# THE PRESS

Australia's legislation relating to the Press varies in different States.

Under the law concerning contempt of court, since the court takes jurisdiction from the time the accused is arrested, to publish names or photographs before proceedings begin may draw heavy penalties. Though accurate reporting of a case while it is being tried is privileged, and has been known to extend to a degree of scandal, a judge is empowered to ban all reports until the conclusion of the case.

Each state has its legislation against obscene publications, which is particularly severe in the State of Queensland, whose broadly defined Objectionable Literature Act of 1954 covers a wide range of offences.

The libel law ranges from seditious libel for matter liable to cause a breach of the peace, or for excessive abuse of government officials, to defamatory libel. Certain government agencies have privilege.

The total circulation of Australia's daily newspapers was very high in 1972 at about 5,282,000 copies per issue, or 408 for every 1,000 inhabitants. Weekly papers are even more popular as they more successfully penetrate to the remoter parts of the country, whereas metropolitan dailies meet competition from small local papers. The circulation of newspapers has traditionally been almost entirely confined to the state in which each is produced. The only exceptions, which may fairly claim a national circulation, are the dailies *The Australian* and *Australian Financial Review*, and the weeklies, *The Bulletin*, the *National Times* and the *Nation Review*.

The main newspaper centres are Sydney, where the morning *Daily Telegraph* competes with the *Morning Herald*, and the evening *Daily Mirror* competes with *The Sun*, and Melbourne, where *The Age* competes with *The Sun News-Pictorial*, both morning papers. Perth, Adelaide and Brisbane each have only one major morning and one major evening paper.

Among the daily papers most respected for their serious news treatment should be mentioned the *Sydney Morning Herald*, *The Age* (Melbourne), *The Australian*, *The Canberra Times* and the *Australian Financial Review*. The most popular dailies include Melbourne's *Sun News-Pictorial* (625,000) and *Herald* (450,800), Sydney's *Daily Telegraph* (331,930), *Sun* (364,288) and *Daily Mirror* (369,153), *Sydney Morning Herald* (272,404) and Brisbane's *Courier Mail* (269,000), and Adelaide's *Advertiser* (230,062).

All newspapers in the state capitals are owned by limited companies. The trend towards concentration of ownership has led to the development of three principal groups of newspapers. Economic conditions have necessitated the extension of the activities of newspaper companies into related spheres, magazine and book publishing, radio and television, etc. The main groups are as follows:

**The Herald and Weekly Times Group:** 44 Flinders St., Melbourne, Vic. 3000; Chair. Sir PHILIP JONES: controls *The Herald* and *Sun News-Pictorial* (Melbourne), *The Bendigo Advertiser*, *The Geelong Advertiser*, *West Australian Daily News* (Perth), and also has holdings in several magazines and radio and television companies.

# AUSTRALIAN EXTERNAL TERRITORIES

CHRISTMAS ISLAND
NORFOLK ISLAND
COCOS (KEELING) ISLANDS
OTHER TERRITORIES

## CHRISTMAS ISLAND

Christmas Island covers an area of about 135 square kilometres and lies 360 kilometres south of Java Head in the Indian Ocean. The nearest point on the Australian coast is North West Cape.

Administration was transferred from Singapore to Britain on January 1st, 1958, pending final transfer to Australia. It became an Australian territory on October 1st, 1958. The island has no indigenous population. At June 30th, 1975, the total population was 3,032 (1,735 Chinese, 888 Malays, 316 Europeans and 93 others). Nearly all the residents are employees of the British Phosphate Commissioners and their families. The recovery of phosphates is the sole economic activity, and exports were 1,426,276 tons of phosphates and 2,168 tons of phosphate dust for the year ending June 30th, 1975.

**Administrator:** W. Worth.

**Supreme Court:** Judge: The Hon. Mr. Justice E. A. Dunphy.

**Christmas Island Broadcasting Station:** Lower Drumsite; daily broadcasting service.

There were 2,000 radio sets in 1975.

**Christmas Island Phosphate Commission:** 515 Collins St., Melbourne, Vic. 3000, Australia. The British Phosphate Commissioners are the managing agents of the Christmas Island Phosphate Commission. Commissioners: Sir Allen Brown, C.B.E. (Australia), W. D. Bremner (New Zealand), W. B. Marston (joint Commissioner). The Commission controls phosphate mining on the Island as well as the export and distribution of phosphate.

**Transport:** Australian Government charter aircraft operate a three-weekly service from Perth. The British Phosphate Commissioners conduct a cargo-shipping service to Singapore and Australian ports. They also operate flights from Singapore and Malaysia to Christmas Island.

## NORFOLK ISLAND

Norfolk Island is about 8 km. long and 4.8 km. wide and was discovered by Captain Cook in 1774. The island was used as a penal settlement from 1788 to 1813 and again from 1825 to 1855. It was a separate Crown Colony until 1897, when it became a Dependency of New South Wales. In 1913 it was transferred to the Australian Government. Area: 3,455 hectares; Estimated population (June 30th, 1975): 1,870.

About 405 hectares are arable. The main crops are bean seed, Kentia palm, cereals, vegetables and fruit. Some flowers and plants are grown commercially. The Administration is increasing the area devoted to Norfolk Island pine and hardwoods. Seed of the Norfolk Island pine is exported. Tourism is the island's main industry. In 1974–75 there were 18,807 visitors.

### STATISTICS

**Imports** (year ending June 30th, 1975): $6,172,174, mainly from Australia.

**Exports** (1975): $621,017.

**Budget** (year ending June 30th, 1975): Revenue $1,408,054; Expenditure $1,077,753.

### THE GOVERNMENT

#### ADMINISTRATION

**Acting Administrator:** C. I. Buffett, M.B.E.

The Administrator is appointed by the Governor-General of Australia. The Norfolk Island Council acts as an advisory body to the Administrator, who is its Chairman. The eight members are elected by adult franchise. Legislation must be referred to the Council for its advice.

### JUDICIAL SYSTEM

**Supreme Court of Norfolk Island;** appeals lie to the **High Court of Australia.**

**Judges:** The Hon. Mr. Justice P. Joske, C.M.G., The Hon. Mr. Justice E. A. Dunphy.

### PRESS AND RADIO

**Norfolk Island News:** Collins Head Rd.; f. 1975; weekly; Proprietor and Editor E. Howard.

**Norfolk Island Government Gazette:** Kingston; weekly.

**Norfolk Islander:** "Greenways Press", Queen Elizabeth Ave.; f. 1965; weekly; circ. 1,100; Co-Editors Mr. and Mrs. T. Lloyd.

**Norfolk Island Broadcasting Service:** Norfolk Island Administration; broadcasts about 45 hours of programmes a week; Broadcasting Officer Mrs. S. Ryves.

There were 1,150 radio receivers in 1975.

### FINANCE, TRADE AND TOURISM

**Banking:** There are branches of the Commonwealth Trading Bank, the Commonwealth Savings Bank of Australia, the Bank of New South Wales Trading Bank and the Bank of New South Wales Savings Bank.

**Trade Association:** Norfolk Island Chamber of Commerce.

**Tourism:** Norfolk Island Tourist Bureau, Burnt Pine.

### TRANSPORT

There are about 80.5 km. of roads, including 33 km. of sealed road. Regular air services operate between Sydney and Auckland and Norfolk Island. There are also regular shipping services from Sydney and New Zealand. A small tanker from Nouméa (New Caledonia) delivers petroleum products to the island.

# COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands are 27 in number and lie 2,768 kilometres north west of Perth in the Indian Ocean. The islands, which have an area of 14 square kilometres, form a low-lying coral atoll, densely covered with coconut palms. The population on June 30th, 1975, was 604, comprising 92 persons on West Island and 512 on Home Island, the only inhabited islands in the group.

The islands were declared a British possession in 1857 and came successively under the authority of the Governor of Ceylon (1878) and the Governor of the Straits Settlements (1886); they were annexed to the Straits Settlements and incorporated with the Settlement (later Colony) of Singapore in 1903. Administration of the islands was transferred to the Commonwealth of Australia in November 1955.

On July 23rd, 1975, the Official Representative Ordinance 1955–61 was repealed and replaced by the Administration Ordinance 1975. This provided for the appointment of an Administrator by the Governor-General of Australia.

Nearly all the islanders are employees of the Clunies Ross Estate which until recently owned all land and provided all social services and amenities on the island. The Australian Government is seeking to encourage the island community to develop an identity and interests separate to those of the Estate.

**Administrator:** R. J. Linford.

**Supreme Court, Cocos (Keeling) Islands:** Judge: The Hon. Mr. Justice E. A. Dunphy.

**Radio Cocos:** daily services from 15.30; to 23.30 Man. R. W. Pilsbury.

There were 650 radio receivers in 1975.

The main economic activity is the production of copra. Total exports in 1974/75 were 300 tonnes.

Australian Government charter aircraft carry passengers, supplies and mail to and from the Cocos every three weeks. Cargo vessels, also chartered by the Government, deliver supplies, usually at six-monthly intervals.

# OTHER TERRITORIES

### Australian Antarctic Territory

The Australian Antarctic Territory was established by Order in Council, proclaimed in August 1936, subsequent to the Australian Antarctic Territory Acceptance Act (1933). It consists of the portion of Antarctica (divided by the French territory of Adélie Land) lying between longitudes 45°E and 136°E, and between longitudes 142°E and 160°E. The Australian National Antarctic Research Expeditions (ANARE) maintains three permanent scientific stations, Mawson, Davis and Casey, in the territory. The area of the territory is 6,120,000 sq. kilometres.

### Heard Island and McDonald Islands

These islands are situated 4,000 km. south-west of Perth, Western Australia, and have been administered by the Australian Government since 1947, when it established a scientific research station on Heard Island (which functioned until 1955). The area is 370 sq. kilometres. There are no permanent inhabitants, but Australian expeditions visit the island from time to time. Heard Island is about 44 kilometres long and 20 wide. The McDonald Islands, with an area of about one sq. kilometre, lie approximately 40 km. to the west of Heard Island.

### Coral Sea Islands Territory

The Coral Sea Islands Territory was created in May 1969 and is composed of a number of islands situated east of Queensland between the Great Barrier Reef and 157° 10° E. longitude. The islands had been acquired by the Commonwealth by acts of sovereignty over a number of years. All are very small and they include Cato Island, Chilcott Islet in the Coringa Group, and the Willis Group. Three members of the Commonwealth Bureau of Meteorology are stationed on one of the Willis Group, but the remainder of the islands are uninhabited.

The Act constituting the Territory did not establish an administration on the islands but provides means of controlling the activities of those who visit them. The possibility of exploration for oil on the continental shelf and the increasing range and scope of international fishing enterprises made desirable such an administrative framework and system of law. The Governor-General is empowered to make ordinances for the peace, order and good government of the Territory, and the Supreme Court and Court of Petty Sessions of Norfolk Island have jurisdiction in relation to the Territory.

# THE BAHAMAS

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of the Bahamas consists of about 700 islands and over 2,000 cays and rocks extending from off the Florida coast of the U.S.A. to just north of Cuba and Haiti. The climate is mild and sub-tropical. English is the official language. The largest religious denominations are the Anglicans, Baptists and Roman Catholics. The flag has three equal horizontal stripes of blue, gold and blue, with a black triangle at the hoist extending across half the width of the flag. The capital, Nassau, stands on the island of New Providence.

### Recent History

As a British colonial territory, the Bahamas were given increased responsibility for their own affairs in 1964 and 1968, and in 1969 the constitution was modified to give the Government some control of external affairs. In the general election in 1968 the Progressive Liberal Party (PLP), led by Lynden Pindling, won a majority in the House of Assembly. In the elections of September 1972, which were dominated by the issue of independence, the PLP maintained its majority, and on July 10th, 1973, the Bahamas became an independent nation within the Commonwealth. The Bahamas was admitted to the United Nations in September 1973.

### Government

There is a 16-member Senate, nine members appointed by the Governor-General on the advice of the Prime Minister, four by the Leader of the Opposition and three after consultation with the Prime Minister. Together with the 38-member House of Assembly, elected for five years (subject to dissolution) by universal adult suffrage, it forms a bi-cameral Parliament to which the Cabinet is responsible. Executive power is vested in the Queen, represented by a Governor-General who is advised by the Cabinet.

### Defence

The Royal Bahamas Police Force is a semi-military organization as there is no permanent defence force.

### Economic Affairs

The economy is dependent on tourism, which accounts for over 70 per cent of G.N.P. The Government has introduced a programme of diversification in agriculture, finance and industry to lessen this dependence. A Bahamas Agricultural Corporation has been established to promote large-scale farming and the fishing industry. A five-year agricultural and livestock research programme on the island of Andros was initiated in 1973 by the U.S. Agency for International Development as a joint venture with the Bahamas Government.

Industrial development is based on the oil industry although the cement, pharmaceuticals and spirits industries are also expanding. The Government aims to attract light manufacturing and assembly industries and the Bahamas Development Corporation makes funds available by participating in ventures with foreign investors or with local concerns. The economy has suffered from the oil crisis. The oil transshipment terminal completed in 1974 is dealing with only 36 million barrels per year, compared with its capacity of 150 million, and a 500,000-barrel oil refinery is operating at half capacity. Legislation intended to develop the islands as an international shipping centre by allowing foreign-owned vessels to register under the Bahamian flag was approved in November 1976.

Although the Government is committed to retaining the Bahamas' status as a tax haven, recent measures to "Bahamianize" the companies registered in the Bahamas have resulted in higher stamp, property, immigration and company registration fees. Of the 15,000 companies registered in 1976, 90 per cent were foreign. Legislation taxing all undeveloped properties held by foreigners or foreign-owned companies has also been approved.

### Transport and Communications

Inter-island transport is by aircraft and boat and on the larger islands there are excellent roads for motor traffic. A 225-mile submarine 1,380-channel telecommunications system has been installed between the Bahamas and the U.S.A., and there are radio telephone connections between the islands.

### Social Welfare

The health service is centralized in Nassau, although cottage hospitals and health centres exist in several of the Family Islands. A Flying Doctor Service supplies medical attention to islands not already provided for. A National Insurance Scheme supplies death, sickness and injury benefits and there is a government-supported old age pension scheme.

### Education

The Bahamas contribute financially to the University of the West Indies, and in 1974 over 700 Bahamian students were registered at universities and colleges overseas. There is an extensive primary and secondary school education system. Education is free and compulsory between the ages of five and fourteen. In 1975 education received B$27.7 million, representing 22 per cent of the total budgetary expenditure.

### Tourism

The mild climate and beautiful beaches attract many tourists to the Bahamas and tourism is the principal source of income. In 1975, 1,380,860 tourists visited the islands.

Nationals of Commonwealth countries may visit the Bahamas without visas. Nationals of the following countries may visit without a visa for eight months: Belgium, Denmark, Finland, Greece, Iceland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, San Marino, Spain, Sweden, Switzerland, Turkey, U.S.A.;

and for three months: Austria, France, Federal Republic of Germany.

### Sport

Swimming, fishing, tennis, cricket, baseball, boat-racing, soccer and golf are popular sports.

### Public Holidays

**1977:** May 30th (Whit Monday), June 3rd (Labour Day), July 10th (Independence Day), August 1st (Emancipation Day), October 12th (Discovery Day), December 25th–26th (Christmas).

**1978:** January 1st (New Year's Day), March 24th (Good Friday), March 27th (Easter Monday).

### Weights and Measures

The imperial system is used.

### Currency and Exchange Rates

100 cents = 1 Bahamian dollar (B$)

Exchange rates (December 1976):

£1 sterling = B$1.66;
U.S. $1 = B$1.00.

# STATISTICAL SURVEY

## AREA AND POPULATION

**Area:** 5,382 square miles.

**Population:** 168,812 at Census of April 7th, 1970. Latest estimate: 203,946 (June 1975).

**Capital:** Nassau, on New Providence Island (population of island 101,503 in 1970).

## FISHING

(1975)

Total weight of catch: 1,385.2 metric tons.

## FINANCE

100 cents = 1 Bahamian dollar (B$).

Coins: 1, 5, 10, 15, 25 and 50 cents; 1, 2 and 5 dollars.

Notes: 50 cents; 1, 3, 5, 10, 20, 50 and 100 dollars.

Exchange rates (December 1976): £1 sterling = B$1.66; U.S. $1 = B$1.00.

B$100 = £60.35 = U.S. $100.00

*Note:* The Bahamian dollar was introduced in May 1966, replacing the Bahamian pound (at par with the pound sterling) at the rate of B$1 = B£0.35 or 7 shillings. The new currency had an initial value of 98 U.S. cents (U.S. $1 = B$1.0204), which remained in effect until February 1970. Since February 1970 the Bahamian dollar has been at par with the U.S. dollar, despite two devaluations of U.S. currency (in December 1971 and February 1973). In terms of sterling, the exchange rate was £1 = B$2.4490 (B$1 = 8s. 2d.) from November 1967 to February 1970; £1 = B$2.40 (B$1 = 8s. 4d. or 41.67p) from February 1970 to August 1971; and £1 = B$2.6057 (B$1 = 38.38p) from December 1971 to June 1972.

## THE CONSTITUTION

Parliament consists of the Queen, represented by a Governor-General, a nominated Senate and an elected House of Assembly. The Governor-General appoints the Prime Minister and the Cabinet on the advice of the Prime Minister. The Cabinet has not fewer than eight other ministers, of which one is the Attorney-General. The Governor-General appoints a Leader of the Opposition.

The Senate (upper house) consists of 16 members of whom nine are appointed by the Governor on the advice of the Prime Minister, four members on the advice of the Opposition Leader, and three on the Prime Minister's advice after consultation with the Opposition Leader. The House of Assembly (lower house) has 38 members. A Constituencies Commission reviews numbers and boundaries at intervals of not more than five years and can recommend alterations for approval of the House. The life of Parliament is limited to a maximum of five years.

The constitution provides for a Supreme Court and a Court of Appeal.

# BAHRAIN

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The State of Bahrain consists of a group of islands situated midway down the Arabian Gulf about 18 miles from the east coast of Saudi Arabia. The climate is cool and temperate from December to the end of March, becoming very hot and humid during the summer months. In August and September temperatures can rise to 44°C (111°F). The official language is Arabic, but English is widely spoken. Bahrain is a predominantly Muslim country, the population being divided between the Sunnis and Shi'ites. The national flag (proportions 5 by 3) is scarlet, with a vertical white stripe at the hoist, the two colours separated by a serrated line. The port of Manama is the capital.

### Recent History

Bahrain was a British Protected State from 1816 until 1971. In 1971 the British Government withdrew troops "east of Suez" and on August 15th, 1971, the Amir, Sheikh Isa, declared Bahrain an independent sovereign state, declining to join any federation of Gulf Emirates. Shortly afterwards Bahrain became a member of the United Nations and the Arab League. In August 1975 the arrest of left-wing dissidents preceded the dissolution of the National Assembly, and in August 1976 the Prime Minister announced that there were no immediate plans for the resumption of parliamentary life, although the re-convening of the National Assembly was under study.

### Government

Bahrain is an independent sovereign state ruled by an Amir through an appointed Cabinet. In August 1975 the National Assembly was dissolved (*see* National Assembly, p. 121).

### Defence

The Bahrain Defence Force consists of 1,600 men. In December 1971 Bahrain agreed to the U.S. Middle East fleet using part of the naval base formerly used by Britain. One year's notice of the termination of this facility was given to the U.S. Government during the October 1973 Arab-Israeli war. This was not implemented in 1974, but U.S. naval units are expected to leave by mid-1977.

### Economic Affairs

The traditional occupations of cattle breeding, agriculture and fishing are still practised throughout the islands. The main crops are vegetables, lucerne, other fodder crops and some dates. The Bahrain Fishing Company, jointly British and Bahraini owned, has now been operating successfully for several years.

Oil in commercial quantity was found in 1932 and has since been developed by the Bahrain Petroleum Company. Bahrain became a member of OAPEC in May 1970. Although Bahrain's production of crude oil is relatively small it has a large refinery which processed 76.4 million barrels in 1975.

Important new communications facilities and port installations have improved Bahrain's transit trade. Storage and refrigeration facilities, a slipway and marine engineering workshops have been completed at Mina Sulman. Bahrain has a free zone in which many British, American and local concerns have their headquarters. The ALBA aluminium smelter has an annual capacity of 120,000 tons, and an OAPEC dry dock, capable of accepting tankers of 400,000 d.w.t., is due to be completed in 1977.

In October 1975 the Government began to license "Offshore Banking Units" (*see* Banking section), by which Bahrain could become a major commercial centre in its own right.

### Transport and Communications

Roads are good and there is a national bus system. Muharraq Airport is just over three miles from the centre of Manama and is the destination of one of the Concorde services from London. The port of Mina Sulman is being further developed.

### Tourism

There are several archaeological sites of importance. Entry visas are required by all non-Bahrainis.

### Social Welfare

The State-run medical service provides comprehensive in-patient and out-patient treatment. There are also dentists, doctors and opticians in private practice. A Social Security Law covering pensions, industrial accidents, sickness, unemployment, maternity and family allowances was introduced in October 1976.

### Education

Education is free in Bahrain. In 1975/76, 41,751 children were receiving primary education in 1,099 classes. There were 8,533 pupils at intermediate level and 8,819 at secondary and technical level. The amount allocated to education in the 1976/77 budget was B.D. 11.4 million.

### Public Holidays

**1977:** September 14th–17th (Id ul Fitr), November 23rd–26th (Id ul Adha), December 13th (Mulsim New Year), December 16th (National Day), December 21st (Ashoura).

**1978:** January 1st (New Year's Day), February 20th (Mouloud, Birth of the Prophet).

## THE CONSTITUTION

A 108-article constitution was ratified in June 1973. It states that "all citizens shall be equal before the law" and guarantees freedom of speech, of the Press, of conscience and religious beliefs. Other provisions include the outlawing of the compulsory repatriation of political refugees. The constitution also states that the country's financial comptroller should be responsible to Parliament and not to the Government, and allows for national trade unions "for legally justified causes and on peaceful lines". Compulsory free primary education and free medical care are also laid down in the constitution. The constitution provides for a National Assembly, composed of the members of the Cabinet and 30 members elected by popular vote, although this was dissolved in August 1975.

## NATIONAL ASSEMBLY

In accordance with the 1973 constitution elections to a National Assembly took place in December 1973. About 30,000 electors elected 30 members for a four-year term. Since political parties are not allowed, all 114 candidates stood as independents, but in practice the National Assembly was divided about equally between conservative, moderate and more radical members. In addition to the 30 elected members, the National Assembly contained the members of the cabinet. In August 1975 the Prime Minister resigned because, it was said, the National Assembly was preventing the government from carrying out its functions. The Amir invited the Prime Minister to form a new government and two days later the National Assembly was dissolved by Amiri decree.

### OFFSHORE BANKING UNITS

Offshore Banking Units (OBUs) are being set up in Bahrain. An OBU is not allowed to provide local banking services but is allowed to accept deposits from governments and large financial organizations in the area and make medium-term loans for local and regional capital projects. The following 32 international banks have received licences to set up OBUs in Bahrain, and by the end of 1976 it was reported that they were all operational:

Algemene Bank Nederland
American Express International Banking Corporation
Arab Bank
Arab International Bank
Banco do Brasil
Bank of America
Bank of Bahrain and Kuwait
Bank of Nova Scotia
Bank Saderat Iran
Banque Arabe et Internationale d'Investissement
Banque de l'Indochine et de Suez

### INSURANCE

**Al Ahlia Insurance Co.:** Manama; f. 1976.

**Bahrain Insurance Co.:** P.O.B. 179, Manama; f. 1971; general accident, fire and life insurance; cap. B.D. 300,000; $66\frac{2}{3}$ per cent Bahrain owned; $33\frac{1}{3}$ per cent Iraq owned.

About fifteen foreign insurance companies are represented.

## TRADE AND INDUSTRY

**Bahrain Chamber of Commerce and Industry:** P.O.B. 248, Manama; f. 1939; 1,200 mems.; Pres. Muhammad Yousuf Jalal; Dir. Yusuf Muhammad Saleh.

**Michael Rice Group—Middle East:** P.O.B. 551, Manama; consultants to the Governments of Bahrain and Oman and to numerous local and foreign businesses trading in Bahrain, the Gulf area, Saudi Arabia and Kuwait.

There are no trade unions in Bahrain, but a law to make them legal was before the National Assembly at the time of its suspension in August 1975.

### OIL

**Bahrain National Oil Company (BANACO):** Manama; involved in exploration for gas, oil and other hydrocarbons, and their refining, transport, storage, marketing and export; controls the 60 per cent in BAPCO which the Government acquired in 1974; Chair. Yousef Ahmed al-Shirawi (Minister of Development and Industry).

**The Bahrain Petroleum Company (BAPCO) Ltd.:** Awali; the sole oil producer in Bahrain; owned jointly by Texaco and Standard Oil of California; a participation agreement, giving 60 per cent state participation to the Bahrain Government, was reached in September 1974; a new agreement, by which the Government will take over full ownership of BAPCO, is under negotiation; also operates the Bahrain refinery and holds a contract to supply natural gas to the ALBA aluminium smelter; Pres. W. O. Stolz.

## TRANSPORT

### ROADS

Most inhabited areas of Bahrain are linked by bitumen-surfaced roads. Public transport consists of taxis and privately owned bus services. A national bus company provides public services throughout the country. A modern network of dual highways is being developed.

### SHIPPING

**Director-General of Customs and Ports:** Sheikh Daij bin Khalifa al-Khalifa.

**Port Operations Manager:** Barry Metcalfe.

**Cargo Manager:** Hassan Shams.

Numerous shipping services link Bahrain and the Gulf with Britain and with Europe (Strick Line, V.N.S. "Kerk" Line, Hansa Line, Nationale Compagnie Havraise Peninsulaire and Compagnie Maritime Belge, Kuwait Shipping Company, Iraqi Maritime Transport Corporation, Lauro Line, Yugo-Linea, Polish Ocean Lines); with the East and West Coasts, of U.S.A. (Concordia Line, Nedlloyd Line); with Pakistan, India, Japan and the Far East and Australia (P & O, British & India Steam Navigation Company, Maersk Line, Everett Johnson Line, "K" Line of Japan, etc.). Though predominantly cargo operators, most of the foregoing lines have some passenger accommodation available; the British India Line operates a mail service between Bombay, Karachi, Bahrain and other Gulf Ports, and also carries passengers; the Mogul line operates mail and passenger services between Bombay and the Gulf, and the Pan Islamic Steamship Co. between Karachi and the Gulf ports.

The deep water harbour of Mina Sulman was opened in April 1962; it has six berths capable of taking vessels of draughts up to 9 metres. In the vicinity are two slipways able to take vessels of up to 1,016 tonnes and 73 metres in length, with services available for ship repairs afloat. Further development for Mina Sulman is planned, for completion in 1979. A trawler basin is the centre of a flourishing shrimping industry, the packaged produce being exported primarily to Europe, North America and Japan.

In November 1972 OAPEC approved Bahrain as the site for a £40 million dry dock large enough to accept super-tankers of up to 375,000 d.w.t. By December 1974, when work had begun, estimated costs had risen to £74 million and capacity was increased to 400,000 tons. The scheme should be completed in 1977.

## CIVIL AVIATION

Bahrain Airport has a first-class runway, capable of taking the largest aircraft in use, and it is the destination of British Airways' first Concorde service. A new jumbo jet airport terminal was opened in December 1971 and expansion is still in progress.

**Gulf Air:** P.O.B. 138, Bahrain; f. 1950; jointly owned by the governments of Bahrain, Qatar, United Arab Emirates and Oman; services linking Bahrain, Doha, Abu Dhabi, Dubai, Sharjah, Salalah and Muscat with London, Beirut, Cairo, Kuwait, Dharan, Shiraz, Bandar Abbas, Karachi, Bombay, Basra, Baghdad, Amman and Athens; fleet consists of four TriStars, five VC-10, four BAC 1-11, three F27, four Skyvans, two Beechcraft B80.

Bahrain is served by the following foreign airlines: Air India, Alia, British Airways, Cathay Pacific Airways, Cyprus Airways, Ethiopian Airlines, Iran Air, Iraqi Airways, KLM, Korean Airlines, Kuwait Airways, MEA, Pan American World Airways, PIA (Pakistan), Qantas, Saudia, TWA, Singapore International Airlines, UTA.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Bangladesh is surrounded by Indian territory except for a short south-eastern frontier with Burma and a southern coast fronting the Bay of Bengal. The climate is tropical monsoon with an average temperature from October to March of 67°F (19°C) and 84°F (29°C) from May to September. Three-quarters of the annual average rainfall (74 inches) occurs between June and September. About 85 per cent of the population speak Bengali, the State language, the remainder Bihari and some Hindi. The principal religion is Islam but there is a small minority of Hindus. The national flag is green, with a red disc in the centre. The capital is Dacca.

### Recent History

The modern state of Bangladesh began as East Pakistan, one of the five provinces into which Pakistan was divided at its separation from the old Indian Empire in 1947. East Pakistan and the four western provinces were separated by 1,000 miles of Indian territory. Dissatisfaction in East Pakistan at its dependence on a remote central government flared up when Urdu was declared Pakistan's official language. Bengali, the main language of East Pakistan, was finally admitted as the joint official language in 1954, and in 1955 Pakistan was reorganized into two wings, east and west, with equal representation in the central legislative assembly.

During the military rule of Field Marshal Muhammad Ayub Khan (1958–69) discontent continued in the eastern wing over the small part it had in Pakistan's army and commerce. Sheikh Mujibur Rahman became the leader of the Awami League, which called for autonomy for the East. He was imprisoned in 1966 and released at the fall of Ayub Khan in 1969.

General elections in December 1970 gave the Awami League a majority in Pakistan's National Assembly, and Sheikh Mujib should have become Prime Minister. The new President, Gen. Yahya Khan, would not accept this, however, and on March 26th the independence of the People's Republic of Bangladesh was proclaimed.

War followed and Sheikh Mujib was arrested. Refugees fled into India and in December 1971 the Indian army intervened in the fighting. Pakistan surrendered on December 16th and Bangladesh's independence became a reality. Sheikh Mujib was freed by Pakistan's new President, Zulfiqar Ali Bhutto, in January 1972 and on his arrival in Dacca he became Prime Minister. Elections held in March 1973 convincingly confirmed Mujib in office.

The new nation quickly achieved international recognition and was finally recognized by Pakistan in February 1974. Prisoners of war were released and some refugees were repatriated in a three-way exchange between India, Pakistan and Bangladesh. The exchange was completed in May 1974, though Pakistan still refuses to accept a number of Biharis who wish to leave Bangladesh.

Difficulties arose in 1974. Widespread famine sapped the economy which had already been deeply affected by the war. Political stability was threatened by opposition groups which resorted to terrorism and included both political extremes; at the end of December a state of emergency was declared and constitutional rights suspended. In January 1975 parliamentary government was replaced by a presidential form of government. Sheikh Mujib became President, assuming absolute power, and created the Bangladesh Peasants' and Workers' Awami League. All other parties were excluded from government.

In August 1975 Sheikh Mujib and his family were assassinated in a coup led by a group of army majors. Khandakar Mushtaq Ahmed, the former Minister of Commerce and a strong leader of the Awami League, assumed the Presidency, declared martial law and banned political parties. A counter-coup in November 1975 brought Brig. (later Major-Gen.) Khalid Musharaf to power as Chief of Army Staff, and the leaders of the August coup were exiled. Two days later Mushtaq Ahmed resigned as President in favour of the Chief Justice of the Supreme Court, Abusadet Mohammad Sayem. After assuming office, President Sayem dissolved Parliament. On November 7th a third coup overthrew Gen. Musharaf's four-day-old regime and power was assumed by the three service chiefs jointly, as Deputy Martial Law Administrators, under the non-political President Sayem. A neutral non-party government was formed.

The reinstated Chief of Army Staff, Major-Gen. Ziaur Rahman, took precedence over his colleagues in the new government, while the Chief of Air Staff, Air Vice-Marshal M. G. Tawab, was rumoured to be planning a coup in April 1976 and resigned in May. As a security measure the country was divided into eleven zones, each under the control of a martial law administrator from the army or navy.

General Zia promised an early return to representative government. During 1976 political prisoners were released and in August political activities were resumed, subject to certain restrictions. Preparations were made for a general election in February 1977, but in November 1976 elections were postponed indefinitely. At the same time about 2,000 people, including ex-President Mushtaq Ahmed, were arrested. In a major shift of power, Gen. Zia took over the office of Chief Martial Law Administrator, which had been held by the President, and President Sayem announced that he would remain as a constitutional head of state.

Relations with India were strained during 1976. Bangladesh alleged that guerrilla groups in north-east Bangladesh were Indian-trained. There was also dispute with India over the Farakka barrage, built by India, which diverts water from the Ganges just before it enters Bangladesh. The dispute was still unresolved in December 1976.

Relations with Pakistan, on the other hand, improved in 1976. Bangladesh and Pakistan exchanged ambassadors, postal and telecommunication links were resumed, and for the first time since independence Pakistan imported tea and jute from Bangladesh.

### Government

Since August 1975 Bangladesh has been governed under martial law. Parliament was dissolved in November 1975.

### Defence

Military service is voluntary. In 1975 the army had a total strength of 30,000; the navy 500; the air force 5,500.

The para-military forces included a National Defence Force of 16,000, the Bangladesh Rifles of 20,000.

### Economic Affairs

The economy is predominantly agricultural. The land is fertile but densely populated and average income per capita is extremely low by international standards. The disruptions caused by the war of secession and by frequent cyclones and floods depressed production in the years following independence so that in 1972/73 the gross domestic product was about 13 per cent lower in real terms than in 1969/70, the last "normal" year before the war.

Production of rice, by far the most important subsistence crop, fell sharply after independence and did not regain former levels until 1974. There was a record rice crop in 1975, accounted for by good weather and the availability of more fertilizers. However, with population growing at about 2.4 per cent a year, it has been necessary to import rice and wheat. This has taxed Bangladesh's foreign exchange resources.

Jute and tea are the main cash crops. Sales of raw jute and jute manufactures provide about 85 per cent of export earnings. The jute market is threatened by the sale of synthetic substitutes, and the Jute Mills Corporation is to launch a campaign to promote the sale of jute products. In 1976, for the first time since independence, there was a rise in production of raw jute of 13.4 per cent.

After independence in 1971 production fell in nearly all the main industries, because of damage to plant during the war, the departure of the largely non-Bengali financier and managerial class and the loss of many skilled Bengali workers. Most organized industry was nationalized and state corporations were set up for the major commodities. In January 1976 the new Government promised to pay compensation to foreign investors, whose assets had been nationalized in 1971, on condition that the money was reinvested in Bangladesh. Although many tea plantations and small industries were returned to the private sector, 75 per cent of industry was run by the public sector in 1976. Bangladesh has few mineral resources, although some natural gas has been produced, and there are the beginnings of steel and oil industries.

Trade patterns were disrupted by the separation from Pakistan, to which the tea crop had largely been exported before the war. However, during 1976 direct trade links were re-established with Pakistan: shipping and banking arrangements were agreed and a joint trade committee was set up between the two countries.

Owing to severe dislocation of the economy caused by the war of independence it seems likely that for the foreseeable future Bangladesh will remain heavily dependent on foreign aid. Total commitments of foreign aid from December 1971 to April 1976 amounted to U.S. $4,220 million. Food aid during 1974/75 was estimated at $363 million and other aid, excluding the IMF oil facility and short-term loans, at $535 million.

The country's first Five-Year Plan (1973–78), introduced by Sheikh Mujib, aimed at an annual growth of 5.5 per cent in G.D.P. and an annual increase of 2.5 per cent in per capita income. In the first year of the plan G.D.P. increased by 9.4 per cent, but a decline in agricultural and in manufacturing output resulted in a growth rate of only 2 per cent for 1974/75. In the following year, mainly due to a 17 per cent rise in foodgrain output and a 13 per cent increase in the production of raw jute, G.D.P. grew by 11.4 per cent. The cost of living during 1975/76 declined by about 20 per cent. However, the development outlay over the five-year plan period is expected to fall far short of that envisaged. A new Three-Year Development Plan was being formulated in 1976.

### Transport and Communications

Of some 3,500 miles of roads, about 2,340 are metalled. The railway system consists of about 1,750 route miles. Inland water transport is also of major significance and there are about 5,000 miles of navigable waterways, on which are located five major river ports. The chief seaports are Chalna and Chittagong and a modern one is being developed at Mangla. *Bangladesh Biman*, the national airline, operates internal services between major towns and international ones from the airports in Dacca and Chittagong.

### Social Welfare

The Government's main task after independence was to prevent epidemics and widespread malnutrition and to treat and rehabilitate war victims. The number of hospital beds has increased from 8,000, before independence, to 13,000. Half the doctors practising in Bangladesh are based in Dacca. A five-year health programme costing 1,660 million taka began in July 1973 with particular priority being given to the popularization of birth control.

### Education

Education is not compulsory but the Government provides free primary schooling for five years, and expects a pilot scheme for universal primary school enrolment to be completed by 1980. Secondary schools and colleges in the private sector vastly outnumber Government institutions: in 1975 Government high schools comprised 3 per cent of the country's total, while only 34 colleges, out of a total of 626, were Government-owned. There are six universities and it is hoped to establish a medical university in 1977.

Educational reform is designed to help meet the manpower needs of the country, and most importance is given to primary, technical and vocational education. About 20 per cent of the population is literate, and in 1975 only 20 per cent of girls received any education.

### Tourism

*Visas* are required by nationals of all countries except Denmark, the Federal Republic of Germany, Ireland, Norway, Sweden, the United Kingdom and Yugoslavia.

### Public Holidays

**1977:** May 1st (May Day), May* (Buddha Purnima), September 16th–18th (Id-ul-Fitr, end of Ramadan), September* (Shab-i-Bharat), October 3rd (Jamat Wida), October 14th (Durga Puja), November 23rd (Id-ul-Azha), December 16th (National Day), December 25th (Christmas), December 26th (Boxing Day).

**1978:** January 1st (New Year's Day), February 21st

(National Mourning Day), March 24th (Good Friday), March 26th (Independence Day), March 27th (Easter Monday).

* Dates of certain religious holidays are subject to the sighting of the Moon.

### Weights and Measures

The imperial system of measures is in force pending the introduction of the metric system.

1 maund=82.27lb.
1 seer=2.057lb.
1 tola=180 grains.

### Currency and Exchange Rates

100 paisa=1 taka.
Exchange rates (December 1976):
£1 sterling=25.45 taka;
U.S. $1=15.36 taka.

## FINANCE

100 paisa = 1 taka.
Coins: 1, 2, 5, 10, 25 and 50 paisa.
Notes: 1, 5, 10 and 100 taka.
Exchange rates (December 1976): £1 sterling = 25.45 taka; U.S. $1 = 15.36 taka.
100 taka = £3.93 = $6.51.

*Note:* The taka was introduced in January 1972, replacing the Pakistan rupee. At the same time the currency was devalued by 34.6 per cent, so that the taka would be at par with the Indian rupee. Until May 1975 the link with India was retained and Bangladesh maintained an official exchange rate against sterling at a mid-point of £1 = 18.9677 taka. Before the "floating" of the pound in June 1972 this was equivalent to a rate of U.S. $1 = 7.279 taka. In May 1975 the currency was devalued by 36.8 per cent against sterling, the new exchange rate being £1 = 30.00 taka. This remained in effect until April 1976, when a new rate of £1 = 28.10 taka was introduced. This was adjusted to £1 = 26.70 taka in June 1976 and to £1 = 25.45 taka in November 1976. The average market rate of taka per U.S. dollar was: 7.595 in 1972; 7.742 in 1973; 8.113 in 1974; and 12.019 in 1975.

# THE CONSTITUTION

(Promulgated November 1972; amended 1973, 1974, 1975)

*Note:* A state of emergency was proclaimed in December 1974 and fundamental constitutional rights such as freedom of speech and of associations were suspended. Martial law was imposed in August 1975 and parliament was dissolved in November 1975. In December 1976 the office of Chief Martial Law Administrator passed from the President to one of the three Deputy Chief Martial Law Administrators.

## SUMMARY

### Fundamental Principles of State Policy

The Constitution is based on the fundamental principles of the State, namely nationalism, socialism, democracy and secularism. It aims to establish a society free from exploitation in which the rule of law, fundamental human rights and freedoms, justice and equality are to be secured for all citizens. A socialist economic system is to be established to ensure the attainment of a just and egalitarian society through state and co-operative ownership as well as private ownership within limits prescribed by law. A universal, free and compulsory system of education shall be established.

### Fundamental Rights

All citizens are equal before the law and have a right to its protection. Arbitrary arrest or detention, discrimination based on race, age, sex, birth, caste or religion and forced labour are prohibited. Subject to law, public order and morality, every citizen has freedom of movement, of assembly and of association. Freedom of conscience, of speech, of the Press and of religious worship are guaranteed.

## GOVERNMENT

### The President

The President is the constitutional Head of State and is elected for a term of five years. He is eligible for re-election. The supreme control of the armed forces is vested in the President. He appoints the Vice-President, the Prime Minister and other Ministers as well as the Chief Justice and other judges.

### The Executive

Executive authority shall rest in the President and shall be exercised by him either directly or through officers subordinate to him in accordance with the constitution.

There shall be a Council of Ministers to aid and advise the President. All ministers shall hold office during the pleasure of the President.

### The Legislature

Parliament (*Jatiya Sangsad*) consists of a unicameral legislature. It comprises 300 members and, for ten years, an additional 15 women members. Members of Parliament, other than 15 women members, are directly elected on the basis of universal adult franchise from single territorial constituencies. Persons aged 18 and over are entitled to vote. The parliamentary term lasts for five years unless sooner dissolved by the President. War can be declared only with the assent of Parliament. In the case of actual or imminent invasion, the President may take whatever action he may consider appropriate.

## THE JUDICIARY

The Judiciary comprises a Supreme Court with High Court and an Appelate Division. The Supreme Court consists of a Chief Justice and such other judges as may be appointed by the President. The High Court division has such original appelate and other jurisdiction and powers as are conferred on it by the Constitution and by other law. The Appelate division has jurisdiction to determine appeals from decisions of the High Court division. Subordinate courts, in addition to the Supreme Court, have been established by law.

### Elections

An Election Commission supervises elections for the Presidency and for Parliament, delimits constituencies and prepares electoral rolls. It consists of a Chief Election Commissioner and other Commissioners as may be appointed by the President. The Election Commission is independent in the exercise of its functions. Subject to the Constitution, Parliament may make provision as to elections where necessary.

## POLITICAL PARTIES

In August 1975 President Mushtaq Ahmed banned all political parties and disbanded the Bangladesh Awami League. In August 1976 the Government permitted political activities to be resumed, with some restrictions laid down in a Political Parties Regulation. Before it may operate, every political party must submit its manifesto to the Government for approval. Any party which, in a general election, fails to win at least 10 seats in parliament, will be dissolved and the seats declared vacant. In December 1976 the Government was still reviewing the manifestos of a large number of parties, and had not issued a complete list of those allowed to operate. The following were among the first to be approved:

**The National Awami Party:** left-wing; Leader ABU NASER KHAN BHASHANI.

**The Bangladesh Jatiya League:** right-wing; sponsored by ATAUR RAHMAN KHAN.

**The Bangladesh Moslem League:** formed by amalgamation of former religious parties; right-wing; Leader KHAN ABDUS SABUR.

# BARBADOS

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

Barbados is the most easterly of the Caribbean islands, lying about 200 miles north-east of Trinidad. There is a rainy season from July to November and the climate is cool during the rest of the year. The mean annual temperature is about 26°c (78°f). The language used is English and the majority of the population are Anglicans. The national flag (proportions 3 by 2) has three equal vertical stripes of blue, gold and blue. On the gold band is the head of a black trident. The capital is Bridgetown.

### Recent History

A former British colony, Barbados achieved internal self-government in 1961 and full independence in 1966. Barbados was a member of the West Indies Federation from 1958 until its dissolution in 1962. In 1964 it was agreed that Bridgetown should become the capital of a proposed East Caribbean Federation, to include the Windward and Leeward Islands, but the Federation was never established. However, some common services, particularly transport and education, are shared with other Caribbean territories.

In the general election of September 1976 the Barbados Labour Party led by Mr. J. M. G. M. Adams won a large majority over the Democratic Labour Party, which had been in power since 1961 under the leadership of Errol Barrow. The election was fought on the issues of unemployment, wasteful spending and corruption. The Barbados Labour Party is committed to retaining a system of free enterprise and Mr. Adams stated that there would be no significant changes in foreign policy.

### Government

The British monarch, represented by a Governor-General, is head of state, and executive power is in the hands of a Cabinet consisting of a Prime Minister and not fewer than five other Ministers. Parliament consists of a Senate of 21 members, appointed by the Governor-General, and a House of Assembly with 24 members elected by universal adult suffrage, the voting age being 18.

### Defence

There is a small local volunteer force, the Barbados Regiment, but no standing armed forces.

### Economic Affairs

Sugar and tourism are the dominant sectors of the Barbados economy. Sugar production has fallen steadily since independence due to the sale of arable land for development, adverse weather conditions and the reluctance of young workers to enter the sugar industry. In 1975 the Government passed a Sugar Export Levy Act which increased the value of the 1975 crop by B$28.4 million despite the poor crop yield. However, sugar production fell in 1976 and, with a drop in world sugar prices, receipts were expected to be substantially lower. In an effort to lessen the dependence on sugar, the production of crops such as sea island cotton and onions has been developed. Production of cotton was doubled in 1975. An Agricultural Development Corporation was set up in 1974.

Tourism has also been affected by the world recession. The steady expansion which had been maintained since the 1960s slowed in 1974 and in 1975 the number of visitors dropped below the 1974 record total. The Government plans to increase tourist promotion and to set up training centres for hotel staff.

Government policy is to reduce dependence on agriculture and tourism and to diversify industry. It aims to attract light manufacturing industries and subsidiaries of North American companies through tax incentives.

Barbados has the most developed infrastructure in the Caribbean and the Government plans to deal with the unemployment problem, which is serious outside the harvest season, by continuing to develop and modernize. Bridgetown deep-water port is being expanded, a flour mill and grain terminal are to be built, and the fish-landing centres are being modernized.

With Guyana and Antigua, Barbados set up in 1967 the Caribbean Free Trade Association (Carifta), and in 1973 was a founder-member of the Caribbean Community (CARICOM).

### Transport and Communications

The situation of the island and its good harbour and airport facilities make it a natural entrepôt for the eastern Caribbean. There are 840 miles of roads, mostly bitumenized; the airport can handle jet aircraft; and the harbour at Bridgetown has moorings for eight ocean-going ships. Both the airport and port are being extended.

### Social Welfare

Estimated expenditure on health services was B$36.9 million in 1974–75. There are one government and three private (acute short-stay) hospitals, 17 day nurseries and seven children's homes. There is a government building scheme of group housing for lower income families and a National Insurance and Social Security Scheme was set up in 1967.

### Education

Education is free and the minimum school-leaving age is 16. The State provides for approximately 86 per cent of those eligible for primary and secondary education. The literacy rate is 97 per cent. There are ten comprehensive schools, ten grammar schools, a community college, a teacher training college, a technical institute and a polytechnic. At the Barbados branch of the University of the West Indies an in-service training programme for graduate teachers in secondary schools is run at the School of Education.

### Tourism

The natural attractions of the island consist chiefly of the healthy climate and varied scenery. In addition, there are many facilities for outdoor sports of all kinds. Bathsheba on the east coast is a well-known health resort. Revenue from tourism has increased from B$13 million in 1960 to $165.4 million in 1975.

*Visas* are not required by nationals of Commonwealth countries and Italy, by nationals of the U.S.A. (for periods not exceeding six months) and by nationals of Austria, Belgium, Colombia, Denmark, Finland, the Federal Republic of Germany, Greece, Iceland, Israel, Liechtenstein, Luxembourg, the Netherlands, the Netherlands Antilles, Norway, Peru, Spain, Surinam, Sweden, Switzerland, Tunisia and Turkey (for periods not exceeding three months), and by Venezuela nationals in possession of return tickets.

### Sport

Sporting facilities cover golf, tennis, cricket, football, rugby, hockey, polo, riding, horse racing, motor racing, fishing, swimming, surfing and boating. Cricket is especially popular. A new National Stadium was opened in 1970.

### Public Holidays

**1977:** May 1st (May Day), May 30th (Whit Monday), August 2nd (Emancipation Day), October 4th (United Nations Day), November 30th (Independence), December 25th–26th (Christmas).

**1978:** January 1st (New Year), March 24th–27th (Easter).

### Weights and Measures

The imperial system of weights and measures is used, with the exception of the U.S. gallon (231 cubic inches).

### Currency and Exchange Rates

100 cents = 1 Barbados dollar (B$).

Exchange rates (December 1976):
£1 sterling = B$3.31;
U.S. $1 = B$2.00.

# THE CONSTITUTION

The Constitution came into force in November 1966. Under its terms protection is afforded to individuals from slavery and forced labour, from inhuman treatment, deprivation of property, arbitrary search and entry, and racial discrimination; freedom of conscience, of expression, assembly, and movement are guaranteed.

Her Majesty's representative in Barbados is the Governor-General, who appoints the Prime Minister and, on the advice of the Prime Minister, appoints Ministers and some Senators.

The executive consists of the Prime Minister, appointed by the Governor-General as being the person best able to command a majority in the House of Assembly, and not fewer than five other Ministers. Provision is also made for a Privy Council, presided over by the Governor-General.

Parliament consists of two houses, the Senate and the House of Assembly. The Senate has 21 members, 12 appointed by the Governor-General on the advice of the Prime Minister, 2 on the advice of the Leader of the Opposition, and 7 as representatives of such interests as the Governor-General considers appropriate. The House of Assembly has 24 members, elected by universal adult suffrage for a five-year term. The minimum voting age is 18.

The Constitution also provides for the establishment of a Judiciary and a Legal Service, and Service Commissions for the Judicial Service, the Public Service and the Police Service. These Commissions are exempt from legal investigation; they have executive powers to deal with appointments, dismissals and disciplinary control of the services for which they are responsible.

# BENIN

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Benin is a narrow stretch of territory in West Africa, flanked by Nigeria and Togo. The climate is tropical in the north, with one rainy season and a maximum temperature of 46°c (115°F), and equatorial in the south, with average temperatures of 20°–34°c (68°–93°F) and two rainy seasons. French is the official language but each tribe has its own tongue. The majority of the people follow traditional beliefs and customs. Christians, mainly Roman Catholics, make up 15 per cent of the population and Muslims 13 per cent. The national flag is green and bears a five-pointed red star. The capital is Porto-Novo.

### Recent History

Benin, called Dahomey until 1975, was formerly part of French West Africa. It became a self-governing republic within the French Community in December 1958, and an independent state in August 1960. Since independence there have been five successful coups involving the army. Hubert Maga was overthrown in 1963 by Gen. Christophe Soglo, who installed Justin Ahomadegbe and Sourou Apithy in a coalition. They were ousted by Soglo himself in 1965, but he in turn was toppled in 1967. Lt.-Col. Alphonse Alley presided over the return to civilian rule and a strong presidential constitution was adopted. The disqualification of the main presidential candidates resulted in the annulment of the 1968 elections and Dr. Emile Zinsou was appointed President. Deposed in 1969, he was succeeded by a Military Directorate. The 1970 elections led to violence and a Presidential Council was formed consisting of the three candidates, MM. Maga, Apithy and Ahomadegbé, with the post of President rotating. In October 1972 the army, led by Major (now Lt.-Col.) Mathieu Kerekou, overthrew the Council and established a military Government.

In December 1975, Dahomey's "colonial" name was changed to an "authentic" title, the People's Republic of Benin. Kerekou intends to establish a Marxist-Leninist regime and to this end a sole party, the Benin People's Revolutionary Party, was founded in December 1975. Secularization of the country has so far entailed the state takeover of all primary schools, and religious holidays are shortly to be abolished. Meanwhile, much of the economy has been nationalized and the legal system has come under review. This has not been achieved without opposition, including two alleged attempted coups, in which the supporters of Dr. Zinsou and the Togolese authorities were accused of complicity, in January and October 1975. Popular unrest was most evident following the shooting by security forces of Capt. Michel Aikpe, Minister of the Interior, under mysterious circumstances in June 1975. During 1976 Kerekou turned his attention to foreign relations. The visit in July of President Eyadema of Togo marked an end to hostility between the two countries, and the borders, closed for several months, were reopened. In August Kerekou's status was enhanced by a visit to North Korea and China.

In January 1977, unidentified "imperialist mercenaries" were defeated by government troops after landing at Cotonou airport.

### Government

Benin is ruled by a military government of army officers. A 69-member National Council of the Revolution (CNR), headed by a National Political Bureau, is responsible for the development of the revolution. Nearly half the members of the CNR are civilians.

### Defence

Citizens of both sexes are liable for military service between the ages of 18 and 51 years. The army strength in 1975 was 1,500, the air force 150 and in addition there were paramilitary forces numbering 1,100 men. France provides technical assistance and equipment.

### Economic Affairs

Over 75 per cent of Benin's working population is employed in agriculture, which accounts for about 30 per cent of G.D.P., while crop processing is the basis of the country's industry, contributing 9 per cent to G.D.P. Benin is almost self-sufficient in foodstuffs, palm products being the main exports. Limestone is the only mineral exploited, but oil has been discovered offshore and a domestic hydroelectric scheme is being planned jointly with Togo. Heavily dependent on foreign aid, especially from France, to subsidize the budget and permanent balance of payments deficit, Benin's foreign capital receipts are being eroded to pay compensation to recently nationalized companies. Benin is an Associate Member of the EEC and a member of the West African Monetary Union.

### Transport and Communications

Transport services are few; three short sections of railway run inland from Cotonou, and the coast road links Togo in the west and Nigeria in the east. The main port is Cotonou.

### Education

Following legislation in 1975, the State is to take control of all education, which is to be free, public, compulsory and secular. Secondary school pupils and students must undertake nine months' teaching and three months' military and ideological training. The University of Benin was founded in 1970.

### Tourism

There is little tourism but safaris can be arranged to the two National Parks and the numerous hunting reserves. *Visas* are not required by French nationals.

### Sport

There is little organized sport but football is generally popular. Big game hunting is possible for tourists.

### Public Holidays

**1977:** May 1st (Labour Day), May 27th (Ascension), May 30th (Whit Monday), August 1st (National Day), August 15th (Assumption), September 15th (Id ul Fitr), October 26th (Felés Revolution), November 1st (All Saints' Day), November 30th (Felés Revolution), December 25th (Christmas), December 31st (Harvest Day).

**1978:** January 1st (New Year), March 27th (Easter Monday).

All religious holidays are to be abolished and replaced by five secular public holidays.

**Weights and Measures**

The metric system is in force.

**Currency and Exchange Rates**

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

1 franc CFA = 2 French centimes;
£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

## FINANCE

100 centimes = 1 franc de la Communauté financière africaine.
Coins: 1, 2, 5, 10, 25, 50 and 100 francs CFA.
Notes: 50, 100, 500, 1,000 and 5,000 francs CFA.
Exchange rates (December 1976): 1 franc CFA = 2 French centimes; £1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA; 1,000 francs CFA = £2.415 = $4.000.

*Note:* Between December 1958 and August 1969 the value of the franc CFA was 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. $1 = 246.853 francs CFA). Since January 1960 the franc CFA has been equivalent to 2 French centimes (1 French franc = 50 francs CFA). In August 1969 the franc CFA was devalued (in line with the French franc) to 3.2 milligrammes of gold, the exchange rate being 1 franc CFA = 0.3601 U.S. cent ($1 = 277.71 francs CFA) until August 1971. From December 1971 to February 1973 the official rate was 1 franc CFA = 0.3909 U.S. cent ($1 = 255.785 francs CFA). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the franc CFA has fluctuated on foreign exchange markets in line with the French franc. The average market rates of francs CFA per U.S. dollar were 252.2 in 1972; 222.7 in 1973; 240.5 in 1974; and 214.3 in 1975. In terms of sterling, the exchange rate between August 1969 and June 1972 was £1 = 666.503 francs CFA (1 franc CFA = 0.15004p).

# THE CONSTITUTION

After coming to power in the military *coup d'état* of October 26th, 1972, President Kerekou set up a Military Council of the Revolution to govern the country. In September 1973 the creation of institutions associating civilians with the military regime at all levels was announced. The highest of these was the National Council of the Revolution, under the Chairmanship of the Head of State, directed since November 1974 by a National Political Bureau. In February 1974 it was decided to reorganize the country into six provinces, each divided into districts. The rural and urban communes are administered by revolutionary committees and the villages and urban *quartiers* by local revolutionary committees.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

Bhutan lies in the Himalayas, with Tibet to the north and India to the south, and covers 46,800 square kilometres. Average monthly temperature ranges from 40°F (mean January) to 62°F (mean July). Rainfall is heavy, averaging over 120 inches in a year. The official language is Dzongkha, spoken mainly in western Bhutan. Written Dzongkha is based on the Tibetan script. Lamaism (a Tibetan form of Buddhism) is the chief religion. The state flag (proportions 5 by 4) comprises two triangles, one yellow and the other maroon, divided diagonally, with a white dragon superimposed in the centre. The capital is Thimphu.

### Recent History

In 1907 the *Tongsa Penlop* (governor) was elected hereditary monarch. Under a treaty concluded with the United Kingdom in 1910, the British Government obtained the right to guide Bhutan's external relations. This right passed to the Indian Government when it concluded a treaty with Bhutan in 1949. In recent years the late King Jigme Dorji Wangchuk vigorously asserted his country's sovereignty, which was exemplified by the entry of Bhutan into the UN in 1971 and her membership of the Colombo Plan a year later. King Jigme Singhye Wangchuk, who succeeded his father in 1972, has stressed that Bhutan's future still depends on Indian goodwill and friendship; although in September 1974 the Bhutan government told the Indian government that it did not wish to replace its present Indian advisers when their terms expired.

### Government

The system of government is unusual in that power is shared between the monarch, the Council of Ministers, the National Assembly (*Tsongdu*) and the monastic head (*Jey Khempo*) of Bhutan's 6,000 Lamas. Since June 1969, the King has been dependent on popular assent, i.e. he must seek a vote of confidence every three years. Any member of the National Assembly can table a vote of no-confidence at any time. The Assembly, which serves a three-year term, has 150 members, including 110 indirectly elected, 10 representing monastic bodies and 30 appointed officials.

### Defence

The 5,000 strong Royal Bhutanese Army is under the direct command of the King. Training facilities are provided by an Indian military training team. Though India is not directly responsible for the country's defence, the Indian Government has indicated that any act of aggression against Bhutan would be regarded as an act of aggression against India.

### Economic Affairs

The economy is predominantly agrarian. Forests cover about 70 per cent of the country's area, and further afforestation is envisaged. There is some small-scale industry, producing, for example, textiles, soap, slate and steel furniture. Traditional handicrafts such as bamboo and lacquer woodwork are also produced. Being underpopulated, Bhutan is dependent on foreign labour. To lessen this dependence on imported labour, many construction activities are to be mechanized.

Economic development has been a notable feature of recent years. The country's first bank, issuing Bhutan's own currency, was established in 1968. Bhutan is a member of the Colombo Plan and of ESCAP. Three Five-Year Plans, financed by Indian and UN aid, have brought about considerable improvements in roads, animal husbandry, irrigation, forestry and electricity generation. At least five hydro-electricity stations have been set up and Bhutan expects to export a surplus of energy in the future. Fifty per cent of expenditure under the fourth Five-Year Plan (1977–82) has been allocated to agriculture.

Since the 1960 ban on trade with Tibet, Bhutan's main trading partner has been India. Exports include fruit and timber, but the main earner of foreign currency since the inauguration of the postal system in 1972 has been postage stamps. These bring in an annual income of U.S. $60,000.

### Transport and Communications

By 1976 1,550 km. of roads linked western, eastern and central Bhutan with India, and extended from Ha in the west to Tashigang in the east. There is a shortage of road transport. Paro, the chief airport, is served by a weekly flight to and from Hashimara in West Bengal. An airport at Yangphulla serves the east.

### Social Welfare

In 1975 the country had six hospitals with a total of 300 beds, and 52 local dispensaries. A mobile hospital unit was operating in the remote central areas. There were 25 doctors. There are programmes to combat leprosy, tuberculosis and malaria, and family planning programmes have been introduced, with the aim of protecting child health while increasing the population.

### Education

Free education of eleven years' duration is available. There are no mission or private schools in Bhutan, all schools being subsidized by the Government. In 1975 there were over 100 schools. Some of them are co-educational and run along the lines of an American private school but using a British syllabus. About 500 Bhutanese students are receiving higher education in India on Indian Government scholarships. Bhutanese students are also receiving higher education and training in various technical fields in Australia, Japan, New Zealand, Singapore and the United Kingdom. A university college is to be built at Thimphu during the third Five-Year Plan.

### Tourism

Tourism was little developed before 1974. Hotels, transport and other facilities were then created in the west. Foreign tourists may visit Bhutan in package tours only, accompanied by guide/interpreters. *Visas* are required by all visitors.

**Sport**

There is little sport other than football and archery.

**Public Holidays**

The usual Buddhist holidays are observed.

**Weights and Measures**

The imperial system is in operation.

**Currency and Exchange Rates**

Currency: 100 chetrums = 1 ngultrum.

Exchange rates (December 1976):

£1 sterling = 14.63 ngultrums;
U.S. $1 = 8.92 ngultrums.

Indian currency is also legal tender.

### AID

Between 1961 and 1975 India granted 620 million rupees to Bhutan, financing 100 per cent of the first and second Five-Year plans and 90 per cent of the third. UN aid amounted to U.S. $4.1 million for the third plan period and will be $11 million in the fourth plan period (1977-82). Subsidies have also been granted to the value of Rs. 763.7 million to finance projects such as road and bridge construction, an airfield, geological, power and transport surveys and the cost of services.

### TRADE

All external trade is with India. The main exports are timber, fruit and coal, while textiles and light equipment are imported. Other export commodities include Bhutan Distillery products such as rum, gin, whisky and liquors, and Fruit Preservation Factory products such as orange and pineapple juices, jams and marmalades.

## THE GOVERNMENT

**Head of State:** His Majesty Druk Gyalpo Jigme Singhye Wangchuk (succeeded July 1972).

**Royal Advisory Council:** Established 1965 and composed of eight members, one representing H.M. the King, two representing the Lamas and five regional representatives of the people.

### COUNCIL OF MINISTERS

(*December* 1976)

**Minister of Trade, Industry and Forests:** H.R.H. Namgyal Wangchuk.

**Home Minister:** Lyonpo Tamji Jagar.

**Finance Minister:** Lyonpo Chogyal.

**Minister of Foreign Affairs:** Lyonpo Dawa Tsering.

**Minister of Communications:** Lyonpo Sangye Penjore.

(*Note:* The last-named also acts as Bhutan's Permanent Representative at the United Nations and as Bhutan's Representative in India).

### NATIONAL ASSEMBLY

A National Assembly (*Tsongdu*) was established in 1953. The Assembly has a three-year term and meets twice yearly in spring and autumn. Present strength is 150 members, of whom 110 are indirectly elected by village headmen. Ten seats are reserved for the monastery (*see* Religion below) and the remainder are occupied by officials, the ministers, their deputies and the 4 chief justice members of the National Assembly. The Assembly enacts laws, advises on constitutional and political matters and debates all important issues. Both the Royal Advisory Council and the Council of Ministers are responsible to it.

The country was formerly an Absolute Monarchy but H.M. the late King, Jigme Dorji Wangchuk, voluntarily surrendered the absolute powers of the Monarchy to establish a new political system described as "Democratic Monarchy". During 1969 Assembly sessions, the Assembly was made a sovereign body under the following provisions:

1. The right of veto by the King was removed.
2. Full freedom of speech is guaranteed.
3. Power to remove the King at any time by a two-thirds majority vote.
4. A vote of confidence in the King is to be taken every three years and requires a two-thirds majority. In the event of a no-confidence vote, the King is to abdicate but the Wangchuk Dynasty is always to provide the ruler in order of succession.
5. The Assembly has the right to appoint and remove ministers.

The system of government is unusual since power is in effect shared between the monarch, the executive and legislative branches and with the *Jey Khempo* or monastic head of Bhutan's 6,000 Lamas.

### LOCAL ADMINISTRATION

*Provinces:* There are eight Provinces each ruled by a Dzongda (District Officer).

*Regions:* The revenue is collected by the village headmen and remitted to the District Headquarters.

## POLITICAL PARTIES

There are no political parties in Bhutan.

## DIPLOMATIC REPRESENTATION

**Bangladesh:** New Delhi, India.

**India:** Lungtenzempa, Thimphu; *Representative:* I. P. Khosla.

## JUDICIAL SYSTEM

Bhutan has a Civil and a Criminal Code.

**High Court:** Established February 1968 to review Appeals from Lower Courts; 6 Judges.

**Appeal Court:** The Supreme Court of Appeal is H.M. the King.

**Magistrates Courts:** All cases are heard by Local Magistrates. Appeals are made to the High Court.

## RELIGION

**Religion:** The population practises a Tibetan form of Buddhism of the Mahayana branch. The sect of Buddhism supported by the dominant race (Bhutias) is the Dukpa (Red-Cap) Sect of Lamaism. Monasteries are numerous. The chief monastery is situated at Tashichho Dzong and contains 1,000 Lamas. There are some 6,000 Lamas in all headed by a monastic head (*Jey Khempo*).

# THE PRESS

**Kuensel:** Weekly government newspaper; in English, Dzongkha and Nepalese.

# FINANCE

## BANKING

**Bank of Bhutan:** Phuntsholing; 4 brs.; f. 1968; 40 per cent shares held by State Bank of India; auth. cap. Rs. 5m. and cap. p.u. Rs. 2.5m. (in Indian Rupees and Bhutanese currency in fully paid shares of Rs. 1,000 each). Dirs. nominated by the Bhutan Govt.: Chair. LYONPO CHOGYAL (Minister of Finance, Bhutan); H.R.H. ASHI DECHHEN WANGMO WANGCHUCK, H.R.H. NAMGYAL WANGCHUCK, DASHO TSHEWANG PENJORE; Dirs. nominated by the State Bank of India: M. MANDAL, P. K. SEN; Man. Dir. V. B. CHADHA (State Bank of India).

## INSURANCE

**Royal Insurance Corporation of Bhutan:** Chair. H.R.H. ASHI SONAM CHHODEN WANGCHUCK; Man. Dir. DASHO UGEN DORJI.

# TRANSPORT

## ROADS AND TRACKS

Main roads connect India with Western, Central and Eastern Bhutan. They are all fair weather metalled roads. An east-west lateral road, completed in 1975, stretches from Tashigang to Ha, and this is linked by a 90-km. road to Thimphu and Paro. The valley of Bhumthang in central Bhutan has been opened to vehicular traffic. Northern Bhutan has only mule tracks. In 1976 there was a total of 1,500 kilometres of roads. In 1972 motorable roads totalled 368 kilometres.

Ponies and mules are still the chief means of transport on the rough mountain tracks.

**State Transport Department:** Phuntsholing: f. 1962; operates a fleet of 146 trucks and buses (1976).

## TOURISM

Tourists may travel in package tours only and stay in government-run guest houses. There are hotels and other facilities at Phunstholing, Thimphu and Paro.

## CIVIL AVIATION

The main airport is at Paro; an airport at Yangphulla serves the east of the country.

# BOLIVIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Bolivia is a landlocked Andean state bordered by Chile and Peru to the west, Brazil to the north and east and Paraguay and Argentina to the south. Climate varies according to altitude from humid tropical below 1,500 metres to the cool and cold zones above 3,500 metres. The official language is Spanish. The Indians speak Quechua, Aymará or Guaraní. Roman Catholicism is the principal religion. The national flag (proportions 3 by 2) has equal horizontal stripes of red, yellow and green. The state flag has, in addition, the national emblem in the centre. The legal capital is Sucre. The administrative capital and seat of government is La Paz de Ayacucho.

### Recent History

In 1969, Dr. Luis Adolfo Siles Salinas, the vice-president, succeeded to the presidency on the death of Gen. René Barrientos, but in September Gen. Alfredo Ovando Candía assumed power by *coup d'état* and established a left-wing military government. The American-owned Bolivian Gulf Oil Company was expropriated and nationalized, and agrarian reforms were promised. Little was achieved and opposition increased. In October 1970 Gen. Ovando was deposed and Gen. Juan José Torres Gonzales emerged as President, pledging support for agrarian reform and worker participation in management. A "People's Assembly" was allowed to meet which called for extreme socialist measures to be taken, causing disquiet in right-wing circles. Gen. Torres' failure either to purge his right-wing opponents from the army or to arm his civilian supporters led to his deposition in August 1971 by Col. (later Gen.) Hugo Banzer Suárez, who became the country's fifty-eighth president in 146 years. Col. Banzer drew support from the right-wing Falange Socialista Boliviano and a section of the Movimiento Nacionalista Revolucionario (MNR), as well as from the army. During 1972 strains appeared in the ruling coalition and many of the MNR were arrested. In June 1973 President Banzer announced an imminent return to constitutional government but elections were later postponed to June 1974. The MNR withdrew its support and entered into active opposition.

Following an attempted military *coup* in June 1974 the cabinet was replaced by an all-military one. After an attempt to overthrow him in November 1974 President Banzer announced a state of siege and declared that elections had been postponed indefinitely and that his military régime would retain power until at least 1980. All political and union activity has been banned until that time. In 1975 opposition to the military government came mainly from the Church which was accused of plotting against Banzer. Several labour leaders were arrested for conspiracy.

In January 1976 dissension within the army led President Banzer to replace the three armed forces commanders and several ministers. Members of opposition groups and trade unions were expelled after the alleged discovery of a plot to install a Communist dictatorship. In June political unrest intensified with widespread strikes among tin miners and disturbances in the universities, following the suspicious death of former President Torres. A state of siege was declared, universities were closed and troops occupied the mining areas and took over their local radio stations. Many miners and students were arrested. The strikes officially ended at the end of June as the Government agreed to a 30 per cent wage rise but in late 1976 the strikes and disturbances were reportedly continuing as a protest against the Government's economic policies and the lack of political and trade union freedom.

In 1976 opposing proposals were put forward by Peru and Chile to give Bolivia access to the Pacific, but no decision had been made by the end of 1976.

### Government

Since 1969 Bolivia has been under military rule, sometimes with the participation of political parties. In 1974 the Government banned political activity until 1980.

### Defence

Military service for one year is compulsory for all males at nineteen. The armed forces number 22,000 men, of whom the army has 17,000, the air force 4,000, and the navy 1,000. Para-military forces number about 5,000 men. Defence expenditure for 1974 amounted to 691 million pesos.

### Economic Affairs

The economy still depends largely on the export of tin, although progress is being made to diversify exports. Tin accounted for only 35 per cent of export earnings in 1975, compared with 60 per cent in 1969.

Agriculture employs two-thirds of the labour force. Although subsistence farming predominates in the central highlands, agricultural production is more effective in the tropical lowlands. Potatoes, maize, rice and wheat are the principal agricultural products for domestic consumption, while sugar, cotton, coffee and, increasingly, timber are the principal agricultural exports. Agriculture is a priority sector with increased government investment aimed at eventual self-sufficiency.

While tin is most important, lead, tungsten, antimony, silver, zinc and other minerals are also mined. In 1976 important deposits of lithium and phosphates were discovered. Crude petroleum and natural gas are becoming increasingly important. In 1975 Bolivia produced 14.7 million barrels of crude oil, 8.3 million of which were exported, and 3,946 million cubic metres of natural gas, of which 1,557 million was exported to Argentina. The Government is encouraging further exploration and plans to increase oil output to 49.3 million barrels by 1980 and gas production to 125,300 million cubic feet. A major oil deposit found near Santa Cruz in 1976 is expected to produce 20,000 barrels per day by 1978. A new mining code, announced in 1974, is designed to encourage foreign investment, although the Government intends to maintain a

70 per cent overall control in the production of minerals and a 51 per cent interest in any joint venture enterprises. Projects include doubling the capacity of the Santa Cruz–Arica pipeline to 50,000 barrels per day and a new pipeline with a capacity of 20,000 barrels per day to be built between Santa Cruz and Choreti. Between 1976 and 1981 the Government is to invest $500 million in various petrochemical complexes, one in Oruro with 60 per cent participation by Argentina and one in the south-east with Brazilian participation.

Following a 40.6 devaluation of the currency in October 1972, Bolivia experienced severe inflation. Retail prices in La Paz rose by 35 per cent in 1973, and by over 75 per cent in the year to February 1974, but thereafter inflation was brought under control. The rise in the cost of living was 39 per cent for 1974, 12 per cent in 1975 and only 5.3 per cent in the year to May 1976.

Bolivia's economic growth rate in 1974 was 6.7 per cent and this increased to 7.3 per cent in 1975 despite the general economic recession, lower international prices and the subsequent fall in the value of Bolivia's exports and a trade deficit which was covered by the Government drawing on its international reserves. In 1976 the Government introduced stringent wage and price controls. This, together with import controls and a rise in the domestic price for petroleum, should result in an improved economic position. Income from tin exports should rise as Bolivia negotiated a higher ceiling price with the International Tin Council in late 1975. Various international loans, including a $75 million Eurodollar loan, are being negotiated to cover several important projects.

The Government's short-term policy is to maintain current growth, monetary stability and free convertibility, and the long-term aims are to integrate the people into a modern industrial society and to develop natural resources. The five-year plan (1976–81) calls for an investment of $3,000 million, 60 per cent of which will require external financing. The plan gives priority to agriculture, industry, mining and petroleum. It is hoped to diversify the country's industrial base and emphasis is being laid on current smelting projects and the development of a steel industry.

Bolivia is a member of LAFTA and the Andean Development Corporation.

### Transport and Communications

In 1976 there were 3,589 km. of railways, linking the main towns. Both the railway and road networks are being lengthened. A 560 km. highway runs from Santa Cruz to Cochabamba, serving a colonization scheme on virgin lands around Santa Cruz. The Pan-American highway, linking Argentina and Peru, crosses Bolivia from South to North-west. Bolivia also has over 14,000 km. of navigable rivers which connect with the Amazon basin. In 1976 Argentina gave Bolivia free-port facilities at Rosario on the Paraná River. This gave Bolivia an independent Atlantic outlet. There are hopes of securing a Pacific outlet from Chile. Internal and international air services are provided by Lloyd Aéreo Boliviano and Transportes Aéreos Militares.

### Social Welfare

There are benefits for unemployment, accident, sickness, old age and death. The Government intends to introduce a social security system for rural workers by 1980.

### Education

The illiteracy rate was 60 per cent in 1975, despite a ten-year literacy campaign introduced in 1966. Education is free and, where possible, compulsory between the ages of 7 and 14. There are nine universities.

### Tourism

Lake Titicaca, at 3,800 metres above sea-level, offers excellent fishing and on its shore stands the famous Catholic sanctuary of Copacabana. The Andes peaks include Chacaltaya, which has the highest ski-run in the world. Tourists are mainly from the U.S.A. and South American countries.

*Visas* are not required to visit Bolivia by nationals of Argentina, Austria, Belgium, Canada, Chile, Denmark, France, the Federal Republic of Germany, Italy, Liechtenstein, Luxembourg, Norway, Peru, Spain, Sweden, Switzerland, the United Kingdom and the U.S.A. All visitors require an exit permit.

### Sport

Football is the most popular sport.

### Public Holidays

**1977:** May 1st (Labour Day), June 9th (Corpus Christi), August 5th–7th (Independence), October 12th (Discovery of America), November 2nd (All Souls' Day), December 25th (Christmas).

**1978:** January 1st (New Year), February 26th–27th (Carnival), March 23rd (Memorial Day and Maundy Thursday), March 24th (Good Friday).

### Weights and Measures

The metric system is officially in force.

### Currency and Exchange Rates

100 centavos = 1 peso Boliviano.
Exchange rates (December 1976):
£1 sterling = 33.14 pesos;
U.S. $1 = 20.00 pesos.

## FINANCE

100 centavos = 1 peso Boliviano.

Coins: 10, 20, 25 and 50 centavos; 1 peso.

Notes: 1, 5, 10, 20, 50 and 100 pesos.

Exchange rates (December 1976): £1 sterling = 33.14 pesos; U.S. $1 = 20.00 pesos.

100 pesos Bolivianos = £3.02 = $5.00.

*Note:* The Bolivian peso was introduced in January 1963, replacing the boliviano at the rate of 1 peso = 1,000 bolivianos. Until October 31st, 1972, the central exchange rate was U.S. $1 = 11.875 pesos. Since October 1972 the rate has been $1 = 20.00 pesos. In terms of sterling, the exchange rate was £1 = 28.50 pesos from November 1967 to August 1971; and £1 = 30.94 pesos from December 1971 to June 1972.

# THE CONSTITUTION

*Note:* The Constitution is suspended at present.

Bolivia became an independent republic in 1825 and received its first Constitution in November 1826. Since that date a number of new Constitutions have been promulgated. Following the *coup d'état* of November 1964 the Constitution of 1947 was revived. Under it the executive power is vested in the President and members of his cabinet. In the revised Constitution the President is elected by direct suffrage for a four-year term and is not eligible for immediate re-election. In the event of his death or failure to assume office, the Vice-President takes his place and, failing the Vice-President, the President of the Senate.

The President has power to appoint members of the cabinet, diplomatic representatives, and archbishops and bishops from a panel proposed by the Senate. He is responsible for the conduct of foreign affairs and is also empowered to issue decrees, and initiate legislation by special messages to Congress.

Congress consists of a Senate and Chamber of Deputies and meets annually on August 6th at La Paz. Its ordinary sessions last only 90 working days, which may be extended to 120. Each of the nine departments (La Paz, Chuquisaca, Oruro, Beni, Santa Cruz, Potosí, Tarija, Cochabamba and Pando) into which the country is divided for administrative purposes, elects three senators to serve for a period of six years. One-third of the Senate retires every two years. The 102 deputies are elected for four years, half the Chamber retiring every two years.

The supreme administrative, political and military authority in each department is vested in a prefect appointed by the President. The sub-divisions of each department, known as provinces, are administered by sub-prefects. The provinces are further divided into cantons. There are 94 provinces and some 1,000 cantons. The capital of each department has its autonomous municipal council and controls its own revenue and expenditure.

Public order, education and roads are under national control.

A decree issued in July 1952 conferred the franchise on all persons who had reached the age of 21, whether literate or illiterate. Previously the franchise had been restricted to literate persons.

The death penalty was restored in October 1971.

### INLAND WATERWAYS

By agreement with Paraguay in 1938 (confirmed in 1939) Bolivia has an outlet on the River Paraguay. This arrangement, together with navigation rights on the Paraná, gives her access to the River Plate and the sea. The River Paraguay is navigable for vessels of 12-foot draught for 288 km. beyond Asunción in Paraguay and for smaller boats another 960 km. to Corumbá in Brazil.

In 1976 Argentina granted Bolivia free port facilities at Roserio on the River Parará. Most of Bolivia's foreign trade is handled through the ports of Matarani (Peru), Antofagasta and Arica (Chile), Rosario and Buenos Aires (Argentina) and Santos (Brazil).

Bolivia has over 14,000 km. of navigable rivers which connect most of Bolivia with the Amazon basin.

# BOTSWANA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Botswana lies between the Republic of South Africa to the south and east, Rhodesia to the north-east and Namibia (South West Africa) to the west and north. A short section of the northern frontier adjoins Zambia. The climate is generally sub-tropical, with hot summers and an average annual rainfall of 18 inches. The territory is largely near-desert, and most of the population lives along the eastern border by the main railway line. The languages used are Tswana and English. The chief religion is Christianity. The national flag (proportions 3 by 2) consists of a central horizontal band of black edged with white, between bands of azure above and below. The capital is Gaborone.

### Recent History

Formerly one of the British High Commission Territories in southern Africa, Bechuanaland became internally self-governing in March 1965 and, as Botswana, attained full independence within the Commonwealth in 1966.

Political life has been dominated by Sir Seretse Khama's Botswana Democratic Party (BDP) which won the general elections in 1965, 1969 and 1974, with little real opposition. A liberal conservative, Sir Seretse has consolidated his leadership of the country over the years while pursuing a national programme of democracy, development, self-reliance and unity.

New-found mineral wealth is stimulating the transition from a predominantly rural to a mixed economy, as well as creating new problems for the country. Growth of the urban at the expense of the rural sector, unequal distribution of capital and incidents of labour unrest and criticism of the public services present obstacles for development, although Botswana has won increasing respect for its stability of government, non-racialism and democratic practice.

In southern African politics, Botswana occupies a delicate position which is reflected in a foreign policy of moderation and non-alignment. While openly critical of the social and political structures in the neighbouring white-ruled countries, it depends heavily upon them for its trade and communications. Sir Seretse has maintained a firm attitude of opposition by refusing financial aid and diplomatic relations, and by repeatedly denouncing *apartheid* and accepting political refugees. The decision to open the border with Zambia and the establishment of full diplomatic relations with the Soviet Union and the People's Republic of China further strengthened Botswana's political independence from South Africa.

Sir Seretse played a leading role in the attempts to encourage a peaceful solution to the constitutional problems of Rhodesia and Namibia but in 1976 joined the Presidents of Angola, Mozambique, Tanzania and Zambia in condemning the Turnhalle talks on the future of Namibia and the proposed arrangements for transition to black majority rule in Rhodesia agreed between the Rhodesian Prime Minister, Ian Smith, and the U.S. Secretary of State, Dr. Henry Kissinger. Botswana's economic reliance on Rhodesia and South Africa will decrease when it withdraws from the customs union with South Africa and nationalizes its vital Rhodesian-owned railway, and when the Bot-Zam highway is completed later in 1977.

### Government

Legislative power is vested in the National Assembly, with 38 members holding office for five years, including 32 elected by universal adult suffrage. Executive power is vested in the President, elected by the Assembly for its duration. He appoints and leads a Cabinet which is responsible to the Assembly. The President has powers to delay implementation of legislation for six months; and certain matters also have to be referred to the 15-member House of Chiefs for approval though they have no power of veto. Local government is effected through nine district councils and three town councils (Gaborone, Lobatse and Francistown).

### Defence

Botswana has a paramilitary police force of 1,572.

### Economic Affairs

When Botswana gained independence in 1966 the economy was limited almost entirely to cattle-raising and, as a result of several years of drought and crop failure, over half the population relied on relief feeding schemes from abroad. The United Kingdom continued to supply budgetary aid until 1972, when higher customs receipts and new revenues from mining allowed for budgetary self-sufficiency. The economy is still based chiefly on livestock raising and agriculture which provide a livelihood for over 80 per cent of the population and which, until recently, were the source of almost all the country's exports. The predominant cattle industry depends on the periodic renewal of the agreement whereby the EEC rebates 90 per cent of its levies on Botswana's vital beef exports to the United Kingdom.

The fastest growing economic sector is mining, which already provides a major source of exports and revenues, although, with the exception of diamonds, production has not yet reached the expected levels. In addition to the established extraction of asbestos, manganese, coal, copper, copper-nickel and diamonds, deposits of brine, soda-ash, salt, sodium sulphate, potash and gypsum have still to be developed.

The Selebi-Pikwe copper and nickel operation, in which the Government has a 15 per cent share, began production in 1974. More than 40 million metric tons of ore were located and potential output was estimated at 46,000 tons of copper-nickel matte per year. Full capacity was reached in 1976. The biggest deposit of diamonds outside the U.S.S.R. was discovered at Orapa in 1967 and production began four years later. Annual output is expected to rise from 2.4 million carats in 1976 to 4.5 million carats in 1978. The DK1/2 kimberlite pipes, which are smaller than the deposits at Orapa but contain higher quality diamonds, began production at the end of 1976 with an initial output of 200,000 rising to 350,000, carats per year. In July 1975 the Government increased its equity stake in the diamond operations from 15 to 50 per cent. Its share of the profits rose from 57.5 to between 65 and 70 per cent.

The manufacturing sector is restricted to the processing of meat and minerals although there are plans for expansion which will allow for the manufacture of soda ash. Botswana, with Lesotho and Swaziland, is linked to South Africa in a customs union but the establishment of its own currency and central bank in August 1976 is an indication of its growing economic self-confidence. The budget has shown a surplus since 1973 and current expenditure of R60.6 million and revenues totalling R68.0 million were announced for the 1976/77 budget, with R38 million for development, most of which will go towards the Accelerated Rural Development Programme, education and road construction schemes.

At the end of 1976 the economy was suffering from inflation, reduced foreign aid and the fall in world commodity prices. Due to a lack of finance, certain projects included in the National Development Plan (1973–78) have been postponed.

Botswana's trade deficit, which goes back to 1962, remains considerable, as the rapid growth of mineral exports has been accompanied by an increased demand for imported manufactured goods and machinery. Development is also hampered by frequent drought, inadequate internal and external communications and a shortage of trained manpower. In the long term, the economic outlook is promising in view of Botswana's highly developed beef industry and its vast mineral resources which offer excellent prospects for the growth of ancillary industries, employment opportunities and economic diversification. The expansion of the tourist industry, which currently provides an annual revenue of R2.5 million, will create further economic opportunities.

### Transport and Communications

Communications are largely undeveloped, with only about 2,400 km. of main roads, and the lifeline of the country is the railway between South Africa and Rhodesia which is owned and operated by Rhodesia Railways. There are several airfields served by government and private charter companies. In the north the Okavango River represents the only major source of water, one which it has not yet proved possible to exploit, either for irrigation or transport. A large road development plan is under way. In June 1973 the Botswana Government announced that an American firm would build the Botswana-Zambia (Bot-Zam) highway from Nata to Kazungula. The road will increase opportunities for trade with Zambia, and connect the remote north of the country with the more populated south. It is scheduled to be completed in 1977 with an American loan of $16.6 million.

### Social Welfare

Health services are being developed, and at the end of 1975 there were 13 general hospitals, one mental hospital, 7 health centres, 200 health posts and 58 clinics.

### Education

In 1975 there were 116,293 pupils in primary schools, mostly financed by district councils, assisted by Government grants in aid. In addition, 12,098 students received secondary education, and 507 students received higher education abroad or at the University of Botswana and Swaziland in Botswana. Literacy in Tswana is about 25 per cent, and in English just over 15 per cent. The Government aims to provide free education by 1980.

### Tourism

There are eight game reserves, including Chobe, only a short drive from Victoria Falls by first-class roads. Most of the main centres of population have hotels, and photographic and big-game safaris can be organized.

*Visas* are not required to enter Botswana by nationals of Commonwealth countries, Austria, EEC countries, Finland, Greece, Iceland, Israel, Liechtenstein, Norway, San Marino, South Africa, Sweden, Switzerland, the U.S.A. and Uruguay.

# THE CONSTITUTION

The current Constitution of Botswana came into operation in September 1966.

## EXECUTIVE

### President

Executive power lies with the President of Botswana, who is also Commander-in-Chief of the armed forces. Election for the office of President is linked with the General Election of members of the National Assembly. Presidential candidates must receive at least 1,000 nominations. If there is more than one candidate for the Presidency, each candidate for office in the Assembly must declare which presidential candidate he supports. The candidate for President who commands the votes of more than half the elected members of the Assembly will be declared President. If the Presidency falls vacant the members of the National Assembly will themselves elect a new President. The President will hold office for the duration of Parliament. After the 1974 elections the President became an ex-officio member of the assembly.

### Cabinet

There is also a Vice-President, whose office is Ministerial. The Vice-President is appointed by the President, and acts as his deputy in the absence of the President. The Cabinet consists of the President, the Vice-President, and ten other Ministers appointed by the President. Every member of the Cabinet accepts responsibility before the National Assembly for the policies of the Government.

## LEGISLATURE

The legislative power is vested in Parliament, consisting of the President and the National Assembly, acting after consultation in certain cases with the House of Chiefs. The President may withhold his assent to a Bill passed by the National Assembly, but if it is again presented to him after six months, he is required to assent to it unless he dissolves Parliament within 21 days.

### House of Chiefs

The House of Chiefs has the Chiefs of the eight principal tribes of Botswana as *ex officio* members, 4 members elected by sub-chiefs from their own number, and 3 members elected by the other 12 members of the House. Bills and motions relating to chieftaincy matters and alterations of the Constitution must be referred to the House, which may also deliberate and make representations on any matter, including Bills affecting tribal interests.

### National Assembly

The National Assembly consists of the Speaker, the Attorney-General, who does not have a vote, 32 elected members and 4 specially elected members. There is universal adult suffrage. The life of the Assembly is five years.

The Constitution also contains a code of human rights, enforceable by the High Court.

## TRANSPORT

### RAILWAYS

The main railway line from Cape Town to Rhodesia passes through the country entering at Ramatlhabama and leaving at Ramaquabane (246 km.) reaching Rhodesia at Bakaranga. Two new railway lines to serve the Selebi-Pikwe mining complex and the Morupula colliery were completed in June 1973.

**Rhodesia Railways:** Bulawayo, Rhodesia; operate the railway system in Botswana.

### ROADS

In 1974 there were 7,812 km. of maintained roads. Of these, 6,486 km. were earth roads, 1,107 km. were gravel roads and only 219 km. were bitumenized. The road between Lobatse and Francistown is being bitumenized. An American financed 400-mile road from Nata near Francistown to Kazungula is expected to be completed by 1977. Zambia has installed a new 50-ton ferry at Kazungula which will improve the ferry service between this politically vital area, the meeting place of the borders of Rhodesia, Botswana, Zambia and Namibia (South West Africa), and Livingstone in Zambia.

# BRAZIL

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Federative Republic of Brazil lies in central and north-eastern South America. To the north are Venezuela, Colombia, Guyana, Surinam and French Guiana, to the west Peru and Bolivia, with Paraguay, Argentina and Uruguay to the south. Climatic conditions vary from the tropical rain forest of the Amazon basin to the savannah grasslands of the central and southern uplands. The language is Portuguese. Over 90 per cent of the population is Roman Catholic. The national flag (proportions 10 by 7) is green with a yellow diamond in the centre charged with a blue celestial globe. The capital is Brasília, though some administrative offices still remain in Rio de Janeiro.

### Recent History

From 1930 to 1945, Brazil was ruled by the benevolent dictatorship of Dr. Getúlio Vargas. Under him, stability was maintained, despite strong undercurrents of both Fascist and Communist opposition, and his corporative state made steady economic progress. Vargas resigned in 1945 and in 1946 Eurico Dutra was elected President. Vargas was re-elected President in 1950, but failed to create the necessary stability and committed suicide in 1954. The next President was Dr. Juscelino Kubitschek, the founder of Brasília. President Kubitschek was succeeded briefly by Dr. Jânio Quadros and then by the left-wing President João Goulart, who was overthrown by a military *coup* led by Gen. Humberto Castelo Branco in April 1964. Marshal Artur da Costa e Silva, who was elected President in October 1966, took office for a four-year term in March 1967. In December 1968 President da Costa e Silva promulgated an Institutional Act giving himself the power to govern the country by decree.

In early 1969 the Brazilian Government extended the security laws in order to combat opposition groups and growing violence. President da Costa e Silva resigned, due to ill health, and the Government was taken over by the three heads of the armed forces in September 1969.

In October 1969 Lt.-Gen. Emílio Garrastazú Médici took office as President, having been elected by Congress under the new Constitution passed by the government junta. Urban guerrilla activity was widespread during 1970 but has since been largely eliminated by stern security measures. Gen. Ernesto Geisel, chosen by an electoral college as President, took office in March 1974. Despite his more liberal outlook, the opposition party, the MDB, made sweeping gains in the congressional elections of November 1974, and calls were made for an end to military government. General Geisel re-affirmed his intention to re-establish stable democratic institutions and considerably relaxed press censorship. However, in 1976 it was reported that political arrests and torture continued, and Church-State relations deteriorated late in the year due to the murder and kidnapping of several priests and nuns. In November 1976 municipal elections were freely contested throughout Brazil. The Government party, ARENA, won overall despite significant opposition victories in nearly all the major State capitals.

### Government

Brazil has had a military-backed Government since the 1964 coup. Under the 1969 constitution the country is a federal republic comprising 21 States, four Territories and a Federal District (Brasília). Legislative power is exercised by the bicameral National Congress, comprising the Chamber of Deputies (364 members elected for four years) and the Federal Senate (66 members elected in rotation for eight years). Election is by universal suffrage of literate adults (aged 18 or over) and voting is compulsory. Executive power is exercised by the President, elected for five years by an electoral college comprising all members of the National Congress and delegates from State legislatures. He appoints and leads the Cabinet. Each State has an appointed Governor and an elected legislature. Only two political parties have been legalized.

### Defence

Military service is compulsory for one year between the ages of 18 and 45. The armed forces consist of 257,200 men: army 170,000, navy 45,800 and air force 41,400. State militias amount to about 200,000 men. The defence budget for 1976 amounted to 18,335 million cruzeiros.

### Economic Affairs

Agricultural production provides a large proportion of Brazil's export earnings, the principal export crops being coffee, sugar and soya beans. Soya bean production increased from 3.7 million tons in 1972 to 9.5 million tons in 1975 and overtook sugar as the leading export crop. Other crops include cocoa, sisal, tobacco, maize and cotton. Agriculture was badly affected in 1975 by severe frosts in the Centre-South, resulting in a 60 per cent loss of the coffee crop, as well as by floods and droughts in other areas; only a 3 per cent rise in production was achieved in 1975. The Second National Development Plan calls for investment of 105,000 million cruzeiros in agriculture in 1975–79.

Since the early 1960s increased emphasis has been laid on industrial development, and manufacturing accounted for over 20 per cent of Brazil's G.D.P. in 1974. The Government's industrial policy includes self-sufficiency programmes in agro-chemicals, fertilizers, paper, cellulose, non-ferrous metals, steel, pharmaceuticals and petrochemicals. Steel is a fast-growing industry. The present steel expansion programme plans to increase annual output to 20 million metric tons by 1978 and a 3.4 million ton steel plant is to be built, with Japanese participation, at Tubarão, ES. Brazil's largest shipyard, which can handle ships of up to 650,000 deadweight tons, was opened in 1974, and it is planned to add another 150 ships to the Brazilian fleet by the 1980s. The motor industry continues to expand but the growth rate fell from 18 per cent in 1974 to 2.7 per cent in 1975 due to the generally worsening economic climate. A new Fiat plant at Betim aims to produce 200,000 units per year by 1978.

Brazil possesses vast mineral reserves, the leading export being iron ore. Deposits at Serra dos Carajás in Amazonia are estimated to be the largest in the world:

18,000 million tons of over 66 per cent iron content. 350 million tons of phosphates have been discovered in Minas Gerais as well as deposits of uranium, manganese and copper. New mineral discoveries are being made constantly but as yet few reserves have been fully exploited. Only 20 per cent of the nation's oil requirements are produced domestically but in 1974 a new off-shore field near Campos was discovered, with estimated reserves of 600 million barrels. Production is expected to begin by 1977 at a rate of 200,000 barrels per day, more than double current production. Foreign participation in oil exploration is to be allowed for the first time. At present 90 per cent of all electric power is hydro-generated. Several important hydro-electric projects are under way, including the Itaipú project on the Paraná river which will increase Brazil's installed capacity to 33,000 MW by 1982. Following the discovery of two large uranium deposits, Brazil has signed a nuclear agreement with the Federal Republic of Germany under which eight nuclear power stations, with a total capacity of 10,000 MW, are to be built by 1990.

The second Five-Year Development Plan (1975–79) aimed at an average annual growth rate of 9.9 per cent, improved social welfare and massive investment in industry, energy, transport, education and health. The sum of 716,000 million cruzeiros was to be invested in the Centre-South area which is to become the economic nucleus of the country. In 1976 heavy cutbacks in the Government's investment plans were announced, including a 40 per cent reduction in investments envisaged in the Plan. The main sectors affected were transport, communications and energy. It is reported that the Itaipú project may be rescheduled.

For eight years Brazil achieved a very high growth rate but in 1975 the international economic recession began to affect the economy. Inflation accelerated to 30 per cent and the growth rate slowed to 4 per cent, the foreign debt reached U.S. $22,000 million and the trade deficit $7,951 million. Various anti-inflationary measures were taken, including monetary corrections, a rigid prices and wages policy and a series of mini-devaluations but it was estimated that inflation might rise to 50 per cent for 1976. To curb the growing trade deficit stringent import restrictions were introduced and emphasis was given to investing in alternative sources of energy to reduce the huge oil import bill, a projected $4,600 million in 1976.

In 1976 the economic situation improved but the foreign trade performance was disappointing, although the foreign debt and trade deficit were slightly reduced. The Government continued with its previous policies and in late 1976 announced heavy cutbacks in government expenditure in order to restrain economic growth.

Brazil is a member of LAFTA and the Inter-American Development Bank.

### Transport and Communications

Transport services are limited by jungles, rivers and mountains. Over large areas the aeroplane is the only practicable means of transport and Brazil has a large domestic network of internal air services. Highways are the principal mode of transport, accounting for 70 per cent of freight and 90 per cent of passenger traffic in 1974. Two major projects include the 5,000 km. Trans-Amazonian Highway, running from Recife and Cabedelo to the Peruvian border, and the 4,138 km. Cuiabá–Santarém highway which will run in a north–south direction. There are long-distance express bus services which play an important part in the scheme of public transport. Rivers are very important as a means of transport and 42,720 km. are navigable. The Amazon is navigable for 3,680 km. as far as Iquitos in Peru, and ocean-going ships can reach Manaus, 1,600 km. upstream. It is planned to lengthen and modernize the railway system in order to decrease reliance on the highway system.

### Social Welfare

In 1960 the social security system was rationalized and all employees must comply with uniform social security regulations. Eight per cent of the wage bill is contributed by the employer, 8 per cent is deducted from salaries and the Federal government also contributes. In 1966 the National Institute for Social Security (INPS) was formed. All employers and workers covered by Labour Laws are compulsory members. Social benefits include pensions, sickness and maternity benefits and unemployment insurance. In 1974, 43 million Brazilians received social security benefits compared with 13 million in 1960.

### Education

Pre-elementary schooling is provided in urban areas for children up to 7 years old. Education is free in official primary schools and compulsory between the ages of 7 and 15. Secondary education is for three years; where necessary it is free, but a system of repayable grants is being encouraged, and the majority of secondary schools are private. The Federal Government is responsible for higher education and there are 63 universities and 740 other institutions of higher education, with a total of 889,000 students in 1974.

Although the high drop-out rate of children at elementary level is still a serious problem, illiteracy has steadily been reduced. A literacy drive (*Movimento Brasileiro de Alfabetização—Mobral*) was launched in 1971. The adult illiteracy rate fell from 35 per cent in 1970 to an estimated 26 per cent in 1973.

### Tourism

Rio de Janeiro, with its famous beaches, is the centre of the tourist trade. Like Salvador, Recife and other towns, it has excellent examples of Portuguese colonial and modern architecture. The new capital, Brasília, incorporates a new concept of city planning and is the nation's showpiece. Other attractions are the Iguaçu Falls, seventh largest (by volume) in the world, and the tropical forests of the Amazon basin.

*Visas* are not required to visit Brazil by nationals of the following countries: Canada, EEC countries (except Ireland), Greece, Liechtenstein, Morocco, Norway, Portugal, Spain, Sweden, Switzerland, U.S.A. and Latin American countries except Cuba.

### Sport

Football is by far the most popular sport; basketball is the second great national sport, and tennis, water sports, golf, horse racing and recently underwater fishing are also popular.

# THE CONSTITUTION

Brazil is a Federative Republic consisting of 21 states, one Federal District and four Territories indissolubly united under a representative form of government to constitute the Union. The Federal District is the capital of the Union.

The Union's competence includes maintaining relations with foreign states and making treaties with them, and taking part in international organizations; declaring war and making peace; decreeing a state of siege; organizing the armed forces, planning and guaranteeing national security, issuing currency; supervising credits, etc.; establishing national services, including communications, development and education services; legislating on the execution of the Constitution and federal services and on civil, commercial, penal, procedural, electoral, agrarian, maritime and labour law. The Union, States, Federal District and Municipalities are forbidden to make any distinction between Brazilians, establish any religious cults or churches against the public interest, and to deny public documents.

The Union may intervene in state affairs only in matters of extreme urgency, such as national security, and then only by Presidential decree. The States are responsible for electing their Governors by universal suffrage by direct secret ballot. The state law will decree the establishment of Municipalities, after due consultation with the local population; it will also decree the division of the States into districts; municipal organization may vary from state to state.

## LEGISLATIVE POWER

The legislative power is exercised by the National Congress, which is composed of the Chamber of Deputies and the Federal Senate. Elections for deputies and senators take place simultaneously throughout the country; candidates for Congress must be Brazilian by birth, have full exercise of their political rights and be over twenty-one in the case of deputies and over thirty-five in the case of senators. Congress meets twice a year in ordinary sessions, and extraordinary sessions may be convened on demand of a third of the members of either House or the President. Each Chamber arranges its own internal procedure.

The *Chamber of Deputies* is made up of representatives of the people, elected by direct secret ballot by men and women over 18 years of age, for a period of four years. The number of inhabitants determines the number of deputies per state. Each Territory will have one deputy.

The *Federal Senate* is composed of representatives of the States, elected by direct secret ballot. Each State will elect three senators with a mandate for eight years, with elections after four years of one-third of the members and after another four years of the remaining two-thirds. Each Senator is elected with his substitute. The Senate approves, by secret ballot, the choice of Magistrates, when required by the Constitution; of the Attorney-General of the Republic, of the Ministers of the Accounts Tribunal, of the Governor of the Federal District, of the Territorial Governors and of the permanent heads of diplomatic missions.

The *National Congress* is responsible for legislating on all matters within the competence of the Union; national and regional plans and programmes, the strength of the armed forces in times of peace and territorial limits. Both houses vote on the budget in joint session. It is also responsible for making definitive resolutions on Presidential treaties, authorizing the President to leave the country; to declare war, to approve boundary changes in the States or Territories. The Executive power must send any bills proposed by the President to the National Congress within fifteen days of signing. Constitutional amendments must be proposed by at least a third of the total number of members of both houses or by the President. Amendments are ratified by a simple majority. No changes may be made to the Constitution during a state of siege. Any Presidential bill must be considered by Congress within forty-five days if so requested by the President. The President is exclusively responsible for legislation concerning finance, creating new public offices, etc., matters concerning the administration of the Federal District and the Territories.

## EXECUTIVE POWER

Executive power is exercised by the President of the Republic, aided by the Ministers of State. Candidates for the Presidency and Vice-Presidency must be Brazilian-born, be in full exercise of their political rights and be over thirty-five years of age. The President and Vice-President will be elected by a simple majority in open session by an electoral college composed of all members of the National Congress and delegates appointed by the State Legislatures on the basis of three for each state and one more for each 500,000 voters registered in the state. The President holds office for a term of five years and is not eligible for re-election. If the President violates any of his responsibilities he may be impeached by a two-thirds majority of the Deputies and judged by the Supreme Tribunal or the Senate according to the nature of his crime.

The Ministers of State are chosen by the President and their duties include carrying out the President's decrees, expediting instructions for the enactment of laws, decrees and regulations, and presentation to the President of an annual report of their activities.

National security is the responsibility of every citizen. There is a National Security Council, composed of the President and the Vice-President of the Republic, all the Ministers of State and the Chiefs of Staff of the armed services.

## JUDICIAL POWER

Judicial power in the Union is exercised by the Supreme Federal Tribunal; the Federal Recourse Tribunals and federal judges; Military Tribunals and judges; Electoral Tribunals and judges; Labour Tribunals and judges; and State Tribunals and judges. Judges are appointed for life; they may not undertake any other employment, receive any percentages from cases tried by them or engage in any party political activity. The Tribunals elect their own presidents and organize their own internal structure.

The *Supreme Federal Tribunal*, situated in the Union capital, has jurisdiction over the whole national territory and is composed of eleven Ministers. The Ministers are nominated by the President after approval by the Senate, from Brazilian-born citizens, over the age of thirty-five, of proved judicial knowledge and experience.

## POLITICAL AND PERSONAL RIGHTS

Registration and voting are compulsory for all Brazilian citizens over the age of eighteen except those who are illiterate or unable to express themselves in the national language or are temporarily or definitively deprived of political rights. The organization of political parties is regulated by federal law, with the guarantee of the fundamental rights of man. Congressional representation is achieved when five per cent of the total electorate votes for one party, with a minimum of seven per cent in each of seven states.

All citizens are equal in the eyes of the law, regardless of sex, race, employment, religion or political convictions; any racialism will be prosecuted; there is no death penalty (except under military legislation in case of external war), no life imprisonment, banishment or confiscation of property. Rights concerning citizens' life, liberty, security and property are inviolable.

The President may declare a state of siege in cases of serious breaches of order or the likelihood of their occurring; or war. Except in cases of war, the state of siege may not last longer than sixty days, with the possibility of extension with the approval of Congress. During a state of siege Congress may suspend constitutional guarantees, and also the immunity of federal deputies and senators.

The Constitution also lays down principles of economic and social order, concerning freedom of enterprise, dignity of human labour, social function of ownership, harmony and solidarity in production, economic development and repression of abuse of economic power. Strikes are not permitted in public services and essential activities, as defined by law. The constitution lays down certain rights for workers, including limited hours of work, paid holidays and social welfare benefits; voting in trade union elections is compulsory.

The law protects family life; education is the right of all, with equal opportunity. Education will be organized by the States and the Federal District and the Union will give technical and financial assistance to develop education.

# POLITICAL PARTIES

A Political Parties Statute, the *Lei Orgánica dos Partidos Políticos*, was signed by the President on July 21st, 1971. It prohibited the establishment of organizations whose programmes were in conflict with the "principles of the democratic régime", or of any party unless it had the support of 5 per cent of the voters who took part in the latest general elections, spread over at least seven states. The following are the only two legal parties:

**Aliança Renovadora Nacional (ARENA):** Câmara dos Deputados, Palácio do Congresso Nacional, Brasília, D.F.; f. 1966; pro-Government Party; Pres. Francelino Pereira; Leader Sen. Petrônio Portella Nunes; publ. *O Renovador*.

**Movimento Democrático Brasileiro (MDB):** Câmara dos Deputados, Palácio do Congresso Nacional, Brasília, D.F.; includes members of former Partido Trabalhista Brasileiro; Pres. Ulisses Guimarães; Leader Sen. Franco Montoro; Presidential and Vice-Presidential candidates in 1973 Ulisses Guimarães and Barbosa Lima Sobrinho.

## JUDICIAL SYSTEM

The judiciary powers of the State are held by the following tribunals: the Supreme Federal Tribunal, the Federal Tribunal of Recourses, the State Tribunals of Appeals, the Superior Military, the Electoral, and the Labour Tribunals; and by judges of other courts.

The Supreme Federal Court comprises sixteen ministers, nominated by the President and approved by the Senate. It judges offences committed by persons exempt from appearing before the normal courts, such as the President, Ministers of State, its own members, judges of other courts, and chiefs of permanent diplomatic missions. It also litigates in disputes between the Union and the states, between the states, or between foreign nations and the Union or the states; disputes as to jurisdiction between justices and/or tribunals of the different states, including those of the federal district and of the territories; in cases involving the extradition of criminals, in certain special cases involving the principle of *habeas corpus*, and in other cases. It is also empowered to judge ordinary appeals in cases in which the Union is interested as plaintiff or defendant.

The Federal Tribunal of Recourses judges the cases in which the Federal Union has interest.

The Tribunals of Appeals, apart from their normal function as a court of appeal, can sit in judgment on their own members. The number of judges varies according to the judiciary organization of each state.

The organs of the Electoral Tribunal (the Superior Tribunal, the Regional Tribunals, and the electoral judges) register the names of political parties, fix the date of elections, supervise the listing of voters, and deal with all infractions of the electoral laws. The seven judges of the Superior Electoral Tribunal are chosen: two from the Supreme Federal Tribunal, two from the Tribunal of Appeals, one from the Tribunal of Justice of the Federal District and two by the President.

The functions of the Military Court are no more than the name implies. The Labour Tribunal deals with labour disputes.

Civil offenders usually come before the courts of the separate states and of the Federal District. Each state organizes its own judiciary system on the principles established in the Constitution, and appoints its own judges from those who have passed the State examination in law.

# THE PRESS

The most striking feature of the Brazilian press is the relatively small circulation of newspapers in comparison with the size of the population. The newspapers with the largest circulations are *O Estado de São Paulo* (192,000), *Jornal do Brasil* (170,000) and *O Globo* (180,000). The low circulation is mainly due to distribution difficulties. In consequence there are no national newspapers.

## ROADS

**Departamento Nacional de Estradas de Rodagem** (*National Roads Development*): Avda. Pres. Vargas 522/534, Rio de Janeiro, RJ; Dir. Adhemar Ribeiro da Silva.

In 1974 there were 1,347,856 km. of roads in Brazil, of which 77,133 were paved.

Brasília has been a focal point for inter-regional development, and paved roads link the capital with every region of Brazil. The building of completely new roads has taken place predominantly in the north. The east-west Trans-Amazonian highway was due for completion in 1974 but 10 per cent of it was still to be completed in late 1976.

According to the Second National Development Plan, the paved federal network alone will increase from 41,200 km. to 63,000 km. by 1979 while the unpaved federal roads will increase from 33,500 km. in 1974 to 45,800 km. by 1979.

## SHIPPING

There are 36 deep-water ports in Brazil, five of which, including the port of Santos which handles 30 per cent of all cargo, are privately owned. The largest ports are Santos, Rio de Janeiro, Paranaguá, Recife and Vitória. Tubarão, an iron ore port, and Icomi on the Amazon, from where manganese is exported, are among the ports already equipped with automated facilities. Both ports are being expanded, as are Recife and Maceio, the sugar ports, and Ilheus, the cocoa port, on the eastern seaboard. The two main oil terminals, at São Sebastião (São Paulo) and Madre de Jesus (Bahia), are being expanded. Port expansion plan also include the building of terminals at Areia Branca, Paranaguá and Rio Grande. A new iron ore terminal is to be built at Sepetiba and a sugar terminal in São Paulo State. All ports will be deepened to accommodate vessels of over 40,000 tons. Brazil's merchant fleet is the largest in Latin America (4,205,000 d.w.t. 1974).

Brazil's first nuclear power station is being built at Angra dos Reis, in the State of Rio de Janeiro. Its initial capacity will be 630 MW. and it was scheduled to come into operation in 1976. A second nuclear plant, also at Angra dos Reis, with a thermal power of 1,200 MW. is due to come into operation in 1982. Present plans envisage that Brazil will have an installed capacity of 10,000 MW. by 1990.

The 1975 budget of the CNEN amounted to Cr. 230,898,175 (U.S. $33,800,000).

Research reactors: The following research reactors are in operation:

(IPR-RI) IPR-NUCLEBRAS, Belo Horizonte, Minas Gerais: thermal power 250 kW.

(IEA-RI) IEA, São Paulo: thermal power 10 MW.

(IEN-RI) IEN-NUCLEBRAS, Rio de Janeiro: thermal power 10 kW.

(URANIE) IPR-NUCLEBRAS, Belo Horizonte, Minas Gerais (subcritical).

(RESUCO) CEN-UFPe, Recife, Pernambuco (subcritical).

(NC-9000) CTA, São José dos Campos, São Paulo (subcritical).

(CAPITU) IPR-NUCLEBRAS, Belo Horizonte, Minas Gerais (subcritical).

(SUBLIME) IME, Rio de Janeiro (planned) (subcritical).

(COBRA) IEN-NUCLEBRAS, Rio de Janeiro (planned).

A government-owned company, the **Companhia Brasileira de Tecnologia Nuclear (CBTN)**, was formed in December 1971 and was re-named **Empresas Nucleares Brasileiras, SA (NUCLEBRAS)** in 1974. Its main objectives are to establish a fuel-cycle industry, to promote the progressive assimilation of nuclear technology by private industrial concerns, and to pursue research and development programmes.

Brazil has close co-operation agreements with the nuclear energy authorities of the following countries: Federal Republic of Germany, France, Italy, U.S.A., Spain, Portugal, India and others.

## BELIZE

### INTRODUCTORY SURVEY

**Location, Climate, Capital**

Belize lies on the Caribbean coast of Central America with Mexico to the north-west and Guatemala to the south-west. The climate is sub-tropical, tempered by trade winds. The capital is Belmopan.

**Recent History**

Belize, known as British Honduras until 1973, was first colonized by British settlers in the seventeenth century. The frontier with Guatemala was agreed by a convention in 1859 but this was declared invalid by Guatemala in 1940. Guatemalan claims to sovereignty of Belize date back to the mid-nineteenth century and were written into Guatemala's constitution in 1945. George Price, leader of the People's United Party, became First Minister in 1961 and Premier in 1965. In January 1972 the capital of the territory was moved from Belize City to the newly built town of Belmopan. The colony was renamed Belize in June 1973. In November 1975 British troops and aircraft were sent to protect Belize from the threat of Guatemalan invasion. Although the United Kingdom supports Belize's wish for full independence, it is not prepared to guarantee this independence militarily. Talks between Guatemala and the United Kingdom were held in 1976, but the issue remained unresolved.

**Government**

Belize is a Crown Colony. The Queen is represented by an appointed Governor, who has responsibility for external affairs, defence and internal security. A constitution giving full internal self-government came into force on January 1st, 1964. Executive power is in the hands of a Cabinet of Ministers, led by the Premier, while the National Assembly consists of an appointed eight-man Senate and a House of Representatives with 18 members elected for five years by universal adult suffrage.

**Economic Affairs**

The economy used traditionally to be based on timber exports, but the cultivation of sugar and citrus fruits, which represent 66 per cent of the total value of exports, is now more important. The fishing and livestock industries are also being developed. Development assistance from the United Kingdom, Canada and various international organizations is being used to improve infrastructure and public utilities and on projects such as a rice mill and a meat packing plant. Tourism is being promoted but has suffered from unfavourable publicity over the Guatemalan dispute. Belize joined the Caribbean Community in 1974.

**Transport and Communications**

There are about 500 miles of good roads and 21 airstrips as well as the Belize international airport at Stanley Field. Belize City is the main port; there is a second port at Stann Creek to the south of Belize.

**Education**

Primary education is principally carried on through subsidized denominational schools under government control. There are also 21 secondary schools, 3 technical colleges, 4 vocational schools and a teacher-training college. Education is compulsory between the ages of six and fourteen years.

**Public Holidays**

**1977:** May 1st (Labour Day), May 24th (Commonwealth Day), September 10th (National Day), October 12th (Columbus Day—Northern Districts), November 14th (Prince Charles's Birthday), November 19th (Carib Settlement Day—Southern Districts), December 25th–26th (Christmas).

**1978:** January 1st (New Year's Day), March 9th (Baron Bliss Day), March 24th–27th (Easter), April 21st (Queen's Birthday).

**Weights and Measures**

Imperial weights and measures are used, but petrol and paraffin are sold by the American gallon (231 cu. in.).

**Currency**

100 cents = 1 Belizean dollar (B$).

Exchange rates (December 1976):

£1 sterling = B$3.31;
U.S. $1 = B$2.00.

## STATISTICAL SURVEY

**Area and Population:** Area (square miles) 8,866; Population (April 1970 census) 119,934; Belize City 39,050, Belmopan *c.* 3,500. Estimated population 140,000 (1975).

**Forestry** (exports): Mahogany Lumber B$4.27m. (1974); Cedar Lumber B$153,260, Rosewood Lumber B$116,546 (1973).

**Agriculture** (1974 exports): Sugar B$7,222,000, Molasses B$1,198,000, Citrus fruits B$5,383,000.

**Fishing:** (1974 exports): B$3,107,000.

**Livestock:** Cattle 48,000, Pigs 25,000.

### FINANCE

100 cents = 1 Belizean dollar (B$).
Coins: 1, 5, 10, 25 and 50 cents.
Notes: 1, 2, 5, 10 and 20 dollars.
Exchange rates (December 1976): £1 sterling = B$3.31; U.S. $1 = B$2.00.
B$100 = £30.18 = U.S. $50.00.

*Note:* The British Honduras (now Belizean) dollar was at par with the U.S. dollar until December 1949, when it was devalued to 70 U.S. cents (U.S. $1 = BH$1.429). At the same time the currency was linked to the pound sterling (at the rate of £1 = BH$4.00). This valuation in terms of sterling remained in effect until May 1976. When the pound was devalued in November 1967 the BH dollar's value fell to 60 U.S. cents (U.S. $1 = BH$1.667). Since June 1972 sterling has been allowed to "float". The average value of the Belizean dollar was 57.74 U.S. cents in 1972; 60.61 U.S. cents in 1973; and 60.00 U.S. cents in 1974. In May 1976 the Belizean dollar's link with sterling was broken and the currency was pegged to the U.S. dollar at the rate of U.S. $1 = B$2.00 (B$1 = 50 U.S. cents.).

## THE CONSTITUTION

A constitution providing for internal self-government came into force on January 1st, 1964. It provides for a Governor, a Cabinet of Ministers and a bi-cameral Legislature.

The powers of the Governor are complete only in respect of defence, external affairs and internal security, and for the first two of these there are consultative bodies designed to familiarize Ministers with matters for which they will ultimately have responsibility. There are also advisory commissions for the public service and the subordinate judiciary.

The Legislature consists of (1) A Senate of eight members, five appointed on the advice of the Premier, two on the advice of the Leader of the Opposition, and one after consultation with such persons as the Governor considers appropriate; (2) A House of Representatives consisting of eighteen members elected by universal adult suffrage for a five-year period.

## THE GOVERNMENT

**Governor and Commander-in-Chief:** PETER DONOVAN MCENTEE, O.B.E.

### CABINET

(*December* 1976)

**Premier and Minister of Finance and Economic Planning:** GEORGE C. PRICE.

**Deputy Premier, Minister of Home Affairs and Health:** CARL L. B. ROGERS.

**Minister of Works:** FREDERICK H. HUNTER.

**Minister of Agriculture and Lands:** FLORENCIO J. MARIN.

# BERMUDA

## INTRODUCTORY SURVEY

### Location, Climate, Capital

The Bermudas or Somers Islands are an isolated group of small Atlantic islands about 570 miles off the coast of South Carolina, U.S.A. They have a mild climate. The capital is Hamilton.

### Recent History

In 1963 Bermuda's first political party, the Progressive Labour Party, was formed, and in 1964 24 independent members of the House formed the United Bermuda Party, which is the present majority party. In 1963 a joint select committee was set up to study constitutional changes; its recommendations were forwarded to the British Government in 1966.

The Constitution introduced in June 1968 provided for internal self-government, although the British Government retained responsibility in certain areas. Various amendments were made in 1973, the most important being the establishment of the Governor's Council to deal with the Governor's powers over external affairs, defence, internal security and the police. In 1974 the Government leader was restyled Premier and the Executive Council became the Cabinet.

Although Bermuda is considered to be a model of good race relations, shooting incidents in 1972 and 1973, which resulted in the deaths of five people (including the Commissioner of Police and the Governor), show underlying tensions. In the general election of May 1976 the United Bermuda Party, whose policies are based on racial cooperation, was returned to power with a decreased majority. It lost a further seat in a by-election in September 1976.

### Government

Bermuda is a Crown Colony with a wide measure of internal self-government. The Queen is represented by an appointed Governor, responsible for external affairs, defence and internal security. The bicameral legislature comprises a Legislative Council (11 nominated members) and the House of Assembly, with 40 members elected for five years by universal adult suffrage. The Governor appoints the majority leader in the House as Premier and the latter nominates other Ministers. The Cabinet is responsible to the legislature.

### Defence

The local defence force is the Bermuda Regiment with a strength of some 425 men.

### Economic Affairs

The principal economic activity and leading source of foreign exchange is the tourist industry. The value of tourism in Bermuda in 1975 was estimated to be B$155,400,000. There is also a significant commercial sector where exempted companies enjoy a freedom from most local taxes and constitute an important offshore financial centre, most notably in the field of insurance.

The chief source of government revenue is customs duties. There is no income tax but there are payroll taxes, a land tax, a minor tax on the value of estates and various tourist-related taxes.

While the dominant economic influence is now the U.S.A. there is still considerable British capital invested in Bermudan enterprises.

### Transport and Communications

There are good roads and bus and ferry services, while international lines provide regular sea and air services.

### Social Welfare

A wide range of welfare work is undertaken by the Department of Health and the Department of Social Services, as well as by a number of voluntary organizations.

The 1967 Contributory Pensions Act enlarged the number of those eligible for pensions, and the 1970 Hospital Insurance Act made hospital insurance available for all. It also provided for free hospital care for children and subsidized rates for the elderly.

### Education

There is free compulsory education between the ages of 5 and 16, and a number of scholarships are awarded for higher education and teacher training. The Bermuda College was founded in 1972 and accepts students over the age of 16. It has three departments: Commerce and Technology, Hotel Technology and Academic Affairs. Extramural courses are available through Queen's University, Canada, and Maryland University, U.S.A.

### Tourism

The great attractions of the islands are the climate, scenery, and facilities for outdoor entertainment of all types.

*Visas* are not required by visitors from non-Communist countries.

### Public Holidays

**1977:** May 24th (Commonwealth Day), June 11th (Queen's Official Birthday), July 28th (Cup Match), July 29th (Somers' Day), November 11th (Remembrance Day), December 25th and 26th (Christmas and Boxing Day).

**1978:** January 1st (New Year's Day), March 24th (Good Friday).

### Weights and Measures

The metric system has been widely adopted but imperial and U.S. weights and measures are both used in certain fields.

### Currency

100 cents = 1 Bermuda dollar (B$).

Exchange rates (December 1976):

£1 sterling = B$1.66;
U.S. $1 = B$1.00.

## THE CONSTITUTION

Under a Constitution introduced on June 8th, 1968, there are provisions relating to the protection of fundamental rights and freedoms of the individual, the powers and duties of the Governor; the composition, powers and procedure of the Legislature; the Cabinet; the Judiciary; the Public Service and Finance.

The Queen is represented by the Governor, who retains responsibility for external affairs, defence, internal security and the Police.

The Legislature consists of Her Majesty, the Legislative Council and the House of Assembly. Five members of the Legislative Council are appointed at the Governor's discretion, four on the advice of the Government leader and two on the advice of the Opposition leader. The Council elects a President and Vice-President. The House of Assembly, consisting of forty members elected under universal adult franchise from twenty constituencies, elects a Speaker and a Deputy Speaker, and sits for a five-year term.

The Cabinet consists of the Premier and at least six other members of the Legislature. The Governor appoints the majority leader in the House of Assembly as Premier, who in turn nominates the other members of the Cabinet. They are assigned responsibilities for government departments and other business and, in some cases, are assisted by Permanent Cabinet Secretaries.

The Cabinet is presided over by the Premier. The Governor's Council enables the Governor to consult with the Premier and two other members of the Cabinet nominated by the Premier on matters for which the Governor has responsibility. The Secretary to the Cabinet, who heads the public service, acts as secretary to the Governor's Council.

Voters must be British subjects aged 21 years or over, and, if not possessing Bermudan status, must have been normally resident in the territory for three years immediately prior to registration. Candidates for election must qualify as electors, and must possess Bermudan status.

# BRITISH ANTARCTIC TERRITORY

The British Antarctic Territory lies within the Antarctic Treaty Area (i.e. south of latitude 60° S.). The Territory consists of all lands and islands south of latitude 60° S., between longitudes 20° and 80° W., and includes the South Orkney Islands, the South Shetlands and the Antarctic Peninsula (Graham Land).

**Area:** 2,095,000 square miles, of which about 660,000 is land.

**Population:** There is no permanent population.

**High Commissioner:** N. A. I. FRENCH, M.V.O. (Port Stanley, Falkland Islands).

| Rothera, Adelaide Island | 67° 34′ S | 68° 07′ W |
| Signy Island | 60° 43′ S | 45° 36′ W |

# BRITISH INDIAN OCEAN TERRITORY

The Colony consists of the Chagos Archipelago (or Oil Islands), about 1,180 miles north-east of Mauritius. The Territory was constituted in November 1965 to provide defence facilities for the British and United States Governments. The Chagos Archipelago, which includes the coral atoll Diego Garcia, was formerly administered by the Government of Mauritius. In June 1976 the islands of Aldabra, Farquhar and Desroches, which until 1965 had been part of the Dependent Territory of Seychelles, were returned to Seychelles when the latter became independent.

According to the British Ministry of Defence all the islands of the Territory are available for both British and U.S. bases. In 1974 the U.S.A. announced a proposal, subsequently approved by the British Government, to extend its naval facilities on Diego Garcia in response to the expansion of Soviet naval power in the Indian Ocean. Under a 50-year agreement with the United Kingdom, concluded in 1972, the U.S.A. has a communications centre, airstrip and anchorage on the island. In 1976 a further agreement between the two Governments provided for an expansion of the facilities to allow for the construction of a harbour, a 12,000 ft. runway, refuelling facilities for a carrier task force and an increase of U.S. military personnel from 430 to more than 600 men.

**Area:** about 20 square miles (52 sq. km.).

**Population:** There are no permanent inhabitants but the islands have a floating population of contract labourers.

**Currency:** Seychelles rupee (*q.v.*).

**Commissioner:** N. Aspin, C.M.G., Assistant Under-Secretary, Foreign Office, London.

**Administrator:** M. K. Ewans, Head of East Africa Dept., Foreign Office, London.

# THE BRITISH VIRGIN ISLANDS

## INTRODUCTION

The British Virgin Islands consist of more than 40 islands, of which some 16 are inhabited, lying at the northern end of the Leeward Islands, 60 miles to the east of Puerto Rico and adjoining the United States Virgin Islands. The capital, Road Town, stands on the island of Tortola.

The bulk of the islands' export trade is in fresh fish, gravel and sand, and to a lesser extent, fruit and livestock. Tourism is the major industry, contributing $12.2 million to the economy in 1975. Efforts are also being made to expand fishing and there are plans to promote the islands as a tax relief centre.

A land reclamation and development scheme involving 70 acres at Wickham's Cay, Road Town, is in progress and a large holiday development at Prospect Reef near Road Town is expected to be completed in 1977.

## THE CONSTITUTION

A new constitution came into effect in April 1967. Under its terms, the Governor is responsible for defence and internal security, external affairs, terms and conditions of service of public officers, the administration of the Courts and finance, and possesses reserved legislative powers in respect of legislation necessary in the interests of his special responsibilities; there is an Executive Council with the Governor as Chairman, two ex-officio members (the Attorney-General and the Financial Secretary), the Chief Minister (appointed by the Governor from among the elected members of the Legislative Council) and two other ministers, appointed by the Governor on the advice of the Chief Minister; and a Legislative Council consisting of a Speaker, chosen from outside the Council, two ex-officio members (the Attorney-General and the Financial Secretary), one nominated member appointed by the Governor on the Chief Minister's advice, and seven elected members to be returned from seven one-member electoral districts.

Constitutional changes to come into effect progressively from 1977 include the assumption of the post of Financial Secretary by an elected member of the Legislative Assembly, and the division of the islands into nine electoral districts instead of seven. There will no longer be a nominated member and the only appointee to the Legislative Assembly will be the Attorney General. The voting age is to be lowered from 21 years to 18 years.

# FALKLAND ISLANDS

## (Islas Malvinas)

### Location, Climate, Language, Capital

The Falkland Islands are situated in the South Atlantic Ocean, 480 miles north-east of Cape Horn. There are two main islands and some 200 smaller ones. The climate is temperate, characterized by strong prevailing westerly winds and a mean annual temperature of 6°C (42°F). The language is English. The capital is Port Stanley on East Falkland Island.

### Recent History

Argentina claims sovereignty on the grounds that it inherited the territory on the break-up of the Spanish Empire and the independence of Argentina. The issue of sovereignty reappeared in the 1960s and 1970s, causing a near rupture of Argentine–British diplomatic relations.

### Government

Administration is conducted by an appointed Governor, who is the personal representative of the Crown, aided by an Executive Council of two ex-officio members, two unofficial members appointed by the Governor and two members elected by the Legislative Council; and a Legislative Council composed of two ex-officio members, two nominated independent members and four elected members. Voting is by universal adult suffrage.

### Defence

Service in the Falkland Islands Defence Force is voluntary. A garrison of Royal Marines is stationed in the Colony and helps train local volunteers.

### Economic Affairs

The economy is almost entirely dependent on the production of wool for export. An economic survey on the islands, published in mid-1976, drew attention to their considerable export potential. There is the possibility of 200,000 million barrels of petroleum beneath the continental shelf surrounding the islands. Also there are vast resources of fish, especially krill and blue whiting. The survey recommends £7 million expenditure on research and pilot programmes for coastal and offshore fishing and £5.4 million aid over the next five years for infrastructural improvements.

### Transport

LADE, the transport section of the Argentine air force, provides the only regular weekly air service to the islands, from Comodoro Rivadavia to Port Stanley. The only regular sea communication is a ship operated by the Falkland Islands Company which calls four times a year. An airfield, financed by the United Kingdom, is being built, and the Argentine Government is extending the existing airstrip.

### Social Welfare

Old age pensions and child allowances are provided and charitable relief is administered by the Medical Department. There is a modern well-equipped hospital in Port Stanley.

### Education

Education is compulsory and free. In 1975 there were two government schools in Port Stanley, with 149 pupils. Eight travelling and other teachers with 104 pupils were maintained by the Government in country districts. There is also a boarding school at Darwin, East Falkland, with 61 pupils.

### Tourism

Abundant wildlife and trout fishing constitute the main tourist attractions. In addition to air services from Argentina cruise ships sometimes make one-day visits to Port Stanley. In 1975, 6,610 tourists visited the Islands.

### Sport

Angling, association football and darts are the most popular sports.

### Public Holidays

**1977:** June 2nd (Queen's Jubilee), October 3rd (October Holiday), December 8th (Anniversary of the Battle of the Falkland Islands), December 25th–28th (Christmas).

**1978:** January 2nd (New Year's Holiday), March 24th (Good Friday).

### Weights and Measures

Both the imperial and metric systems are in general use.

## STATISTICS

**Area** (square miles): 4,700 (approx.), East Falklands 2,610, West Falklands 2,090.

## TRANSPORT

### ROADS

There are 13 miles of made-up road in and around Stanley. Elsewhere tracks link the settlements which are passable by land rover or motor cycle in all but the worst weather.

### SHIPPING AND CIVIL AVIATION

There is communication between the Islands and the mainland of South America by air. A weekly air service is provided with Fokker F-27 aircraft by the Argentine development line L.A.D.E., linking Stanley with Comodoro Rivadavia in southern Argentina. There is a ship on charter to the Falkland Islands Company which makes the round trip to the United Kingdom four or five times a year, carrying mail and cargo. In 1974 the transport service of the Argentine navy began a passenger and freight service between the Argentine mainland and Port Stanley.

**Falkland Islands Government Air Service:** f. 1948; maintains Beaver float-plane services between the settlements and Stanley.

# FALKLAND ISLANDS DEPENDENCIES

The Falkland Islands Dependencies consist of South Georgia and the South Sandwich Islands.

## STATISTICS

**Area** (Square miles): South Georgia 1,387, South Sandwich 120.

**Population:** There is no permanent population, but 22 scientists and support personnel man the British Antarctic Survey station at King Edward Point, South Georgia. The South Sandwich Islands are uninhabited.

**Governor:** JAMES ROLAND WALTER PARKER, O.B.E. (Port Stanley, Falkland Islands).

# THE GILBERT ISLANDS

The Gilbert Islands consist of 33 coral atolls and islands totalling 683 square kilometres scattered over about 5,000,000 square kilometres of ocean. There are 16 Gilbert Islands, 8 Phoenix Islands, 8 Line Islands, and Ocean Island (Banaba) lying off the Gilberts. Gilbert Islanders are Micronesians. The capital is on Tarawa Atoll in the Gilbert group.

### Recent History

The Gilbert and Ellice Islands Colony was established in 1915 following the proclamation of a British protectorate over the Gilbert Islands in 1892. The Colony was governed from the Solomon Islands until January 1972 when a separate government, directly responsible to the United Kingdom, was appointed. On October 1st, 1975, the Ellice Islands were allowed to break away from the Colony to form the Territory of Tuvalu with its capital on Funafuti Atoll.

In 1975 the British Government refused to recognize as legitimate an independence move by the people of Ocean Island (Banaba) who have been in litigation with the British Government since 1971 over revenues derived from exports of phosphate. The discovery of the guano deposits on the 600 hectare Ocean Island was a prime motive in Britain's annexation of the island. Since 1920 the British Phosphate Commissioners, a consortium of the British, Australian and New Zealand governments, have been mining phosphate for use as a fertilizer in Australia and New Zealand. Open-cast mining so adversely affected the island's environment that the Banabans, who were removed from the island during the Second World War, were resettled on Rabi Island, 2,600 kilometres away in the Fiji group, and became citizens of Fiji in 1970. They remain the landowners on Ocean Island.

The Banabans rejected the British Government's argument that phosphate revenues should be spread over the whole Gilbert Islands group and in 1973, despite winning 50 per cent of the revenues, continued with litigation. They claimed unpaid royalties from the British Government and damages for the destruction of the island's environment against both the Government and the British Phosphate Commissioners. In December 1976 a judgment in the High Court dismissed the claim for royalties on the grounds that the Government's obligations were not enforceable in law, but upheld the claim for damages. A further hearing is expected in 1977 for settlement of the amount to be paid.

Following protests by the Banabans the date for Gilbert Islands self-government was postponed until January 1st, 1977, while new safeguards for their interests were drawn up. Nevertheless the Banabans intend to continue to press for separate independence. Full independence for the Gilbert Islands is planned for 1978.

### Economy

Some 450,000 metric tons of phosphate are exported annually from Ocean Island by the British Phosphate Commissioners. Copra is the only other export. Most islanders are fully engaged in subsistence activities.

## STATISTICAL SURVEY

**Area:** Land area: 683 square kilometres.

**Population** (1973 census): 51,932; Tarawa (capital) 17,188.

**Agriculture** (1974—metric tons): Coconuts 25,200, Copra 9,472.

**Mining** (1974): 538,563 metric tons of phosphate rock mined.

## TRANSPORT

### ROADS

Wherever practicable, roads are built on all atolls and connecting causeways between islets are also being built as funds and labour permit.

### SHIPPING

Vessels owned or chartered by the British Phosphate Commissioners visit Ocean Island about six times a month. Australian cargo vessels call at Tarawa every six weeks and United Kingdom cargo ships every four months. Ships call at Tarawa to collect copra every two or three months and at Christmas, Fanning and Washington Islands twice a year. Vessels of the Columbus Line en route from U.S.A. and Australia call at Tarawa at approximately three to four weekly intervals. There is an irregular service from Tarawa to Suva, Fiji by Government vessels, and a two-monthly service to Fiji and to the Marshall Islands. Ships owned by the Daiwa Line operate a ten to twelve-weekly service from Japan, and tankers bring fuel from Fiji and occasionally from Nouméa in New Caledonia.

### CIVIL AVIATION

Air Pacific maintains a weekly service from Nadi to Funafuti/Tarawa/Nauru and return. It also operates a twice-weekly service between Tarawa and three other islands in the Gilberts. Air Nauru also provides services. A regular charter service between Honolulu, Christmas Island and Tarawa began in early 1976. There are seven airfields in the Islands.

# HONG KONG

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Capital

The Colony of Hong Kong lies off the south coast of China and consists of the island of Hong Kong, Stonecutters Island, the Kowloon Peninsula and the New Territories, which are partly on the mainland. The climate is sunny and dry in winter, and hot and humid in summer. The official language is English, but Cantonese is universally spoken and Mandarin is widely understood. The main religion is Buddhism; Confucianism, Islam, Hinduism and Taoism are also practised and there are more than a quarter of a million Christians. The capital is Victoria.

### History

Hong Kong Island was ceded to Britain under the terms of the Treaty of Nanking in 1842. The Kowloon Peninsula was acquired in 1860. The New Territories were leased from China in 1898 for a period of 99 years. However, since 1949 China has asserted that the above treaties are no longer valid.

Hong Kong was temporarily occupied by Japan during the Second World War, but British government was re-established in 1945.

### Government

The Colony is administered by the Governor, the Executive Council of five *ex officio* members and eight others and the Legislative Council consisting of four of the *ex officio* Executive Council members, 18 other official members and 22 unofficial members.

### Defence

Defence forces in the Colony number about 10,400; 9,300 in the army, 560 in the navy and 500 in the air force. Additionally, there are auxiliary defence units numbering about 1,000 and an essential services corps of some 11,400 personnel. Proposed annual defence expenditure for 1975 was HK $450 million.

### Economic Affairs

Hong Kong is a free trade area and one of the principal entrepôt ports of the world. Manufactured goods, particularly textiles and electrical goods, provide three-quarters of total export earnings. Commerce plays an important part in the economy and Hong Kong banking and mercantile houses have branches all over the Far East. In 1964 legislation was enacted to limit the activities of unincorporated banks.

In 1974 and 1975 there was effectively no growth in the Hong Kong economy due to prolonged recession in the major industrial nations, particularly the U.S.A. and the

EEC countries which together account for over 60 per cent of the colony's exports. However, the rate of inflation is comparatively low, and in 1976 the economy began to make a rapid recovery, indicating an increase of well over 10 per cent in the G.D.P. for the year.

### Transport

Transport facilities include buses, trams, and ferries and a railway runs north from Kowloon to the Chinese border. An underground railway is under construction and scheduled for completion in 1980.

### Social Welfare

Social welfare is administered by the Social Welfare Department which initiated a scheme of five-year development programmes in 1973. It is not a comprehensive system; for instance, there is no unemployment benefit. Resettlement of refugees from mainland China is also undertaken by the Government. At the end of 1975 there were 17,580 hospital beds in Hong Kong, representing four beds per thousand population.

### Education

Since 1965, with the doubling of free places in primary schools and the introduction of a system of subsidized places in primary schools, every child is ensured a primary education. There are five types of secondary school: Anglo-Chinese grammar schools, Chinese middle schools, secondary technical schools, secondary modern schools and prevocational schools. There are three government-run teacher-training colleges. The two universities have a combined enrolment of over 7,000 students.

### Tourism

Hong Kong is one of the main tourist centres of the Far East, and tourism is the second largest source of foreign exchange.

*Visas* are not required to visit Hong Kong by nationals of the following countries. For a visit of not more than 3 months: Andorra, Belgium, Brazil, Chile, Colombia, Denmark, Ecuador, France, Ireland, Israel, Italy, Liechtenstein, Luxembourg, Monaco, Nauru, the Netherlands, the New Hebrides, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey, the United Kingdom, dependent territories and Commonwealth countries; for a visit of not more than 1 month: Argentina, Austria, Bolivia, Costa Rica, the Dominican Republic, El Salvador, Finland, the Federal Republic of Germany, Greece, Guatemala, Honduras, Iceland, Iran, Maldives, Mexico, Morocco, Nepal, Nicaragua, Pakistan, Panama, Paraguay, Peru, Tunisia, the U.S.A., Uruguay and Venezuela; for a visit of not more than 7 days: Nationals of all other countries.

### Public Holidays

**1977:** June 21st (Tuen Ng, Dragon Boat Festival), July 1st (first weekday in July), August 1st (first Monday in August), August 29th (Liberation Day), September 28th (day following Chinese Mid-Autumn Festival), October 21st (day following Chung Yeung Festival), December 25th (Christmas Day), December 26th (first weekday after Christmas Day).

**1978:** January 2nd (first weekday in January), January–February* (Chinese New Year), April 5th (Ching Ming), March 24th–27th (Easter), April 21st (The Queen's Birthday).

* From the first to the third day of the first moon of the lunar calendar.

### Weights and Measures

The metric system is in force. Chinese units include tsün (37.147 mm.), chek or ch'ih (37.147 cm.); kan or catty (604.8 grammes), tam or picul (60.479 kg.).

### Currency and Exchange Rates:

100 cents = 1 Hong Kong dollar (HK $).
Exchange rates (December 1976):

£1 sterling = HK $7.875;
U.S. $1 = HK $4.753.

## FINANCE

100 cents = 1 Hong Kong dollar (HK $).
Coins: 5, 10 and 50 cents; 1 dollar.
Notes: 1 cent; 5, 10, 50, 100 and 500 dollars.
Exchange rates (December 1976): £1 sterling = HK $7.875; U.S. $1 = HK $4.753.
HK $100 = £12.70 = U.S. $21.04.

*Note:* From September 1949 to November 1967 the Hong Kong dollar was officially valued at 1s. 3d. sterling (£1 = HK $16.00) or 17.5 U.S. cents (U.S. $1 = HK $5.714). On November 18th, 1967, the Hong Kong dollar was devalued, in line with sterling, to 15 U.S. cents (U.S. $1 = HK $6.667) but, four days later, it was revalued at 1s. 4½d. or 6.875p (£1 = HK $14.545), worth 16.5 U.S. cents (U.S. $1 = HK $6.061) until August 1971. The relationship to sterling remained unchanged and a rate of U.S. $1 = HK $5.582 (HK $1 = 17.91 U.S. cents) came into operation in December 1971. After sterling was allowed to "float" in June 1972, the Hong Kong dollar was devalued in July 1972, when the central exchange rate became U.S. $1 = HK $5.65 (HK $1 = 17.70 U.S. cents). This was retained until February 1973, after which the central rate was U.S. $1 = HK $5.085 (HK $1 = 19.666 U.S. cents) until November 1974, since when the Hong Kong dollar has been "floating". For 1975 the average value of the Hong Kong dollar was 20.18 U.S. cents.

## THE CONSTITUTION

The Government of Hong Kong, which consists of the Governor, the Executive Council and the Legislative Council, is constituted under the authority of Letters Patent and Royal Instructions.

The Executive Council is consulted by the Governor on all important administrative questions. In addition to five *ex officio* members, there are eight unofficial members and one nominated official member.

The Legislative Council, which advises on and approves the enactment of the Colony's laws and approves all expenditure from public funds, consists of four of the *ex officio* members who sit on the Executive Council, 18 other official members and 22 unofficial members. A finance committee comprising all the unofficial members meets in private to scrutinize all government expenditure proposals; two subcommittees deal with public works capital expenditure, and with government staff increases.

A further one-half of the island's 25,000 acres is potential agricultural land. The Government is actively pursuing a resettlement programme for small-scale farmers. Though there is only a limited acreage suitable for arable farming, the prospects for livestock are becoming encouraging.

**Forestry:** An area of 5,000 acres is covered by forests. Trial plots of pine, eucalyptus and mahogany have been established.

### FINANCE

100 cents = 1 East Caribbean dollar (EC$).

Coins: 1, 2, 5, 10, 25 and 50 cents.

Notes: 1, 5, 20 and 100 dollars.

Exchange rates (December 1976): £1 sterling = EC $4.47;
U.S. $1 = EC $2.70.
EC $100 = £22.35 = U.S. $37.04.

*Note:* The East Caribbean dollar (EC$) was introduced in October 1965, replacing (at par) the West Indian dollar (WI$), linked to sterling at the rate of £1 = WI$4.80. The exchange rate was U.S. $1 = EC$2.00 (EC$1 = 50 U.S. cents) from November 1967 to August 1971, and U.S. $1 = EC$1.842 (EC$1 = 54.29 U.S. cents) from December 1971 to June 1972. The pound was allowed to "float" in June 1972 but the East Caribbean dollar remained linked to sterling until July 1976, when the exchange rate was pegged at U.S. $1 = EC$2.70 (EC$1 = 37.04 U.S. cents). The average exchange rate was U.S. $1 = EC$1.959 in 1973; U.S. $1 = EC$2.053 in 1974.

### SHIPPING

**Union Castle** and **Clan Lines:** to and from the United Kingdom and South Africa; the only service.

# ASCENSION

(WIDEAWAKE ISLAND)

Ascension lies in the South Atlantic Ocean, 703 miles north-west of St. Helena. The island is an important communications centre, being a major relay station for the cables between South Africa and Europe. Under an agreement with the British Government, U.S. forces occupy Wideawake Airfield, which is used as a tracking station for guided missiles. Ascension has no indigenous population and does not raise its own finance.

**Area:** 34 square miles.

**Population** (December 1975): 1,131 (St. Helenians 698); Births 17, Deaths 1.

**Agriculture** (1975): Vegetables 31,654 lb., Milk 17,700 gals.; Sheep 1,600, Pigs 300, Cattle 50.

**Budget** (April 1975–76): Revenue and Expenditure balanced at £67,576.

**Transport** (1975): Roads: 508 vehicles; Shipping: tonnage entered and cleared 905,466, ships 72; calls are made by Union Castle or Clan Line ships from St. Helena and the U.K. Calls are also made by naval vessels and occasional private yachts.

# TRISTAN DA CUNHA

The island of Tristan da Cunha lies in the South Atlantic Ocean, 1,500 miles west of Cape Town, and comes under the jurisdiction of St. Helena, 1,300 miles to the north-east. Also in the group are Inaccessible Island (20 miles west of Tristan), the three Nightingale Islands (20 miles south) and Gough Island (Diego Alvarez), 220 miles south. Tristan da Cunha was evacuated in 1961, after volcanic eruptions, but was resettled in 1963. The entire working population is employed by the Government or Tristan Investments Ltd., which operates the crayfish processing plant.

**Area** (square miles): Tristan da Cunha 38, Inaccessible Island 4, Nightingale Island ¾, Gough Island 35.

**Population** (1975): 292 on Tristan; there is a small weather station on Gough Island manned, under agreement, by personnel of the South African Government.

**Constitution:** The Administrator, representing the British Government, is aided by a Council of 8 elected and 3 nominated members which has advisory powers in legislative and executive functions. The Council's advisory functions in executive matters are performed through small committees of the Council dealing with the separate branches of administration. An election was held in 1976.

**Government:** The Administrator: S. G. TREES, M.V.O., O.B.E.

**Legal System:** The Administrator is the Magistrate. There is one Justice of the Peace.

**Religion:** The Church of England predominates, with a small number of Roman Catholics. Resident Chaplain: Rev. E. D. BUXTON.

# SOLOMON ISLANDS

The Solomon Islands comprises the major islands of Choiseul, Santa Isabel, New Georgia, Malaita, Guadalcanal and San Cristobal, plus numerous small islands, totalling 29,785 square kilometres in area. Much of the Solomon Islands remains under dense tropical rainforest; extensive tracts of native and introduced grassland cover the northern plains of Guadalcanal. The total population in 1976 was 196,708, which included 1,300 Europeans, 700 Chinese, about 2,000 Micronesians resettled from the Gilbert Islands and about 5,300 Polynesians from the Polynesian "outliers" in the western Pacific near the Solomons. The rate of population growth is very high. The capital is Honiara on the island of Guadalcanal.

### Recent History and Government

The British Solomon Islands Protectorate became the Solomon Islands on January 2nd, 1976. In 1960 a Legislative Council and Executive Council were set up with an appointed membership. These bodies were revised in 1964 to provide for a council of three ex-officio, eight official, eight elected and two nominated members. Further revisions in 1967 and 1970 increased the number of elected members to 14. After general elections in 1973, a new Governing Council of 24 elected members was constituted and a ministerial system introduced. Solomon Mamaloni, leader of the People's Progress Party (PPP), was elected Chief Minister in August 1974. Following the announcement of self-government in January 1976, arrangements for independence in July or August 1977 were tentatively proposed and the Legislative Assembly was increased to 38 members. Immediately before the announcement the Chief Minister resigned, the Cabinet was radically re-organized and Solomon Mamaloni was re-elected. The new cabinet contained five members of the PPP's former opposition, the United Solomon Islands Party. After a general election in June 1976, which was not fought on party lines, a new Chief Minister, Peter Kenilorea, was chosen by the Assembly.

### Economic Affairs

In an attempt to diversify the economy away from the single export crop copra, a number of resource surveys were carried out during the 1950s and 1960s.

A heavily mineralized area at Betilonga and in the Sutakiki Valley has been investigated for gold, silver and copper and an asbestos deposit at Kumboro on Choiseul has been surveyed. On Rennell and Wagina Islands bauxite mining seems certain to go ahead. The companies involved are the Mitsui Mining and Smelting Company of Japan and Conzinc Rio Tinto of Australia. On Bellona Island an estimated 10 million metric tons of phosphate rock is under investigation. The other main resource in the Solomons is timber. Rice and cattle farming are being developed on the grasslands, the latter largely in association with investment from Australia. The export of skipjack tuna began in 1972 and cocoa and chillies are also exported.

## STATISTICS

**Area:** Land 29,785 square kilometres.

**Population** (1976 census): 196,708; Honiara (capital) 14,993.

**Employment** (1974): Persons in paid employment 14,184.

**Agriculture** (1975): Copra 23,108 tons; Cocoa 122 tons; Rice 2,100 tons; Timber (logs) 8.1 million cu. ft.; Cattle 22,668 head.

**Fishing:** 11,585 metric tons (including 10,000 tons of skipjack tuna) landed in 1974.

**Finance:** Australian currency: 100 cents=1 Australian dollar ($A). Coins: 1, 2, 5, 10, 20 and 50 cents. Notes: 1, 2, 5, 10, 20 and 50 dollars. Exchange rates (December 1976): £1 sterling=$A1.593; U.S. $1=95.0 Australian cents; $A100=£62.76=U.S. $105.21. *Note:* for previous changes in the exchange rate, *see* the chapter on Australia. The Solomon Islands will possibly introduce a new currency in 1977.

**Budget** (1976): Estimated revenue is $A10.27 million recurrent, of which $A1.6 million is grant-in-aid from the United Kingdom. Capital expenditure is an estimated $A8.1 million, mainly financed by British Development aid and in support of the National Development Plan.

**External Trade** (1975): *Imports:* $A22,273,000 (mainly machinery and transport, food and manufactured articles); *Exports* $A11,849,000 (mainly fish, timber, copra, marine shells, scrap metal, manufactured tobacco, cocoa). Imports were mainly from Australia, and exports to Japan and Western Europe.

## THE CONSTITUTION

The present constitution, conferring internal self-government, was introduced on January 2nd 1976. There is a Governor and a Council of Ministers. The appointed Governor must act in accordance with the advice of the Council of Ministers except in his reserved subjects of defence, external affairs, internal security and the Public Service. The Council of Ministers includes eight Ministers and these members are collectively responsible to the Legislative Assembly for advice given to the Governor in the exercise of their functions under the Constitution. The Legislative Assembly is composed of 38 elected members who choose the Chief Minister.

Internal self-government was introduced on the understanding that, subject to the approval of Parliament, independence should follow within 12 to 18 months.

## THE GOVERNMENT

(*November* 1976)

**Governor:** C. H. ALLAN, C.M.G., O.B.E.

### COUNCIL OF MINISTERS

**Chief Minister:** PETER KENILOREA.

**Deputy Chief Minister and Minister of Finance:** BENEDICT KINIKA.

**Minister of Home Affairs:** FRANCIS BILLY HILLY.

**Minister of Foreign Trade, Industries and Labour:** PULEPADA GHEMU.

**Minister of Health and Welfare:** DANIEL HO'OTA.

**Minister of Education and Cultural Affairs:** MARIANO KELESI.

**Minister of Agriculture and Lands:** GIDEON ZOLEVEKE.

**Minister of Works and Public Utilities:** JOHN TEPAIKA.

**Minister of Natural Resources:** PAUL JOHN TOVUA.

## POLITICAL PARTIES

In 1976 there were four political parties. They are the People's Progress Party (PPP), the United Solomon Islands Party (USIPA) and two newly formed parties: the Nationalist Party, a political association connected with the Solomon Islands General Workers' Union, and the Melanesian Action Party.

## JUDICIAL SYSTEM

The High Court is a Superior Court of Record with jurisdiction and powers as prescribed by the Solomon Islands Constitution or by any law for the time being in force in the Solomon Islands. The Judges of the High Court are the Chief Justice, resident in the Solomon Islands and employed by their government, and Puisne Judges, who are non-resident and visit the territory as and when necessary, as prescribed by the Governor. Appeals from this Court go to the Fiji Court of Appeal and ultimately, in certain cases, to Her Majesty in Council.

In addition there are Magistrates' Courts staffed by lay magistrates exercising limited jurisdiction in both civil and criminal matters. There are also Native Courts staffed by elders of the native communities which have jurisdiction in the areas of established native custom, petty crime and local government by-laws. In 1975 a Customary Lands Appeals Court was established to hear land appeals from local courts.

**Chief Justice of the High Court:** R. B. DAVIS, O.B.E.

## RELIGION

Most of the people are Christian, and the remainder still follow their traditional animism.

**Church of Melanesia** (Anglican): Archbishop of Melanesia: The Very Rev. N. K. PALMER.

**Roman Catholic:** Bishop of Honiara, Most Rev. DANIEL STUYVENBERG, S.M., C.B.E.

**Methodist:** Bishop of Solomon Islands, Rev. L. BOSETO.

## THE PRESS

**Melanesian Messenger:** Church of Melanesia (Anglican).

**Solomon News Drum:** f. 1975; Government Information Service; weekly.

There is no local independent commercial newspaper, although efforts have been made to establish one.

## RADIO

**Solomon Islands Broadcasting Service:** daily transmission (on VQO–1030 KHz, VQO5–5020 KHz and VQO9–9545 KHz) are mainly in Pidgin with a certain amount of simple English. Broadcasts total 134 hours a week, including 14 hours of school programmes. Almost 50 per cent of the programming is produced from locally recorded material. Audience figures for 1975 were estimated at 100,000 rural and 25,000 urban.

## FINANCE

### BANKING

**Australia and New Zealand Banking Group Ltd.:** Honiara.

**Commonwealth Banking Corporation of Australia:** Honiara.

**Hong Kong and Shanghai Banking Corporation:** Honiara; P.O. Gizo, Western Solomons.

**Solomon Islands Agricultural and Industrial Loans Board:** Honiara.

### INSURANCE

About ten of the principal British insurance companies maintain agencies in the territory.

## TRADE AND INDUSTRY

**Solomon Islands Chamber of Commerce:** P.O.B. 64, Honiara.

**Solomon Islands Copra Board:** P.O.B. 454, Honiara; sole exporter of copra; agencies at Yandina and Gizo.

### CO-OPERATIVE SOCIETIES

In 1976 there were 233 primary co-operative societies working mostly outside the capital.

## TRANSPORT

### ROADS

There were 283 miles of main road in 1976. Road construction and maintenance is difficult because of the nature of the country, and what roads there are serve as feeder roads to the main town of an island. Honiara now has a main road running about 40 miles each side of it along the north coast of Guadalcanal, and Malaita has a road 98 miles long running north from Auki and around the northern end of the island to the Lau Lagoon, where canoe transport takes over; and one running south for 17 miles to Bina. On Makira a road has been built linking Kira Kira and Kakoragana, a distance of 34 miles.

### SHIPPING

Regular shipping services (mainly for freight) exist between the Solomons and Australia (Sydney and Brisbane), New Zealand, Bougainville (Kieta), Hong Kong, Japan and U.K./Continent ports. Internal shipping is provided by 32 ships of the government marine fleet and about 106 commercial vessels. Gross tonnage is 4,354. The two main ports are at Honiara and Gizo. The ports are controlled by the Solomon Islands Ports Authority.

**Solomon Islands Ports Authority:** P.O.B. 307, Honiara; Chair. R. HARDWICK.

### CIVIL AVIATION

**Solomon Islands Airways Ltd. (Solair):** P.O.B. 23, Honiara; internal services and charter. Fleet of 2 Beechcraft Baron and 1 Britten-Norman Islander.

International air services for the Islands are provided by Air Pacific to and from Fiji twice weekly and Brisbane and Papua New Guinea weekly; Air Niugini from Rabaul twice weekly and Port Moresby and Bougainville weekly; Air Nauru twice weekly.

Domestic air services are provided by Solair, operating light aircraft from Honiara to 20 aerodromes in the districts.

## TOURISM

**Solomon Islands Tourist Authority:** P.O.B. 321, Honiara; f. 1972; Chair. F. SAEMALA.

# TURKS AND CAICOS ISLANDS

The Turks and Caicos Islands consist of more than 30 islands forming the south-eastern part of the Bahamas chain of islands, and lying north of Haiti. Eight islands are inhabited: Grand Turk, Salt Cay, South Caicos, Middle Caicos, North Caicos, Providenciales, Pine Cay and Parrot Cay.

## STATISTICS

**Area:** 166 square miles.

# TUVALU

The former Gilbert and Ellice Islands Colony, situated in the South-West Pacific around the point where the International Date Line cuts across the Equator, was divided on October 1st, 1975, into the two territories of the Gilbert Islands and Tuvalu (the former Ellice Islands), after a referendum held in August 1974 in the Ellice Islands resulting in a clear majority in favour of separate status as Tuvalu.

Tuvalu comprises nine islands scattered over 1.06 million square kilometres of ocean south of the Gilbert Islands. It was administered by the existing Gilbert and Ellice Islands Council of Ministers until January 1st, 1976, but on October 1st, 1975, formed its own cabinet and legislative assembly based at the capital, Funafuti. The Deputy Governor of the former Gilbert and Ellice Islands is also Her Majesty's Commissioner in Tuvalu. The United Kingdom will finance capital projects and help to meet the recurrent costs of government.

## STATISTICS

**Land Area:** 26 square kilometres.

**Population** (1975 estimate): 9,000.

**Economy:** A subsistence level economy based on fish and coconuts.

**Finance:** Australian currency: 100 cents=1 Australian dollar ($A). Coins: 1, 2, 5, 10, 20 and 50 cents. Notes: 1, 2, 5, 10, 20 and 50 dollars. *Note:* For previous changes in the exchange rate, *see* the chapter on Australia.

**Budget:** (1976): Expenditure $A1,687,150 of which $A839,090 is British grant-in-aid. The remainder, $A850,060, is expected to comprise personal tax revenue of $A50,000, customs duties of $A125,000 and philately and coinage $A360,000.

**Development:** (1976): $A1,761,970 derived from grant and loan funds. Some of this will be used to build an administrative centre at Funafuti.

The Government is planning to spend $A758,980 on home affairs, including shipping and works, $A354,280 on social services and education and $A42,030 on commerce and natural resources.

## THE CONSTITUTION

The Constitution of Tuvalu provides for a Commissioner in Tuvalu responsible for external affairs, defence, internal security, finance and the public service, and for the establishment of a House of Assembly.

The House of Assembly comprises 8 elected members and 2 ex-officio members, the Financial Secretary and Attorney General, presided over by a Speaker appointed by the Commissioner. The elected members elect from their own number a Chief Minister on whose advice two further members are appointed to serve as ministers in a cabinet which also includes the two ex-officio members and is chaired by the Commissioner. The former Ellice representatives in the Gilbert and Ellice Islands Colony Assembly have continued to serve as the first elected members of the Tuvalu Assembly as new elections are not scheduled until October 1977.

## GOVERNMENT

(*July* 1976)

# BRUNEI

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The State of Brunei lies on the north-west coast of the island of Borneo. It is surrounded on the landward side by Sarawak, one of the two eastern states of Malaysia. The climate is tropical, characterized by consistent temperature and humidity. Annual rainfall ranges from about 110 inches in lowland areas to over 150 inches in the interior. Temperatures are high, the annual extreme range being 73°F to 96.4°F. The principal language is Malay though Chinese is also spoken and English widely used. The Malay population (65 per cent) is Muslim. Most Chinese are Buddhist, Confucian or Taoist. Europeans and Eurasians are largely Christian. The flag comprises two diagonal stripes of black and white on a yellow background, with the state emblem centred in red. The capital is Bandar Seri Begawan, formerly called Brunei Town.

### Recent History

In 1888, when North Borneo became a British protectorate, Brunei became a British-protected state. Between 1906 and 1941, a form of government emerged which included a state council. In 1959 a new constitution was adopted.

A revolt led by A. M. Azahari and the Brunei People's Party broke out in December 1962, prompted by dissatisfaction with the prospect of Brunei's joining the proposed Malaysian Federation. The disorders were suppressed, the People's Party banned and Azahari was given asylum in Malaya. In the event, in 1963 the Sultan decided against joining the Federation. From 1962 he ruled by decree, and the state of emergency declared in that year has remained in force. Sir Muda Hassanal Bolkiah succeeded his father as Sultan in 1967.

In December 1975 the UN General Assembly passed a resolution calling for British withdrawal from Brunei, the return of political exiles and for elections to be held. However, the Brunei Government remained reluctant to re-negotiate the terms of its agreement with the United Kingdom and talks planned for mid-1976 were postponed.

A number of people prominent in the 1962 rebellion were still in detention in 1976 and relations with Malaysia remained strained because of its support for the exiled former members of the People's Party.

### Government

Under an agreement signed in November 1971 Brunei was granted full internal self-government and ceased to be a protected State. The United Kingdom continues to conduct Brunei's external relations. Internal security is the responsibility of the Brunei Government. The constitution confers supreme executive authority in the State on the Sultan. He is assisted and advised by five Constitutional Councils: the Religious Council, the Privy Council, the Council of Ministers, the Legislative Council and the Council of Succession.

Since the rebellion of 1962 certain provisions of the constitution have been suspended and the Sultan has ruled by decree.

### Defence

Under the 1959 Constitution as amended in November 1971, Brunei and Britain share responsibility for the State's defence and security. The Royal Brunei Malay Regiment numbered 2,365 men in 1975. The British Government is represented on the Brunei Defence Council and a Gurkha battalion of the British army is stationed in Brunei.

### Economic Affairs

Brunei's economy depends almost entirely on its petroleum and natural gas resources. Crude petroleum is the essential source of revenue and principal export, with current production at about 240,000 barrels per day. Export earnings from oil, B$ 762 million in 1973, rose to B$ 1,970 million in 1974, an increase of 158 per cent. Earnings from natural gas, B$ 46.5 million in 1973, increased 526 per cent to B$ 291 million in 1974. Sales of oil and natural gas were largely responsible for the favourable trade balance in 1974; exports reached B$ 2,353 million, while imports amounted to B$451 million, a trade surplus of B$ 1,902 million.

Revenues from oil and gas are being used to finance ambitious development projects aimed at improving infrastructure, increasing public and private investment, diversifying the economy and improving social welfare. Projects already completed include an international airport, a deep-water port at Muara and a natural gas liquefaction plant, the largest in the world, at Lumut. The Five-Year Plan (1974–78) stresses the importance of diversification and aims at creating 10,000 new jobs by 1978. In 1973 the G.D.P. reached B$997.3 million. It more than doubled in 1974 to B$2,406 million, but dropped by 5.7 per cent in 1975 to B$2,268 million, largely as a result of a decline in the demand for oil. Other sectors of the economy expanded, notably manufacturing, which grew by 55 per cent in 1975. The rate of inflation was 21.4 per cent in 1974 but only 3.9 per cent in 1975. Highly favourable tax concessions were introduced in 1975 with the aim of encouraging investment in new industries. The areas most suitable for industrial development are timber, paper, fertilizers, petro-chemicals and glass. In 1975 government investment in development projects totalled B$82 million, well below the Plan target of $126 million.

With the expansion of the oil and gas industries the relative importance of agriculture has declined, and Brunei imports around 80 per cent of its food requirements. However, much potential agricultural land lies undeveloped and the Five-Year Plan aims at achieving self-sufficiency in those crops, such as rice, that Brunei can produce itself.

### Transport

There are five ports in Brunei. Most sea traffic is handled by a deep-water port at Muara. Brunei International airport was opened in 1974. There are some 370 kilometres of roads and 720 kilometres of district tracks.

### Social Welfare

Free medical services are provided by the state. In 1973 there was one hospital bed for each 166 of the population. There is a flying doctor service as well as various clinics, travelling dispensaries and dental clinics. A non-contributory state pensions scheme for the old and disabled came into operation in 1955.

### Education

Education is free. Schools are classified according to the language of instruction, i.e. Malay, English or Chinese (Mandarin). Total enrolment in primary schools was 30,772 in 1973 while in secondary schools the enrolment was 12,479. There are five technical colleges including a teachers' training college.

### Tourism

Tourism is relatively underdeveloped though there are the beginnings of a tourist industry. The Five-Year Plan (1974–78) emphasizes the expansion of tourism.

*Visas* are not required by British visitors for stays of up to 14 days. Holders of other passports normally require an entry permit.

### Public Holidays

**1977:** May 31st (Anniversary of the Royal Brunei Malay Regiment), July 14th (Meraj, Ascension of the Prophet), July 15th (Sultan's Birthday), August 16th (First day of Ramadan), August 31st (Anniversary of the Revelation of the Koran), September 15th and 16th (End of Ramadan), September 29th (Constitution Day), November 22nd and 23rd (Hari Raya Haji), December 12th (Muslim New Year), December 25th (Christmas Day), December 26th (Boxing Day).

**1978:** January 1st (New Year's Day), January-February (Chinese New Year)*, February 20th (Maulud, Birth of the Prophet).

* From the first to the third day of the first moon of the lunar calendar.

*Note:* Dates are subject to alteration.

### Weights and Measures

The imperial system is in operation but local measures of weight and capacity are used. These include the Gantang (1 gallon), the Tahil (1⅓ oz.) and Kati (1⅓ lb.).

### Currency and Exchange Rate

100 cents = 1 Brunei dollar (B$).
Exchange rates (December 1976):
£1 sterling = B$4.07; U.S. $1 = B$2.455.

## FINANCE

100 sen (cents) = 1 Brunei dollar (B$).

Coins: 1, 5, 10, 20 and 50 cents.

Notes: 1, 5, 10, 50 and 100 dollars.

Exchange rates (December 1976): B$1 = 1 Singapore dollar; £1 sterling = B$4.07; U.S. $1 = B$2.455
B$100 = £24.59 = U.S. $40.73.

*Note:* The Brunei dollar (B$) was introduced in June 1967, replacing (at par) the Malayan dollar (M$). From September 1949 the Malayan dollar was valued at 2s. 4d. sterling (£1 = M$8.5714) or 32.667 U.S. cents (U.S. $1 = M$3.0612). This valuation in terms of U.S. currency remained in effect until August 1971. Between December 1971 and February 1973 the Brunei dollar was valued at 35.467 U.S. cents (U.S. $1 = B$2.8195). From February to June 1973 the Brunei dollar's value was 39.407 U.S. cents (U.S. $1 = B$2.5376). In terms of sterling, the exchange rate was £1 = B$7.347 from November 1967 to June 1972. The formal link with the Malaysian dollar, begun in June 1967, ended in May 1973 but the Brunei dollar remained tied to the Singapore dollar. Since June 1973 the Singapore dollar has been allowed to "float". The average market exchange rate (B$ per U.S. $) was: 2.809 in 1972; 2.444 in 1973; 2.437 in 1974; 2.371 in 1975.

## THE CONSTITUTION

*Note:* Parts of the constitution have been in abeyance since 1962.

A new constitution was promulgated in September 1959. Under it sovereign authority is vested in the Sultan, who is to be assisted and advised by five Councils:

**The Religious Council:** In his capacity as head of the Islamic Faith, the Sultan is advised in all Islamic matters by the Religious Council, whose members are appointed by the Sultan.

**The Privy Council:** This Council, presided over by the Sultan, is to advise the Sultan on matters concerning the Royal prerogative of mercy, the amendment of the constitution and the conferment of ranks, titles and honours.

**The Council of Ministers:** Presided over by the Sultan, the Council of Ministers considers all executive matters as well as those raised by the Legislative Council. It is composed of 11 members, including the High Commissioner.

**The Legislative Council:** This council is presided over by a Speaker appointed by the Sultan. The Council introduces Bills, passes laws, exercises financial controls and scrutinizes government policies.

**The Council of Succession:** Subject to the Constitution this Council is to determine the succession to the throne should the need arise.

A Mentri Besar (Chief Minister) is responsible to the Sultan for the exercise of all executive authority. He is assisted by a State Secretary, an Attorney-General and a State Financial Officer.

The State is divided into four administrative districts, in each of which is a District Officer (Malay) responsible to the Mentri Besar.

## THE GOVERNMENT

(*December* 1976)

**The Sultan:** H.H. MUDA HASSANAL BOLKIAH MU'IZZADDIN WADDAULAH (succeeded October 5th, 1967; crowned August 1st, 1968).

# BURMA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Socialist Republic of the Union of Burma lies in the uppermost region of South-East Asia between the Tibetan plateau and the Malayan peninsula. Its principal neighbours are India to the north-west, China to the north-east and Thailand to the south-east. The climate is tropical, with an average temperature of 80°F (27°C) and monsoon rains from May to October. The official language is Burmese and there are also a number of tribal languages. About 80 per cent of the population are Buddhists. There are Christian, Hindu and Muslim minorities, and there is a Chinese community of some 350,000. The national flag is red with a blue canton bearing two ears of rice within a cogwheel and a ring of 14 stars, all in white. The capital is Rangoon.

### Recent History

Burma was annexed to British India during the nineteenth century. It was separated from India in 1937 with a limited measure of self-government. Japanese forces occupied the country in 1942 and granted nominal independence under a government of anti-British nationalists. The Burmese nationalists later turned against Japan and aided Allied forces to retake the country. They formed a resistance movement, the Anti-Fascist People's Freedom League led by Gen. Aung San, which became the main political force after the defeat of Japan. Aung San was assassinated in July 1947 and was succeeded by U Nu. In January 1948 the Union of Burma became independent, outside the Commonwealth, with U Nu as the first Prime Minister.

During the first decade of independence Burma was a parliamentary democracy and resisted revolts by communist and other insurgent groups. In 1958 the ruling AFPFL split, precipitating a political crisis. U Nu invited the Army Chief of Staff, Gen. Ne Win, to head a caretaker government and restore order. Elections in February 1960 gave an overwhelming majority to U Nu, leading the Union Party, and he resumed office in April. Despite its popularity, the U Nu administration proved ineffective in dealing with internal security and economic development, while the Union Party was split by factional dissension. In March 1962 Gen. Ne Win intervened again, this time by staging a coup to depose U Nu. The new Revolutionary Government suspended the constitution and instituted authoritarian control through the Government-sponsored Burma Socialist Programme Party (BSPP). All other political parties were outlawed in March 1964.

The next decade saw the creation of a more centralized system of government, representing an attempt to win popular support and nationalize the economy. In 1971 it was announced that a new constitution would be drafted with the aim of transforming Burma into a democratic socialist state and a final draft was approved in a national referendum in December 1973. Under this constitution new governmental organizations were created, the BSPP became the sole authorized political party and the country's name was changed to the Socialist Republic of the Union of Burma. In March 1974 Ne Win (who, together with other senior army officers, became a civilian in 1972) was elected President by the new Council of State. Despite these developments there have been, in fact, remarkably few changes in the ranks of leading politicians since 1962, while the BSPP, of which the army forms the core, has increased its influence.

During 1974 and early 1975 government security forces achieved some success in suppressing various insurgent minority groups but in May 1975 five of these organizations agreed to unite in the Federal National Democratic Front (FNDF) with the aim of overthrowing the Government and establishing a federal union based on national self-determination. Operations against the rebels continued during 1976. In June the FNDF was extended to include four more minority groups.

In July 1976 a plot by junior army officers to assassinate Ne Win was discovered. The conspirators, said to be supporters of Gen. Tin U, the former Minister of Defence and Commander-in-Chief of the Armed Forces, were quickly arrested and by September 1976 the Government felt sufficiently secure to end martial law in Rangoon, imposed after student riots in 1974. The universities, closed since March 1976 owing to disturbances, were reopened in October 1976.

### Government

Under the constitution which came into force in January 1974, the highest organ of state is the 450-member People's Assembly, a legislative body elected by the people. From among its members the Assembly elects a Council of State, which, in turn, elects its own Chairman, who is President of the Republic. The Council is the chief decision-making organ of government and co-ordinates the work of central and local governmental organs. The Assembly also elects the Council of Ministers, which is responsible for the public administration of the state, the Council of People's Justices, the Council of People's Attorneys and the Council of People's Inspectors. As for local government, the state, formerly a federation, is now unitary, and is divided into States or Divisions. These in turn are divided into townships, and townships into wards or village-tracts. People's Councils exist for every subdivision at each of these levels.

### Defence

Burma maintains neutrality and has no external defence treaties. The armed forces are largely engaged in internal security duties. In 1975 the armed forces totalled 167,000 men, of whom 153,000 were in the army. Para-military forces comprise a People's Police Force of 35,000 men.

### Economic Affairs

Burma is relatively rich in agricultural, fishery, timber, mineral and water resources. In 1973 agriculture produced about 40 per cent of G.N.P. and employed 67 per cent of the labour force. Rice, timber and other agricultural products have traditionally been the main export items, though rice exports have declined drastically since 1964 when they accounted for about 60 per cent of export earnings. Exports of rice amounted to only 366,000 tons in 1974/75.

Industry accounts for about 50 per cent of the G.N.P. Mining of tin, petroleum and coal is important; the expanding petroleum industry is expected to supply all Burma's requirements for petroleum products by the late 1970s. There are small deposits of tungsten, lead, zinc, antimony, silver and gold, and a number of other minerals are known to exist. Burma's principal trading partner is Japan, which supplied 23.2 per cent of imports and took 19.2 per cent of exports in 1973/74.

Industry, transport, internal and external trade, communications and finance have been nationalized since the 1962 revolution. Economic growth has been slow, with production rising only slightly faster than the population. From 1966 to 1976 the G.D.P. grew at an annual rate of 2.3 per cent, while the population increased at a rate of 2.2 per cent. In 1973 the Government began to relax its opposition to foreign investment and aid and joined the Asian Development Bank (ADB). Between 1973 and 1976 Burma received development aid from Federal Germany, Japan and the People's Republic of China. A new four-year plan was launched in 1974 with the aim of raising the G.N.P. and export earnings and increasing the level of foreign and domestic investment. In 1976 a five-year programme was announced which aims to increase the overall investment ratio from 8 to 15 per cent of the G.N.P. by 1981/82 and to achieve an annual growth rate of 8.4 per cent in exports. It is planned to invest U.S. $3,364 million in development projects in agriculture and industry during this period. The kyat was "floated" in July 1974 and devalued by 23 per cent in January 1975.

### Transport and Communications

The chief artery of traffic is the river Irrawaddy, which is navigable as far as Bhamo, 900 miles inland. The Irrawaddy delta has nearly 2,000 miles of navigable waters and some parts of the Salween and the Chindwin are navigable. An agreement was signed with the World Bank in 1973 for a $33 million credit to help rehabilitate the waterways and railways. Railways have been modernized by the introduction of diesel engines and in 1974 comprised 2,690 track miles compared with 2,606 track miles in 1971. Burma Airways Corporation provides internal and international air services. All the railways, domestic air services and the other major inland water facilities are owned and operated by the State. All passenger and freight road transport services are to be nationalized. In 1974 there were 13,512 miles of motorable roads.

### Social Welfare

Burma has fairly well-developed health facilities but they are not comprehensive. Health treatment is free. About 500,000 workers are covered by social security insurance and all workers are entitled to state pensions.

### Education

Education is free, where available. Schools are divided into primary, middle and high schools. There were over 20,000 schools, colleges and professional institutes in 1973/74 with a total enrolment of 4.3 million pupils. Emphasis is placed on vocational and technical training. There are two universities.

### Tourism

Tourism is undeveloped. Burma is one of the centres of Buddhism and has many temples and shrines, including the famous Shwe Dagon Pagoda in Rangoon. Mandalay and Pagan also possess outstanding temples and palaces.

*Visas* are required by all visitors.

### Sport

There is little organized sport, but football, basketball, volleyball and tennis are played.

### Public Holidays

**1977:** May 1st (World Workers' Day), July 19th (Martyrs' Day), November 14th (National Day), December 25th (Christmas).

**1978:** January 4th (Independence Day), February 12th (Union Day), March 2nd (Peasants' Day, anniversary of 1962 coup), March 27th (Resistance Day).

In addition to the above holidays the usual Buddhist holidays are observed.

### Weights and Measures

The imperial system is in force.

### Currency and Exchange Rates

100 pyas = 1 kyat.

Exchange rates (December 1976):
£1 sterling = 11.90 kyats;
U.S. $1 = 7.12 kyats.

# THE CONSTITUTION

The constitution came into force on January 3rd, 1974, following a national referendum held in December 1973. It is the basic law of the State. A summary of the main provisions follows:

## General Principles

The Socialist Republic of the Union of Burma is a sovereign, independent, socialist state. There shall be only one political party, the Burma Socialist Programme Party. Sovereign power rests with the people as represented by the People's Assembly. The State is the ultimate owner of all natural resources and shall exploit them in the interests of the people. The means of production shall be nationalized. National groups shall have the right to practise their religion and culture freely within the law and the national interest. The State shall follow an independent and peaceful foreign policy.

## State Organs

The structure of the State is based on a system of local autonomy under central leadership. Government operates at four levels of administration: wards or village tracts, townships, states or divisions and at national level.

## People's Assembly

A unicameral legislature, the highest organ of State power, it exercises sovereign power on behalf of the people. It is elected directly by secret ballot for a term of four years. Regular sessions take place twice a year, the intervening period being no more than eight months. The People's Assembly may be dissolved if three-quarters of its members agree to it. It may delegate executive and judicial power to central and local state organs. It has the power to enact economic legislation, declare war and peace and the right to call referenda. It may constitute committees and commissions and invest them with powers and duties. Under certain circumstances the People's Assembly may dissolve the People's Councils.

## Council of State

The Council of State is composed of 28 members including one representative from each of the 14 States and Divisions, elected by the People's Assembly from its members. The Council of State elects a chairman from its members who is President of the Union and represents the State. The term of office of the Council and the President is the same as that of the People's Assembly. The Council of State is vested with executive power to carry out the Constitution. It has the power to convene the People's Assembly in consultation with the panel of Chairmen of the Assembly. It interprets and promulgates legislation, makes decisions concerning diplomatic relations, international treaties and agreements. It is responsible for the appointment of the heads of the bodies of the public services. The Council of State has the power to grant pardons and amnesties. It may make orders with the force of law between sessions of the People's Assembly, and may order military action in defence of the State, declare a state of emergency and martial law subject to the subsequent approval of the People's Assembly.

## Council of Ministers

The highest organ of public administration, elected by the People's Assembly from a list of candidates submitted by the Council of State. Its term of office is the same as that of the People's Assembly. The Prime Minister is elected by the Council of Ministers from among its members. It is responsible for the management of public administration and drafting economic measures and submitting them to the People's Assembly for enactment.

## Council of People's Justices

The highest judicial organ. Elected by the People's Assembly from a list of its members submitted by the Council of State. Its term of office is the same as that of the People's Assembly. The People's Councils form judges' committees at local levels.

## Council of People's Attorneys

Elected by the People's Assembly from a list of members submitted by the Council of State. Its term of office is the same as that of the People's Assembly. It is responsible to the People's Assembly for directing state, divisional and township law officers, protecting the rights of the people and supervising the central and local organs of state power.

## Council of People's Inspectors

Elected by the People's Assembly from a list of candidates submitted by the Council of State. Its term of office is the same as that of the People's Assembly. It is responsible to the People's Assembly for the inspection of the activities of the local organs of state power, ministries and public bodies. There are also local inspectorates at each administrative level, responsible to the People's Council concerned.

## People's Councils

The term of office of the People's Councils is the same as that of the People's Assembly. They are elected at different levels according to law. They are responsible for local economic and social affairs and public administration, the administration of local justice, local security, defence and the maintenance of law and order. Each of the People's Councils elects an executive committee to implement its decisions. The Executive Committees each elect a Chairman and a Secretary from among themselves who are also the Chairman and Secretary of the People's Council concerned.

## Fundamental Rights and Duties of Citizens

All citizens are equal before the law irrespective of race, religion, sex or other distinction. Every citizen has the right to enjoy the benefits derived from labour, to inherit, to settle anywhere in the State according to law, to medical treatment, education and rest and recreation. Freedom of thought, conscience and expression are upheld subject to the law and the interests of state security. All citizens are bound to abstain from undermining the sovereignty and security of the State and the socialist system.

## Electoral System

All citizens over 18 years are entitled to vote. Those whose parents are both citizens may stand for election to office having attained the age of 20 years (Village and Township Councils), 24 years (State and Divisional Councils), 28 years (People's Assembly). Members of religious orders and others disqualified by law are prohibited from voting or standing for election.

# BURUNDI

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Burundi lies on Lake Tanganyika in the heart of Africa, a little below the Equator. Rwanda is to the north, Tanzania to the south and east and Zaire to the west. The climate is tropical with an irregular rainfall. The official languages are French and Kirundi; and Swahili is used in addition to French in commercial circles. Religious beliefs are African and animistic but missions have converted more than half the population to Roman Catholicism. The national flag (proportions 3 by 2) consists of a white diagonal cross on a background of red and green, with a white circle containing three green-edged red stars in the centre. The capital is Bujumbura.

### Recent History

Before independence Burundi formed part of the Belgian-administered UN Trust Territory of Ruanda-Urundi, which was itself formerly part of German East Africa. Internal self-government was granted in January 1962, following elections to a new National Assembly in September 1961, and full independence in July 1962, when the two parts of the Trust Territory became separate states. Burundi continued to be linked to Rwanda in a customs and monetary union, until the agreements were terminated in January 1964. In July 1966 Mwambutsa IV, king since 1915, was deposed by his son Charles, with the help of a group of army officers, and the constitution suspended. In November 1966, Charles, now Mwami (King) Ntare V, was himself deposed by his Prime Minister, Captain (later Lieut.-Gen.) Michel Micombero, who declared Burundi a Republic. Agreement on a settlement of the long dispute with Rwanda, during which armed refugees from both countries had clashed, was reached in March 1967 with the mediation of President Mobutu of Congo-Kinshasa (now Zaire).

Micombero's rule confirmed the long established dominance of the Tutsi tribe élite over the Hutu tribe who form the majority of the population. Several alleged plots against the Government in 1969 and 1971 were followed in 1972 by an abortive coup during which Ntare V was killed. The Hutus were held responsible for the attempted coup and this served as an excuse for the Tutsis to conduct a series of large-scale massacres of the rival tribe. Many Hutus fled to neighbouring countries and repression of the tribe continued.

In 1972 Micombero began a prolonged restructuring of the executive which resulted in 1973 in an appointed seven-man Presidential Bureau, with Micombero holding the dual office of President and Prime Minister. A new republican constitution was introduced in July 1974 which vested sovereignty in UPRONA (Unity and National Progress), the sole legal political party in Burundi. The President was elected Secretary General of the party and re-elected for a seven-year presidential term.

On November 1st, 1976, an army coup deposed Micombero. Lieutenant-Colonel Jean-Baptiste Bagaza was appointed President by the Supreme Revolutionary Council (composed of army officers), and a new Council of Ministers formed.

### Government

Executive power is ostensibly in the hands of a Council of Ministers, which, according to the Constitution, is directly responsible for its policy to UPRONA, the sole legal political party. Policy issues are also under the direction of the Supreme Council of the Republic (Supreme Revolutionary Council) which is entirely composed of army officers. There are eight provinces, administered by military governors, each of which is divided into districts and further sub-divided into communes.

### Defence

The army was merged with the police force in 1967 and total armed strength in 1975 was about 5,000 men. Defence expenditure in 1975 amounted to 23 per cent of the national budget, compared with 13.2 per cent in 1971.

### Economic Affairs

The economy is based almost entirely on agriculture, the main subsistence crops being cassava and sweet potatoes and the main cash crops coffee and cotton. Coffee is Burundi's principal export and accounted for 90.7 per cent of earnings in 1975, the main customer being the U.S.A. Tea is being developed and the Government plans to raise output to around 7,000 tons by 1978, during which time six to eight tea processing factories are to be built. The EEC countries, in particular Belgium, Luxembourg, France and Federal Germany, are Burundi's main trading partners, but continue to provide more imports than they take exports. Inflation seriously affected the economy in 1975. Imports rose substantially whilst coffee production was disappointing and exports fell. In May 1976 the Burundi franc was devalued by 12.5 per cent.

The mining industry, based on gold and cassiterite, is developing, and exports have been expanding rapidly over the last few years. Tungsten, tantalum and nickel are also mined. Manufacturing industry is, however, still in its infancy, accounting for less than one-tenth of Gross Domestic Product, and many industrial and consumer goods have to be imported. In September 1976 Burundi established, with Zaire and Rwanda, the Economic Community of the Great Lakes Countries (CEPGL) and in 1974 trade agreements with the EEC, through the ACP (African, Caribbean and Pacific) countries, were reached.

Most foreign aid to Burundi comes from Belgium, France and Federal Germany and through the EEC's European Development Fund. In 1974 the African Development Fund and Development Bank both made substantial development loans to Burundi.

### Transport and Communications

There are no railways in Burundi. Roads extend for 6,000 km., of which 134 km. are asphalted. Six "routes nationales" link the major towns, and improvements are being undertaken with loans from China and the African Development Bank. These include the asphalting of the road from Kayanzu to the Rwanda border and an approved plan to extend the Bujumbura–Gitega road to the Tanzania border. There is passenger and freight traffic on Lake Tanganyika with Bujumbura as the main port handling about 150,000 tons of goods yearly and an international airport at Bujumbura equipped to take large jet aircraft.

### Social Welfare

Wage-earners are protected by insurance against accidents and occupational diseases and can draw on a pension fund. Medical facilities are, however, very limited. The ratio of persons to hospital beds is 760 to 1.

### Education

Education is free but since 1972 its budget allocation has been severely reduced. French is the language of instruction in the secondary schools and Kirundi in primary schools. In 1974 there were 127,176 pupils in primary schools, 4,517 in secondary, and 4,385 student teachers. There is a university with three faculties at Bujumbura.

### Tourism

*Visas* are not required to visit Burundi by citizens of Tanzania and Uganda, but, as yet, tourism in Burundi is practically non-existent.

### Sport

Sport is very popular, the chief sport being football.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension), May 30th (Whit Monday), July 1st (Independence Day), August 15th (Assumption), September 18th (Victory of UPRONA Party), October 13th (Murder of Hero of the State Rwagasore), November 1st (All Saints'), November 28th (Republic Day), December 25th (Christmas).

**1978:** January 1st (New Year's Day), March 27th (Easter Monday).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes = 1 Burundi franc.

100 centimes = 1 Burundi franc.
Coins: 1, 5 and 10 francs.
Notes: 10, 20, 50, 100, 500, 1,000 and 5,000 francs.
Exchange rates (December 1976): £1 sterling = 149.13 francs; U.S. $1 = 90.00 francs.
1,000 Burundi francs = £6.71 = $11.11.

*Note:* The Burundi franc was introduced in May 1964, replacing (at par) the Rwanda-Burundi franc, valued at 2 U.S. cents ($1 = 50.00 RB francs). This remained the exchange rate until January 1965. Between then and February 1973 the rate was $1 = 87.50 Burundi francs (1 franc = 1.143 U.S. cents), despite the devaluation of the U.S. dollar in December 1971. From February 1973 to May 1976 the exchange rate was $1 = 78.75 Burundi francs (1 franc = 1.270 U.S. cents). Since May 1976 the rate has been $1 = 90.00 Burundi francs. In terms of sterling, the official exchange rate was £1 = 210 francs from November 1967 to August 1971; and £1 = 228 francs from December 1971 to June 1972.

# THE CONSTITUTION

The new republican constitution was introduced on July 11th, 1974, nearly eight years after the declaration of the republic.

**The Party:** UPRONA (*Parti de l'Unité et du Progrès National de Burundi*) is the sole legal political party. It determines national political orientation and state policy and supervises the actions of the Government and the judiciary. The Secretary-General is elected every seven years by an absolute majority in the national congress of the party. He is proposed by the Central Committee. The Secretary-General automatically becomes President of the Republic and Head of Government.

**The President:** His term of office is for seven years and is renewable. He draws up legislation and is responsible for executive action. He may proclaim a state of emergency and a state of siege.

The nation's status is defined as unitary, indivisible, laicist and democratic. The preamble proclaims Burundi's adherence to the UN Charter and to the Universal Declaration of Human Rights, and separate articles outlaw all forms of racial or ethnic discrimination.

# THE GOVERNMENT

**President:** Lieut.-Col. JEAN-BAPTISTE BAGAZA.

### COUNCIL OF MINISTERS

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

Cambodia, officially known as Democratic Kampuchea, occupies part of the Indo-Chinese peninsula in South-East Asia. It is bounded by Thailand and Laos to the north, Viet-Nam to the east and by the Gulf of Siam to the south. The climate is tropical. The heaviest rainfall occurs in September. The temperature ranges from 20° to 36°C (68° to 97°F), the average at Phnom-Penh being 27°C (81°F). The Khmer language is the official language spoken by all except the Vietnamese and Chinese minorities. The principal religion was Theravada Buddhism but reports indicate that it has been discouraged since 1975. The national flag is red with the national "Angkor" symbol in yellow in the centre. The capital is Phnom-Penh.

### Recent History

Formerly a French protectorate, in 1949 Cambodia was recognized by France as an independent state within the French Union. In 1953 Cambodia was granted complete independence under its King, Norodom Sihanouk. He abdicated in 1955 to become a political leader, and was elected Head of State in 1960. Now a Prince, he ruled through a cabinet and parliament, but with frequent direct appeals to the electorate to bolster his personal authority. His government maintained an official policy of neutrality, but during the 1960s developed good relations with the People's Republic of China and North Viet-Nam, while being highly critical of the United States' role in Asia. From 1964, however, the Prince's government was faced with a pro-Communist insurgency movement, the *Khmers Rouges*. Also, it became increasingly difficult to isolate Cambodia from the war in Viet-Nam. Large numbers of North Vietnamese and National Liberation Front (NLF) troops were on Cambodian soil, and Cambodian territory was violated by Saigon and U.S. air and ground forces.

In March 1970 a *coup* led by the Prime Minister, Lt.-Gen. (later Marshal) Lon Nol, deposed Sihanouk. The new government pledged itself to the removal of foreign Communist forces and appealed to the U.S.A. for military aid. Sihanouk went into exile and formed a Royal Government of National Union of Cambodia (GRUNC), supported by the *Khmers Rouges*. Sihanoukists and the *Khmers Rouges* formed the National United Front of Cambodia (FUNC). Their combined forces, aided by the NLF and North Vietnamese troops, quickly put the new regime in jeopardy. In April 1970 a large-scale incursion of South Vietnamese and U.S. forces was required to defend Phnom-Penh. Two months later U.S. troops withdrew, but bombing raids continued until 1973 and U.S. military assistance remained essential to the survival of the Lon Nol regime.

In October 1970 Marshal Lon Nol proclaimed the Khmer Republic and in June 1972, after the promulgation of a new constitution, was elected the first President. His regime never controlled more than a small fraction of rural areas and its hold on the towns was precarious.

Corruption was rife in both the army and government. An American-inspired attempt to broaden the base of Lon Nol's government led to the appointment of opposition politicians to high positions in early 1973, but the experiment collapsed in December when Gen. In Tam, a leading opposition figure, resigned as Prime Minister.

During 1973 an increasing number of foreign states recognized GRUNC as the rightful government of Cambodia. In September 1973 Prince Sihanouk represented his country at the conference of non-aligned nations in Algiers. However, attempts during 1973 and 1974 to challenge the credentials of the Khmer Republic delegation to the UN narrowly failed.

In 1974 the republican regime's control was limited to a few urban enclaves, besieged by GRUNC forces, mainly *Khmers Rouges*. Following a new offensive launched in January 1975, Phnom-Penh was completely isolated and, though briefly sustained by American airlifts, fell to the *Khmers Rouges* in April. The GRUNC victory was followed by an almost total blackout on information but it became clear that the first act of the new government was to depopulate the overcrowded cities, including Phnom-Penh, and return peasants to the countryside to forestall the danger of famine. Prince Sihanouk became Head of State again and the name of the country reverted to Cambodia, although both Radio Phnom-Penh and Prince Sihanouk referred to it as Kampuchea.

In December 1975 a congress of FUNC approved a new constitution, promulgated in January 1976. This established a republican form of government and a 250-member People's Representative Assembly. Elections for the Assembly were held in March 1976 and in April Prince Sihanouk resigned as Head of State and GRUNC was dissolved. The Assembly elected Khieu Samphan, formerly Deputy Prime Minister, to be President of the State Presidium (Head of State). A new Council of Ministers was formed in which the Prime Minister was Pol Pot (sometimes known as Tol Saut), reportedly Secretary-General of the Cambodian Communist Party, although real power was thought to be held by Ieng Sary, the Foreign Minister, Son Sen, the Minister of Defence, and Saloth Sar, the Secretary of FUNC.

In September 1976 Pol Pot stepped down temporarily as Prime Minister on grounds of ill-health and Nuon Chea, the President of the Assembly, took over the post. This led to speculation that further government changes were to take place.

The defeat of the Lon Nol government led to a total transformation of Cambodia's foreign relations. By April 1975 most foreign diplomatic missions had withdrawn their staff from Cambodia and after the fall of Phnom-Penh diplomatic activity was conducted with very few nations. By December 1976 29 countries had established diplomatic relations with the new regime, but only eight had representatives in Phnom-Penh. Although the constitution emphasizes a non-aligned foreign policy, very close relations with the People's Republic of China have developed.

### Government

Legislative authority lies with the People's Representative Assembly of 250 members elected by direct universal suffrage for a five-year term. The Assembly directs both domestic and foreign policy, elects the three-member State Presidium and the Council of Ministers, and appoints members to a Popular Tribunal, which administers justice.

### Defence

The situation of the "Liberation Army", which was organized into four divisions and three independent regiments, equipped with a mixture of Soviet, Chinese and American arms and totalled some 80,000 men, is unclear.

### Economic Affairs

The essentially agricultural Cambodian economy was totally disrupted by the perpetual military conflict between 1970 and 1975. Before 1970 rice was Cambodia's principal export but by 1974 the country was a net importer of rice. It is estimated that the area of rice under cultivation fell from 2,428,000 hectares in 1969 to 782,000 hectares in 1973. Rubber production fell similarly. In addition, the extent of military activity and the American bombing severely disrupted road and rail communications.

With much of the country's productive capacity and infrastructure destroyed, the republican economy became entirely dependent on U.S. aid, which totalled $668 million in 1974. By 1975 there was no economy, save for the rice, arms and other aid provided by the U.S.A.

With GRUNC's assumption of control in April 1975, a vigorous agricultural programme was put into effect to overcome severe food shortages. Partly to this end, the overcrowded urban areas were cleared of their inhabitants, who were driven into the countryside to work on the land and in other tasks of economic reconstruction. All sectors of the economy were nationalized and the new government declared its principal objective to be the production of as much rice, other strategic crops and livestock as possible. Currency dealings largely ceased and in December 1976 a barter system was in operation.

According to Radio Phnom-Penh the Government had an extensive programme to restore the country's infrastructure (*see* below under *Transport and Communications*) and industry during 1975. By May 1976 more than 100 factories were reported to be back in production. However, Government plans, announced in mid-1976, did not provide for any expansion in the industrial sector, but emphasized the rehabilitation of existing factories and the restoration of agricultural production. It is thought that rice, beans, dried fish, rubber, fruit, hides and teak will constitute Cambodia's main exports. By mid-1976 it was estimated that Cambodia had exported 13,000 tons of rubber to the People's Republic of China and the Democratic People's Republic of Korea. With its problems of transport, supply and communications, the bulk of Cambodia's imports are likely to consist of fuel, machinery and spare parts. A new economic agreement was concluded with the People's Republic of China in August 1975 and a further agreement signed in March 1976. In October 1976 a trading point was opened on the Thai border and a Cambodian trading mission was set up in Hong Kong which bought goods valued at U.S. $1 million with Chinese aid. With serious food shortages reported, it was clear at the end of 1976 that the Government still faced a daunting task in reviving the national economy and that all sectors of the economy would remain under tight state control.

### Transport and Communications

Much of the country's transport system was destroyed or disrupted during the war but, according to Radio Phnom-Penh, an extensive programme of reconstruction was undertaken after April 1975. The port of Kompong Son was reported to have been re-opened to shipping in July 1975, and the Phnom-Penh-Takeo railway in September 1975. Extensive repair work was also said to have been undertaken along Route 5, which links the capital with the rice-growing areas of the north-west. By late 1976 air links had been established between Phnom-Penh and Peking and Hanoi.

### Education

Reports indicate that schools have been closed for formal education since April 1975 but some may have reopened for revolutionary teaching.

### Tourism

Principal attractions are the many monuments of the great Khmer Empire (ninth to fourteenth century A.D.). Until 1970 tourism was an important section of the economy, but ceased owing to military activity and had not been resumed in late 1976.

*Visas* are required by all visitors.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 sen = 1 riel.

Exchange rates (April 1975):

£1 sterling = 3,945 riels;
U.S. $1 = 1,675 riels.

There appears to be no currency in use at the present time.

## FINANCE

100 sen = 1 riel.

Coins: 10, 20 and 50 sen.

Notes: 1, 5, 10, 20, 50, 100 and 500 riels.

Exchange rates (April 1975): £1 sterling = 3,945 riels; U.S. $1 = 1,675 riels.

10,000 riels = £2.535 = $5.970.

*Note:* The riel was introduced in January 1955, replacing (at par) the Indo-Chinese piastre. From May 1953 the piastre's value was 10 old French francs. The initial exchange rate was thus U.S. $1 = 35 riels (1 riel = 2.857 U.S. cents). Except for exchange transactions in U.S. dollars and sterling, the riel was linked to French currency, with a value of 10 French centimes after the introduction of the new French franc in January 1960. In August 1969 the multiple exchange rate system ended when the riel was devalued (in line with the French franc) to 16 milligrammes of gold, worth 1.8004 U.S. cents ($1 = 55.542 riels) until August 1971. In October 1971 the official rate became inoperative except for specified official transfers and a flexible "floating" rate was established, initially at $1 = 140 riels. Thus the riel's link to the French franc was effectively broken and the currency devalued. The "floating" rate was later adjusted upwards, reaching $1 = 120 riels in January 1972, but thereafter the currency was frequently devalued. The exchange rate was $1 = 187 riels at the end of 1972; and $1 = 275 riels at the end of 1973. In September 1974 the currency was devalued by 65 per cent, with the exchange rate altered from $1 = 420 riels to $1 = 1,200 riels. By the end of 1974 the rate was $1 = 1,650 riels. In terms of sterling, the exchange rate was £1 = 98 riels before November 1967; £1 = 84 riels from November 1967 to August 1969; and £1 = 133.30 riels from August 1969 to October 1971. Since April 1975 no information concerning the exchange rate has been available.

## THE CONSTITUTION

A new constitution was approved on December 14th, 1975, by the third national congress of the National United Front of Cambodia. It was approved by the Royal Government of National Union on January 3rd, 1976, and promulgated two days later. The main provisions are summarized below.

---

Democratic Kampuchea is an independent, united, peaceful and non-aligned democratic state. The constitution prohibits the establishment of foreign bases in Cambodia, and the state has the duty to protect the people from foreign aggression. Cambodia must struggle against all forms of aggression: intellectual, economic, military, social and diplomatic. It is a nation of workers and peasants and the means of production belong to the state and people.

Legislative authority rests with the Cambodian People's Representative Assembly, with 250 members elected by direct, universal suffrage for a five-year term. Seats are allocated on the following basis: 150 members represent peasants, 50 represent other working people and another 50 represent the armed forces. The Assembly elects the State Presidium (a President and two Vice-Presidents) and the Government. It also elects a Popular Tribunal to administer justice. The Assembly directs both domestic and foreign policy.

Unemployment does not exist and the standard of living of the people is guaranteed. The workers control the factories. Men and women have equal rights and are free to practise any religion which does not contribute to the destruction of the state.

## THE GOVERNMENT

### HEAD OF STATE

**President of the State Presidium:** Khieu Samphan.

### CABINET

(*November* 1976)

**President of the State Presidium:** Khieu Samphan.

**First Vice-President of the State Presidium:** Sor Thon.

**Second Vice-President of the State Presidium:** Ngean Ros.

**Prime Minister:** Pol Pot*.

**Acting Prime Minister:** Nuon Chea*.

**Deputy Prime Minister and Minister of Foreign Affairs:** Ieng Sary.

**Deputy Prime Minister and Minister of National Defence:** Son Sen.

**Deputy Prime Minister and Minister of the Economy:** Vorn Vet.

**Minister of Information and Propaganda:** Hu Nim.

**Minister of Social Action:** Ieng Thirith.

**Minister of Culture and Education:** Yun Yat.

**Minister of Public Works:** Toch Phoeun.

**Minister of Health:** Thioun Thioeun.

**Minister of Communications:** Mey Prang.

**High Counsellor of the State Presidium:** Penn Nouth.

* In September 1976 Pol Pot stepped down temporarily due to ill-health.

# PEOPLE'S REPRESENTATIVE ASSEMBLY

In national elections held on March 20th, 1976, 250 representatives were chosen out of 515 candidates for the Cambodian People's Representative Assembly.

**President:** NUON CHEA.

# POLITICAL PARTY

**Front uni national du Cambodge (FUNC):** Phnom-Penh; f. 1970; Chair. PENN NOUTH; Sec. SALOTH SAR.

Reports indicate the existence of a Cambodian Communist Party.

# DIPLOMATIC RELATIONS

## EMBASSIES ACCREDITED TO CAMBODIA

**China, People's Republic:** Phnom-Penh; *Ambassador:* SUN HAO.

**Viet-Nam:** Phnom-Penh; *Ambassador:* PHAM VAN BA.

**United Kingdom:** Peking, People's Republic of China.

By November 1976 the following countries also had representatives in Phnom-Penh: Albania, Cuba, Egypt, the Democratic People's Republic of Korea, Mexico, and Yugoslavia.

By November 1976, in addition to the above, the following countries had established diplomatic relations: Austria, Burma, Denmark, Finland, Greece, Iraq, Italy, Japan, Laos, Malaysia, Nepal, Peru, the Philippines, Romania, Rwanda, Singapore, Sudan, Sweden, Thailand and Zambia.

# JUDICIAL SYSTEM

Under the constitution of January 1976 justice is to be administered by a Popular Tribunal, elected by the People's Representative Assembly.

# RELIGION

## BUDDHISM

Before April 1975 the principal religion of Cambodia was Theravada Buddhism (Buddhism of the Little Vehicle), the sacred language of which is Pali. There were more than 2,500 monasteries throughout the land and nearly 20,000 Bonzes (Buddhist priests). However, reports indicate that since the change of regime religious practices are being discouraged.

**Sangaraja of Cambodia:** His Eminence HUOT TATH, Vat Unnalon, Phnom-Penh.

# THE PRESS

**Pa Idiwat** (*Revolution*)*:* Official journal.

# RADIO

**Radio Phnom-Penh:** Phnom-Penh; f. 1975; official service.

# FINANCE

No official information has been made available on financial organizations in Cambodia at the time of publication. However, it is reported that no currency is in circulation and a system of barter is in operation.

# TRADE AND INDUSTRY

Under the constitution of January 1976 all means of production were nationalized but no detailed information on the organization of trade and industry has been announced.

# TRANSPORT

*Note:* The following information applies to the situation before April 1975.

**Railways:** Gare Centrale de Phnom-Penh, Moha Vithei Pracheathippatay, Phnom-Penh. A line, built in 1930–32 and 1939–40 and totalling 385 km. in length, connects Phnom-Penh with the Thai border (at Poipet) via Battambang. Since June 1970, owing to war damage, only the Pursat-Poipet section (225 km). is open. Construction of a new line, 270 km. in length and linking Phnom-Penh with Kompong-Somville, via Takeo and Kampot, was started in 1960, opened in December 1969, has been closed since April 1970. Total length is about 1,370 km.

**Roads:** There are nearly 11,000 km. of motorable roads and tracks, of which about 2,000 km. are asphalted.

**Waterways:** The major routes are along the Mekong River, and up the Tonlé-Sap River into the Tonlé-Sap (Great Lake) covering in all about 1,400 km.

**Civil Aviation:** By November 1976 air links had been established with Peking and with Hanoi via Ho Chi Minh City (Saigon).

**Shipping:** The main port is Kompong-Som on the Gulf of Siam, which handles vessels up to 10,000 tons; the total of berths was raised to 10 in 1970 at a cost of U.S. $50m. Phnom-Penh, which lies some distance inland, can take steamers of up to 4,000 tons.

# CAMEROON

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The United Republic of Cameroon lies on the west coast of Africa with Nigeria to the west, Chad and the Central African Empire to the east and the Congo People's Republic, Equatorial Guinea and Gabon to the south. The climate is hot and humid in the south and west, with average temperatures of 26°C (80°F). The north is drier, with more extreme temperatures. The official languages are French and English. In religion roughly half of all Cameroonians follow traditional beliefs. About 35 per cent are Christians, roughly divided between Roman Catholics and Protestants, and about 20 per cent, mostly in the north, are Muslims. The national flag (proportions 3 by 2) consists of a vertical tricolour of green, red and yellow with one gold star in the red stripe. The capital is Yaoundé.

### Recent History

East Cameroon, once a League of Nations Mandate and later a United Nations Trusteeship Territory, was under French administration until it became independent as the Republic of Cameroon in January 1960. Ahmadou Ahidjo was elected its first president. West Cameroon, then part of the British-administered Trust Territory of Southern Cameroon, opted to join the Republic in February 1961, and a Federal Republic was created in October 1961. Under Ahidjo's leadership the two states became increasingly integrated. In 1966 the two governing parties and several opposition groups combined to form a single party, the *Union nationale camerounaise* (UNC). The party has grown to embrace almost all the country's political, cultural, professional and social organizations. The only significant opposition party, the *Union des Populations de Cameroun* (UPC), which had waged sporadic guerrilla warfare against the authorities from 1955 onwards, was finally crushed in 1971 when the last of its leaders were arrested and executed.

In June 1972, after approval by referendum of a new Constitution, the Federal Republic of Cameroon became the United Republic of Cameroon. A fully centralized political and administrative system was quickly introduced, and in May 1973 a new National Assembly was elected. After the re-election of Ahidjo as president in April 1975 the constitution was revised and a Prime Minister appointed. The United Republic has pursued an independent foreign policy. It withdrew from OCAM in July 1973, and negotiated a revision of its co-operation agreements with France in 1974.

### Government

Cameroon is governed by a President and a unicameral 120 member National Assembly, each elected for five years by universal adult suffrage. The age of majority is 21. The Prime Minister, Ministers and Vice-Ministers are appointed by the President who also appoints a Governor to each of the seven provinces.

### Defence

Cameroon has an army of 5,000 and 7,000 men in para-military forces. The navy numbers 300, and the air force 300. France has a bilateral defence agreement with Cameroon. The defence budget for 1976/77 is 12,207 million francs CFA.

### Economic Affairs

Cameroon has one of the highest incomes per head in tropical Africa, though the basis of its economy is still essentially agricultural. Cocoa, coffee and timber are the main exports, though palm products, bananas, rubber and cotton are also produced in quantity and help protect the economy against fluctuating commodity prices.

The major industries are aluminium smelting and the processing of agricultural raw materials. The aluminium smelters use imported bauxite and hydro-electric power from the Edea Dam. Industrial production grew by about 15 per cent annually in the first decade of independence, but the rate of growth has declined since 1970.

In 1974 Cameroon's Gross Domestic Product was more than $1,250 million, of which about 35 per cent was derived from agriculture, forestry and fishing, while industry accounted for about 10 per cent. The annual economic growth rate fell from 8 per cent in 1970 to 3 per cent in 1972, but the economy has since regained its momentum.

Despite its economic growth since independence, Cameroon remains dependent on foreign investment and the export of primary commodities. In 1973 the government initiated a "Green Revolution" designed to halt the drift of population from backward rural areas to the towns. The transport system is being developed to permit exploitation of natural resources in remote parts of the country. The fourth Five-Year Plan, for 1976–81, concentrates resources on agricultural development, but includes plans for a television network, hydro-electric schemes and a state import agency for necessities.

### Transport and Communications

Routes in former East Cameroon are linked with those of the ex-French Equatorial states while former West Cameroon is linked to Nigeria. The main rail links are between Douala and Yaoundé, and Yaoundé and Ngaoundéré. A major road also links the two regions. British and French shipping lines call at Douala and Victoria. There are internal and international air services.

### Social Welfare

The Government and Christian Missions maintain hospitals and medical centres but there are no welfare services covering the whole population. In 1970 Cameroon had 80 hospitals with 19,141 beds.

### Education

Education is provided by the government, missionary societies and private concerns. Education in state schools is free, and the government provides financial assistance for other schools. In 1974 about 80 per cent of school-age children attended school. The Federal University, founded in 1962, is to be decentralized by the establishment of five regional campuses.

**Tourism**

Tourists are attracted by the cultural diversity of local customs, and by the national parks, game reserves and sandy beaches. The tourist trade is being expanded and in 1971–72 there were about 10,000 visitors. A visa is required by all foreigners.

**Public Holidays**

**1977:** May 1st (Labour Day), May 19th (Ascension), May 20th (National Day), August 15th (Assumption Day), September 1st (Union Nationale Camerounaise Day), September 15th (Djoulde Soumae, End of Ramadan), November 22nd (Festival of Sheep), December 25th (Christmas).

**1978:** January 1st (New Year), February 11th (Youth Day), March 24th (Good Friday), March 27th (Easter Monday).

**Weights and Measures**

The metric system is in force.

**Currency and Exchange Rates**

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

1 franc CFA = 2 French centimes;
£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

# THE CONSTITUTION

(*Constitution of June 2nd*, 1972, *revised May 9th*, 1975)

### The People of Cameroon

Declares that the human being, without distinction as to race, religion, sex or belief, possesses inalienable and sacred rights.

Affirms its attachment to the fundamental freedoms embodied in the Universal Declaration of Human Rights and the United Nations Charter and in particular to the following principles:

Equal rights and obligations for all, and freedom and security for the individual subject to the rights of others and the higher interests of the State. The home and the privacy of all correspondence are inviolate. Freedom of movement. Freedom within the law. Assurance of a fair hearing and that the law may not act retrospectively.

Freedom of belief. Freedom to practise a religion. The State is secular. Freedom of expression, freedom of the press, freedom of assembly, freedom of association, freedom of trade unions under conditions fixed by law.

Protection of the family as the natural basis of society. The right to education, the provision and control of which is the duty of the State, the right of ownership unless in violation of public interests, and the right and duty to work. The duty of all to share the burden of public expenditure according to his means.

The State guarantees to all citizens of either sex the rights and freedoms set out in the preamble of the Constitution.

### I Sovereignty

1. The Federal Republic of Cameroon, constituted from the State of East Cameroon and the State of West Cameroon, shall become a unitary State to be styled the United Republic of Cameroon with effect from the date of entry into force of this Constitution. The Republic shall be one and indivisible, democratic, secular and dedicated to social service. It shall ensure the equality before the law of all its citizens. Provisions that the official languages be French and English, for the motto, flag, national anthem and seal, that the capital be Yaoundé.

2–3. Sovereignty shall be vested in the people who shall exercise it either through the President of the Republic and the members returned by it to the National Assembly or by means of referendum. Elections are by universal suffrage, direct or indirect, by every citizen aged 21 or over in a secret ballot. Political parties or groups may take part in elections subject to the law and the principles of democracy and of national sovereignty and unity.

4. State authority shall be exercised by the President of the Republic and the National Assembly.

### II The President of the Republic

5. The President of the Republic, as Head of State and Head of the Government, shall be responsible for the conduct of the affairs of the Republic. He shall define national policy and may charge the Prime Minister with the implementation of this policy in certain spheres. The President may delegate to the Prime Minister his powers to direct, co-ordinate and control governmental activity in such spheres. Certain powers may also be delegated to other members of government.

6–7. Candidates for the office of President must hold civic and political rights and be at least 35 years old, and may not hold any other elective office or professional activity. Election is by a majority of votes cast by the people. The President is elected for five years and may be re-elected. Provisions are made for the continuity of office in the case of the President's resignation and for the President of the National Assembly or, failing him, the Prime Minister to act as interim President should the President die or be permanently incapacitated.

8–9. The Prime Minister, Ministers and Vice-Ministers are appointed by the President to whom they are responsible, and they may hold no other appointment. The President is also head of the armed forces, he negotiates and ratifies treaties, may exercise clemency after consultation with the Higher Judicial Council, promulgates and is responsible for the enforcement of laws, is responsible for internal and external security, makes civil and military appointments, provides for necessary administrative services.

10. The President, by reference to the Supreme Court, ensures that all laws passed are constitutional.

11. Provisions whereby the President may declare a State of Emergency or State of Siege.

### III The National Assembly

12. The National Assembly shall be renewed every five years, though it may at the instance of the President of the Republic legislate to extend or shorten its term of office. It shall be composed of 120 members elected by universal suffrage.

13–14. Laws shall normally be passed by a simple majority of those present, but if a bill is read a second time at the request of the President of the Republic a majority of the National Assembly as a whole is required.

15–16. The National Assembly shall meet twice a year, each session to last not more than 30 days; in one session it shall approve the budget. It may be recalled to an extraordinary session of not more than 15 days.

17–18. Elections and suitability of candidates and sitting members shall be governed by law.

### IV Relations between the Executive and the Legislature

19. Bills may be introduced either by the President of the Republic or by any member of the National Assembly.

20. Reserved to the legislature are: the fundamental rights and duties of the citizen; the law of persons and property; the political, administrative and judicial system in respect of elections to the National Assembly, general regulation of national defence, authorization of penalties and criminal and civil procedure etc., and the organization of the local authorities; currency, the budget, dues and taxes, legislation on public property; economic and social policy; the education system.

21. The National Assembly may empower the President of the Republic to legislate by way of Ordinance for a limited period and for given purposes.

22–26. Other matters of procedure, including the right of the President of the Republic to address the Assembly and of the Prime Minister, Ministers and Vice-Ministers to take part in debates.

27–29. The composition and conduct of the Assembly's programme of business. Provisions whereby the Assembly may inquire into governmental activity. The obligation of the President of the Republic to promulgate laws, which shall be published in both languages of the Republic.

30. Provisions whereby the President of the Republic, after consultation with the National Assembly, may submit to referendum certain reform bills liable to have profound repercussions on the future of the Nation and National Institutions.

### V The Judiciary

31. Justice is administered in the name of the people. The President of the Republic shall ensure the independence of the judiciary and shall make appointments with the assistance of the Higher Judicial Council.

### VI The Supreme Court

32–33. The Supreme Court has powers to uphold the Constitution in such cases as the death or incapacity of the President and the admissability of laws, to give final judgements on appeals on the Judgement of the Court of Appeal and to decide complaints against administrative acts. It may be assisted by experts appointed by the President of the Republic.

### VII Impeachment

34. There shall be a Court of Impeachment with jurisdiction to try the President of the Republic for high treason and the Prime Minister, Ministers and Vice-Ministers for conspiracy against the security of the State.

### VIII The Economic and Social Council

35. There shall be an Economic and Social Council, regulated by the law.

### IX Amendment of the Constitution

36–37. Bills to amend the Constitution may be introduced either by the President of the Republic or the National Assembly. The President may decide to submit any amendment to the people by way of a referendum. No procedure to amend the Constitution may be accepted if it tends to impair the republican character, unity or territorial integrity of the State, or the democratic principles by which the Republic is governed.

## NATIONAL ASSEMBLY

**President:** SOLOMON TANDENG MUNA.

ELECTION, MAY 18TH, 1973

All 120 seats were won by the *Union nationale camerounaise.*

### ECONOMIC AND SOCIAL COUNCIL

The Economic and Social Council is a national body set up under the unitary constitution to advise the Government on economic and social problems arising. It replaces the regional organizations which carried out similar functions on a smaller scale. The Council consists of 85 members, who meet several times a year, a permanent secretariat and a president appointed by Presidential decree. The members are nominated for a five-year term, whilst the secretariat is elected annually. Pres. FÉLIX SABAL LECCO.

## POLITICAL PARTY

**Union nationale camerounaise (UNC):** Yaoundé; f. 1966 by merger of the governing party of each state of the Federation (*Union camerounaise* and the *Kamerun National Democratic Party*), and four opposition parties; its bodies are: Congress which meets every five years, a 12-member Political Bureau and a 48-member Central Committee; there are two subsidiary organizations, *Organisation des femmes de l'UNC* (OFUNC) and *Jeunesse de l'UNC* (JUNC); Pres. Ahmadou Ahidjo; publ. *l'Unité* (weekly).

The UNC Charter, outlining the party's internal and external policies, was published in April, 1969. It supports efforts towards the liberation and unification of Africa; it supports a democratic system of government within Cameroon; and it lays down that economic and social development should be achieved in Cameroon through encouraging private initiative while reserving for the state a determining and organizing role.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Dominion of Canada occupies the northern part of North America (except Alaska and Greenland) and is the second largest country in the world. The border with the U.S.A. follows the upper St. Lawrence Seaway and the Great Lakes, continuing west along the 49th parallel. The climate is an extreme one, particularly inland. Winter temperatures drop well below freezing with a summer average of about 18°C (65°F). Rainfall varies from moderate to light and there are heavy falls of snow. The two official languages are English and French, the mother tongues of 60.2 per cent and 26.9 per cent, respectively, in 1971. More than 98 per cent of Canadians can speak English or French. Forty-six per cent of the people are Roman Catholics. The largest Protestant churches are the United Church of Canada (17.5 per cent) and the Anglicans (11.8 per cent) but almost every Christian denomination is represented. The national flag (proportions 2 by 1) consists of a red maple leaf on a white field, flanked by red panels. The capital is Ottawa.

### Recent History

In 1963, a six-year Conservative government was succeeded by a minority Liberal Government under Lester Pearson. Mr. Pearson retired in April 1968 and his successor, Pierre Trudeau, won an electoral majority for the Liberals in June 1968. Mr. Trudeau's party was returned to power in the 1972 General Election, but with a reduced majority over the Progressive Conservatives. Foreign relations have altered significantly under the Trudeau government, with less emphasis on traditional links with Western Europe and the U.S.A. and a fostering of relations with Far East countries. Canada established diplomatic relations with the People's Republic of China in 1970 and the Prime Minister paid a successful state visit to China in October 1973. Relations with the U.S.S.R. are good and in the mid-1970s Japan ranked as Canada's second largest trading partner.

Trudeau was returned with a commanding majority in the July 1974 elections. In 1975 Canada began experiencing the effects, belatedly and not so severely as most countries, of the international economic recession, leading in October to the introduction of unpopular mandatory wage and price controls by the Liberal Government. The popularity of the Liberal Government was eroded during 1975 and 1976, as indicated by the success of opposition parties in provincial and by-elections, even in formerly safe seats.

Quebec, where four-fifths of the population speak French as a first language, maintains its own cultural and educational links with France. The Liberals came into power there with a large majority in 1970 and the Quebec Liberation Front was outlawed after violent terrorist activities. The continuing conflict over language erupted again in September 1975 over the controversial new stipulation, particularly resented by immigrants, that French should be the language of instruction for all children whose mother tongue was not English. In June 1975 conflict over the use of English for air traffic control in Quebec led to an extended strike of pilots and air traffic controllers and during 1975 two Federal Cabinet ministers resigned over issues concerning bilingualism. At provincial elections in Quebec in November 1976 the separatist party, Parti Quebecois, which had been formed only three years earlier, defeated the incumbent Liberals, winning 69 seats to the Liberals' 28, compared with 6 and 102 seats respectively in the 1973 elections. Although not elected on a specific platform of separation from the rest of Canada, one election promise was the holding of a referendum in Quebec on the issue within two years.

### Government

Queen Elizabeth II, Queen of Canada, is the Head of State and is represented at Ottawa by a Governor-General. Parliament consists of the Queen, the Senate and the House of Commons. Senators are appointed on a regional basis until the age of 75. Members of Parliament are elected by universal adult suffrage. Executive power lies with the Cabinet selected by the Prime Minister. Each of the ten provinces is headed by a Lieutenant-Governor and governed by a unicameral Legislative Assembly, from which the provincial premiers and cabinets are chosen. Two directly-administered areas, the Yukon Territory and the Northwest Territories, are represented by one member each in the House of Commons and the Senate and locally by a Commissioner.

### Defence

Canada co-operates with the U.S.A. in the defence of North America, sends forces to NATO's Atlantic and European sectors, and takes part in UN peace-keeping in the Middle East. Unification of the all-volunteer services as the Canadian Armed Forces was completed in 1968. The total strength of the Canadian Armed Forces has been progressively reduced from 120,000 in 1964 to 78,000 in 1976: army 28,000, navy 15,500, air force 34,500. The defence budget for 1976/77 is C$3,371 million.

### Economic Affairs

The Canadian economy is linked very closely with that of the U.S.A. About 67 per cent of total trade is with the U.S.A. and industry is heavily dependent on foreign investment, 80 per cent of it American. It is estimated that 65 per cent of Canada's largest companies are wholly-owned or effectively controlled by foreign corporations. Efforts to develop other markets, notably Japan, China and the U.S.S.R., and measures such as the Foreign Investments Review Act, which allows for assessment of the benefits to Canada of foreign investors' intentions, are being taken to lessen dependence on the U.S.A. Canada is one of the world's leading industrial countries, although farming still accounts for about 4 per cent of the country's gross domestic product and is the leading primary industry in terms of employment. Canada is the world's fourth largest exporter of agricultural products. The main exports in 1975 were motor vehicles and parts, wood pulp, newsprint, petroleum and wheat. Canada is the world's largest producer of asbestos, silver, nickel and zinc and is rich in many other minerals, notably iron, copper, uranium, cobalt, elemental sulphur, lead and gold. There are considerable oil and gas resources in Alberta and the Canadian

Arctic islands. Other valuable primary industries are forestry, fishing and fur production.

In 1974 the economy enjoyed one of the highest expansion rates of an industrialized country while suffering a slightly lower rate of inflation than that of comparable economies. However, in 1975 the economy began to be affected by the international slump: inflation throughout the year ran at about 11 per cent and unemployment reached over 7 per cent, the highest since the 1930s. In October statutory controls on wages, limiting them to 10 per cent increases, and on prices were introduced. These successfully reduced the rate of inflation to 8 per cent within a year. During 1976 the economy was slowly recovering from a not very severe recession: the growth rate for 1975 was 0.6 per cent and was projected at between 4.5 and 5 per cent for 1976. A trade deficit of C$795m., the first deficit since 1960, was recorded for 1975 and a small surplus was projected for 1976. Unemployment increased slightly during the year and was projected to increase into 1977. In December 1976 the Canadian dollar fell sharply against the U.S. dollar to its lowest level for over a year and reserves were at their lowest for many years.

### Transport and Communications

Owing to the size of the country, Canada's economy is particularly dependent upon good communications. Canada's rail, river and canal system is being increasingly supplemented by roads, air services and pipelines. The St. Lawrence Seaway allows ocean-going ships to reach the Great Lakes; the Trans-Canadian Highway is one of the major features of a network of over half a million miles of roads in Canada. Nearly 60,000 miles of track provide an extensive rail service throughout the country. A railway is being planned to open up north-western British Colombia. Work started in 1970 on a new airport near Montreal and 66,000 miles of gas and oil pipelines have been built since 1950. The North West Passage was negotiated for the first time in 1969, and as a result the Arctic Waters Bill was passed in April 1971 giving Canada effective control of the passage and extending territorial waters from three miles offshore to twelve. Internal air services for freight and passengers play a major role in a country the size of Canada.

### Social Welfare

About 27 per cent of the federal budget is devoted to health and welfare. The Federal Government administers family allowances, unemployment insurance and war veterans' and old age pensions. Other services are provided by the provinces, the range varying from province to province. The Canada Pension Plan, introduced in 1966, and its Quebec counterpart provide contributory retirement, disability and survivors' pensions for the majority of workers, based on past earnings. A Federal Medicare insurance programme in which all ten provinces participate covers all Canadians against medical expenses. The federal-provincial hospital insurance programme covers over 99 per cent of the insurable population of Canada.

### Education

Education is a provincial matter and the period of compulsory education varies. French-speaking students are entitled by law to instruction in French. Primary education is from 6–7 years to 13–14, followed by 3–5 years at secondary or high school. There are 67 degree-awarding institutions and 192 other institutions of higher education.

### Tourism

Canada offers a wide range of outdoor tourist attractions: fishing, hunting, riding, canoeing, etc., in the great National Parks. Winter sports carnivals are held in many centres and Indian and Prairie gatherings are popular, a famous one being the Calgary Stampede. Most visitors are from the U.S.A. (over 34 million in 1975) and tourist spending in 1975 amounted to C$1,805 million.

*Visas* are not required to visit Canada by nationals of Austria, Belgium, Denmark, Finland, France, German Federal Republic, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Switzerland, Turkey, United Kingdom and Commonwealth and U.S.A.

### Sport

The national sports are Canadian football and ice hockey. Baseball, tennis, athletics and winter and water sports are all popular and soccer is increasingly played, particularly in southern Ontario.

### Public Holidays

**1977:** May 23rd (Victoria Day), July 1st (Dominion Day), September 5th (Labour Day), October 10th (Thanksgiving), November 11th (Remembrance Day), December 25th–26th (Christmas).

**1978:** January 1st (New Year), March 24th (Good Friday), March 27th (Easter Monday).

### Weights and Measures

The imperial system is in general use with the exception of the 2,000 lb. American ton; the metric system is being implemented gradually.

### Currency and Exchange Rates

100 cents = 1 Canadian dollar (C $).

Exchange rates (December 1976):

£1 sterling = C $1.7025;

U.S. $1 = C$1.0275.

# THE CONSTITUTION

Constitutional development has been based mainly upon four important acts of the British Parliament: the Quebec Act of 1774, the Constitutional Act of 1791, the Act of Union of 1840, and the British North America Act of 1867. The first is chiefly important as it established the French civil law throughout the then province of Quebec and guaranteed the free exercise of Roman Catholicism. The second is noteworthy for the division of the province into the French-speaking province of Lower Canada and the English-speaking province of Upper Canada, and for the concession of representative government through an elective Legislative Assembly which, however, had no control over the executive government except in so far as it could refuse to vote taxes (the non-tax revenue of the province was outside of its control). The Act of Union (Section 45) mentions the appointment by Her Majesty of the Executive Council, but does not refer to the responsibility of the Council. It can be stated that responsible government has existed in Canada by constitutional practice and precedent. It was recognized in the instructions which the Colonial Secretary of State transmitted to the Governors.

The fourth act separated the two Canadas from their existing legislative union to make them provinces, each administering its own local affairs, in a wider confederation, which within a comparatively short period so extended its boundaries as to take in the whole of British North America, except Newfoundland and Labrador.

The British North America Act 1867 provides that the Constitution of the Dominion shall be "similar in principle to that of the United Kingdom"; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the "Senate", and the "House of Commons".

The Statute of Westminster received the Royal Assent in December 1931. In its application to Canada the Statute emancipates the Legislatures of the provinces as well as the Dominion Parliament from the operation of the Colonial Laws Validity Act. A special section was, however, included providing that the Statute should not apply to the repeal, amendment or alteration of the British North America Acts of 1867 to 1930, and also preventing the Dominions and provinces, in the exercise of their enlarged legislative powers, from trenching upon provincial and Dominion fields of legislative power respectively. Numerous attempts to devise amendment procedures within Canada without reference to Westminster have been made without success, and Amendment of the British North America Acts 1867 to 1962 still remains a procedural problem awaiting solution.

## The Government

The national government works itself out through three main agencies. There is **Parliament** (consisting of the Queen as represented by the Governor-General, the Senate and the House of Commons) which makes the laws; the **Executive** (the Cabinet or Ministry) which applies the laws; and the **Judiciary** which interprets the laws.

Particular features of the British system of government are the close relation which exists between the Executive and Legislative branches, and the doctrine of Cabinet responsibility which has become crystallized in the course of time. The members of the Cabinet, or executive committee, are chosen from the political party commanding a majority in the House of Commons. Each Minister or member of the Cabinet is usually responsible for the administration of a department, although there may be Ministers without portfolio whose experience and counsel are drawn upon to strengthen the Cabinet, but who are not at the head of departments.

Meetings of the Cabinet are presided over by the President of the Privy Council, but all Ministers, including the Prime Minister and the President of the Privy Council, meet as equals and there is no precedence in Council. From the Cabinet signed orders and recommendations go to the Governor-General for his approval, and it is in this way that the Crown acts only on the advice of its responsible Ministers. The Cabinet takes the responsibility for its advice being in accordance with the will of Parliament and is held strictly accountable.

## The Federal Parliament

Parliament must meet at least once a year, so that twelve months do not elapse between the last meeting in one session and the first meeting in the next. The duration of Parliament may not be longer than five years. Senators (a maximum of 102 in number) are appointed until age 75 by the Governor-General in Council. They must be at least 30 years of age, British subjects, residents of the province they represent, and in possession of $4,000 over and above their liabilities. Members of the House of Commons are elected by universal adult suffrage for the duration of Parliament.

Under the British North America Act, which is the basis of the Constitution, the Federal Parliament has exclusive legislative authority in all matters relating to public debt and property; regulation of trade and commerce; raising of money by any mode of taxation; borrowing of money on the public credit; postal service; census and statistics; militia, military and naval service and defence; fixing and providing for salaries and allowances of the officers of the Government; beacons, buoys and lighthouses; navigation and shipping; quarantine and the establishment and maintenance of marine hospitals; sea-coast and inland fisheries; ferries on an international or interprovincial frontier; currency and coinage; banking, incorporation of banks, and issue of paper money; savings banks; weights and measures; bills of exchange and promissory notes; interest; legal tender; bankruptcy and insolvency; patents of invention and discovery; copyrights; Indians and lands reserved for Indians; naturalization and aliens; marriage and divorce; the criminal laws, except the constitution of courts of criminal jurisdiction but including the procedure in criminal matters; the establishment, maintenance and management of penitentiaries; such classes of subjects as are expressly excepted in the enumeration of the classes of subjects exclusively assigned to the Legislatures of the provinces by the Act. Judicial interpretation and later amendment have, in certain cases, modified or clearly defined the respective powers of the Federal and Provincial Governments.

## Provincial Government

In each of the ten Provinces (Newfoundland joined with Canada as the tenth province on April 1st, 1949) the Queen is represented by a Lieutenant-Governor, appointed by the Governor-General in Council, and governing with the advice and assistance of the Ministry or Executive Council, which is responsible to the Legislature and resigns office when it ceases to enjoy the confidence of that body. The

Legislatures are unicameral, consisting of an elected Legislative Assembly.

The Legislature in each province may exclusively make laws in relation to: amendment of the constitution of the province, except as regards the Lieutenant-Governor; direct taxation within the province; borrowing of money on the credit of the province; establishment and tenure of provincial offices and appointment and payment of provincial officers; the management and sale of public lands belonging to the province and of the timber and wood thereon; the establishment, maintenance and management of public and reformatory prisons in and for the province; the establishment, maintenance and management of hospitals, asylums, charities and charitable institutions in and for the province, other than marine hospitals; municipal institutions in the province; shop, saloon, tavern, auctioneer and other licences issued for the raising of provincial or municipal revenue; local works and undertakings other than interprovincial or international lines of ships, railways, canals, telegraphs, etc., or works which, though wholly situated within the province are declared by the Federal Parliament to be for the general advantage either of Canada or of two or more provinces; the incorporation of companies with provincial objects; the solemnization of marriage in the province; property and civil rights in the province; the administration of justice in the province, including the constitution, maintenance and organization of provincial courts both in civil and criminal jurisdiction, and including procedure in civil matters in these courts; the imposition of punishment by fine, penalty or imprisonment for enforcing any law of the province relating to any of the aforesaid subjects; generally all matters of a merely local or private nature in the province. Further, provincial Legislatures may exclusively make laws in relation to education, subject to the protection of religious minorities, who are to retain the privileges and rights enjoyed before Confederation.

### Municipal Government

Under the British North America Act, the municipalities are the creations of the Provincial Governments. Their bases of organization and the extent of their authority vary in different provinces, but almost everywhere they have very considerable powers of local self-government.

# THE PRESS

The vastness of the country hampers distribution and the establishment of a strong national press, so the daily press in Canada is essentially local in coverage, influence and distribution. However, a considerable proportion of the contents of the smaller Canadian papers is from syndicated sources in the U.S.A. or the United Kingdom, and news which is not local has a strong U.S. flavour. In mid-1976 there were 114 daily newspapers: 101 in English and 13 in French with a combined circulation of over 4.9 million, representing three-quarters of the country's households and covering the major centres of population.

There is an increasing trend towards group ownership: over a third of daily newspapers are owned by three major groups: Thomson Newspapers Ltd. (35 dailies), Southam Press (14 dailies) and Free Press Publications (9 dailies), accounting for 10 per cent, 21 per cent and 20 per cent of total circulation respectively.

In 1973 about 900 weekly and twice-weekly newspapers with a total circulation of more than 3,000,000 served the more remote areas of the country and a significant feature of the Canadian press is the publishing of newspapers catering for ethnic groups: there are over 80 of these (mainly weekly) publications appearing in over 20 languages, with a total circulation of about 3,000,000.

There are numerous periodicals for business, trade, professional, recreational and special interest readership, although periodical publishing, particularly, suffers from substantial competition from publications originating in the U.S.A. Among periodicals, the only one which can claim to be national in its attitudes and readership is the fortnightly *Maclean's Canada's Magazine*.

## RADIO AND TELEVISION

The 1968 Broadcasting Act set out the broadcasting policy of Canada, established the Canadian Broadcasting Corporation (CBC) as the national broadcasting service, and created the Canadian Radio-Television Commission (CRTC) as the agency regulating all broadcasting on radio and television. Broadcasters are responsible for content, but freedom of expression is guaranteed; programmes are to use predominantly Canadian creative and other resources; and Canadians are entitled to CBC services in English and French as public funds become available.

Canadian broadcasting is a combination of public and private enterprise which provides radio and television service to almost all the population. Many privately-owned television and radio stations have affiliation agreements with the CBC and help to distribute the national services. The major private networks are CTV, TVA and Global, as well as the educational networks. Cable television services in Canada are part of the broadcasting system, and reach over half the Canadian population.

**Canadian Radio-television and Telecommunications Commission:** 100 Metcalfe St., Ottawa, Ont. K1A 0N2; f. 1968; regional offices in Montreal and Vancouver; Chair. HARRY J. BOYLE; Vice-Chair. CHARLES DALFEN, JEAN FORTIER.

**Canadian Broadcasting Corporation:** 1500 Bronson Ave., P.O.B. 8478, Ottawa, Ont. K1G 3J5; f. 1936; financed mainly by public funds, supplementary revenue from commercial advertising on CBC television; CBC radio is almost completely non-commercial; Pres. A. W. JOHNSON; Exec. Vice-Pres. PIERRE DESROCHES.

### RADIO

The CBC operates two AM networks, in English and in French, and FM stereo networks in English and French. In the north, the CBC's northern radio service provides both national network programming in English and French, and special local and shortwave programmes, some of which are broadcast in the languages of the Indian and Inuit peoples. In March 1976 there were 493 outlets for CBC radio (62 CBC-owned stations, 320 CBC-owned relay transmitters, 111 private affiliates and rebroadcasters). CBC radio service is within reach of 98.8 per cent of the population. Radio Canada International, the CBC's overseas shortwave service, has its headquarters in Montreal and its transmitters near Sackville, New Brunswick. It broadcasts daily in 11 languages and distributes recorded programmes free for use by broadcasters throughout the world.

### TELEVISION

The CBC operates two television networks, in English and in French. Northern television also transmits some broadcasts in the Inuktitut language. As of March 1976, CBC television was carried on 463 outlets (25 CBC-owned stations, 212 CBC-owned rebroadcasters, 226 private affiliates and rebroadcasters). CBC television is available to 97.8 per cent of the population. Most television programming is in colour, and as of January 1976, 61 per cent of Canadian households had colour sets. CBC transmission methods include leased channels on the Canadian space satellite Anik. Anik 1 started operation in 1973 and was the world's first synchronous domestic communications satellite.

## ROADS

Provincial Governments are responsible for roads within their boundaries. The Federal Government is responsible for the construction of major roads in the Yukon and North-west Territories and in National Parks. At the end of 1971 the mileage of all provincial, federal and municipal roads was 516,783, of which 395,437 miles were surfaced and 121,346 miles were earth roads.

The Trans-Canadian Highway extends from St. John's, Newfoundland, to Victoria, British Columbia.

## INLAND WATERWAYS

The St. Lawrence River and the Great Lakes provide Canada and the United States with a system of inland waterways stretching 2,300 miles across the continent. There is a 35-foot navigation channel from Montreal to the sea and a 27-foot channel from Montreal to Lake Erie. The St. Lawrence Seaway project was initiated partly to provide a deep waterway and partly to satisfy the demand for more electric power. Power development has been undertaken by the Provinces of Quebec and Ontario, and by New York State. The navigation facilities and conditions are within the jurisdiction of the federal governments of the United States and Canada.

# CAPE VERDE

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Capital

The Republic of Cape Verde is an archipelago of ten islands and five islets in the North Atlantic, about 500 km. west of Dakar, Senegal. All but three of the islands are mountainous and lie in a semi-arid belt, with little rain and high temperatures (yearly average 24°C (76°F)). The spoken language is Creole but Portuguese is the official language. The majority of the population is Roman Catholic. The capital is Cidade de Praia.

### Recent History

The Cape Verde Islands were colonized by the Portuguese in the 19th century. Since the early 1960s liberation movements in the Portuguese Overseas Territories have been working for independence and, in this context, the archipelago was linked with the mainland territory of Guinea-Bissau. However, the African party for the Independence of Guinea and Cape Verde (PAIGC) made little progress in the islands, although regarding them as an integral part of their territory. When Guinea-Bissau was granted independence in 1974 the Cape Verde Islands elected to become independent rather than enter into an immediate federation with Guinea-Bissau. In December 1974 a transitional government was formed, comprising representatives of the Portuguese government and the PAIGC; members of other political parties were excluded. A National People's Assembly was elected in June 1975 with a majority voting for the PAIGC platform of ultimate union with Guinea-Bissau. Independence was granted on July 5th, 1975, and Aristides Pereira, Secretary-General of the PAIGC, became the country's first President.

Although Cape Verde and Guinea-Bissau are constitutionally separate, the PAIGC supervises the activities of both states. In 1976 a joint committee was elected to consider the form of unification which will eventually be decided by popular vote in both countries.

Cape Verde is a member of the UN and the OAU. Negotiations are taking place for accession to associate membership of the EEC under the Lomé Convention.

### Government

Executive power is held by a President elected by the National People's Assembly. Legislative power is vested in the Assembly, with 56 deputies elected by universal adult suffrage. The age of majority is 17.

### Defence

The Popular Revolutionary Armed Forces have been formed.

### Economic Affairs

The agricultural subsistence economy of the islands has suffered in recent years due to a seven-year drought which ended in August 1975. Maize and beans are the staple crops but production has fallen dramatically. Only 1,800 tons of maize was grown in 1974 and domestic consumption was 60,000 tons. Coffee is grown but the plantations are very inefficient and are plagued with disease. Other crops grown include bananas, sugar cane, castor beans and groundnuts. Almost all the country's food is imported.

Government policy is to obtain loans to overcome the immediate problem of providing food for the population. There are plans to tap underground water-tables to complete irrigation projects and then to set up an agricultural development programme. The U.S.A. has offered an agricultural loan of $3 million and gifts of $2 million. The Government has requested a loan of $20 million from the UN but only $10 million had been received at the end of 1975. Fishing forms a large part of the island's development potential.

There is little industry except for a few small food-processing and canning factories but the Government hopes to exploit the islands' resources of volcanic trass on Santo Antão, cement on Maio and salt on Sal, and to develop cement, salt, fertilizer, fish processing and porcelain industries.

### Transport and Communications

A railway network of 1,600 km. is under construction. About 300 km. had been completed in 1976. There were 1,946 km. of roads in 1972. There are six airports, the principal one being at Espargos on Sal Island.

### Education

Compulsory education is divided into *Instrução Primária* (for children aged 7–12 years) and *Escola Preparatória* (12–14 years). From the age of 14, children may attend one of the two *liceus* which provide a three-year general course or a two-year pre-university course. There is also one industrial and commercial school and three teacher training colleges.

Priority is being given to the building of schools, teacher training and the reduction of the 70 per cent illiteracy rate.

### Tourism

The Government hopes to develop tourism on Sal Island. A large hotel already exists at Santa Maria beach. The islands of Santo Antão, São Tiago, Fogo and Brava offer combination of mountain scenery and vast beaches.

### Public Holidays

**1977:** May 1st (Labour Day), June 1st (Children's Day), July 5th (Independence Day), September 12th (Day of the Nation), December 25th (Christmas Day).

**1978:** January 1st (New Year), January 20th (National Heroes' Day), March 8th (Women's Day).

# THE CENTRAL AFRICAN EMPIRE

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Central African Empire lies in the heart of equatorial Africa and is bounded by Chad to the north, the Sudan to the east, the Congo People's Republic and Zaire to the south and Cameroon to the west. Climate is tropical with an average temperature of 26°C (79°F) and heavy rains in the south-western forest areas. The national language is Sangho, but French is the official language. Many of the population hold animist beliefs, but about one-third are Christians. The national flag (proportions 5 by 3) consists of horizontal bands of blue, white, green and yellow, divided vertically by a red band, with a yellow star and crescent in the top left-hand corner. The capital is Bangui.

### Recent History

The former territory of Oubangui-Chari, within French Equatorial Africa, became the Central African Republic on achieving self-government in December 1958. Full independence was attained in August 1960. The leading figure in the campaign for self-government and the first President, Barthol émy Boganda, died in 1959. His successor, David Dacko, established a one-party state in November 1962 but was overthrown at the end of 1965 by a military *coup d'état* which brought to power Colonel (later Marshal) Jean-Bédel Bokassa.

At the beginning of January 1966 Colonel Bokassa formed a new government, rescinded the Constitution and dissolved the National Assembly. Bokassa, who became Life President in March 1972 and Marshal of the Republic in May 1974, has forestalled several alleged coups. Conspiracy charges led to the execution in 1969 of Lt.-Col. Alexandre Banza, the Minister of Health, the arrest in 1973 of another Minister, Auguste M'Bongo, and the detention in 1974 of leading trade unionists. Eight conspirators were executed after an attempt on the President's life in February 1976. In September 1976 the Council of Ministers was replaced by the Council for the Central African Revolution and shortly afterwards, ex-President Dacko was named as Bokassa's personal adviser. On his return from Libya in October, Bokassa announced his conversion to Islam. In December, following the approval of a new constitution, the Republic was renamed the Central African Empire and Bokassa proclaimed as the country's first Emperor.

### Government

Since the abrogation of the Constitution in January 1966 the President has had full competence to act in all affairs of state. A new imperial Constitution was adopted in December 1976.

### Defence

The armed forces number about 3,000 men. Military service is compulsory for adult males.

### Economic Affairs

About 85 per cent of the population is engaged in agriculture, which accounts for 50 per cent of GDP. The most important cash crops are cotton and coffee, but subsistence farming predominates. Industrial production is minimal. Diamonds were the major export earner from the mid-1960s until 1973. Coffee became the main export commodity in 1974 and cotton also surpassed diamonds in 1975. Timber has recently increased in importance. Despite rising production in 1975, the future of the diamond industry is uncertain following the revocation of the Central African Diamond Prospecting Company's mining licence in April 1976. A state uranium mining company, with French and Swiss participation, will shortly begin production. In 1976 Bokassa tightened government control of expenditure and announced that cheques issued by state enterprises must bear his signature. Lack of transport facilities and inefficient administration hamper all sectors.

The C.A.E. is a member of UDEAC and has close economic links with France. In 1975 a substantial long-term loan from South Africa was successfully negotiated.

### Transport and Communications

Bangui is about 1,450 km. from the sea but roads radiate east, north and west to the Sudan, Chad and Cameroon respectively. There are no railways, and the chief artery of transport is the Oubangui river which flows into the Congo and thereby provides an outlet from Bangui to Brazzaville, from where a railway runs to the port of Pointe-Noire. There is an international airport at Mpoko, near Bangui, and numerous airfields allow for extensive internal services.

### Social Welfare

An Employment Code guarantees a minimum wage for 60,000 employees and provides for employment accident benefits. There are 36 prefectorial hospitals, 36 maternity hospitals, 108 welfare centres and 200 first aid centres.

### Education

In the 1970/71 school year 55 per cent of children in the appropriate age-group received primary education. Opportunities for secondary and higher education are very limited. There were only 10,960 places in secondary schools in 1970/71.

### Tourism

The main tourist attractions are the waterfalls, the forests and many varieties of wild animals. There is excellent hunting and also opportunities for fishing. In 1970 about 8,000 tourists visited the C.A.R.

### Public Holidays

**1977:** May 1st (May Day), May 27th (Ascension), May 30th (Whit Monday), August 13th (Independence Day), August 15th (Assumption), November 1st (All Saints' Day), December 1st (National Day), December 25th (Christmas).

**1978:** January 1st (New Year), March 27th (Easter), March 29th (Death of Boganda).

**Weights and Measures**

The metric system is officially in force.

**Currency and Exchange Rate**

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):
£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

# STATISTICAL SURVEY

## AREA AND POPULATION

**Area:** 622,984 sq. km. (240,535 sq. miles).

**Population** (1971 estimate): 1,637,000, excluding refugees from the Sudan, numbering 28,000 in 1966. According to other estimates, the population in 1970 was 2,370,000.

**Capital:** Bangui (an autonomous commune), population 301,793 (1968).

# TRANSPORT

## RAILWAYS

There are no railways at present but there is a long-term project to connect Bangui to the Trans-Cameroon railway.

A railway is also due to be constructed from Sudan's Darfur province into the C.A.E.'s Vakaga province. An agreement between the two Governments was signed in December 1971.

## ROADS

**Compagnie Nationale des Transports Routiers:** Bangui; f. 1971; Dir.-Gen. I. Tinor; state-controlled.

In 1974 there were about 21,500 km. of roads, 6,000 km. of which are passable at all seasons by heavy vehicles. The total includes 4,345 km. of *routes nationales*, 3,500 km. of regional roads and 13,655 km. of rural roads. Both the total road length and the condition of the roads is inadequate for the traffic that uses the road system and very few roads have a tarmac surface. Seven main routes leave Bangui, and those that are surfaced have been toll roads since 1971.

## INLAND WATERWAYS

**Agence Centrafricaine des Communications Fluviales (ACCF):** B.P. 822, Bangui; f. 1969; state-owned; Dir.-Gen. G. Loumandet.

There are two navigable waterways. The first is open all the year, except in the dry season, and is formed by the Congo and Oubangui rivers; convoys of barges (of up to 800 tons load) ply between Bangui and Brazzaville. The second is the river Sangha, a tributary of the Oubangui, on which traffic is seasonal. There are two ports, at Bangui and Salo, on the rivers Oubangui and Sangha respectively. Efforts are being made to develop the stretch of river upstream from Salo to increase the transportation of timber from this area, and Nola will be developed as a timber port.

## CIVIL AVIATION

There is an international airport at Bangui and several small airports for internal services.

**Air Centrafrique:** B.P. 1432, Rue du Président Boganda, Bangui; f. 1966 as Air Bangui, reorganized in 1971 when the Government planned to withdraw from Air Afrique; extensive internal services; fleet of one DC-3 and one Baron.

**Air Afrique:** B.P. 875, Bangui; the C.A.E. Government has a 7 per cent share in Air Afrique.

The C.A.E. is also served by the following foreign airlines: Aeroflot, Air Zaire, Cameroon Airlines and UTA.

# TOURISM

**Direction Générale du Tourisme:** P.O.B. 655, Bangui; Dir.-Gen. G. Fretel; Dir. of Tourist Org. M. Ouada.

# UNIVERSITY

**Jean-Bédel Bokassa Université de Bangui:** Bangui; f. 1970; 84 teachers; 450 students.

# CHAD

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Chad is a landlocked state in north central Africa, bordered to the north by Libya, to the south by the Central African Empire, to the west by Niger and Cameroon and to the east by Sudan. The climate is hot, arid in the desert north and very wet (annual rainfall 500 cm.) in the south. The official language is French, but Arabic and various African languages are widely spoken. About half the population are Muslims living in the north; most others follow animistic beliefs. About 5 per cent are Christians. The national flag (proportions 3 by 2) consists of vertical blue, yellow and red stripes. The capital is N'Djamena (formerly Fort-Lamy).

### Recent History

Formerly a province of French Equatorial Africa, Chad became independent in 1960 under the leadership of François (later N'Garta) Tombalbaye and the Chad Progressive Party (PPT). In 1962 President Tombalbaye banned all opposition parties and Chad became a single-party state. Civil disturbances began in 1963 with riots in the capital and a full-scale rebellion broke out in 1965, concentrated mainly in the north, which had until that year remained under French military control. The Muslims of northern Chad have traditionally opposed their black southern compatriots who are animists or Christians. The banned National Liberation Front (FROLINAT) assumed leadership of the revolt. In 1968 Tombalbaye called in French military forces and with their help the rebellion was contained. Most of the French forces were withdrawn in 1971. By reaching an agreement with Libya in 1972, Tombalbaye deprived the rebels of their major foreign support.

In 1973 several leading figures of the regime, including the Army Chief of Staff, Gen. Félix Malloum, were imprisoned on conspiracy charges. The PPT was replaced by a new political party, the MNRCS, which had as its objective a return to African authenticity. The consequent enforcement of ritual initiation rites and a worsening economic situation caused widespread disaffection. On April 13th, 1975, Tombalbaye was killed in an army *coup* led by the Acting Chief of Staff, Gen. Mbailau Odingar.

General Malloum was released from detention and became President at the head of a Supreme Military Council. On May 12th a provisional government was formed, with army officers holding the key posts. The new government launched appeals for national reconciliation, aimed at the rebel groups which still controlled large areas of Chad. Some rebel leaders rallied to the regime, but FROLINAT remained unmoved. In September 1975 France was ordered to close its military bases in Chad following the French Government's abortive attempt to secure the release of French civilian hostages by direct negotiation with a splinter rebel group. Relations were restored in March 1976 by the visit of the French Prime Minister, Jacques Chirac, who, in exchange for increased budgetary, technical and military aid, secured the use of Chad's airfields for French military aircraft. In April Gen. Malloum survived an assassination attempt for which FROLINAT claimed responsibility. There were signs that Malloum's policy of undermining rebel support by frequent tours of the north and economic aid was having some success, but it was reported in November 1976 that rival factions of FROLINAT had united and an early end to the conflict seems unlikely.

### Government

According to the provisional constitution announced in August 1975, executive and legislative power is exercised by a President elected by the Supreme Military Council. The President presides over the Council of Ministers. The country is divided for administrative purposes into 13 Prefectures.

### Defence

Chad's army numbers about 4,500 men. There are also some 200 men in the air force and 6,000 men in the National Guard and other para-military forces. Following the co-operation agreement with France concluded in March 1976, the number of French military technical advisers, then numbering 260, is to be increased.

### Economic Affairs

Chad's economy is essentially one of subsistence, based on agriculture, stock-breeding and fishing, which together employ 89 per cent of the working population. The only significant cash crop is cotton, which provides the basis for Chad's major industry and some two-thirds of all export earnings. Groundnuts are grown, but not in sufficient quantities to meet local demand or to allow Chad's oil-mills to work at full capacity. Animal resources are under-exploited, despite government efforts to improve cattle stock and the construction of modern abattoirs. Lake Chad and the Lagone-Chari basin are well-stocked with fish, producing more than 100,000 tons a year. The six-year drought, which was ended by heavy rainfall in 1974, caused considerable loss of livestock and reduced fishing and agricultural production.

Industry is almost entirely based on agriculture. Textile production is the most important sector, followed by food and tobacco. There is little mining at present but deposits of petroleum and other minerals have been discovered. Chad's foreign trade is principally with France and shows a considerable deficit. French financial and technical aid is necessary to meet this deficit. Malloum introduced an austerity budget in 1976 and has taken measures against corruption and rising prices.

Chad is a member of the French Community, the OAU, the Chad Basin Commission, the Niger River Commission and is an associate member of the EEC.

### Transport and Communications

There are no railways in Chad. The river Chari is navigable from N'Djamena to Sarh in the far south. Roads are inadequate and only short stretches have been surfaced. There is an international airport at N'Djamena and over 40 aerodromes.

### Social Welfare

An Employment Code guarantees a minimum wage and other rights for employees. There are 4 hospitals, 28 medical centres, several hundred dispensaries and 40 qualified doctors.

### Education

In 1971 about 22 per cent of children between 6 and 14 years old attended school. A National University was opened in 1971 with 300 students and in addition the Republic sends students to foreign universities.

### Tourism

Chad provides a variety of scenery from the dense forests of the south to the deserts of the north. Wild animals abound, especially in the two national parks and five game reserves; there is excellent hunting, mainly around Sarh.

*Visas* are not required to visit Chad by nationals of the following countries: Andorra, Benin, the Central African Empire, the Congo People's Republic, France, Gabon, Federal Republic of Germany, Guinea, Ivory Coast, Madagascar, Mali, Mauritania, Mauritius, Monaco, Niger, Rwanda, Senegal, Togo, Upper Volta and Zaire.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension), May 25th ("Liberation of Africa"), May 30th (Whit Monday), August 11th (Independence Day), August 15th (Assumption), September 15th (Id ul Fitr, end of Ramadan), November 1st (All Saints' Day), November 22nd (Id ul Adha, Feast of the Sacrifice), November 28th (Proclamation of the Republic), December 25th (Christmas).

**1978:** January 1st (New Year), January 11th (National Holiday), February 20th (Mouloud, Birth of the Prophet), March 27th (Easter Monday).

### Weights and Measures

The metric system is officially in force.

### Currency and Exchange Rate

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

# NATIONAL ASSEMBLY

The National Assembly and the Economic and Social Council were both dissolved after the coup of April 13th, 1975. The Supreme Military Council is advised by four technical commissions.

# POLITICAL PARTIES

Chad's ruling party, the MNRCS, was disbanded after the coup of April 1975. All other political parties remain prohibited but large areas of the country are controlled by opposition groups. FROLINAT (the National Liberation Front), led by Dr. Abba Siddick, dominates much of the east of Chad. It is supported by Algeria and its leaders live in Algiers. A breakaway group from FROLINAT is under the command of Goukouni Ouedeï, son of the Derdeï who is the spiritual and temporal chief of the Toubou tribe. The FLT (Chad Liberation Front) has been active in the Eastern Wadai area. Its leader Hassan Ahmed Moussa, has rallied to the new government. Another former opposition party, the MDRT (Democratic Movement for the Renovation of Chad), established by exiles in Paris, welcomed the military coup.

## TRANSPORT

### RAILWAYS

In 1962 Chad signed an agreement with Cameroon to extend the Trans-Cameroon railway from N'Gaoundéré to Sarh, a distance of 500 km. Although the Trans-Cameroon reached N'Gaoundéré in 1974, the proposed extension into Chad has been postponed indefinitely. Other possibilities are being explored of extending Sudanese and Nigerian lines into Chad.

### ROADS

**Coopérative des Transportateurs Tchadiens (COPORTCHAD):** B.P. 336, N Djamena; road haulage.

In 1974 there were 30,725 km. of roads, of which 2,680 km. were national roads and 3,462 km. were secondary roads. There are also some 20,000 km. of tracks suitable for motor traffic during the dry season from October to July. A 4,840 km. motor track leads from Rouiba, in Algeria, to Chad. There are projects for road links between N'Djamena and Tripoli, and between Moundou and N'Gaoundéré.

### INLAND WATERWAYS

There is a certain amount of traffic on the Chari and Logone rivers which meet just south of N'Djamena. Both routes, from Sarh to N'Djamena on the Chari and from Bongor and Moundou to N'Djamena on the Logone, are open only during the wet season, August–December, and provide a convenient alternative when roads become impassable.

### CIVIL AVIATION

# CHILE

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

Chile is a long, narrow country stretching for 4,480 km. along the Pacific coast of South America from Peru and Bolivia in the north to Cape Horn in the far south. It is separated from Argentina to the east by the high Andes mountains. Both the mountains and the cold Humboldt Current influence the climate; between Arica in the north and Punta Arenas in the extreme south, some 4,000 km., the average maximum temperature varies by no more than 13°C. The language is Spanish. There is no state religion but Roman Catholics represent over 85 per cent of the population. The national flag (proportions 3 by 2) is divided horizontally, the lower half red, the upper half with a white star on a blue square at the hoist and the remainder white. The capital is Santiago.

### Recent History

In the elections of September 1970 Dr. Salvador Allende Gossens, the Marxist candidate of Unidad Popular, a coalition of five left-wing parties including the Communist Party, was elected President. He promised to transform Chilean society by constitutional means and among proposed measures were a nationalization programme, the intensification of agrarian reforms, and the extension of government control over foreign trade. During 1972 shortages of many basic foodstuffs and consumer goods became more acute. Inflation continued and the combination of these factors caused great discontent, especially among the middle classes.

The Government failed to obtain a Congressional majority in the elections of March 1973 and was confronted with a deteriorating economic situation as well as an intensification of violent opposition to its policies. Accelerated inflation led to food shortages and there were repeated clashes between pro- and anti-Government activists. The armed forces finally intervened in September 1973 because of the increasingly anarchic situation and economic breakdown. President Allende died during the *coup*.

Congress was dissolved, all political activity banned and strict censorship introduced. The military junta's leader, Gen. Augusto Pinochet Ugarte, became Supreme Chief of State in June and President in December 1974. The state of internal war, imposed at the time of the coup, was lifted in September 1974 but the state of siege continued. The junta has dedicated itself to the eradication of Marxism and the reconstruction of Chile. The junta has been widely criticized abroad because of its repressive policies. In 1975 a UN resolution condemned "the constant and flagrant violation of basic human rights" by the junta.

In an effort to improve its image abroad the junta has passed laws designed to protect prisoners from torture and in late 1976 released over 200 political prisoners, although some were later re-arrested. Despite Pinochet's recent moves towards liberalization there was strong dissent within the armed forces. In January 1976 a consultative Council of State was established and in September three constitutional acts were promulgated with the aim of creating a "new democracy".

### Government

Chile is a republic, divided into 25 provinces. Since the coup of September 1973 the country has been under military rule. The bicameral National Congress (a Senate and a Chamber of Deputies) was dissolved and constitutional rule suspended. Constitutional and legislative powers are exercised by the Government Junta and executive and administrative powers are vested in the President. In 1976 three new Constitutional Acts were promulgated as part of the Government's move to establish new institutions.

### Defence

Military service is compulsory for one year at 19 years of age. In 1976 the army had a strength of 45,000, the air force 10,800 and the navy 23,800. Para-military security forces number about 30,000. Defence expenditure for 1974 amounted to 159,700 million escudos.

### Economic Affairs

About a quarter of the population lives on the land, particularly in the fertile central region. Although the country has great agricultural potential, inefficient use of land resources has made it necessary to import a large amount of food. Major crops include wheat, sugar beet, potatoes and maize, and the wine industry is growing rapidly.

Chile is one of the world's largest producers and exporters of copper. In early 1974 Chile benefited from the dramatic rise in world copper prices but subsequent price weaknesses resulted in the cutting of copper exports by 15 per cent. In 1975 copper earned only U.S. $834.5 million in foreign exchange, compared with $1,550.6 million in 1974, and in 1976 the Government decided unilaterally to resume full production despite opposition from other members of the Council of Copper Exporting Countries. The fall in copper's export earnings prompted the Government to encourage the development of other industries, especially forest products, which were Chile's second largest foreign exchange earner in 1974. Chile produces only a third of its oil needs and production is falling. The Government has intensified exploration, especially in the Magellan Straits, and several international companies are prospecting in the north.

The Allende régime introduced wide-ranging state control but the present Government hopes to develop a mixed economy. It is government policy to return state enterprises, including banks, to the private sector. The April 1975 economic recovery programme aimed primarily at cutting the budget deficit and controlling inflation, which stood at 340.7 per cent in 1975. Measures included more realistic exchange rates and prices, credit restraints, tighter monetary control, a large cut in government spending and increased taxes. The effect of these measures was that the G.D.P. fell by 16.2 per cent and industrial production fell by 23.5 per cent in 1975. Industrial sales fell by over 20 per cent, reflecting a decrease in purchasing power and increased unemployment, which reached an overall level of over 18 per cent in 1975.

In June 1976 the government announced measures to reactivate the economy and stimulate domestic demand. The peso was devalued 17 times in the first six months of 1976 but was revalued slightly at mid-year. Thereafter, however, devaluation continued and the currency's overall depreciation in 1976 was 49 per cent. In 1976 Chile's total foreign debt was estimated at $2,500 million. Although the "Paris Club" of creditor nations refused to reschedule Chile's foreign debt in 1975, Japan, the U.S.A., Spain and Federal Germany (but not the United Kingdom, the Netherlands and Sweden) signed bilateral rescheduling agreements in 1976. In 1976 the World Bank approved a $33 million loan for copper development and Chile is seeking a $200 million loan in the U.S. capital markets.

A National Development Plan (1974/80) calls for investment of $9,375 million. One important target is the generation of additional foreign exchange resources through exports or import substitution. Priority is to be given to transport, mining, petro-chemicals, cattle raising and forestry.

Chile is a member of the OAS, LAFTA and SELA (Latin American Economic System). In 1969 it formed the Andean Group with five other countries, but withdrew in October 1976, unable to accept the extent of the Group's proposed restrictions on the export of profits by foreign-owned corporations.

### Transport and Communications

There are about 10,000 km. of railway track, of which four-fifths are state-owned. At the end of 1972 Chile had 63,656 km. of roads, of which 8,531 km. were paved. Several motorways are under construction. The chief ports are Valparaíso, Talcahuano, Antofagasta, San Antonio and Punta Arenas. There are international airports at Pudahuel outside Santiago, Arica, Antofagasta, Puerto Montt and Punta Arenas. Plans are going ahead to extend the provincial airport network.

### Social Welfare

Employees, including agricultural workers, receive benefits for sickness, unemployment and retirement and there are dependents' allowances. There is a National Health Service which was established in 1952.

### Education

Education is free and compulsory between the ages of six and fourteen. Over 90 per cent of the population are literate (95 per cent in the towns). Primary school education has been extended from six to eight years and new academic and technical syllabuses have been drawn up for the secondary school course. There are eight universities with over 100,000 students.

### Tourism

The long Andes range of mountains is the chief attraction to tourists. There are good beaches and many lakes, the largest of which is Llanquihue. Over 250,000 tourists visited Chile in 1975.

*Visas* are not required to visit Chile for a period of up to 90 days. This applies to all nationalities.

### Sport

Football is the most popular sport and ski-ing and fishing are extremely popular.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension), May 21st (Navy Day), June 9th (Corpus Christi), June 29th (SS. Peter and Paul), August 15th (Assumption), September 18th (Independence Day), September 19th (Army Day), October 12th (Discovery of America), November 1st (All Saints' Day), December 25th (Christmas Day).

**1978:** January 1st (New Year's Day), March 24th, 25th (Good Friday and Easter Saturday).

### Weights and Measures

The metric system is officially in force.

### Currency and Exchange Rate

100 centavos = 1 Chilean peso.

Exchange rates (December 1976):
£1 sterling = 27.70 pesos;
U.S. $1 = 16.72 pesos.

## FINANCE

100 centavos = 1 Chilean peso.

Coins: 1, 5, 10 and 50 centavos; 1 peso.

Notes: 1, 5, 10, 50 and 100 pesos.

Exchange rates (December 1976): £1 sterling = 27.70 pesos; U.S. $1 = 16.72 pesos.

100 Chilean pesos = £3.61 = $5.98.

*Note:* The new Chilean peso was introduced in September 1975, replacing the escudo at the rate of 1 peso = 1,000 escudos. The Chilean escudo had been introduced in January 1960, replacing the old peso at the rate of 1 escudo = 1,000 pesos. In October 1953 the basic exchange rate was altered from U.S. $1 = 31 pesos to $1 = 110 pesos. However, a system of multiple exchange rates was in force until April 1956 and thereafter the free rate, which applied to external trade, fluctuated considerably, reaching 1,120 old pesos per U.S. dollar by the end of 1958. At the end of 1959 the rate was $1 = 1,053 pesos, so the initial value of the escudo was 95 U.S. cents ($1 = 1.05 escudos). Chile's currency, however, continued to depreciate. After mid-1970 the principal rate of exchange for overseas trade transactions fluctuated as follows: U.S. $1 = 12.225 escudos from July 1970 to December 1971; $1 = 15.80 escudos from December 1971 to August 1972; $1 = 25.00 escudos from August 1972 to September 1973. In terms of sterling, the principal trading rate was £1 = 29.34 escudos from July 1970 to August 1971; and £1 = 41.17 escudos from December 1971 to June 1972. A number of other exchange rates were in force for specific transactions, e.g. imports of non-essential goods, and for non-trade purposes such as tourism. For converting the value of foreign trade the average rates of escudos per U.S. dollar were: 6.9 in 1968; 8.6 in 1969; 11.3 in 1970; 12.2 in 1971; and 20.8 in 1972. For July–September 1973 the average rate was $1 = 42.0 escudos. On October 1st, 1973, the new military junta introduced a two-tier system with a single trading rate of $1 = 280 escudos, representing a 91 per cent devaluation from the previous basic rate. By the end of 1973 the rate was $1 = 360 escudos. The average rates (escudos per U.S. dollar) were 71.6 in 1973 and 593 in 1974. Many more devaluations subsequently occurred until by September 1975 the exchange rate was $1 = 6,400 escudos. The initial rate for the new currency was thus $1 = 6.40 pesos. For 1975 the average exchange rate was $1 = 5,193 escudos (5.193 pesos). Some figures in this Statistical Survey are still expressed in terms of escudos.

# THE CONSTITUTION

In September 1976 the Government published three new Constitutional Acts which lay down the bases of Chile's new institutions. Chile is to have a new democratic structure with community participation. The basic aims of the State is the general wellbeing of the Nation in as much as each and every member of the community shall be helped to achieve material and spiritual fulfilment. The concept of a society based on class struggle is rejected. The family shall be the base of society.

The third Act deals with constitutional rights and guarantees. The following rights are guaranteed: the right to life and personal integrity, to a defence, to personal liberty and individual security; the right to reside in, cross or leave the country; the right of assembly, petition, association and free expression and the right to work. The Act differs from the 1925 Constitution in so far as men and women are accorded equal rights; no-one shall be obliged to join any association; any group considered to be contrary to morality, public order or state security shall be prohibited; the courts shall be able to prohibit any publication or broadcast considered to be contrary to public morality, order, national security or individual privacy; civil servants are denied the right to strike as are any other organization or service which is deemed to be vital to the nation. Also any person or group which disseminates doctrines which may harm the family, incite violence or be considered as contrary to the regime or the integrity or functioning of the law, shall be illegal and deemed to be contrary to the institutions of the Republic.

# THE PEOPLE'S REPUBLIC OF CHINA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The People's Republic of China covers a vast area of eastern Asia, with Mongolia to the north, the Soviet Union to the north and west, Pakistan to the west and India, Nepal and South-East Asia to the south. The climate ranges from sub-tropical in the far south to an annual average temperature of below 10°F (50°C) in the north and from the monsoon climate of East China to the aridity of the north-west. The principal language is Northern Chinese (Mandarin); in the south and south-east local dialects are spoken. The Tibetans, Uighurs, Mongols and other groups have their own languages. The traditional religions and philosophies of life are Confucianism, Buddhism and Taoism. There are also small Muslim and Christian minorities. The national flag (proportions 3 by 2) is plain red with one large and four small five-pointed gold stars in the top left-hand corner. The capital is Peking.

### Recent History

The People's Republic of China was proclaimed in October 1949, following the defeat by Communist forces of the Kuomintang government led by Gen. Chiang Kai-shek, which then fled to the island province of Taiwan. It was not until October 1971 that the People's Republic was admitted to the United Nations in place of the Kuomintang régime as the representative of China, and several countries still withold full recognition of the People's Republic.

The early years of Communist rule saw the restoration of order and the beginnings of economic progress, as well as China's intervention in the Korean War. A considerable measure of success was achieved, allowing China to withstand the effects of the industrialization programme of the late 1950s called the "Great Leap Forward", the drought of 1960–62 and the withdrawal of Soviet assistance in 1960. To prevent the establishment of a privileged ruling class, Chairman Mao Tse-tung launched the Great Proletarian Cultural Revolution in 1966. The excesses of the Red Guards caused the army to intervene but not before Liu Shao-chi, the Head of State, and Teng Hsiao-p'ing, Secretary of the Party, had been disgraced.

Factional disputes culminated in the attempted coup by the Defence Minister, Marshal Lin Piao, and several military leaders, who disappeared in 1971. However, by 1973 it was apparent that Chairman Mao Tse-tung and Premier Chou En-lai had retained their predominant positions.

A campaign against Lin Piao's followers took place in 1973–74. The supremacy of the Communist Party over the ultra-revolutionaries of the Cultural Revolution and the military establishment was confirmed by the holding of the Fourth National People's Congress in January 1975. Teng Hsiao-p'ing re-emerged as first Vice-Premier and also Chief of the General Staff, next only to Mao and Chou. A new constitution affirmed that the Party provides leadership both for the people and for the executive and legislature, and that the Party Chairman was to be commander of all the armed forces.

Chou En-lai died in January 1976, and Teng Hsiao-p'ing was expected to succeed him. Instead, Hua Kuo-feng, Minister of Public Security since January 1975, was officially appointed Premier in April, and Teng Hsiao-p'ing was dismissed from all posts, after a campaign denouncing him as a "capitalist roader". Counter-demonstrations followed, and serious rioting took place in Peking. The death in July of Marshal Chu Teh, another senior and long-standing member of the Party Politburo, further strained the leadership.

On September 9th, 1976, Mao died at the age of 82. His widow, Chiang Ching, who had begun to exert an increasing influence in the political sphere, then tried to seize power, with the help of three members of the Party Politburo, Chang Chun-chiao, Wang Hung-wen and Yao Wen-yuan. However, their attempt was unsuccessful, they were arrested, and a vigorous campaign against them was mounted, in which they were accused of plotting to assassinate Hua Kuo-feng, and of forging Mao's will. In October Hua Kuo-feng was appointed successor to Mao as Party Chairman and Commander-in-Chief of the People's Liberation Army, and the third session of the Fourth National People's Congress was held in early December.

### Government

China is a unitary state. Directly under the Central Government there are 21 provinces, five autonomous regions (including Tibet) and three municipalities (Peking, Shanghai, Tientsin). The highest organ of state power is the National People's Congress, under the leadership of the Chinese Communist Party. The Congress consists of over 2,800 deputies indirectly elected for five years by the provinces, autonomous regions, municipalities directly under the central government, and the People's Liberation Army. The Congress elects a Standing Committee to be its permanent organ. China has no Head of State but the equivalent functions are exercised by this Committee.

The State Council is the executive and is composed of the premier, the vice-premiers, the ministers and the ministers heading ministries and commissions. The State Council is appointed by and accountable to the National People's Congress.

Local people's congresses at various levels are the local organs of state power, and local revolutionary committees at various levels are the permanent organs of local people's congresses.

The Chinese Communist Party is given an even more important role than hitherto under the 1975 Constitution. It is defined as "the core of leadership of the whole Chinese people" and the Chairman of the Central Committee of the Communist Party commands the country's armed forces.

### Defence

China is divided into 11 major military regions. Total regular forces numbered 3,525,000 in 1976. The People's Liberation Army numbered 3,000,000. The navy of 275,000 has three fleets including over 50 submarines, one of which has ballistic missile tubes. The air force has 4,250 combat aircraft and personnel totalling 250,000. In addition China has 20–30 IRBM and 30–50 MRBM. There are also 300,000 security and border guards. All males are conscripted and military service lasts for 2–4 years in the army, 3–5 years in the airforce and 4–6 years in the navy. China has exploded nuclear devices.

### Economic Affairs

Agriculture represents about one-quarter of China's total national output. Of the chief grains, rice is grown mainly south of the Yangtze and wheat and millets to the north. China, with one-fifth of the world's population, accounts for 15 per cent of the world's cereal and groundnut production, 20 per cent of the world's soya and tea output and almost 40 per cent of the world's pig numbers. The gross value of China's farm output increased by about 50 per cent in the decade up to 1974.

China has large deposits of natural resources, such as coal and iron ore, which serves the iron and steel works at Anshan, Shanghai, Paotow and Wuhan. Other important minerals include tungsten, molybdenum, antimony, tin, lead, bauxite and manganese. The gross value of China's industrial output increased by 190 per cent between 1964 and 1974.

The petroleum industry is gaining steadily in importance, though four-fifths of the country's fuel and power requirements are still supplied by the coal industry, which produces one-fifth of the world's coal, while China's petroleum production does not yet account for more than 2 per cent of the world's output. The energy consumption per capita in 1974 was estimated at less than 650 kilogrammes of coal equivalent, compared to a world average of 2,050 kilogrammes per capita. Since 1973 China has been self-sufficient in petroleum and its products, and in 1975 exported over 8 million tons of oil, whilst producing, in the view of the Joint Economic Committee of the U.S. Congress, 80 million tons of crude petroleum. China is in the process of developing its own petro-chemical industries, including fibres and plastics, and is now a major producer and consumer of nitrogenous fertilizers.

The development of the economy since 1952 has been within the framework of four five-year plans, but recessions occurred in the wake of the Great Leap Forward (1958–60) and during the Cultural Revolution (1966–68). The Fourth Plan was successfully fulfilled in 1975, but the Fifth Plan (1976–80) seems to be delayed. From 1955 to 1957 collective farms were set up and these were amalgamated in 1958 in communes. Industry, trade and banking are in the hands of the State. Foreign trade, running at about U.S. $7,000 million in each direction in the mid-1970s, accounts for about 1 per cent of world trade. China has no serious balance of payments problems, but trade deficits of about U.S. $1,000 million and over $400 million in 1974 and 1975 respectively, had to be met by deferred payments in Japan and Western Europe.

### Transport and Communications

Since 1949 an ambitious programme of railway construction has been undertaken, especially in the west and north-west. In 1949 railways were responsible for nearly 80 per cent of the freight turnover by modern means of transport; the total length of railway lines exceeded 32,000 km. Roads are unevenly developed; national and provincial highways total 200,000 km. About 48,000 km. of inland waterways are navigable by steamships and civil air routes total 25,600 km. Coastal shipping is also important and the Chinese merchant fleet is expanding rapidly, with an estimated displacement of 2,828,000 gross tons in 1975. Since 1964 a number of foreign airlines have been permitted to set up regular services to Chinese cities.

### Social Welfare

Western and traditional Chinese medical attention is available in the cities, and to a lesser degree in rural areas, Since the Cultural Revolution, some 330,000 medical workers have settled in the countryside and an additional 400,000 doctors and nurses have been recruited into mobile teams to tour the villages, according to the New China News Agency. About 1 million "barefoot doctors" or semi-professional peasant physicians assist with simple cures and treatment. Large factories and other enterprises provide social services for their employees. Industrial wage-earners qualify for pensions. Average industrial wages amount to about 60 yüan per month; some three-fifths of the family budget is devoted to buying food.

### Education

A great expansion has occurred since 1949 in numbers receiving education at all levels, and education is almost universal. Kindergartens are considered an important part of pre-school education. Primary schooling covers five years and middle school six years. In 1960 it was claimed that 67 per cent of the population was literate. Following the closing of many schools and universities during the Cultural Revolution, PLA-worker teams took over their administration, entrance examinations were abolished and selection for admission was based on political assessment. By 1971 many colleges and universities had re-opened but initial enrolment was reportedly low. In 1975 some 150 million pupils received primary education, 45 million secondary, and 1 million higher education.

### Tourism

Tourism is still of limited extent. Tours are organized for party groups visiting China and foreign visitors still require a visa. Western-style hotels exist in Peking, Shanghai, Canton and other large centres.

### Sport

Football and basketball are popular in schools and other institutions. Athletics and swimming are encouraged. Chinese table-tennis players are among the world's best.

### Public Holidays

**1977:** May 1st (Labour Day), August 1st (Army Day), October 1st and 2nd (National Days).

**1978:** January or February* (Lunar New Year).

* From the first to the third day of the first moon of the lunar calendar.

### Weights and Measures

1 catty (*jin*) = 0.5 kg. or 1.1023 lb.
1 picul (*dan*) = 0.05 metric ton or 0.0492 long ton.
1 *mou* = 0.0667 hectare or 0.1647 acre.

### Currency and Exchange Rates

100 fen = 10 chiao = 1 yüan.

Exchange rates (December 1976):
£1 sterling = 3.153 yüan;
U.S. $1 = 1.897 yüan.

## FINANCE

Renminbi (RMB or "People's Currency"):
100 fen (cents) = 10 chiao (jiao) = 1 Jen Min Piao (People's Bank Dollar), usually called a yüan.
Coins: 1, 2 and 5 fen.
Notes: 10, 20 and 50 fen; 1, 2, 5 and 10 yüan.
Exchange rates (December 1976): £1 sterling = 3.153 yüan; U.S. $1 = 1.897 yüan.
100 yüan = £31.71 = $52.70.

*Note:* The new yüan, equal to 10,000 old yüan, was introduced in March 1955. The initial exchange rate was U.S. $1 = 2.46 new yüan (1 yüan = 40.65 U.S. cents) and this remained in effect until August 1971. Between December 1971 and February 1973 the official rate was $1 = 2.27 yüan, though an effective rate of $1 = 2.20 yüan was in force from January 1973. Since February 1973 the official basic rate has been $1 = 2.04 yüan but the market rate has been adjusted frequently. The latter (at December 31st) was: $1 = 2.02 yüan in 1973; $1 = 1.84 yüan in 1974; $1 = 1.97 yüan in 1975. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 5.904 yüan.

### FIRST FIVE-YEAR PLAN 1953–57

The First Five-Year Plan aimed at raising basic industrial and agricultural production. The Government claim that most targets were fulfilled.

### SECOND FIVE-YEAR PLAN 1958–62

This plan was prematurely terminated and for a number of years, there were only annual, if any, plans in existence.

### THIRD FIVE-YEAR PLAN 1966–70

The Third Plan, delayed by economic and political difficulties, was put into operation in January 1966. No details have been issued.

### FOURTH FIVE-YEAR PLAN 1971–75

It was announced that a Fourth Five-Year Plan started in January 1971. No details have yet been issued but a few output data were released at the end of 1971.

### FIFTH FIVE-YEAR PLAN 1976–80

No details were available in mid-1976. Agriculture continues to rank high in economic priorities. The exploitation of China's petroleum resources is rapidly changing the country's fuel and power basis and its industrial economy.

A Twenty-Five Year Plan is proposed for 1976–2000.

# THE CONSTITUTION

The 1954 Constitution of the People's Republic of China was revised by the Tenth National Congress of the Communist Party of China, and a new constitution was adopted by the Fourth National People's Congress on January 17th, 1975. The 106 articles of the 1954 Constitution were reduced to 30, and a number of significant changes in the theory and structure of government were made. The provisions of the 1975 Constitution are as follows:

### Preamble

(*Summary*)

Socialist society extends over a fairly long historical period. Throughout this period classes, class contradictions and class struggle exist, as well as the struggle between the socialist and capitalist roads, the danger of a restoration of capitalism and the threat of subversion and aggression by imperialism and social-imperialism. China will never be a super-power. We must strengthen our unity with the socialist countries and with all oppressed peoples and nations, and work for peaceful co-existence with countries having different social systems.

### Chapter 1. General Principles

*Article* 1—The People's Republic of China is a socialist state of the dictatorship of the proletariat led by the working class and based on the alliance of workers and peasants.

*Article* 2: Communist Party—The Communist Party of China is the core of leadership of the whole Chinese people. The working class exercises leadership over the state through its vanguard, the Communist Party of China.

Marxism-Leninism-Mao Tse-tung thought is the theoretical basis guiding the thinking of our nation.

*Article* 3: People's Congresses—All power in the People's Republic of China belongs to the people. The organs through which the people exercise power are the people's congresses at all levels, with deputies of workers, peasants and soldiers as their main body.

The people's congresses at all levels and all other organs of state practise democratic centralism.

Deputies to the people's congresses at all levels are elected through democratic consultation. The electoral units and electors have the power to supervise the deputies they elect and to replace them at any time according to provisions of law.

*Article* 4—The People's Republic of China is a unitary multi-national state. The areas where regional national autonomy is exercised are all inalienable parts of the People's Republic of China.

All the nationalities are equal. Great power chauvinism and local national chauvinism must be opposed.

All the nationalities have the freedom to use their own spoken and written languages.

*Article* 5—In the People's Republic of China, there are mainly two kinds of ownership of the means of production at the present stage: socialist ownership by the whole people and socialist collective ownership by working people.

The state may allow non-agricultural individual labourers to engage in individual labour involving no exploitation of others, within the limits permitted by law and under unified arrangement by neighbourhood organizations in cities and towns or by production teams in rural people's communes. At the same time, these individual labourers should be guided on to the road of socialist collectivization step by step.

*Article* 6: The Economy—The state sector of the economy is the leading force in the national economy.

All mineral resources and waters as well as the forests, undeveloped land and other resources owned by the state are the property of the whole people.

The state may requisition by purchase, take over for use, or nationalize urban and rural land as well as other means of production under conditions prescribed by law.

*Article* 7—The rural people's commune is an organization which integrates government administration and economic management.

The economic system of collective ownership in the rural people's communes at the present stage generally takes the form of three-level ownership with the production team at the basic level, that is, ownership by the commune, the production brigade and the production team, with the last as the basic accounting unit.

Provided that the development and absolute predominance of the collective economy of the people's commune are ensured, people's commune members may farm small plots for their personal needs, engage in limited household sideline production, and in pastoral areas keep a small number of livestock for their personal needs.

*Article* 8—Socialist public property shall be inviolable. The state shall ensure the consolidation and development of the socialist economy and prohibit any person from undermining the socialist economy and the public interest in any way whatsoever.

*Article* 9—The state applies the socialist principle: "He who does not work, neither shall he eat" and "From each according to his ability, to each according to his work".

The state protects the citizens' right of ownership to their incomes from work, their savings, their houses, and other means of livelihood.

*Article* 10—The state applies the principle of taking hold of revolution, promoting production and other work and preparedness against war; promotes the planned and proportionate development of the socialist economy, taking agriculture as the foundation and industry as the leading factor and bringing the initiative of both the central and the local authorities into full play; and improve the people's material and cultural life step by step on the basis of the constant growth of social production and consolidates the independence and security of the country.

*Article* 11—State organizations and state personnel must earnestly study Marxism-Leninism-Mao Tse-tung thought, firmly put proletarian politics in command, combat bureaucracy, maintain close ties with the masses and whole-heartedly serve the people. Cadres at all levels must participate in collective productive labour.

Every organ of state must apply the principle of efficient and simple administration. Its leading body must be a three-in-one combination of the old, the middle-aged and the young.

*Article* 12—The proletariat must exercise all-round dictatorship over the bourgeoisie in public life, including all spheres of culture. Culture and education, literature and art, physical education, health work and scientific research work must all serve proletarian politics, serve the workers, peasants and soldiers, and be combined with productive labour.

*Article* 13—Speaking out freely, airing views fully, holding debates and writing big-character posters are new forms of carrying on socialist revolution created by the masses of the people. The state shall ensure to the masses the right to use these forms to create a political situation in which there are both centralism and democracy, both discipline and freedom, both unity of will and personal ease of mind and liveliness, and so help consolidate the leadership of the Communist Party of China over the state and consolidate the dictatorship of the proletariat.

*Article* 14—The state safeguards the socialist system, suppresses all treasonable and counter-revolutionary activities and punishes all traitors and counter-revolutionaries.

The state deprives the landlords, rich peasants, reactionary capitalists and other bad elements of political rights for specified periods of time according to law, and at the same time provides them with the opportunity to earn a living so that they may be reformed through labour and become law-abiding citizens supporting themselves by their own labour.

*Article* 15: Armed Forces—The Chinese People's Liberation Army and the people's militia are the workers' and peasants' own armed forces led by the Communist Party of China; they are the armed forces of the people of all nationalities.

The chairman of the Central Committee of the Communist Party of China commands the country's armed forces.

The Chinese People's Liberation Army is at all times a fighting force, and simultaneously a working force and a production force.

The task of the armed forces of the People's Republic of China is to safeguard the achievements of the socialist revolution and socialist construction, to defend the sovereignty, territorial integrity and security of the state, and to guard against subversion and aggression by imperialism, social-imperialism and their lackeys.

## Chapter 2. The Structure of the State

### SECTION I. THE NATIONAL PEOPLE'S CONGRESS

*Article* 16—The National People's Congress is the highest organ of state power under the leadership of the Communist Party of China.

The National People's Congress is composed of deputies elected by the provinces, autonomous regions, municipalities directly under the central government, and the People's Liberation Army. When necessary, a certain number of patriotic personages may be specially invited to take part as deputies.

The National People's Congress is elected for a term of five years. Its term of office may be extended under special circumstances.

The National People's Congress holds one session each year. When necessary, the session may be advanced or postponed.

*Article* 17: Functions—The functions and powers of the National People's Congress are: to amend the constitution, make laws, appoint and remove the premier of the State Council and the members of the State Council on the proposal of the Central Committee of the Communist Party of China, approve the national economic plan, the state budget and the final state accounts, and exercise such other functions and powers as the National People's Congress deems necessary.

*Article* 18: Standing Committee—The Standing Committee of the National People's Congress is the permanent organ of the National People's Congress. Its functions and powers are: to convene the sessions of the National People's Congress, interpret laws, enact decrees, dispatch and recall plenipotentiary representatives abroad, receive foreign diplomatic envoys, ratify and denounce treaties concluded with foreign states, and exercise such other functions and powers as are vested in it by the National People's Congress.

The Standing Committee of the National People's Congress is composed of the chairman, the vice-chairman and other members, all of whom are elected and subject to recall by the National People's Congress.

### SECTION II. THE STATE COUNCIL

*Article* 19—The State Council is the central people's government. The State Council is responsible and accountable to the National People's Congress and its Standing Committee.

The State Council is composed of the premier, the vice-premiers, the ministers, and the ministers heading commissions.

*Article* 20: Functions—The functions and powers of the State Council are: to formulate administrative measures and issue decisions and orders in accordance with the Constitution, laws and decrees; exercise unified leadership over the work of ministries and commissions and local organs of state at various levels throughout the country; draft and implement the national economic plan and the state budget; direct state administrative affairs; and exercise such other functions and powers as are vested in it by the National People's Congress or its Standing Committee.

### SECTION III. THE LOCAL PEOPLE'S CONGRESSES AND THE LOCAL REVOLUTIONARY COMMITTEES AT VARIOUS LEVELS

*Article* 21: Local People's Congresses—The local people's congresses at various levels are the local organs of state power.

The people's congresses of provinces and municipalities directly under the central government are elected for a term of five years. The people's congresses of prefectures, cities and counties are elected for a term of three years. The people's congresses of rural people's communes and towns are elected for a term of two years.

*Article* 22: Local Revolutionary Committees—The local revolutionary committees at various levels are the permanent organs of the local people's congresses and at the same time the local people's governments at various levels.

Local revolutionary committees are composed of a chairman, vice-chairmen and other members, who are elected and subject to recall by the people's congress at the corresponding level. Their election or recall shall be submitted for examination and approval to the organ of state at the next higher level.

Local revolutionary committees are responsible and accountable to the people's congress at the corresponding level and to the organ of state at the next higher level.

*Article* 23: Functions—The local people's congresses at various levels and the local revolutionary committees elected by them ensure the execution of laws and decrees in their respective areas; lead the socialist revolution and socialist construction in their respective areas; examine and approve local economic plans, budgets and final accounts; maintain revolutionary order; and safeguard the rights of citizens.

### SECTION IV. THE ORGANS OF SELF-GOVERNMENT OF NATIONAL AUTONOMOUS AREAS

*Article* 24—The autonomous regions, autonomous prefectures and autonomous counties are all national autonomous areas; their organs of self-government are people's congresses and revolutionary committees.

The organs of self-government of national autonomous areas, apart from exercising the functions and powers of local organs of state as specified in Chapter 2, Section III of the Constitution, may exercise autonomy within the limits of their authority as prescribed by law.

The higher organs of state fully safeguard the exercise of autonomy by the organs of self-government of national autonomous areas and actively support the minority nationalities in carrying out the socialist revolution and socialist construction.

### SECTION V. THE JUDICIAL ORGANS AND THE PROCURATORIAL ORGANS

*Article* 25—The Supreme People's Court, local people's courts at various levels and special people's courts exercise judicial authority. The people's courts are responsible and accountable to the people's congresses and their permanent organs at the corresponding levels. The presidents of the people's courts are appointed and subject to removal by the permanent organs of the people's congresses at the corresponding levels.

The functions and powers of procuratorial organs are exercised by the organs of public security at various levels.

The mass line must be applied in procuratorial work and in trying cases. In major counter-revolutionary criminal cases the masses should be mobilized for discussion and criticism.

## Chapter 3. The Fundamental Rights and Duties of Citizens

*Article* 26—The fundamental rights and duties of citizens are to support the leadership of the Communist Party of China, support the socialist system and abide by the Constitution and the laws of the People's Republic of China.

It is the exalted duty of every citizen to defend the motherland and resist aggression. It is the honourable obligation of citizens to perform military service according to law.

*Article* 27—All citizens who have reached the age of eighteen have the right to vote and stand for election, with the exception of persons deprived of these rights by law.

Citizens have the right to work and the right to education. Working people have the right to rest and the right to material assistance in old age and in case of illness or disability.

Citizens have the right to lodge to organs of state at any level written or oral complaints of transgression of law or neglect of duty on the part of any person working in an organ of state. No one shall attempt to hinder or obstruct the making of such complaints or retaliate.

Women enjoy equal rights with men in all respects.

The state protects marriage, the family, and the mother and child.

The state protects the just rights and interests of Overseas Chinese.

*Article* 28—Citizens enjoy freedom of speech, correspondence, the press, assembly, association, procession, demonstration and the freedom to strike, and enjoy freedom to believe in religion and freedom not to believe in religion and to propagate atheism.

The citizens' freedom of person and their homes shall be inviolable. No citizen may be arrested except by decision of a people's court or with the sanction of a public security organ.

*Article* 29—The People's Republic of China grants the right of residence to any foreign national persecuted for supporting a just cause, for taking part in revolutionary movements or for engaging in scientific activities.

## Chapter 4. The National Flag, the National Emblem and the Capital

*Article* 30—The national flag has five stars on a field of red.

The national emblem: Tien An Men in the centre, illuminated by five stars and encircled by ears of grain and a cogwheel.

The capital is Peking.

## JUDICIAL SYSTEM

The general principles of the Chinese judicial system are laid down in Article 25 of the January 1975 constitution.

### PEOPLE'S COURTS

**Supreme People's Court:** Peking; f. 1949; the highest judicial organ of the State. Directs and supervises work of lower courts.

**President of the Supreme People's Court:** CHIANG HUA; term of office four years.

**Vice-Presidents:** HO LAN-CHIEH, HSING YI-MIN, TSENG HAN-CHOU, WANG-TEH-MAO, CHANG CHIH-JANG, CH'EN CHI-HAN, WANG WEI-KANG, WU TE-FENG, T'AN KUAN-SAN.

**Special People's Courts.**

**Local People's Courts.**

### PEOPLE'S PROCURATORATES

**Supreme People's Procuratorate:** Peking; acts for the National People's Congress in examining government departments, civil servants and citizens, to ensure observance of the law; prosecutes in criminal cases.

**Chief Procurator:** CHANG TING-CHENG elected by N.P.C. for four years.

**Deputy Chief Procurators:** HUANG HUO-HSING, CHANG SU.

**Local People's Procuratorates:** undertake the same duties at the local level. Ensure that the judicial activities of the people's courts, the execution of sentences in criminal cases, and the activities of departments in charge of reform through labour, conform to the law; institutes, or intervenes in, important civil cases which affect the interest of the State and the people.

## RELIGION

The practice of religious belief is not encouraged. Below are listed the dominant religions which prevailed before 1949.

### ANCESTOR WORSHIP

Ancestor worship is believed to have originated with the deification and worship of all important natural phenomena. The divine and human were not clearly defined; all the dead became gods and were worshipped by their descendants. The practice has no code or dogma and the ritual is limited to sacrifices made during festivals and on birth and death anniversaries.

### CONFUCIANISM

Confucianism is a philosophy and a system of ethics, without ritual or priesthood. The respects accorded Confucius are not paid to a prophet or god, but to a great sage whose teachings promote peace and good order in society and whose philosophy encourages moral living. The teachings of Confucius were officially criticized at the Fourth National People's Congress in January 1975.

### TAOISM

**China Taoist Association:** Peking; Chair. CH'EN YINGNING.

Taoism originated as a philosophy expounded by Lao Tse, born 604 B.C. The establishment of a religion was contrary to his doctrines, but seven centuries after his death his teachings were embodied into a ritual.

### BUDDHISM

**Chinese Buddhist Association:** f. 1953; Pres. SHIROB-JALTSO; Sec.-Gen. CHAO P'U-CH'U.

Buddhism was introduced in China from India in A.D. 61, and now bears little resemblance to the religion in its original form, a number of native Chinese legends, traditions, rites and deities having been added. The "secularization" of Buddhist monasteries has resulted in the evacuation of many, particularly in Tibet.

### ISLAM

**China Islamic Association:** Peking; f. 1953; Chair. BURHAN SHAHIDI.

According to Muslim history, Islam was introduced into China in A.D. 651. Its number of adherents in China is estimated at about 10 million, chiefly among the Uighur and Hui people.

### CHRISTIANITY

During the 19th century and the first half of the 20th large numbers of foreign Christian missionaries worked in China. The Chinese People's Republic has steadily discouraged all foreign influences in Chinese religious affairs.

**Roman Catholic Church:** Catholic Mission, Si-She-Ku, Peiping, Hopeh.

# CHINA (TAIWAN)

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Chinese province of Taiwan comprises the island of Taiwan (Formosa), the nearby Pescadores islets, and the islands of Quemoy and Matsu near the mainland. Taiwan itself lies 200 miles from the coast of south-eastern China. The average temperature is 23°C (73°F) and the average annual rainfall 101 inches. The official language is Mandarin Chinese. The predominant religion is Buddhism and there are Muslims, Catholics and Protestants. Confucianism has a large following. The national flag (proportions 3 by 2) is crimson, with a dark blue rectangular canton containing a white sun. The capital is Taipei.

### Recent History

China's Kuomintang government, led by Gen. Chiang Kai-shek, was overthrown by the Communist revolution of 1949. Chiang and many of his supporters left the mainland and established themselves on Taiwan. In 1954 a mutual security pact was signed by which the U.S.A. pledged the protection of Taiwan and the Pescadores; in 1955 the offshore islands of Quemoy and Matsu were included in the protected area. The Taiwan régime, which still claims to be the legal government of all China, was recognized by only 26 countries in 1976, having lost its seat at the United Nations to the Government of the People's Republic of China in October 1971. Elections were held in December 1972 for the first time in 24 years, to increase popular representation in local affairs. In 1973 the Government rejected a Peking offer to hold secret talks on the reunification of China.

Following the death of Chiang Kai-shek in April 1975, his son, General Chiang Ching-kuo, was elected leader of the ruling Kuomintang. No remarkable change of policy has ensued: *détente* with mainland China still seems remote and economic and political stability continues to be the main priority. The Kuomintang's eleventh party congress was held in November 1976.

### Government

The Head of State is the President, who is elected for terms of six years by the National Assembly. There are five Yuans (governing bodies), the highest legislative organ being the Legislative Yuan, to which the Executive Yuan is responsible. There are also Control, Judicial and Examination Yuans. Elections are by universal adult suffrage, but the great majority of Assembly seats are held by life members who formerly represented mainland constituencies.

### Economic Affairs

The economy is progressing towards self-sufficiency, and Taiwan has become one of the leading exporters in Asia. A large trade surplus in the years 1971–73 was transformed into a considerable deficit in 1974 as import costs rose. However, a favourable balance of NT$60 million is expected by 1981. Trade is chiefly with the U.S.A., Japan and South-East Asia, the most important exports being clothing, television and radio sets, plastic articles, plywood and cotton fabrics. The production of electrical goods is the main industry. Mineral resources include coal, marble, oil and natural gas. Gross National Product per capita is now amongst the highest in Asia.

### Defence

The armed forces totalled 470,000 men in 1976: army 330,000, air force 70,000, navy 35,000 with a marine corps of 35,000. Military service lasts for two years. Much of the equipment and some training staff are provided by the U.S.A.

Defence expenditure for 1976/77 was estimated at NT$48,000 million.

### Transport and Communications

There are 3,604 km. of state railway and over 17,000 km. of roads. The ports of Keelung, Hualien and Kaohsiung handled nearly 46 million metric tons of cargo in 1975. There are international airports at Taipei and Kaohsiung.

### Social Welfare

The Labour Security Programme covers over 1.4 million workers and provides benefits for injury, disability, birth, death and old age. 341,774 Government employees are covered by a separate scheme (September 1974).

### Education

Pre-school education is optional, though attendance at kindergartens is showing a marked increase. Primary education is free and compulsory between the ages of six and twelve. Secondary schools consist of junior and senior middle schools, normal schools for teacher-training and vocational schools. There are also a number of private schools. Higher education comprises universities, colleges, junior colleges and graduate schools. In 1975/76 there were over 2.3 million pupils enrolled in state primary schools and about 1.5 million in secondary schools. There are 11 universities and 16 independent colleges.

### Tourism

Festivals, ancient art treasures and the island scenery are the principal attractions; 853,000 tourists visited Taiwan in 1975.

*Visas* are required by all visitors.

### Sport

The most popular sports are basketball, baseball and swimming. About 20 national sports associations belong to the China National Amateur Athletic Federation.

### Public Holidays

**1977:** September 28th (Teachers' Day—Birthday of Confucius), October 10th (Double Tenth Day, anniversary of 1911 revolution), November 12th (Birthday of Sun Yat-sen), December 25th (Constitution Day).

**1978:** January 1st (Founding of the Republic), January–February* (Chinese New Year).

## FINANCE

100 cents=1 New Taiwan dollar (NT $).

Coins: 10, 20 and 50 cents; 1 and 5 dollars.

Notes: 1, 5, 10, 50 and 100 dollars.

Exchange rates (December 1976): £1 sterling=NT $62.97; U.S. $1=NT $38.00.
NT $100=£1.588=U.S. $2.632.

*Note:* Multiple exchange rate systems were in operation from 1951 to August 1959. From March 1956 the certificate rate (used for foreign trade transactions) was U.S. $1=NT$24.78 (NT$1=4.04 U.S. cents). In 1958 the rate became U.S. $1=NT$36.38 (NT$1=2.75 U.S. cents). In August 1959 the currency was devalued and the exchange rate fluctuated close to U.S. $1=NT$40.00 (NT$1=2.50 U.S. cents), which became the par value in September 1970. Foreign trade was valued at this rate from January 1961 and it became the official basic rate in June 1961, though from October 1963 a selling rate of U.S. $1=NT$40.10 came into force. These rates remained in effect until February 1973. Since February 1973 the exchange rate (par value) has been U.S. $1=NT$38.00 (NT$1=2.63 U.S. cents). In terms of sterling, the exchange rate was £1=NT$96.00 from November 1967 to August 1971; and £1=NT$104.23 from December 1971 to June 1972.

# THE CONSTITUTION

The form of government incorporated in the Constitution follows the five-power system envisaged by Dr. Sun Yat-sen, which has the major features of both cabinet and presidential government. The following are the chief organs of government:

**National Assembly:** Composed of elected delegates; meets to elect or recall the President and Vice-President, to amend the Constitution, or to vote on proposed Constitutional amendments submitted by the Legislative Yuan.

**President:** Elected by the National Assembly for a term of 6 years, and may be re-elected for a second term (the two-term restriction is at present suspended). Represents country at all state functions, including foreign relations; commands land, sea, and air forces, promulgates laws, issues mandates, concludes treaties, declares war, makes peace, declares martial law, grants amnesties, appoints and removes civil and military officers, and confers honours and decorations. He also convenes the National Assembly, and subject to certain limitations, may issue emergency orders to deal with national calamities and ensure national security.

**Executive Yuan:** Is the highest administrative organ of the nation and is responsible to the Legislative Yuan; has five categories of subordinate organization:

- Executive Yuan Council
- Ministries and Commissions
- Secretariat
- Government Information Office and Personnel Administration Bureau
- Directorate-General of Budgets, Accounts and Statistics.

**Legislative Yuan:** Is the highest legislative organ of the state, composed of elected members; holds two sessions per year; is empowered to hear administrative reports of the Executive Yuan, and to change Government policy.

**Judicial Yuan:** Is the highest judicial organ of state and has charge of civil, criminal, and administrative cases, and of cases concerning disciplinary measures against public functionaries (*see* Legal System).

**Examination Yuan:** Supervises examinations for entry into public offices, and deals with personal questions of the civil service.

**Control Yuan:** Is a body elected by local councils to impeach or investigate the work of the Executive Yuan and the Ministries and Executives; meets once a month, and has a subordinate body, the Ministry of Audit.

# COLOMBIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Colombia lies in the north-west of South America with the Caribbean Sea to the north and the Pacific to the west. Its continental neighbours are Venezuela, Brazil, Peru and Ecuador, while Panama connects it with Central America. The coastal areas have a tropical rain forest climate, the plateaux are temperate and in the Andes there are areas of permanent snow. The language is Spanish. There is freedom of religion; the state religion, to which 90 per cent of the population adhere, is Roman Catholicism. There are small Protestant and Jewish minorities. The national flag (proportions 3 by 2) has horizontal stripes of yellow (half the depth), dark blue and red. The capital is Bogotá.

### Recent History

Between 1948 and 1957, Colombia was torn by civil war between Conservative and Liberal factions which led to the dictatorship of Gen. Gustavo Rojas Pinilla (1953–57), who was overthrown by a military junta in May 1957. Democratic government was re-established in 1958 with an agreement to form a National Front, by which the two principal parties, Liberal and Conservative, would alternate in power for four-year periods. In 1966 Dr. Carlos Lleras Restrepo was elected Liberal President for a four-year term. Despite much political unrest and continuing guerrilla warfare, Dr. Lleras was able to bring about economic recovery after the crisis left by Gen. Rojas. Presidential elections were held in April 1970 and Dr. Misael Pastrana Borrero of the Conservative Party was elected by a very small majority over Gen. Rojas. Dr. Pastrana's administration was severely hampered during its first two years by the parliamentary alliance between the supporters of Gen. Rojas and a section of the Liberal Party. However, in 1972 the two main factions within the Liberal Party agreed to unite their forces. The presidential elections of April 1974 (for which the National Front arrangement was terminated) were won by the Liberal Party, and their candidate, Dr. Alfonso López Michelsen, took office as President in August 1974. He promised wide-ranging reforms and a more equitable distribution of income. After one year of government his failure to carry out these policies led to strikes, rioting and increased violent guerrilla activity. A state of siege was announced in June 1975 with political meetings banned and the right to *habeus corpus* rescinded. Throughout 1976 there was serious civil unrest and intensified guerrilla activity. Several universities were closed and hundreds of students and strikers arrested. Government reaction to increased strike activity, caused by a refusal to negotiate pay increases of over 15 per cent, was to suspend or dismiss any striking public employee. The state of siege was lifted in June but reimposed in October during a nation-wide strike by medical workers. In the April municipal elections the Government coalition received 77 per cent of the votes but only 20 per cent of the electorate voted despite a presidential call for support for the Government against the left.

### Government

Executive power is exercised by the President (assisted by a Cabinet) who is elected for a four-year term by universal adult suffrage.

Legislation is carried out by Congress, consisting of the Senate (112 members elected for four years) and the House of Representatives (214 members elected for four years). The country is divided into 22 Departments, five Intendencies and four Commissaries.

### Defence

At the age of 18 every male must present himself as a candidate for two years' military service. In 1976 the strength of the army was 40,000, the navy 8,000 and the air force 6,300. The para-military police force numbers about 5,000 men. Defence expenditure for 1974 was 2,393 million pesos.

### Economic Affairs

The economy depends principally on coffee, of which Colombia is the world's second largest producer and which accounted for 45 per cent of export earnings in 1976. Other major cash crops are sugar and cotton and there have been considerable gains in the value of tobacco, bananas and cut-flower exports. The principal food crops are rice, sorghum, maize, wheat and barley. The agricultural growth rate is keeping pace with the 3 per cent annual population growth rate. Priority is being given to agriculture under the three-year plan (1976–78). Little progress has been made in agrarian reform.

Industrial growth slowed in the mid-1970s and the world recession affected textile exports which are the country's second major currency earner. Although Colombia was a net exporter of crude petroleum in 1970, exports were banned in 1974 and over 10,000 barrels of oil a day were imported in 1976. Some new oil fields have been discovered and the Government is to invest $500 million in increasing production. There are proven reserves of 3,500 million cubic feet of natural gas and 12,000 million tons of coal and priority is being given to their development. The exploitation of the Cerromatoso nickel resources is to begin in 1979; reserves are estimated at 70 million tons and annual output is planned at 850,000 tons. Colombia also accounts for 95 per cent of the world's emerald production and is a substantial producer of platinum and gold.

The Government has introduced various measures, including frequent but small devaluations, in an effort to improve the trade position. The Government is seeking new markets for non-traditional exports and hopes to speed up tariff reductions between Andean Group countries. The rate of increase in G.D.P. fell from over 7 per cent in 1973 to 4.8 per cent in 1975 due largely to anti-inflation policies and the world recession. The Government reduced inflation from 30 per cent in 1974 to 17.9 per cent in 1975 but this caused a sharp rise in unemployment and a fall in the general standard of living resulting in discontent and civil unrest. There was a balance of payments surplus in 1975 due largely to increased income from coffee and a slower growth of imports.

The Government's three-year plan (1976–78) provides for total expenditure of 92,400 million pesos, with emphasis being laid on the social content of economic policy reflecting government concern with the endemic problems of unemployment and inequitable income distribution.

Colombia is a member of the Andean Group, LAFTA, the IDB, SELA and the OAS.

### Transport and Communications

The high mountains make transport difficult. In 1975 there were 49,248 km. of roads, including three highways, and 3,424 km. of railways. There are plans to construct a new Jungle Edge highway to provide direct access to the interior. Much freight and cattle as well as passenger traffic is carried on the River Magdalena, which is navigable for 1,440 km. from Barranquilla on the Atlantic coast to Puerto Berrio. A new port at Urabá, to cost $4.1m., will be completed in 1977. Four national airlines provide internal and international services. There are international airports at Bogotá, Barranquilla, Medellín, Cali and the San Andrés islands.

### Social Welfare

There is compulsory social security paid for by the Government, employers and employees, and administered by the Institute of Social Security. It provides benefits for disability, old age, death, sickness, maternity, industrial accidents and unemployment. Large firms must provide life insurance for their employees and there is a comprehensive system of pensions.

### Education

Elementary education is free and compulsory for five years. No child may be admitted to secondary school unless these five years have been successfully completed. Secondary education is for six years. There were 21 public and 17 private universities in 1976. There is a 75 per cent literacy rate.

### Tourism

The main tourist attractions are the Caribbean coast, the Andes mountains of up to 6,000 metres, the extensive forests and jungles and pre-Columbian relics and monuments of Colonial art.

*Visas* are not required to visit Colombia for up to 90 days by nationals of Argentina, Austria, Brazil, Costa Rica, EEC countries, El Salvador, Finland, Israel, Japan, Liechtenstein, Norway, Peru, Portugal, Spain, Sweden, Switzerland, Trinidad and Tobago.

### Sport

The principal sports are football, cycling, baseball, basketball, boxing, swimming, riding and bullfighting. Tejo, a kind of discus-throwing game, is also popular.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension), June 9th (Corpus Christi), June 29th (SS. Peter and Paul), July 20th (Independence), August 7th (Battle of Boyacá), August 15th (Assumption), October 12th (Discovery of America), November 1st (All Saints' Day), November 11th (Independence of Cartagena), December 8th (Immaculate Conception), December 25th (Christmas Day).

**1978:** January 1st (New Year's Day), January 6th (Epiphany), March 19th (St. Joseph's Day), March 23rd (Holy Thursday), March 24th (Good Friday).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rate

100 centavos = 1 Colombian peso.

Exchange rates (December 1976):
£1 sterling = 59.81 pesos;
U.S. $1 = 36.11 pesos.

# THE CONSTITUTION

The Constitution now in force was promulgated in 1886 and has been amended from time to time. The country is governed by a President and a Congress consisting of two Chambers. All citizens over the age of 18 are eligible to vote. Civil rights and social guarantees include freedom of education, the right to strike (except in the public sector), public aid to those unable to support themselves, freedom of assembly, of the press, and the right to petition. All male citizens are required to present themselves for possible military service at the age of 18.

## THE PRESIDENT

Executive power is vested in the President of the Republic, who is elected by popular suffrage for a four-year term of office.

The President is assisted in the government of the country by a Cabinet which he appoints. A substitute (*designado*) is elected by Congress, subject to bi-annual re-appointment, to act in the event of a Presidential vacancy. The President appoints the governors of the twenty-two Departments, the five Intendencies and the four Commissaries.

## CONGRESS

Legislative power is exercised by Congress, which is composed of the Senate and the House of Representatives. Members of both chambers are elected by direct suffrage for a period of four years.

The Presidents in each House are elected for sixty days.

## JUDICIARY

The administration of justice is in the hands of the Supreme Court, superior district tribunals, and lower courts. The magistrates of the Supreme Court of Justice are elected by Congress from lists presented by the President. The term of office is five years and the magistrates may be re-elected indefinitely.

## NATIONAL ECONOMIC COUNCIL

Direction of the nation's finances is in the hands of the Controller-General, who is appointed for two years. A National Economic Council including five ministers and also representatives of banking, industrial and agricultural interests, has functioned since 1935.

### LOCAL GOVERNMENT

For administrative purposes the country is divided into twenty-two departments, five intendencies and four commissaries. The twenty-two departments of the republic are further divided into municipalities. Governors for the Departments are appointed by the President, but regional legislatures are elected by the local inhabitants and enjoy considerable autonomy, including the management of local finances. Mayors for the municipalities are appointed by the governors.

Various constitutional reforms were promulgated in December 1968, including the following amendments: to increase the membership of the Senate from 106 to 112, and the Chamber of Representatives from 204 to 214; to increase from two to four years the term of office of representatives; to eliminate the two-thirds majority required for matters of importance; to enable the Government to legislate by decree for a maximum period of 90 days in any one year in the event of an economic crisis, though such decrees must relate only to the matters which caused the crisis; from 1970, proportional representation to be allowed in departmental and municipal elections; the same principle to apply to congressional elections after 1974.

# THE COMOROS*

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Comoro Islands lie between the East African coast and Madagascar and comprise four small islands (Grande-Comore, Mayotte, Anjouan and Mohéli) and numerous islets and coral reefs. The climate is tropical, with considerable variations in rainfall and temperature from island to island. The official language is French but the majority of the population speak Comoran, a blend of Swahili and Arabic. The Muslim religion predominates. The flag comprises two horizontal bands, an upper red band (two-thirds of the depth) bearing a white crescent moon and four five-pointed white stars in the hoist, and a lower green band. The capital is Moroni, on Grande-Comore.

### Recent History

Formerly attached to Madagascar, the Comoros became a separate French Overseas Territory in 1947 and achieved internal self-government in 1961.

Elections held in December 1972 produced a large majority for parties advocating independence and in June 1973 the French and Comoran governments agreed that the islands should become independent within five years, after a referendum. When the referendum took place, in December 1974, there was a 96 per cent vote in favour of independence, despite the opposition of the Mayotte Party, seeking the status of a French Department for the island of Mayotte.

In June 1975 the French Parliament, noting that a majority of Mayotte's population had voted against independence, provided that each island should be asked separately to ratify the new constitution by referendum before the granting of independence. In order to avoid such a procedure, which would have led to the separation of Mayotte from the rest of the Comoros, the head of the Government, Ahmed Abdallah, unilaterally declared the Comoros independent on July 6th, 1975.

France accepted the *fait accompli* but maintained its hold on Mayotte. Abdallah was declared president of the new state but in August he was deposed in a *coup* organized by the opposition *Front national uni* (FNU). The National Assembly was abolished and a National Executive Council established, with Said Mohamed Jaffar as its president and Ali Soilih, the leader of the *coup*, among its members. The new government taxed Abdallah with his failure to achieve a reconciliation with Mayotte but they had no more success themselves. The French proceeded with arrangements for a referendum on independence in Mayotte, and there seemed little doubt that the island would opt for union with France. Relations between the Moroni government and France deteriorated and in December France announced the withdrawal of all bureaucratic and technical staff from the three independent islands. France formally recognized the independence of the three islands on January 1st, 1976. The next day Ali Soilih was elected President by the National Executive Council and the National Revolutionary Council. A new government was formed, headed by a Prime Minister.

On February 8th, 1976, the population of Mayotte voted overwhelmingly for continuing links with France, and in a further referendum on April 11th they demonstrated their desire for French departmental status. The French Government, however, proposed a "special status" for the island, apparently leaving the way open for a possible reintegration of Mayotte in the Comoran state. Comoran suspicions of France remained, and in October 1976 the Comoran Government accused France of planning a coup against them in collaboration with former President Ahmed Abdallah

### Government

The Comoros are ruled by a President and a Vice-President, assisted by a Council of Ministers headed by a Prime Minister.

### Economic Affairs

The economy of the Comoros is in a disastrous condition. With no industry or mining, the population is entirely dependent upon agriculture. Much farming is carried on with primitive implements and techniques. Substantial imports of foodstuffs, especially rice, are necessary for the survival of the inhabitants, most of whom are very poor. The export of cash crops such as ylang-ylang, vanilla and copra, produced on the estates of European landowners and foreign companies, is a most unreliable source of income and, even at best, quite inadequate to cover the cost of imports. Until 1975, French aid kept the economy afloat but the colonial power made no effort to develop the bases for an independent state, such as an adequate transport system or capital equipment.

In July 1975 France cut off all aid to the islands, leaving the state virtually bankrupt. The UN arranged emergency food shipments and in the course of 1976 financial aid was obtained from various sources, especially other Muslim states, though not in sufficient quantities to replace the French aid lost.

Because of a rapidly expanding population and the limited area available for cultivation, many Comorans are forced to emigrate. The separation of Mayotte, which is less densely populated than the other islands, has exacerbated this problem.

### Transport and Communications

Transport facilities are very limited, even between the islands themselves. There are air and sea links with the outside world *via* Madagascar and East Africa.

### Social Welfare

In 1975 there were three hospitals and a number of general welfare centres and maternity units. Since France withdrew all medical staff, Canada has provided substitutes.

* Most of the information contained in this chapter refers to the whole Comoros Archipelago, which the independent Comoran state claims as its national territory. However, the island of Mayotte is, in fact, administered by France. Separate information on Mayotte may be found in the chapter on French Overseas Possessions (p. 582).

### Education

Under French rule teaching facilities were grossly inadequate, only 23 per cent of children receiving any formal education. In late 1975 secondary education ceased after the withdrawal of all French teaching staff, but schools were reopened in May 1976 with the arrival of about 40 teachers from Belgium, Senegal and Tunisia. Basic education for the mass of the population is provided through traditional Koranic schools.

### Tourism

There is a developing tourist industry. The chief attractions are the beaches, underwater fishing and mountain trips.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

1 franc CFA = 2 French centimes;
£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

## STATISTICAL SURVEY

**Area:** 2,236 sq. km. (863 sq. miles). **Population** (1973 estimates): 294,800; Moroni (capital) 15,900; approximate population by islands: Grande-Comore 135,000, Anjouan 105,000, Mayotte 38,000, Mohéli 12,000.

## THE GOVERNMENT

### HEAD OF STATE

**President:** Ali Soilih.

**Vice-President:** Mohammad Hassanaly.

### COUNCIL OF MINISTERS

(*December* 1976)

**Prime Minister, responsible for the Commissariat of Planning and the Civil Service:** Abdallah Mohamed.

**Minister for Foreign Affairs:** Mouzaoir Abdallah.

**Minister for Public Health:** Benali Bacar.

**Minister of the Interior:** Salim Himidi.

**Minister of Finance:** Tadjidine Massoundi.

**Minister of Public Works:** Soidridine Abdallah.

**Minister of Education:** Ali Mlamali.

**Minister of Production and Light Industry:** Nacr Eddin.

**Minister of Transport and Telecommunications:** Youssouf Soufiane.

### NATIONAL INSTITUTIONAL COUNCIL

In January 1976 the National Institutional Council replaced the National Revolutionary Council. Its functions include overseeing the action of the Government, preventing acts against state security and acting as supreme judge of acts committed by the head of state.

### NATIONAL PEOPLE'S COUNCIL

The National People's Council is drawing up a Constitution, in liaison with a technical committee on the Constitution. The Council also studies the Government's major economic projects.

## POLITICAL PARTIES

Since independence in 1975 the Comoros' political parties have ceased to play an active role, although still legally in existence. The major parties were united in the Front National Uni (FNU) from which the present Government stems.

## JUDICIAL SYSTEM

The Judicial System is being reorganized to abolish the distinction between French and Muslim law. There will be a court in each district (or *moudiria*) of about 5,000 inhabitants. The courts will operate by a jury system.

**Superior Court of Appeal:** B.P. 40, Moroni.

## RELIGION

The majority of the population is Muslim.

## RADIO

**Radio-Comores:** B.P. 250, Moroni (Grande-Comore); formerly controlled by France-Régions 3, the radio was taken over by the Comoran state in November 1975.

In 1973 there were 24,000 radio receivers.

## FINANCE

**Institut d'émission des Comores:** Moroni; f. 1975; bank of issue; Dir.-Gen. M. Panouillot.

**Banque des Comores:** Moroni; f. 1974; from Comoran section of *Banque de Madagascar et des Comores*; cap. 125m. francs CFA.

## TRADE

**Office National du Commerce:** Moroni (Grande-Comore); Pres. Ismaël Mouchtadi.

## TRANSPORT

### ROADS

There are approximately 750 km. of roads serviceable throughout the year.

### SHIPPING

Large vessels anchor off Moroni, Mutsamudu, Dzaoudzi and Fomboni and the port of Mutsamudu can now accommodate ships of medium tonnage alongside the quay. Goods from Europe come via Madagascar, and coasters serve the Comoros from the east coast of Africa.

**Société Comorienne de Navigation:** Moroni; services to Madagascar.

### CIVIL AVIATION

The international airport is on Grande-Comore and each of the three other islands has a small aerodrome. A new international airport at Hahaya (Grande-Comore) is under construction.

**Air Comores:** B.P. 81, Moroni; f. 1963; services to Anjouan, Mayotte, Mohéli, and to Dar es Salaam, Mombasa and Tananarive; fleet of 4 DC-4, 1 DC-3; Man. Dir. Yves le Bret.

The Comoros are also served by Air France and Air Madagascar.

## TOURISM

**Alliance Touristique de l'Océan Indien:** Moroni; the Comoros are a member of the alliance which includes Madagascar, Réunion, Mauritius and the Seychelles; Pres. Mohammed Dahalani.

# THE CONGO PEOPLE'S REPUBLIC

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The People's Republic of the Congo runs north from the Atlantic to Cameroon and the Central African Empire. To the east is Zaire. Gabon lies to the west. The climate is tropical with temperatures averaging 21°–27°C (70°–80°F) throughout the year with an annual rainfall of about 120 cm. The official language is French. Just over half the people follow traditional beliefs, with Roman Catholic, Protestant and Muslim minorities. The national flag is plain red with the state emblem (two green palms enclosing a crossed hammer and hoe, surmounted by a gold star) in the upper left. The capital is Brazzaville.

### Recent History

Formerly part of French Equatorial Africa, the Republic of the Congo became autonomous within the French Community in 1958 and fully independent in August 1960. The country's first President, the Abbé Fulbert Youlou, was deposed in 1963, and replaced by Alphonse Massemba-Débat. Political unrest culminated in the intervention of the army in 1968; the National Assembly was replaced by the National Council of the Revolution, and in January 1969 Major Marien Ngouabi, chairman of the Council of the Revolution, took power as President.

The Ngouabi government set up a single political party, the Congolese Labour Party, and in January 1970 produced a new constitution, Marxist in inspiration, and changed the country's name. Despite the adoption of the panoply of Marxism, Ngouabi faced considerable opposition from left-wing elements within the Party, the army and the students. He was criticized for allowing foreign economic domination to continue, and receiving massive French financial and technical aid. There were several attempted *coups*, and the Party and Council of Ministers were frequently purged. The left-wing rebellion of Lieut. Ange Diawara, a former Vice-President, was ended when its leaders were killed in April 1973. Strengthened by this success, Ngouabi produced a new Constitution, including the establishment of a National Assembly, adopted by referendum in June 1973. Despite the criticism of the left wing, the Government still proclaims Marxist-Leninist principles and public ownership is being gradually extended. In January 1976 Ngouabi dismissed the Party's political bureau, replacing it by a Special Revolutionary General Staff, and reshuffled the Government. In March trade union leaders were arrested and expelled from the party after calling a general strike.

### Government

There is only one political party, the Parti congolais du travail (P.C.T.).

The Constitution, which came into force following a referendum in June 1973, established the People's National Assembly, with 115 members elected (from a single list of candidates) to form the main legislative body. Executive power rests with the Council of State, which includes both the President and the Prime Minister, who appoints ministers and is responsible to the Party. The President is elected by the Party, and is Chairman of its Central Committee. The Assembly is responsible to the Prime Minister.

### Defence

The army numbered 6,500 in 1976. The navy numbered 200 in 1976 and the air force 300. There are 3,900 men in para-military forces.

### Economic Affairs

The most important economic activity is forestry. The major cash crops are sugar, palm oil, cocoa and tobacco, the processing of which is the basis of industry. Cement, flour and textiles are also produced. The Congo has large reserves of potash, and offshore petroleum deposits are exploited by the French-backed Elf-Congo company. A second commercial field began production in 1976, and the Congo applied for membership of the Organization of Petroleum Exporting Countries (OPEC). Production is expected to reach 7.5 million metric tons in 1977. An oil refinery is under construction at Pointe-Noire.

The government's commitment to "scientific socialism" accords uneasily with the actual dependence of the country on foreign aid and private investment. The nationalized sector is inefficient but the threat of further state control discourages investors. There is a large trade deficit. An overstaffed administration puts a strain on the budget, necessitating high taxation. The close economic links with France still work largely to the advantage of France.

The Congo is a member of the OAU and UDEAC, and is an associate member of the EEC.

### Transport and Communications

The River Congo and its tributary the Oubangui are the principal means of transport and Brazzaville is an important port on the River Congo. The rivers and the railway line, from Pointe-Noire on the Atlantic to Brazzaville with a branch to the manganese mines at Mouanda in Gabon, are important links between Chad, the Central African Empire and the coast. Roads are few with 11,000 km. usable throughout the year. The Government plans to improve the poor communications system, which inhibits economic development. The Congo has its own internal air service and the Government has a share in Air Afrique.

### Social Welfare

In January 1963 a pension scheme was started by the National Social Security Board, which is also responsible for family allowances and workmen's compensation schemes. The Government also runs hospitals and health centres.

### Education

There are not enough primary schools but there is a relatively high literacy rate—education will soon be compulsory from 6 to 16. In 1965 all private schools were taken over by the State. A number of students go to France for technical instruction, but the National University at Brazzaville was founded in 1971 and in 1972 catered for over 1,400 students.

### Tourism

There are no special facilities for tourism. All tourists, with the exception of representatives of UDEAC or nationals of Chad and Zaïre, must deposit their return fares at a bank or tourist office.

*Visas:* Citizens of all states, with the exception of France, require visas to visit the People's Republic of the Congo.

### Sport

Football, volleyball, basketball and athletics are the principal sports. The Congo competes with neighbouring states and within the French Community. The first African Games were held in Brazzaville in July 1965.

### Public Holidays

**1977:** May 1st (Labour Day), August 15th (Independence Day), December 25th (Christmas).

**1978:** January 1st (New Year's Day), March 24th–27th (Easter).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

1 franc CFA = 2 French centimes;
£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

# THE CONSTITUTION

(Approved by referendum June 24th, 1973)

**Fundamental Principles:** The People's Republic of the Congo is a sovereign independent state, in which all power springs from the people and belongs to the people. Treason against the people is the greatest crime. All nationals are guaranteed freedom of conscience and religion, and religious communities are free to practise their faith, but political organizations based on religion are banned. The land is the property of the people, and as necessary the state shall regulate its use. The state directs the economic life and development of the country according to the general plan. The right to own and inherit private property is guaranteed, and expropriation is governed by law.

**Head of State:** The Chairman of the Central Committee of the *Parti congolais du travail* (*PCT*) is the President of the Republic and Head of State. He is elected for a five-year term by the party congress.

**The Executive:** Executive power is vested in the Council of State under the Chairmanship of the President of the Republic. It directs and orientates the action of the Government. It consists of the five members of the PCT's political bureau, the executive of the National Assembly, and the Prime Minister. Ministers are appointed by the Prime Minister, who is responsible to the party.

**The Legislature:** Most legislative powers are vested in the People's National Assembly. It has 115 members, elected by all adults over the age of 18 from a list put out by the PCT. It is responsible to the Prime Minister and undertakes tasks entrusted to him by the party. The President of the National Assembly is second in rank only to the President of the Republic.

**The Party:** The sole political party is the *Parti congolais du travail* (*PCT*). Its Political Bureau of five members takes part in government. Its Central Committee consists of 50 members, including the Political Bureau, most of the Ministers and the Chief of Staff of the army, chaired by the President of the Republic and Head of State. The Central Committee's powers include the initiation of revisions to the constitution, which revisions are put to the party congress and the people and become final when approved by the Central Committee, and the appointment of judges to the Revolutionary Court of Justice.

# COSTA RICA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Costa Rica lies in the Central American isthmus with Nicaragua to the north, Panama to the south, the Caribbean to the east and the Pacific to the west. The climate is warm and damp in the lowlands—average temperature 27°C (81°F)—and cooler on the Central Plateau—average temperature 22°C (72°F)—where two-thirds of the population live. The language is Spanish. The state religion is Roman Catholicism. The national flag (proportions 3 by 2) consists of horizontal bands of blue, white, red, white and blue, the red band being twice the width of the others. The state flag, in addition, has on the red stripe (to the left of centre) a white disc enclosing the national coat of arms. The capital is San José.

### Recent History

After 1948, the predominant figure in Costa Rican politics was José Figueres Ferrer. Leader of the socialist Partido de Liberación Nacional (PLN), which seized power in 1948, he was President three times (1948–49, 1953–58 and 1970–74). Under him, Costa Rica became one of the most democratic countries in Latin America. In 1948 the armed forces were abolished and banks were nationalized, and since then great social improvements have been made. The presidential election in February 1974 resulted in victory for Daniel Oduber Quirós, the candidate of the PLN, who took office in May. He outlined his Government's policy as including the improvement of the wages and living standards of the underprivileged, the creation of new jobs to fight unemployment, and the eradication of the discrepancies of regional development. President Oduber also re-affirmed the Government's intention to continue with the establishment of friendly relations with the socialist states, a policy initiated under President Figueres. Communist and other left-wing parties were legalized in 1975.

In 1976 there was a major political crisis over the issue of presidential re-election. The crisis was exacerbated by an electricity workers' strike and the discovery of an alleged plot aiming to overthrow the President. Civil unrest led to many arrests.

### Government

Under the Constitution of 1949 executive power is vested in the President assisted by two Vice-Presidents and a Cabinet. The President is elected for a four-year term and must receive 40 per cent of the votes. The legislative organ is the unicameral Legislative Assembly of 57 members elected for four years. Parliamentary and presidential elections are held by compulsory adult suffrage.

### Defence

There have been no armed forces since 1948. Paramilitary forces number about 5,000 men.

### Economic Affairs

The economy depends mainly on agriculture. Coffee has been the principal export for many years. Owing to a diversification programme, bananas, livestock and meat, sugar, cocoa and fertilizers are now major exports. In 1976 a 137 million colones development plan was launched to encourage the recultivation of cocoa and the development of new products such as tobacco, rice, groundnuts and maize, and cattle-raising. There are limestone deposits, and a cement plant with a capacity of 600,000 tons a year is to be built at Colorado de Abangares. The Government hopes to develop the substantial deposits of bauxite discovered in the Boruca region. The Sacra Familia and Compañía gold mines, closed for thirty years, are to be re-opened in early 1977 with a projected daily output of 100 short tons of gold ore. Industry is on a small scale, the main products being textiles, chemicals and leather goods. Hydro-electric power is being developed in the highlands. The 135 MW Arenal plant is due for completion in 1978 and two other plants at Santa Rosa and Angostura will begin production in 1982 and 1985. Venezuela is financing several projects including the construction of a U.S. $200 million oil refinery at Puerto Limón.

The G.D.P. rise, 6.3 per cent in 1973, fell to 3 per cent in 1975 due to restrictive measures taken in 1975 to combat the inflation rate and improve the balance of payments situation. The measures met with some success: the inflation rate fell from 30.6 per cent in 1974 to 20.5 per cent in 1975 and there was a balance of payments surplus of $20.9 million in 1975, compared with a $22.9 million deficit in 1974, partly due to a Venezuelan aid scheme which included financing oil imports. Government policy in 1976 was to control inflation, maintain the exchange rate and slightly reflate the economy. The growth in G.D.P. for 1976 was forecast at 5.5 per cent.

Costa Rica is a member of the Union of Banana Exporting Countries, the OAS, ODECA, the Central American Common Market and SELA.

### Transport and Communications

Excluding 665 km. of the Pan-American Highway there were 20,982 km. of roads, of which 5,197 km. were all-weather roads, in 1971. Three railway companies operate 1,389 km. of track. The main ports handling external trade are Limón on the Caribbean coast and Puntarenas and Golfito on the Pacific coast, and there are local shipping services to Panama. The main towns are connected by internal air services and international air transport is provided by the national airline Líneas Aéreas Costarricenses and ten foreign companies.

### Social Welfare

A Labour Code provides benefits for employees and there are insurance schemes covering sickness, old age and death. Under a law established in 1971, all salaried workers began paying social security contributions. There is no centralized health service, but there are various independent organizations, some of them state-subsidized, governing hospitals. clinics and all medical services.

### Education

All education is free and elementary education is compulsory between the ages of six and twelve. Official secondary education is free and consists of a three-year basic course followed by a more highly specialized course of two years. At 80 per cent Costa Rica has the highest literacy rate in Central America. There are about 3,000 primary schools and about 200 secondary schools, with a total of over 500,000 pupils. There are two universities, at San José and Heredia.

**Tourism**

The main tourist features are the Irazú and Poas volcanoes, the Orosi waterfalls and relics of Spanish colonial civilization. Tourists also visit San José, the capital, and the Pacific beaches of Puntarenas. A tourist complex is to be built in the Santa Ana valley.

*Visas* are required by all visitors.

**Sport**

Football is the national sport and basketball, boxing, baseball, golf, tennis and swimming are also popular.

**Public Holidays**

**1977:** May 1st (Labour Day), June 9th (Corpus Christi), June 29th (SS. Peter and Paul), July 25th (Anniversary of the Annexation of Guanacaste Province), August 2nd (Our Lady of the Angels), August 15th (Assumption), September 15th (Independence Day), October 12th (Columbus Day), December 8th (Immaculate Conception), December 25th (Christmas Day), December 28th–31st (Bank Holidays in San José).

**1978:** January 1st (New Year's Day), March 19th (Feast of St. Joseph), March 23rd (Maundy Thursday), March 24th (Good Friday), April 11th (Anniversary of the Battle of Rivas).

**Weights and Measures**

The metric system is in force.

**Currency and Exchange Rates**

100 céntimos = 1 Costa Rican colón.

Exchange rates (December 1976):

£1 sterling = 14.20 colones;

U.S. $1 = 8.57 colones.

### FINANCE

100 céntimos = 1 Costa Rican colón.

Coins: 5, 10, 25 and 50 céntimos; 1 and 2 colones.

Notes: 5, 10, 20, 50, 100, 500 and 1,000 colones.

Exchange rates (December 1976): £1 sterling = 14.20 colones; U.S. $1 = 8.57 colones.

100 Costa Rican colones = £7.04 = $11.67.

*Note:* Prior to September 1961 the par value of the colón was based on an exchange rate of U.S. $1 = 5.60 colones. This rate was used for calculating the value of foreign trade transactions. The official buying rate corresponded to the par value and the official selling rate from 1951 was $1 = 5.67 colones. At the same time there was a free market for currency in which the selling rate from 1952 was $1 = 6.65 colones. In September 1961 the free market ended and a new par value was fixed at the rate of $1 = 6.625 colones, which also became the trading rate. The official buying rate was $1 = 6.62 colones and the official selling rate $1 = 6.65 colones (i.e. the same as the old free market rate). The free market was reintroduced in 1967 and by the end of 1971 the free selling rate was $1 = 8.60 colones. In April 1974 a new par value was fixed at $1 = 8.57 colones. The Central American peso, used for transactions within the Central American Common Market, is at par with the U.S. dollar.

# THE CONSTITUTION

The present Constitution of Costa Rica was promulgated in November 1949. A committee of lawyers was set up in mid-1967 to study the possibility of reforming the Constitution.

## GOVERNMENT

The government is unitary: provincial and local bodies derive their authority from the national government. The country is divided into seven provinces administered by a governor who is appointed by the President. The provinces are divided into cantons, and each canton into districts. There is an elected municipal council in the chief city of each canton, the number of its members being related to the population of the canton. The municipal council supervises the affairs of the canton. Municipal government is closely regulated by national law, particularly in matters of finance.

## LEGISLATURE

The government consists of three branches: legislative, executive and judicial. Legislative power is vested in a single chamber, the Legislative Assembly, which meets in regular session twice a year—from May 1st to July 31st, and from September 1st to November 30th. Special sessions may be convoked by the President to consider specified business. The Assembly is composed of 57 deputies elected for four years. The chief powers of the Assembly are to enact laws, levy taxes, authorize declarations of war and, by a two-thirds vote, suspend, in cases of civil disorder, certain civil liberties guaranteed in the Constitution.

Bills may be initiated by the Assembly or by the Executive and must have three readings, in at least two different legislative periods, before they become law. The Assembly may override the presidential vote by a two-thirds vote.

## EXECUTIVE

The Executive branch is headed by the President, who is assisted by his Cabinet. The President may not serve two successive periods of office, but may be re-elected after eight years. If he should resign or be incapacitated, the executive power is entrusted to the First Vice-President, and from him to the Second Vice-President, and finally to the President of the Legislative Assembly.

The President sees that the laws and the provisions of the Constitution are carried out, and maintains order. He has power to appoint and remove his ministers and diplomatic representatives; and to negotiate treaties with foreign nations (which are, however, subject to ratification by the Legislative Assembly). He is assisted in his duties by a Cabinet, each member of which is head of an executive department.

## ELECTORATE

Suffrage is universal, compulsory and secret for persons over the age of 20; or, if they are completely independent, for persons over 18 years of age.

## DEFENCE

A novel feature of the Costa Rican Constitution is the clause outlawing a national army. Only by a continental convention or for the purpose of national defence may a military force be organized.

# CUBA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Cuba is an archipelago of two main islands, Cuba and Isla de Pinos, and about 1,600 keys and islets. It lies in the Caribbean, south of Florida, U.S.A. Its other neighbours are Mexico, Jamaica and Haiti. The climate is tropical with the annual rainy season from May to October. The average annual temperature is 25°C (77°F) and hurricanes are frequent. The language is Spanish. The population is predominantly Roman Catholic. The national flag (proportions 2 by 1) has five horizontal bands, alternating blue, white, blue, white, blue, with a red triangle close to the staff, charged with a silver star. Havana (La Habana) is the capital.

### Recent History

In 1959 the dictatorship of Gen. Fulgencio Batista was overthrown, after years of guerrilla war, by Dr. Fidel Castro, who gradually established a Communist system of government. In 1961 Cuban exiles, with some United States support, attempted unsuccessfully to invade the island. The installation of Soviet rockets in Cuba precipitated a crisis with the United States in the early 1960s; Cuba was subsequently suspended from the Organization of American States (OAS) and since 1964 has been under an economic blockade by the United States. Economic and social progress have been made, however, with aid chiefly from the U.S.S.R. During 1973 Cuba announced its wish to establish relations with the United States, on condition that the economic blockade be lifted. In 1975 a majority in the OAS voted in favour of allowing countries to normalize relations with Cuba, although this does not mean the end of Cuba's exclusion from the OAS or of economic sanctions. Several Latin American countries have established diplomatic relations with Cuba and the U.S.A. eased trade restrictions but relations became strained again in 1976 due to Cuban involvement in the Angolan war.

In 1974 the country's first elections under Castro were held for municipal offices in one province. Cuba's first socialist constitution was submitted to the First Congress of the Cuban Communist Party in December 1975 and came into force in April 1976 after being approved by popular referendum. The Congress also elected a new Central Committee Secretariat and an enlarged Politburo. In addition, the existing six provinces were reorganized to form fourteen and the Congress also approved the 1976–80 Five-Year Plan. In October 1976 municipal elections were held, followed by elections to provincial assemblies and a National Assembly of People's Power. In December Fidel Castro was elected President of the newly created Council of State and therefore became Head of State and Head of the Government. Much of the general administration of the country has been changed and various new ministries and committees established.

### Government

In April 1976 Cuba's first socialist Constitution came into force. Legislative power is vested in the National Assembly of People's Power, with 481 deputies elected for five years by municipal assemblies. The National Assembly elects from its number the Council of State, with 31 members, to be its permanent organ. The Council of State is the highest representative of the State and its President is both Head of State and Head of Government. Executive and administrative authority is vested in the Council of Ministers, appointed by the National Assembly on the proposal of the Head of State. Municipal, regional and provincial assemblies have also been established. The Communist Party of Cuba, the only authorized political party, is "the leading force of society and the state".

### Defence

Cuba receives considerable aid from Communist countries. In 1976 the army numbered 146,000, the navy 9,000 and the air force 20,000. Army reserves numbered a further 90,000. Most fit men and women belong to the militia. Estimated defence expenditure for 1971 was 290 million pesos. Conscription is for a three-year period at 17 Conscripts also work on the land.

### Economic Affairs

Cuba's economy is basically agricultural and is organized by the State. Sugar cane is the principal crop and in 1974 sugar accounted for 86.4 per cent of foreign exchange earnings. The Government aimed to produce 10 million tons of sugar annually by 1970 but crops have been consistently low; in 1975 about 5.4 million tons were produced. High sugar prices in 1974–75 compensated in part for the low production rate. To increase efficiency it is hoped to mechanize 60 per cent of cane-cutting by 1980. Tobacco and citrus fruits are other major export crops. Rice is also becoming increasingly important and meat and milk production are being encouraged. The agricultural sector grew by only 3 per cent in 1974, although the overall growth rate was 9 per cent. Priority is being given to agricultural development. Heavy government investment in the fishing industry has resulted in catches that have risen from 27,100 tons in 1959 to 165,000 tons in 1975.

Cuba is rich in nickel deposits. Production in 1975 was 36,800 tons and nickel is Cuba's second largest export. New deposits of 350 million tons were discovered in 1975 and a new nickel plant, capable of producing 30,000 tons of nickel sinter and oxide annually, should be in production by 1980. There are also deposits of copper, chromite, manganese, cobalt and iron ore. Cuba is dependent on the U.S.S.R. for 95 per cent of its petroleum requirements but an important programme of oil exploration is being undertaken.

A Five-Year Development Plan (1976–80) provides for an expenditure of about 12,000 million pesos, of which a third is to be spent on industrialization. Fast growing industries include metallurgy, construction, textiles, fishing and consumer goods. Rationing of some consumer goods has been eased or ended. Glass, newsprint and chemical industries have been established since 1973. The Plan aims at increased production of sugar, energy, paper, food, car parts and minerals. The Plan specifies an average growth rate of 6 per cent but the fall in world sugar prices since 1975 and the rising cost of imports may force a review of the plan. Industrial complexes are to be built at Nuevitas and Cienfuegos. Cuba's first atomic power plant is to be built in 1977.

Forty per cent of Cuba's trade is with the U.S.S.R. on which it depends to a large extent for economic aid. Cuba's debt to the U.S.S.R. was estimated at between U.S. $3,000 and 4,000 million in 1975. In 1976 Cuba signed a five-year trade agreement with the U.S.S.R. which will double the volume of trade between the two countries. A five-year economic and scientific-technical co-operation agreement was also signed which includes provisions for the construction of a metallurgical complex, to produce over one million tons of steel per year, and of a nuclear power-station, as well as for co-operation in the fields of electric power engineering, oil refining, construction materials and sugar. The U.S.S.R. also provides credits to finance imports of Soviet goods and loans to develop the sugar and nickel industries. In 1975 trade agreements were signed with several Latin American and Western European nations. Closer economic ties with other Caribbean countries are being established. Cuba is a member of the CMEA and SELA.

### Transport and Communications

In 1974 there were 14,872 km. of railways and 27,074 km. of roads. The merchant marine is being developed and in 1975 Cuba had 51 cargo ships with a total of 550,000 d.w.t. There are international airports at La Habana and Santiago de Cuba.

### Social Welfare

Through the State Social Security System employees receive benefits for sickness, accidents, maternity, disability, retirement and unemployment. Health services are free. Health care is the second largest item in the budget, amounting to 400 million pesos in 1975. Total expenditure on social security in 1975 was 593.3 million pesos.

### Education

Education is a very large item in the budget, accounting for over 800 million pesos in 1975, and in recent years illiteracy has been greatly reduced. Education is universal and free up to university level. Education is based on Marxist-Leninist principles and combines study with manual work at secondary level.

Pre-school national schools are run by the State for children of five years of age, and day nurseries are available for all children after their forty-fifth day. Primary education, from six to twelve years of age, is compulsory and secondary education lasts from thirteen to sixteen years of age. University students rely on the national scholarship plans, and those with family responsibilities are assisted by the Students Loans Plan. Workers undergoing university courses receive a state subsidy to provide for their dependants. Courses at intermediate and higher levels are created in accordance with the needs of the country, with emphasis on technology, agriculture and teacher training. Adult education centres gave basic education to over 400,000 people in 1975. 107 new schools were inaugurated in 1975.

### Tourism

Cuba has much to attract the tourist—forests, mountains, and a coastline with many bays and inlets and excellent bathing. Tourism has only recently begun to be developed. In 1975 an estimated 50,000 tourists visited Cuba, compared with 15,000 in 1974. The 1976–80 Development Plan provides for several new hotels.

*Visas:* Tourists from the following countries do not require a visa for visits of up to thirty days: Bahamas, Belgium, Bermuda, Canada, France, Denmark, German Democratic Republic, Gibraltar, Italy, Norway, Sweden, and Yugoslavia.

All travellers require permission to leave Cuba.

### Sport

Sports and recreations are organized at national level by the National Institute of Sports, Physical Education and Recreation (INDER). The national sport is baseball, and boxing and athletics are very popular.

### Public Holidays

**1977:** May 1st (Labour Day), July 26th (Revolution Day), October 10th (Wars of Independence Day).

**1978:** January 1st (Liberation Day).

### Weights and Measures

Officially the metric system is in force but the U.S system is still widely used.

### Currency and Exchange Rates

100 centavos=1 Cuban peso.

Exchange rates (December 1976):

£1 sterling=1.374 pesos;
U.S. $1=82.9 centavos.

# THE CONSTITUTION

Following the assumption of power of the Castro régime on January 1st, 1959, the Constitution was suspended and a Fundamental Law of the Republic was instituted with effect from February 7th, 1959. In April 1976 Cuba's first socialist Constitution came into force after being submitted to the First Congress of the Communist Party in December 1975 and to popular referendum in February 1976.

## POLITICAL, SOCIAL AND ECONOMIC PRINCIPLES

The Republic of Cuba is a socialist state in which all power belongs to the working people. The Communist Party of Cuba is the leading force of society and the state. The socialist state carries out the will of the working people and guarantees work, medical care, education, food, clothing and housing. The Republic of Cuba is part of the world socialist community. It bases its relations with the Union of Soviet Socialist Republics and with other socialist countries on socialist internationalism, friendship, co-operation and mutual assistance. It hopes to establish one large community of nations within Latin America and the Caribbean.

The State organizes and directs the economic life of the nation in accordance with a central social and economic development plan. Foreign trade is the exclusive function of the State. The State recognizes the right of small farmers to own their lands and other means of production and to sell that land. The State guarantees the right of citizens to ownership of personal property in the form of earnings, savings, place of residence and other possessions and objects which serve to satisfy their material and cultural needs. The State also guarantees the right of inheritance.

Cuban citizenship is acquired by birth or through naturalization.

The State protects the family, motherhood and matrimony.

The State directs and encourages all aspects of education, culture and science.

All citizens have equal rights and are subject to equal duties.

The State guarantees the right to medical care, education, freedom of speech and press, assembly, demonstration, association and privacy. In the socialist society work is the right and duty, and a source of pride for every citizen.

## GOVERNMENT

### National Assembly of People's Power

The National Assembly of People's Power is the supreme organ of the State and is the only organ with constituent and legislative authority. It is composed of deputies over the age of eighteen elected by the Municipal Assemblies of People's Power, for a period of five years. All Cuban citizens over the age of sixteen, except those who are mentally incapacitated or who have committed a crime, are eligible to vote. The National Assembly of People's Power holds two ordinary sessions a year and a special session when requested by one third of the deputies or by the Council of State. More than half the total number of deputies must be present for a session to be held.

All decisions made by the Assembly, except those relating to constitutional reforms, are adopted by a simple majority of votes. The deputies may be recalled by their electors at any time.

The National Assembly of People's Power has the following functions:

to reform the constitution;
to approve, modify and annul laws;
to supervise all organs of the State and government;
to decide on the constitutionality of laws and decrees;
to revoke decree-laws issued by the Council of State;
to discuss and approve economic and social development plans, the state budget, monetary and credit systems;
to approve the general outlines of foreign and domestic policy, to ratify and annul international treaties, to declare war and approve peace treaties;
to approve the administrative division of the country;
to elect the President, First Vice-President, the Vice-Presidents and other members of the Council of State;
to elect the President, Vice-President and Secretary of the National Assembly;
to appoint the members of the Council of Ministers on the proposal of the President of the Council of State;
to elect the President, Vice-President and other judges of the People's Supreme Court;
to elect the attorney-general and the deputy attorney-generals;
to grant amnesty;
to call referendums;

The President of the National Assembly presides over sessions of the Assembly, calls ordinary sessions, proposes the draft agenda, signs the Official Gazette, organizes the work of the commissions appointed by the Assembly and attends the meetings of the Council of State.

### Council of State

The Council of State is elected from the members of the National Assembly and represents that Assembly in the period between sessions. It comprises a President, one First Vice-President, five Vice-Presidents, one Secretary and twenty-three other members. Its mandate ends when a new Assembly meets. All decisions are adopted by a simple majority of votes. It is accountable for its actions to the National Assembly.

The Council of State has the following functions;

to call special sessions of the National Assembly;
to set the date for the elections of a new Assembly;
to issue decree-laws in the period between the sessions of the National Assembly;
to decree mobilization in the event of war and to approve peace treaties when the Assembly is in recess;
to issue instructions to the courts and the Office of the Attorney General of the Republic;
to appoint and remove ambassadors of Cuba abroad on the proposal of its President, to grant or refuse recognition to diplomatic representatives of other countries to Cuba;
to suspend those provisions of the Council of Ministers that are not in accordance with the Constitution;
to revoke the resolutions of the Executive Committee of the local organs of People's Power which are contrary to the Constitution or laws and decrees formulated by other higher organs.

The President of the Council of State is Head of State and Head of Government and for all purposes the Council of State is the highest representative of the Cuban state.

### Head of State

The President of the Council of State is the Head of State and the Head of Government and has the following powers:

to represent the state and government and conduct general policy;
to call and preside over the sessions of the Council of State and the Council of Ministers;
to supervise the ministries and other administrative bodies;
to propose the members of the Council of Ministers to the National Assembly of People's Power;
to receive the credentials of the heads of foreign diplomatic missions;
to sign the decree-laws and other resolutions of the Council of State;
to assume command of the Revolutionary Armed Forces.

In the case of absence, illness or death of the President of the Council of State, the First Vice-President assumes the President's duties.

### The Council of Ministers

The Council of Ministers is the highest-ranking executive and administrative organ. It is composed of the Head of State and Government, as its President, the First Vice-President, the Vice-Presidents, the Ministers and the President of the Central Planning Board. Its Executive Committee is composed of the President, the First Vice-President and the Vice-Presidents of the Council of Ministers.

The Council of Ministers has the following powers:

to conduct political, economic, cultural, scientific, social and defence policy as outlined by the National Assembly;
to approve international treaties;
to propose projects for the general development plan and if they are approved by the National Assembly, to supervise their implementation;
to conduct foreign policy and trade;
to draw up bills and submit them to the National Assembly;
to draw up the draft state budget;
to conduct general administration, implement laws, issue decrees and supervise defence and national security.

The Council of Ministers is accountable to the National Assembly of People's Power.

## LOCAL GOVERNMENT

The country is divided into fourteen provinces and 169 municipalities. The provinces are: Pinar del Río, Habana, Ciudad de la Habana, Matanzas, Villa Clara, Cienfuegos, Sancti Spiritus, Ciego de Avila, Camagüey, Las Tunas, Holguín, Granma, Santiago de Cuba and Guantánamo.

Voting for delegates to the municipal assemblies is direct, secret and voluntary. All citizens over sixteen years of age are eligible to vote. The number of delegates to each assembly is proportionate to the number of people living in that area. A delegate must obtain more than half the number of votes cast in the constituency in order to be elected. The Municipal Assemblies are elected for a period of two and a half years and are headed by Executive Committees elected from the members of the Municipal Assemblies. The members of the Executive Committees will form five Regional Assemblies and the members of the Regional Assemblies will in turn form Provincial Assemblies also headed by an Executive Committee. Membership of regional and provincial executive committees is proposed by a commission of Communist Party members and youth and trade union representatives. The President and Secretary of each of the regional and the provincial assemblies are the only full-time members, the other delegates carrying out their functions in addition to their normal employment.

The regular and extraordinary sessions of the local Assemblies of People's Power are public. More than half the total number of members must be present in order for agreements made to be valid. Agreements are adopted by simple majority.

## JUDICIARY

Judicial power is exercised by the People's Supreme Court and all other competent tribunals and courts. The People's Supreme Court is the supreme judicial authority and is accountable only to the National Assembly of People's Power. It can propose laws and issue regulations through its Council of Government. Judges are independent but the courts must inform the electorate of its activities at least once a year. Every accused person has the right to a defence and can be tried only by a tribunal.

The Office of the Attorney-General is subordinate only to the National Assembly and The Council of State and is responsible for ensuring that the law is properly obeyed.

---

The Constitution may be modified only by a two-thirds majority vote in the National Assembly of People's Power.

The following industries have their own unions: Agriculture, Arts and Entertainment, Aviation, Basic Industry, Catering, Commerce, Communications, Construction, Education, Fishing, Food, Health, Light Industry, Lumber, Merchant Marine and Ports, Mining, Petrochemical, Printing, Public Administration, Revolutionary Armed Forces, Sugar, Tobacco, Transport.

## TRANSPORT

The Ministry of Transport controls all public transport.

### RAILWAYS

The total length of railways in 1974 was 14,872 km., of which 9,819 km. were laid down by the sugar companies primarily to transport cane from the fields to the *centrales* or grinding mills. The remaining 5,053 km. are public service railways. All railways were nationalized in 1960.

**Ferrocarriles de Cuba:** Egido y Arsenal, Apdo. 450, Havana; f. 1960 when all railways were nationalized by the Government; operates public services; Dir. Manuel E. Escalona. Divided into two Administrative Divisions: Eastern and Western.

### ROADS

The total length of roads in 1974 was 27,074 km. The Central Highway runs from Pinar del Río in the west to Santiago in Oriente Province, for a length of 1,144 km. In addition to this paved highway, there are a number of secondary and "farm-to-market" roads. A small proportion of these secondary roads is paved, but the majority are unsurfaced earth roads. There are in addition many hundred kilometres of tracks and paths, some of which can be used by motor vehicles during the dry season.

### SHIPPING

Cuba's principal ports are La Habana, which handles 37 per cent of all cargo, Santiago de Cuba, Guayabal, Nuevitas, Cienfuegos, Matanzas, Mariel and Antilla. Maritime transport has developed rapidly since 1959 and there is now a merchant fleet of 51 ships and a coastal trading and deep-sea fleet of 61 ships.

# THE DOMINICAN REPUBLIC

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Dominican Republic occupies the eastern part of the island of Hispaniola which lies between Cuba and Puerto Rico in the Caribbean Sea. Its only border is with Haiti. The climate is sub-tropical with an average temperature of 27°C (80°F). The island lies in the path of tropical cyclones. The official language is Spanish. Over 60 per cent of the population are Roman Catholics. There are small Protestant and Jewish communities. The national flag (proportions 23 by 15) is red and blue, quartered by a white cross, at the centre of which is the coat of arms. The capital is Santo Domingo.

### Recent History

The Dominican Republic was ruled from 1930 to 1961 by Generalísimo Rafael Trujillo. After his assassination, a transitional government composed of a seven-man Council of State was set up. Elections were held in December 1962 and Prof. Juan Bosch of the Partido Revolucionario Dominicano (PRD) was elected President. This administration was overthrown by a military *coup* in September 1963. Six right-wing parties endorsed the appointment of a civilian triumvirate led by Emilio de los Santos. After a further *coup* in April 1965 forces of the Organization of American States, including 23,000 U.S. troops, were called in to restore order. Dr. Héctor García Godoy became provisional President; elections were held in June 1966 and resulted in victory for Dr. Joaquín Balaguer. In May 1970, Dr. Balaguer was re-elected for a further four years. In February 1973 a state of emergency was declared when guerrilla forces landed on the coast. Captain Francisco Caamaño Deño, the leader of the 1965 revolt, and his followers were killed. Prof. Bosch and other opposition figures went into hiding; Prof. Bosch later resigned as leader of the PRD, undermining hopes of a united opposition in the May 1974 elections, when Dr. Balaguer was returned with a large majority. Dr. Balaguer reaffirmed his policies of economic expansion. In June 1975 guerrilla forces of Dominican émigrés from Cuba landed on the island with the intention of overthrowing Balaguer. Several hundred people, including prominent opposition leaders, were arrested in the resulting political activity.

### Government

The Dominican Republic comprises 26 provinces, each administered by an appointed governor, and a *Distrito Nacional* (DN) containing the capital. Under the 1966 Constitution, legislative power is exercised by the bicameral National Congress, with a Senate of 27 members (one for each province and one for the DN) and a Chamber of Deputies (91 members). Members of both houses are elected for four years by universal adult suffrage. Executive power lies with the President, elected by direct popular vote for four years. He is assisted by a Vice-President and a Cabinet containing Secretaries of State.

### Defence

Military service is voluntary and lasts for four years. In 1976 armed forces totalled 21,000 men: army 13,000, air force 4,000 and navy 4,000. Para-military forces number 10,000. Defence expenditure for 1975 was 57 million pesos.

### Economic Affairs

Over fifty per cent of the population live on the land and 75 per cent of exports are agricultural. Sugar is the principal cash crop and accounts for about fifty per cent of all exports by value. Other major cash crops are coffee, cocoa, tobacco and bananas. Only two-fifths of the cultivable land is in use. Although there has been a heavy influx of population into the towns, about 40 per cent of the population is unemployed in both rural and urban areas. Manufacturing on a small scale covers a wide range of consumer goods. There are estimated bauxite reserves of 18 million tons at Cabo Rojo. The leading mineral export is nickel from the Canadian plant at Bonao. Nickel provided about 15 per cent of government revenue in 1975. Production of ferro-nickel began in 1972. Foreign oil companies have undertaken extensive prospecting and an oil refinery jointly owned by the Government and Shell, the Refinería Dominicana de Petróleo, began supplying the home market in 1973. The Rosario gold and silver mine began production in 1975. In 1976 deposits of copper were discovered in the centre of the country. Since 1969 great economic progress has been made, due mainly to massive U.S. aid, the sugar boom, high public and private investment and increased foreign participation. The Government is investing heavily in agriculture, tourism and hydroelectricity. Tourism has priority because it is labour intensive and unemployment is endemic in the Dominican Republic. A severe drought in 1975 resulted in a large import bill and a 10 per cent cut in sugar production. In 1975 the growth rate was only 4.9 per cent, compared with 8.9 per cent in 1974, reflecting a decline in purchasing power and the effects of the world recession.

The Dominican Republic is a member of the OAS, the International Bauxite Association and SELA.

### Transport and Communications

Transport facilities are limited and about 80 per cent of the railways are used solely to carry sugar from the plantations. Some 10,467 km. of roads are the main means of communication and the network includes some modern motorways. There is no inland waterway system and very little coastal shipping. A number of shipping lines link the island with the United States and other Caribbean islands. There are internal and international air services, the international airport being at Punta Caucedo. A second international airport is to be built at Puerto Plata.

### Social Welfare

A voluntary national contributory scheme, introduced in 1947, provides cover for sickness, unemployment, accidental injury, maternity, old age and death. It is not yet universal.

### Education

Primary education is free and, where possible, compulsory from the ages of seven to fourteen. In 1975 primary school enrolment totalled 868,105. There are four universities with over 45,000 students. In 1970 adult illiteracy stood at 32.8 per cent (males 31.2 per cent, females 34.3 per cent).

### Tourism

Efforts are now being made to develop the tourist industry. Hotels, casinos and seaside resorts are being built and tours have been organized to the old Spanish colonial settlements. The Government plans to spend 150 million pesos on a tourism development programme to be completed in 1985. Tourist complexes are under construction at Puerto Plata and Boca Chica. In 1975 232,902 tourists visited the Republic, 194,833 of whom came from the U.S.A.

*Visas* are not required to visit the Dominican Republic by nationals of Austria, Belgium, Colombia, Denmark, Ecuador, France, the Federal Republic of Germany, Israel, Italy, Japan, Luxembourg, the Netherlands, Panama, Spain, Sweden, Switzerland and the United Kingdom. A tourist card is available for visits of up to 15 days.

### Sport

The favourite sport is baseball but swimming, basketball, boxing and horse-racing are also popular.

### Public Holidays

**1977:** May 1st (Labour Day), June 9th (Corpus Christi), August 16th (Restoration Day), September 24th (Mercedes), December 25th (Christmas Day).

**1978:** January 1st (New Year's Day), January 21st (Altagracia), January 26th (Duarte), February 27th (Independence), March 24th (Good Friday).

### Weights and Measures

The metric system is officially in force but the imperial system is often used.

### Currency and Exchange Rate

100 centavos = 1 Dominican Republic peso.

Exchange rates (December 1976):

£1 sterling = 1.66 pesos;

U.S. $1 = 1.00 peso.

# THE CONSTITUTION

The present constitution of the Dominican Republic was promulgated on November 28th, 1966. Its main points are:

The Dominican Republic is a sovereign, free, independent State; no organizations set up by the State can bring about any act which might cause direct or indirect intervention in the internal or foreign affairs of the State or which might threaten the integrity of the State. The Dominican Republic recognizes and applies the norms of general and American international law and is in favour of and will support any initiative towards economic integration for the countries of America. The civil, republican, democratic, representative Government is divided into three independent powers: legislative, executive and judicial.

The territory of the Dominican Republic is as laid down in the Frontier Treaty of 1929 and its Protocol of Revision of 1936.

The life and property of the individual citizen are inviolable; there can be no sentence of death, torture or any sentence which might cause physical harm to the individual. There is freedom of thought, of conscience, of religion, freedom to publish, freedom of unarmed association, provided that there is no subversion against public order, national security or decency. There is freedom of labour and trade unions; freedom to strike, except in the case of public services, according to the dispositions of the law.

The State will set about agrarian reform, dedicating the land to useful interests and gradually eliminating the *latifundios*. The State will do all in its power to support all aspects of family life. Primary education is compulsory and all education is free. Social security services will be developed. Every Dominican has the duty to give what civil and military service the State may require of him. Every legally entitled citizen must exercise his right to vote. Citizens are all persons over the age of eighteen and all who are or have been married even if they are not yet eighteen.

## GOVERNMENT

*Legislative Power* is exercised by Congress which is made up of the Senate and Chamber of Deputies, elected by direct vote. *Senators*, one for each province and one for the *Distrito Nacional*, are elected for four years; they must be Dominicans in full exercise of their citizen's rights, over 25. Their duties are to elect judges, the President and other members of the Electoral and Accounts Councils, and to approve the nomination of diplomats. *Deputies*, one for every 50,000 inhabitants or fraction over 25,000 in each province and the *Distrito Nacional*, are elected for four years and must fulfil the same conditions for election as Senators.

Decisions of Congress are taken by absolute majority of at least half the members of each house; urgent matters require a two-thirds majority. Both houses normally meet on February 27th and August 16th each year for sessions of 90 days, which can be extended for a further 60 days.

*Executive Power* is exercised by the President of the Republic, who is elected by direct vote for a four-year term. He and the Vice-President must be Dominican citizens by birth or origin, over 30 years of age and in full exercise of their citizen's rights; they must not have engaged in any active military or police service for at least a year prior to their election. They take office on August 16th following their election. The *President of the Republic* is Head of the Public Administration and Supreme Chief of the armed forces and police forces. His duties include nominating Secretaries and Assistant Secretaries of State and other public officials, promulgating and publishing laws and resolutions of Congress and seeing to their faithful execution, watching over the collection and just investment of national income, nominating, with the approval of the Senate, members of the Diplomatic Corps, receiving foreign Heads of State, presiding at national functions, decreeing a State of Siege or Emergency or any other measures necessary during a public crisis. The President may not leave the country for more than 15 days without authorization from Congress. In the absence of the President, the Vice-President will assume power, or failing him the President of the Supreme Court of Justice.

## LOCAL GOVERNMENT

Government in the *Distrito Nacional* and the Municipalities is in the hands of local councils, with members elected proportionally to the number of inhabitants, but numbering at least five. Each Province has a civil Governor, designated by the Executive.

## JUDICIARY

*Judicial Power* is exercised by the Supreme Court of Justice and the other Tribunals; no judicial official may hold another public office or employment, other than honorary or teaching. The Supreme Court is made up of at least nine judges, who must be Dominican citizens by birth or origin, at least 35 years old, in full exercise of their citizen's rights, graduates in law and have practised professionally for at least 12 years. There are also five Courts of Appeal, a Lands Tribunal and a Court of the First Instance in each judicial district; in each Municipality and in the *Distrito Nacional* there are also Justices of the Peace.

Elections are directed by the Central Electoral Council. The armed forces are essentially obedient and apolitical, created for the defence of national independence and the maintenance of public order and the Constitution and Laws.

The artistic and historical riches of the country, whoever owns them, are part of the cultural heritage of the country and are under the safekeeping of the State. Mineral deposits belong to the State. There is freedom to form political parties, provided they conform to the principles laid down in the Constitution. Justice is administered without charge throughout the Republic.

This Constitution can be reformed if the proposal for reform is supported in Congress by one-third of the members of either house or by the Executive. A special session of Congress must be called and any resolutions must have a two-thirds majority. There can be no reform of the method of government, which must always be civil, republican, democratic and representative.

# JUDICIAL SYSTEM

The Judicial Power resides in the Supreme Court of Justice, the Courts of Appeal, the Tribunals of the First Instance, the municipal courts and the other judicial authorities provided by law. The Supreme Court is composed of nine judges and the Attorney-General and exercises disciplinary authority over all the members of the judiciary. The Attorney-General of the Republic is the Chief of Judicial Police and of the Public Ministry which he represents before the Supreme Court of Justice. All judges are elected by the Senate.

**President of the Supreme Court:** Lic. Nestor Contín Aybar.

# RELIGION

The majority of the inhabitants belong to the Roman Catholic Church, but freedom of worship exists for all denominations. There are approximately 30,000 Protestants and a small Jewish community.

# ECUADOR

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Ecuador lies on the west coast of South America. Its neighbours are Colombia to the north and Peru to the east and south. The Galápagos Islands, 800 km. out in the Pacific, belong to Ecuador. The climate is affected by the Andes mountains and the topography ranges from the tropical rain forest on the coast and in the eastern region to the tropical grasslands of the central valley and the permanent snowfields of the highlands. The official language is Spanish but Indian languages are very common. About 90 per cent of the population is Roman Catholic and there are Protestant and Jewish minorities. The national flag (proportions 2 by 1) is a horizontal tricolour of yellow, blue and red, the yellow stripe being half the total depth. The state flag has, in addition, the national emblem in the centre. The capital is Quito.

### Recent History

In November 1961 labour groups, left-wing parties and the armed forces overthrew the President, Dr. José María Velasco Ibarra, who was forced into exile. His successor, Dr. Carlos Julio Arosemena Monroy, formerly Vice-President, was deposed after an army coup in July 1963. A military junta was set up, headed by Rear-Admiral Ramón Castro Jijón, but the junta was forced to resign in March 1966, and Clemente Yerovi Indaburu was installed as acting President. Following the elections of October 1966, Dr. Otto Arosemena Gómez became provisional President. Former President Velasco was elected as President in June 1968 and took office in September. In June 1970, with the aid of the army, he declared himself dictator, suspended the constitution and dismissed Congress. But in February 1972 President Velasco was deposed by the armed forces and Brig.-Gen. Guillermo Rodríguez Lara, C.-in-C. of the army, became President. In July 1974 President Rodríguez Lara announced that he would not authorize elections or other political activity for five more years. However, following an attempted right-wing *coup* in September 1975, led by Gen. Raúl González Alvear and supported by ex-President Velasco, President Rodríguez Lara promised substantial economic and political changes but unrest continued and in January 1976 President Rodríguez Lara resigned. A three-man military junta took power and appointed a new cabinet. The junta announced its intention to lead the country to a truly representative democracy. In order to achieve this, it initiated a dialogue with the political parties, announced that committees would be established to draft an alternative constitution to that of 1945 (which would also be amended), began to prepare the reorganization of the electoral system and announced that presidential elections would be held by February 1978. However, opposition to the Government and calls for civilian rule continued throughout 1976.

### Government

The country is divided into 19 Provinces and the National Territory of the Galápagos Islands. Each Province has a Governor appointed by the President. Constitutional rule was suspended in June 1970, when the bicameral National Congress was dismissed. Ecuador has been under military rule since February 1972 and all political activity was suspended in July 1974. Since January 1976 power has been held by a three-man military junta, called the Supreme Council of Government, which rules with the assistance of an appointed Cabinet.

### Defence

Military service is selective for two years at the age of 20. In 1976 there were 23,550 men in the armed forces: army 17,500, navy 3,450 and air force 2,600. Para-military forces numbered 5,800 men. Defence expenditure for 1974 was 1,288 million sucres.

### Economic Affairs

The economy is dominated by three commodities: petroleum, bananas and coffee. Ecuador is the world's leading exporter of bananas. The extensive forests yield valuable hardwoods. Ecuador is also the world's principal producer of balsawood. Agricultural output is increasing by less than 2 per cent annually. Therefore the Agrarian Reform Law of 1973 gives priority to productivity rather than land distribution although any estate of which less than 80 per cent is under cultivation was to be expropriated from January 1976. The Government has also introduced an ambitious agricultural mechanization programme. Despite friction with the U.S.A., Ecuador extended its fishing limits to 320 km. in 1976. Between 1976 and 1980, $97.9 million is to be invested in the development of the fishing industry. Gold, silver, copper, lead and zinc reserves totalling one million tons have been discovered in Azuay.

With the completion of the trans-Andean pipeline (capacity 350,000 barrels per day in 1975), linking the oilfields of Oriente Province with the tanker-loading port of Esmeraldas in 1972, Ecuador became an important oil-exporting nation, and the leading oil producer in Latin America after Venezuela. Cepe, the state oil concern, bought a 25 per cent share in Texaco-Gulf's operations in Ecuador in 1974. Oil sales in 1974 reached a record U.S. $614 million but exports fell by 40 per cent in the first half of 1975 due to disputes between the Government and Texaco-Gulf and damage to the trans-Andean pipeline. Following further disputes within the oil consortium it was announced that Cepe would buy the 37.5 per cent Gulf Oil share in the consortium. Cepe plans to invest 500 million sucres in exploration and hopes to develop the substantial offshore natural gas reserves discovered in the Gulf of Guayaquil. A gas-liquefaction plant is under construction on the Shushufindi oilfield, with a daily capacity of 25 million cubic feet. There are three oil refineries in Ecuador.

The manufacturing sector grew by 19 per cent in 1975. The sector consists mainly of light industry although the Government plans to invest U.S. $1,500 million for the development of heavy industry, priority being given to petrochemicals, pharmaceuticals, cement and steel. An $800 million petrochemical complex is to be completed by 1983 and a $180 million integrated steel mill by 1985.

With a growth rate of 13.6 per cent in 1974, Ecuador had one of Latin America's fastest growing economies due to the development of the oil sector. However, the domestic supply of goods and services was unable to keep pace with the growth in local purchasing power, the result being a 23 per cent inflation rate in 1974 and a dramatic increase in the volume of imports. Reflecting difficulties in the oil industry and the fall in world commodity prices, Ecuador's economic growth rate fell to 5.8 per cent in 1975 although trends in 1976 pointed to a renewal of confidence and a growth rate of 8 per cent. The inflation rate fell to 6.9 per cent in the year to March 1976 but it is unlikely that this fall will continue. The balance of payments deteriorated between 1974 and 1975 but the situation was expected to improve in 1976 with a recovery in exports, the introduction of selective import controls and further borrowing from abroad. The National Development Fund (FONADE) was established in 1973. It received about 30 per cent of the oil revenue in 1974, 75 per cent of which was used to finance agricultural, industrial and energy development.

Ecuador is a member of OPEC, the OAS, LAFTA, the Andean Group and SELA.

### Transport and Communications

Communications are rendered difficult by mountains and forests. There are 1,070 km. of railway track. The Pan-American Highway runs for 1,392 km. through the country with branch roads to the coast. Near the coast the lower reaches of the rivers Guayas, Mira and Esmeraldas are navigable for about 190 km. There are a number of seaports of which Guayaquil and Manta are the most important. Three main Ecuadorean companies and some foreign lines operate internal and international air services.

### Social Welfare

Social insurance is compulsory for all employees. Benefits are available for sickness, industrial accidents, disability, maternity, old age, widowhood and orphanhood. Hospitals and welfare institutions are run by Central Public Assistance Boards.

### Education

Education is compulsory and all public schools are free. Private schools continue to play a vital role in the educational system. Primary education covers the ages of 6 to 12 and secondary education 12 to 18. University courses extend for up to six years and include programmes for teacher training. As part of the current literacy campaign a number of adult schools and literacy centres have been built. There are sixteen universities.

### Tourism

The main tourist attractions are the magnificent mountain and forest scenery of the highlands, the tropical jungles of the Upper Amazon and the relics of Indian and Colonial Spanish cultures. There are a number of coastal resorts from which deep-sea fishing is possible.

*Visas* are not required to visit Ecuador by nationals of Colombia, EEC countries (except Ireland), Portugal, Spain, Sweden, Switzerland and Uruguay.

### Sport

Football and basketball are the most popular sports.

### Public Holidays

**1977:** May 1st (Labour Day), May 24th (Battle of Pichincha), July 24th (Birth of Simón Bolívar), August 10th (Independence Day), October 9th (Independence—Guayaquil), October 12th (Discovery of America—Guayaquil), November 1st (All Saints')*, November 2nd (All Souls'), November 3rd (Cuenca's Day), December 6th (Foundation of Quito), December 25th (Christmas).

**1978:** January 1st (New Year's Day), February 9th–11th (Carnival), March 24th (Good Friday), March 25th (Easter Saturday).

* Not an official holiday, but almost universally observed.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centavos = 1 sucre.

Exchange rates (December 1976):

£1 sterling = 41.425 sucres;

U.S. $1 = 25.00 sucres.

## THE CONSTITUTION

*Note:* The constitution has been suspended since June 1970.

### CONGRESS

The Constitution of 1945 states that legislative power is vested in Congress, which is composed of two chambers. They assemble twice a year for a period of sixty days. Members of the Senate are elected for a four-year term, and may be re-elected. There are two senators for each province and one for the Archipelago of Colón. In addition, fifteen "functional" senators are designated by bodies representative of educational institutions, learned societies, the Press, the armed forces; and by labour, industry, agriculture and commerce, in the *sierra* and in the *litoral*.

The Chamber of Deputies has seventy-two members elected for a two-year term. Members are eligible for re-election.

In addition to its law-making duties, Congress supervises the administration and expenditure of the national revenues; ratifies treaties; elects members of the Supreme and Superior Courts; and, from panels presented by the President, the Comptroller-General, the Attorney-General and the Superintendent of Banks. It is also able to overrule the President's amendment or rejection of a bill which it has submitted to him for his approval, and may grant or refuse the allocation of extraordinary powers to the President.

### PRESIDENT

The presidential term is four years. An ex-President may be re-elected only after four years have elapsed from the date of his terminating office. The President appoints his own cabinet, the governors of provinces, diplomatic representatives and certain administrative employees, and is responsible for the direction of international relations. In the event of foreign invasion or internal disturbance, extraordinary powers may be given him by Congress, or by the Council of State if Congress is not in session.

---

The Constitution also provides for a Legislative Committee, consisting of nine members, to draw up bills (with the exception of those dealing with economic questions), and codify and edit laws.

As in other post-war Latin-American Constitutions, particular emphasis is laid on the functions and duties of the State, which is given wide responsibilities with regard to the protection of labour; assisting in the expansion of production; protecting the Indian and peasant communities; and organizing the distribution and development of uncultivated lands, by expropriation where necessary.

Voting is compulsory for every Ecuadorean citizen who is literate and over 18 years of age. The Constitution guarantees liberty of conscience in all its manifestations, and states that the law shall not make any discrimination for religious reasons.
